GENERAL INFORMATION

There are 33 files available for programming. All files are listed below.

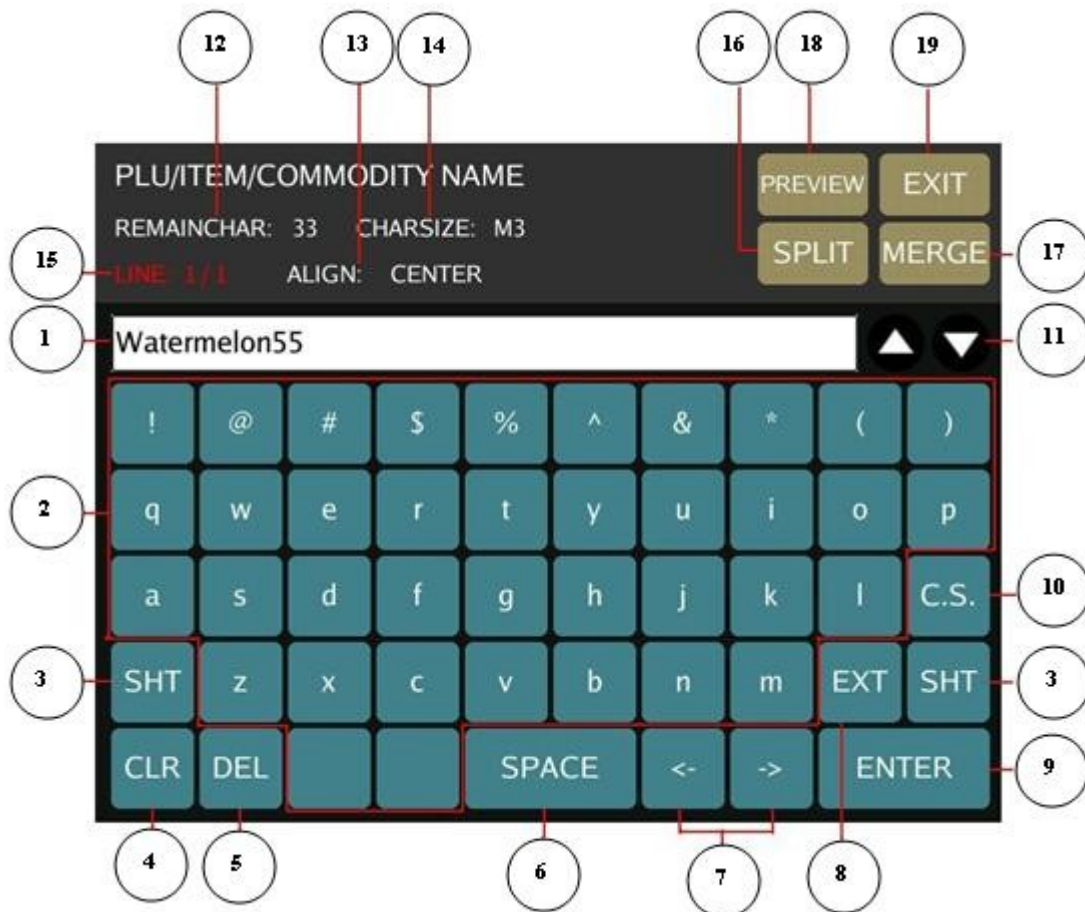

1. Entry to Programming Mode

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key to enter to Programming Mode.</p>	
<p>3. Touch the desired key to go to the desired Programming Mode. (e.g. PLU RELATED)</p>	

2. Internal Keyboard Displays

The Internal keyboard displays are used for programming text. They can be found in the following places.

- Commodity Name in PLU programming
- 2nd Name in PLU programming
- Preset Name in PLU programming
- Ingredient in PLU programming
- Special Message in PLU programming
- Department file in program mode
- Main Group file in program mode
- Ingredient file in program mode
- Special Message file in program mode
- Text file in program mode
- Clerk file in program mode
- Shop Name file in program mode
- Production Place file in program mode
- Country Name file in program mode
- Slaughter House file in program mode
- Cutting Hall file in program mode

No.	Area /Function	USAGE
1.	Programming Display	Here you can see what you have programmed.
2.	Alphanumeric key	To enter text (alpha, numeric, symbol).
3.	Shift key	To change between characters. (Upper Case, Lower Case, Text Symbol Characters, numeric & other characters when applicable)
4.	Clear keys	To clear all programmed character at one touch.
5.	Delete keys	To delete programmed character one by one letter.
6.	Space key	To make a space in the text.
7.	Arrow Left & Right key	To go to the left or right side of programmed text. (And when use shift key, the Arrow key change to Alphanumeric key)
8.	Extent keys	To extent displayed character key. (And when use shift key, the Arrow key change to Alphanumeric key)
9.	Enter key	To save and exit.
10.	Character key	To change the character size.
11.	Arrow Up & Down keys	To go to the next or previous line.
12.	Remain Character	Shows the remaining number of character that can be entered.
13.	Align	Show where/how to put the name.
14.	Character Size	Shows the character size usage.
15	Line	Shows the line number you currently programming.
16.	Split	To split the text for next line
17	Merge	To Merge the text become same line
18	Preview	To view the text programmed for all line
19	Exit key	To exit from internal keyboard layout

3. File Relationship between Department, Main Group and PLU

DEPARTMENT, MAIN GROUP and PLU are linked as shown below. By linking the files, reports will become more comprehensible and make after-sales operation more convenient.

