

# RETHINK YOUR CHECK-IN

The new way of checking in:  
Where quality Made in Germany  
meets ID-innovation

## Keyboard quality Made in Germany meets ID-innovation

- Small foot-print
- One cable solution
- USB powered
- Compatible with Windows, Linux & Android

Our check-in innovation combines our high-quality keyboards >>Made in Germany<< with modern identification technology.

Our keyboards use cutting-edge optical character recognition (OCR) to quickly and accurately read passport and other travel document information. A perfect solution for busy airports where time is of the essence.

It can help speed up the check-in process, reduce errors and improve the overall customer experience. But that's not all - our keyboard is also designed with durability and ease-of-use in mind. Its rugged construction can withstand the wear and tear of daily use, while its ergonomic design ensures maximum comfort for check-in staff who are using it for hours at a time.

Rethink your check-in keyboard with PrehKeyTec!