Department File

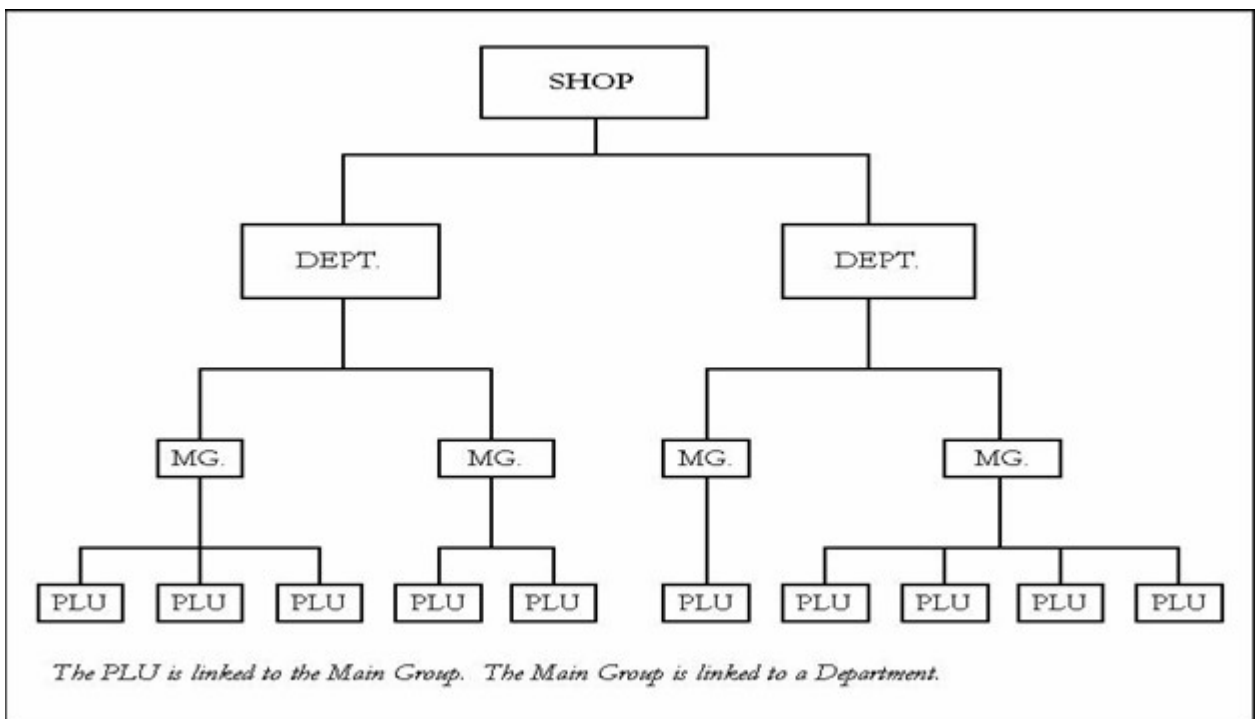

DEPARTMENT file is the largest category, including items such as MEAT, FISH, VEGETABLES, DELICATESSEN, etc.

Main Group File

MAIN GROUP file is the middle category including items such as BEEF, PORK, CHICKEN, etc. You can link a Main Group to a Department in the Main Group file. Tax number can be assigned to a Main Group. The assigned Tax number will apply for all PLU assigned to the Main Group.

PLU File

PLU file is the smallest category including items such as BEEF SLICE, BEEF SHOULDER, and BEEF SIRLOIN. You can link the PLU to a Main Group in the PLU-file.

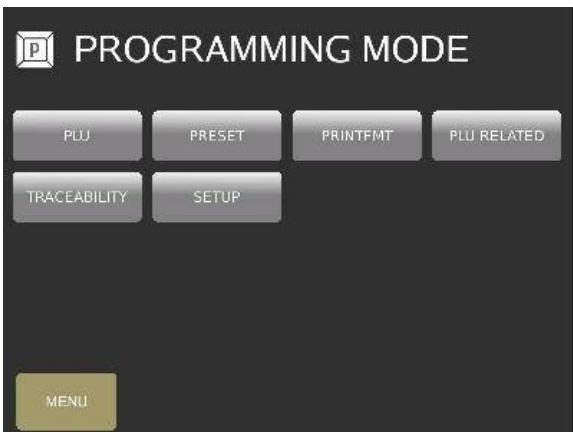

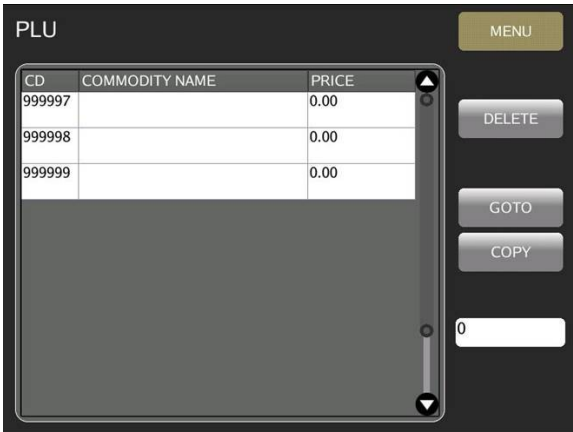

PLU PROGRAMMING FILES

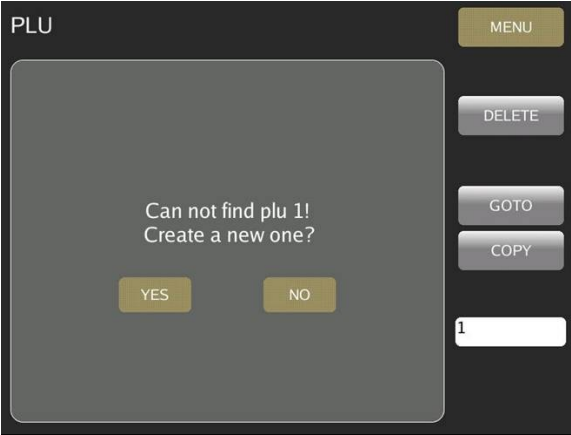

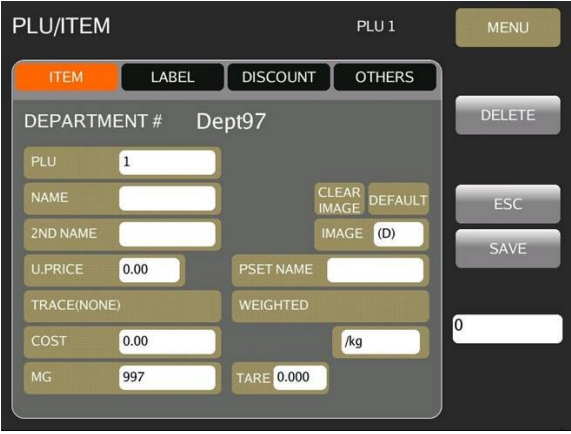

1. General Notes

The following items can be programmed in PLU PROGRAMMING Mode. The format chosen for the PLU will decide what items can be programmed in the PLU file. The items which print areas are not set on the selected format cannot be programmed.

- | | | |
|-----------------------------|---|---|
| 1. PLU | 21. Special Message | 40. Discount within 2 nd Limit |
| 2. Name | 22. Link Special Message | 41. Discount Day(s) of Week |
| 3. 2 nd Name | 23. Use by Date | 42. Start Time |
| 4. Unit Price / Price | 24. Sell by Date | 43. Start Date |
| 5. Price Base | 25. Sell by Time | 44. End Time |
| 6. Link Traceability | 26. Pack by Date | 45. End Date |
| 7. Cost | 27. Pack by Time | 46. 1 st Breakpoint |
| 8. Link Main Group | 28. Multilevel Special Sales | 47. Point Given |
| 9. Image | Discount | 48. Weight/Pcs |
| 10. Preset Key Name | 29. Colli Discount | 49. Discount Value |
| 11. Weighed/Non-Weighed | 30. Multilevel Spc Sales | 50. Target Wt/Pcs |
| 12. Tare / Tray / Quantity | 31. Discount View | 51. Stepping |
| 13. Barcode Type | 32. Colli Contents | 52. Image Printing on Label |
| 14. Barcode Format | 33. Special Sales | 53. Reference PLU |
| 15. Barcode Flag | 34. Level 1 – 4 | 54. Couple PLU |
| 16. Item Code | 35. Type of Discount | 55. 2nd. Price |
| 17. User Programmable Right | 36. Type of Markdown | 56. Price Override |
| Side Data | 37. 1 st Limit for Discount | 57. Tax |
| 18. Label Format | 38. Discount within 1 st Limit | 58. Storage Temp. 1 & 2 |
| 19. Ingredient | 39. 2 nd Limit for Discount | 59. Multi Barcode |
| 20. Link Ingredient | | |

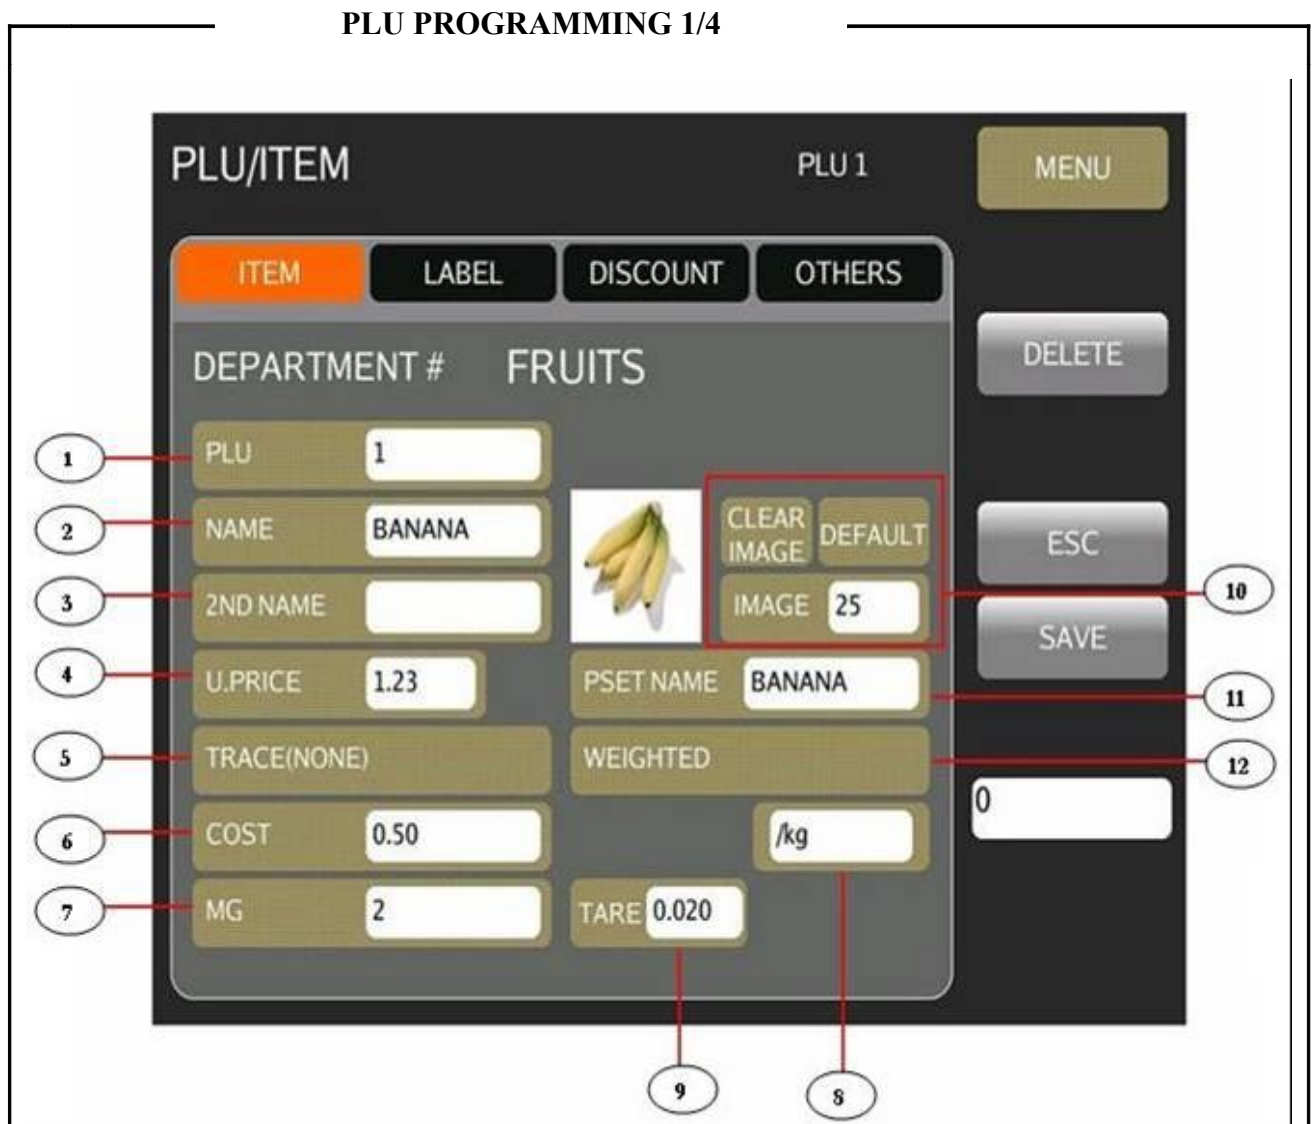

2. Entry to PLU Programming

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.</p>	
<p>3. Touch [PLU] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed PLU File will be listed in PLU PROGRAMMING Display Screen.</p> <p>Note 3: Display Screen also used to browse existing PLU Files using the scroll bar and to select file for modification</p>	

OPERATION	DISPLAY
<p>4. Enter PLU number. (e.g. 1)</p> <p>Press [PLU] key at keypad.</p> <p>Note: This message will appear only if the PLU is not created before.</p>	
<p>5. To create a new PLU, touch [YES] key. (Procedure to program the PLU, refer to Program PLU File)</p> <p>Note: Touch [NO] key to abort.</p>	

3. Program PLU File

There are 5 screens in the PLU file that each has a number of programmable data.

1) PLU

This key will show the PLU number and it can't be change.

2) Name Entry (Commodity Name)

Maximum 4 lines can be programmed for Commodity Name and number of lines or maximum of characters entry is depends on the Character Size entry or size of the print area. If selected label format without print area for Commodity Name, maximum 1 line of 46 letters can be entered for printing in receipt.

- 1) Touch [NAME] key.
- 2) Enter Commodity Name using the [internal keyboard](#) screens.

3) 2nd Name Entry (Commodity Name)

2nd Name is use for Search Function only.

- a. Touch [2ND NAME] key.

- b. Enter 2nd Name using the [internal keyboard](#) screens.

4) Unit Price / Price Entry

- Touch **[PRICE]** key.
- Enter Price value by keypad.

5) Traceability Entry

The PLU will be linked to the programmed Traceability type.

- Touch **[TRACE]** key.
- Will open up another page.
- Touch desired key. (None, Auto or Manual)
- Example touch **[AUTO]** key.

TRACE	TRACE NO
AUTO	0
[BORN COUNTRY]:	Not Selected
[ORIGIN COUNTRY]:	Not Selected
[FATTEN COUNTRY]:	Not Selected
[SLAUGHTER HOUSE]:	Not Selected
[SLAUGHTER COUNTRY]:	Not Selected
[CUTTING HALL]:	Not Selected
[CUTTING COUNTRY]:	Not Selected
[REFERENCE NUMBER]:	00000000000000

- Touch desired key.

Note: All programmed Traceability will be listed.

6) Cost Entry

Cost is the buying price by store so the Cost value must be equal or less than the Unit Price.

- Touch **[COST]** key.
- Enter Cost Price value by keypad.

7) Link Main Group Number Entry

The PLU will be linked to the programmed Main Group number. If PLU is not linked to a Main Group, then PLU will be assigned to Main Group number 997 by default.

- Touch **[MG]** key.
- Touch desired Main Group key.

Note: All programmed Main Groups will be listed.

Note: Touch **[ARROW DOWN]** or **[ARROW UP]** for more selection.

Note 1: All programmed Image will be listed. And also can select from other group.

Note 2: [EXIT] button if cancel the image selection process without save.

Note 3: [GO TO] for search the image

Note 4: If do not want image touch [CLEAR] key.

Note 5: Touch [ARROW DOWN] or [ARROW UP] for more image selection.

Note 6: [ENTER] save the image

- c. Touch [**CLEAR IMAGE**] to clear the image that you had selected
- d. Touch [**DEFAULT**] to select default image that had programmed

11) Preset Key Name Entry

The Preset Key Name data will show on preset key assignment for the PLU on Registration Mode. If not programmed, the Commodity Name will show on the Preset Key of Registration Mode or Function Key. Maximum one line of 32 characters can be programmed for each Preset Key Name Data.

- a. Touch [PSET NAME] key.
- b. Enter Preset Key Name using the [internal keyboard](#) screens.

12) Weighted / Non-Weighted Entry

Touch [WEIGHTED/NON-WEIGHTED] key to select the PLU to be in Weight Item or Non-Weight Item.

PLU PROGRAMMING 2/4

The screenshot shows the 'PLU/LABEL' programming screen for 'PLU 1'. The screen is divided into several sections:

- Top Bar:** 'PLU/LABEL' on the left, 'PLU 1' on the right, and a 'MENU' button.
- Navigation Tabs:** 'ITEM', 'LABEL' (highlighted in orange), 'DISCOUNT', and 'OTHERS'.
- Barcode Section:** 'BARCODE' field with '(D)F1F2 CCCCC XXXXX CD (13 D N-PLU)', 'EAN' type selection, and 'DELETE' button.
- Function Keys:** 'F1 (D)2', 'F2 (D)1', 'ITEM CODE 00000', and 'PRICE' field.
- Labels:** 'LABEL1 (D)F1' and 'LABEL2 INHIBIT'.
- Ingredient and Special Message:** 'INGREDIENT' and 'SPECIAL MSG' fields, each with a '0' value and an 'ENABLE' button.
- Expiration Dates:** 'USE BY DATE', 'PACK BY DATE', and 'SELL BY DATE(P.D)' fields, each with a '0' value and an 'ENABLE' button.
- Time-based Expiration:** 'PACK BY TIME(RTC)' and 'SELL BY TIME(RTC)' fields, each with 'RTC' and 'ENABLE' options.
- Navigation Buttons:** 'ESC', 'SAVE', and a numeric keypad (0).

Numbered callouts (13-27) point to various elements: 13 (Barcode field), 14 (EAN type), 15 (F1/F2 keys), 16 (DELETE button), 17 (ITEM CODE), 18 (Label1/Label2 fields), 19 (Ingredient field), 20 (Special MSG field), 21 (ESC button), 22 (SAVE button), 23 (USE BY DATE), 24 (PACK BY DATE), 25 (SELL BY DATE), 26 (ENABLE button), and 27 (RTC/ENABLE buttons).

13) Barcode Type Selection

Has three type of selection EAN, EAN + and ITF type.

- Touch **[EAN]**, **[EAN+]** or **[ITF]** key to change between barcode types. The key Display as 'EAN' or 'ITF' depend on **Spec 141A012 "Selection of Default Barcode Type" (in User/Item Barcode Spec)**

14) Barcode Format Entry

Selection of Barcode Format type, 'EAN FORMAT' and 'ITF FORMAT', if ITF format been selected, the programming of **EAN 5 DIGIT ADD-ON** format will not shows on the screen.

- Touch **[BARCODE FORMAT]** key.
- Touch the desired Barcode Format key.

Note: All Barcode Format Type will be listed.

Refer to [Barcode List](#)

Note 1: Default Item Barcode type can be set on SPEC141A000 “Selection of Item Barcode” (in User/Item Barcode Spec)

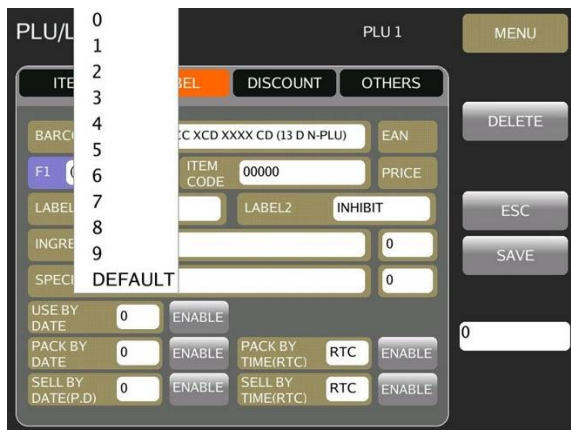

Note 2: Print Right Side Data of the Item Barcode can be select on SPEC141A001 “Right Side Data of Item Barcode” (in User/Item Barcode Spec). The following selections are available.

- ❖ Quantity
- ❖ Price (Before Tax / After Tax can be selected)
- ❖ Weight
- ❖ User Programmable
- ❖ Original Price

15) Barcode Flag Entry

The default flag data can be set on SPEC: Data of F1 & F2 (in User/Item Barcode Spec) and the Flag data consists of one or two digits, which depends on the selected Barcode type.

- a. Touch [F1] or [F2] key twice to enter Barcode Flag selection.
- b. Touch [M] selection for Manual Entry.
- c. Enter Barcode Flag value by keypad.

16) Item Code Entry

Number of digit of Item Code is depends on the Barcode Type selected.

- a. Touch [ITEM CODE] key.
- b. Enter the Item Code value by keypad.

17) User Programmable Right Side Data selection

Select type of data to print on right side data (**Example:** F1F2 CCCCCC XCD **XXXX** CD, the bold 'X's) of Item Barcode.

Note: SPEC 141A001“Right Side Data of item Barcode” in User Spec Setting must set to “USER PROGRAMMABLE” to enable this selection

Note: If select Price for SPEC 141A001“Right Side Data of item Barcode”, price data depend on SPEC 141A002“Right Side Price Data of item Barcode” in User Spec Setting.

- a. Touch **[PRICE]** key to toggle between Price, Weight, Org Price and Quantity.

18) Label Format Entry

Select label format type for label printing. The item label format 2 for item label can also be selected.

Note: Default Item Label Format can be set at the SPEC: Default Item Label Format in Printing Spec of USER SETUP. (Only Free Format label types are available for 2nd Format)

- a. Touch **[LABEL FORMAT]** key.
- b. Touch desired Format key.

Note: All Label Format Type will be listed.

Refer to [Label Format List](#)

19) Ingredient Entry

Ingredient by PLU is the ingredient data programmed in a PLU, and only applied for the PLU. Maximum 15 lines can be programmed for Ingredient data and number of lines or maximum of characters entry is depends on the Character Size entry or size of the print area. Individual Ingredient only can be entered when free format (F1-F99) with ingredient print area is selected for the PLU.

- a. Touch **[INGREDIENT]** key.
- b. Enter Ingredient using the [internal keyboard](#) screens.

20) Special Message Entry

Special Message by PLU is the special message data programmed in a PLU, and only applied for the PLU. Maximum 8 lines can be programmed for Special Message and number of lines or maximum of characters entry is depends on the Character Size entry or size of the print area. Individual Special Message data only can be entered when free format (F1-F99) with special message print area is selected for the PLU.

- a. Touch **[SPECIAL MSG]** key
- b. Enter Special Message using the [internal keyboard](#) screens.

21) Ingredient Selection

Select Ingredient selection that had programmed in [Ingredient Programming](#)

22) Special Message Selection

Select Special Message selection that had programmed in [Special Message Programming](#)

23) Use by Date Entry

Maximum value 999 can be entered and Used by Date will not printed on Label, if selected Label Format without print area for Used by Date.

- a. Touch **[DISABLE]** key to change to **[ENABLE]**
- b. Enter the Use by Date value by keypad.

24) Sell by Date Entry

Maximum value 999 can be entered and the sources of Sell by Date can be either **From Current Date** or **From Packed Date**.

- a. Touch **[DISABLE]** key to change to **[ENABLE]**
- b. Enter the Sell by Date value by keypad.
- c. Touch the **[SELL BY DATE]** key will toggle within **(C.D)**-Current Date and **(P.D)**-Packed Date.

25) Sell by Time Entry

Sell by Time is default to RTC (Real Time Clock). It also can be set manually by touching the **[MANUAL/RTC]** key once the selection is enabling. Sell by Time will not be printed on Label, if selected Label Format without print area for Sell by Time.

- a. Touch **[DISABLE]** key to change to **[ENABLE]**
- b. Touch **[MANUAL/RTC]** key to change to manual time entry.
- c. Enter the Sell by Time value by keypad in 24hour format.

26) Pack by Date Entry

Maximum value 999 can be entered.

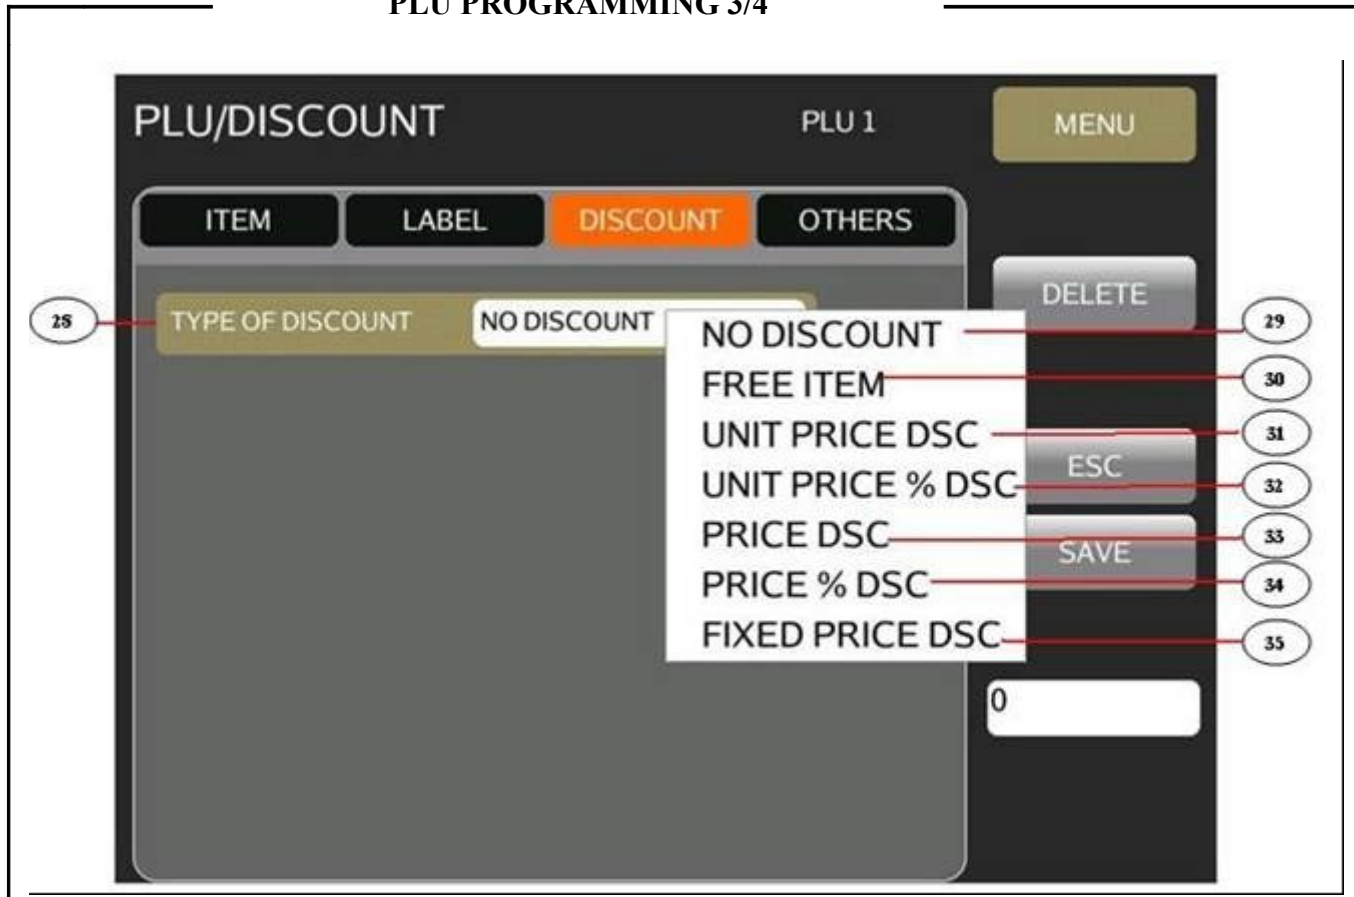

- a. Touch **[DISABLE]** key to change to **[ENABLE]**
- b. Enter the Pack by Date value by keypad.

27) Pack by Time Entry

Pack by Time is default to RTC (Real Time Clock). It also can be set manually by touching the **[MANUAL/RTC]** key once the selection is enabling. Pack by Time will not be printed on Label, if selected Label Format without print area for Pack by Time.

- a. Touch **[DISABLE]** key to change to **[ENABLE]**
- b. Touch **[MANUAL/RTC]** key to change to manual time entry.
- c. Enter the Pack by Time value by keypad in 24hour format.

PLU PROGRAMMING 3/4

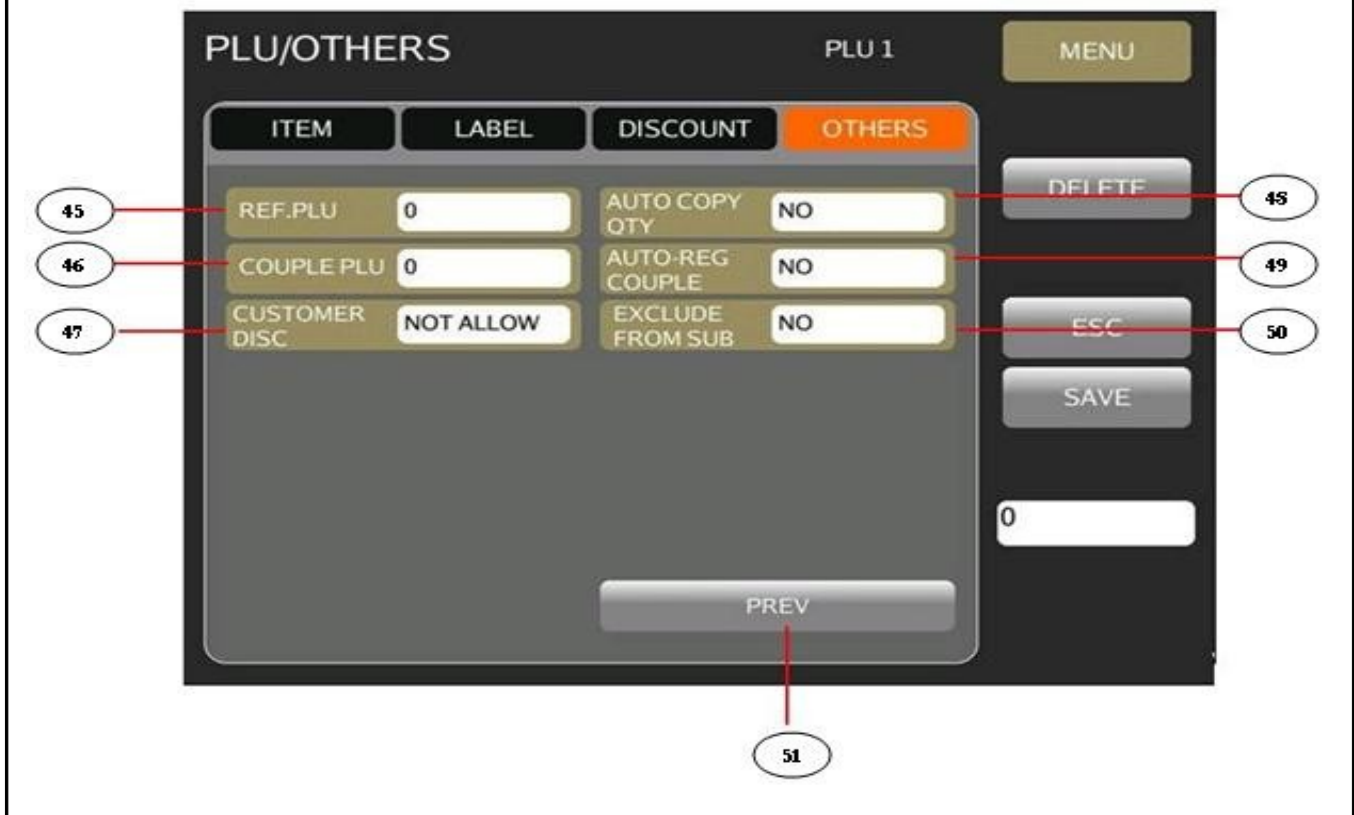

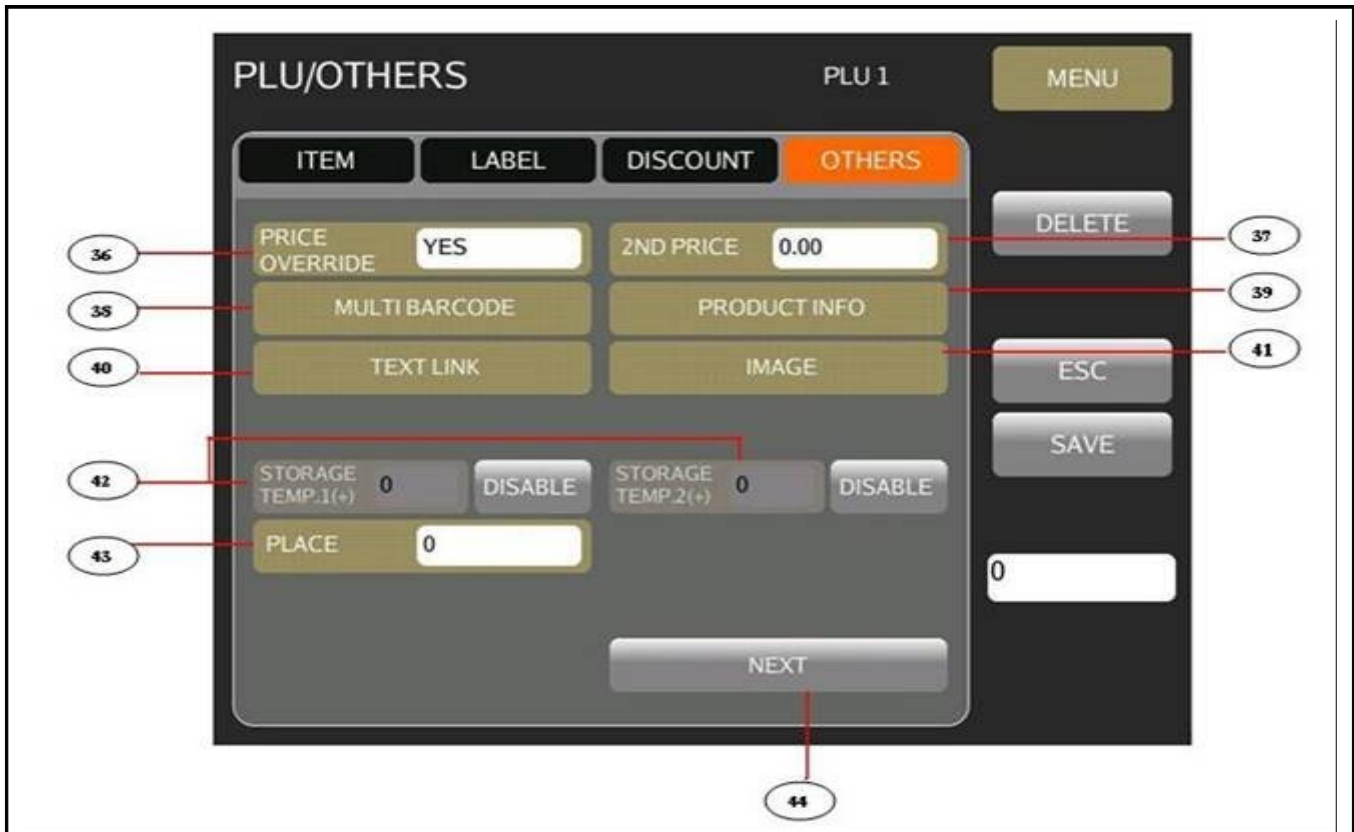

28) Type of Discount Entry

- Touch [TYPE OF DISCOUNT] key.
- Touch the desired Type of Discount function.

Note: All Type of Discount will be listed.

No.	Discount Type	Description
29)	No Discount	Normal procedure without any discount at all.
30)	Free Item	Non charged item
31)	Unit Pr. Disc	(Unit price – discount) x Weight/Pcs = item total price, discount done when it reach the Weight/Pcs limit
32)	Unit Pr. %Disc	(Unit price – %discount) x Weight/PCs = item total price, discount done when it reach the Weight/PCs limit
33)	Price Disc	Total price – discount = new item total price, discount done when it reach the Weight/Pcs limit
34)	Price. %Disc	Total price – %discount = new item total price, discount done when it reach the Weight/Pcs limit
35)	Fixed Pr. Disc	Fixed Item Total Price for any number of weight/Pcs

PLU PROGRAMMING 4/4

36) Price Override

Even if Spec 141D001 “Unit Price Override” (in User/Operation Spec) set to “Allow”, Price Override depend on PLU Price override setting.

- a. Touch [PRICE OVERRIDE] key to select ‘YES’ or ‘NO’.

37) 2nd Price Entry

2nd price used for temporary change the price (press half function key to change to 2nd price).

- a. Touch [2nd PRICE] key.
- b. Enter the 2nd Price by using keypad.

38) Multi Barcode

Multi Barcode is a barcode used for Traceability function, to use the barcode, must create print area in [Free Format](#) programming.

- a. Touch [MULTI BARCODE] key.

- b. Touch [M.BARCODE 1] or [M.BARCODE 2] or [TOTAL M.BARCODE 1] or [TOTAL M.BARCODE 2] and enter value by touch the button selection on screen.

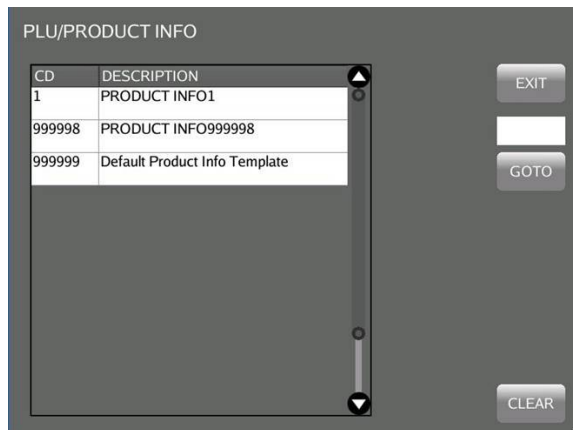

- c. Packaging indicator only can add from 1 to 9.

39) Product Info

Product Info used for selecting format of printing product information on receipt.

Note: This function Required to program in Product Info Programming in advance, please refer to [Product Info Programming](#).

- a. Touch [PRODUCT INFO] key,
- b. Touch desired Product Info format to select. To clear touch [CLEAR] key.

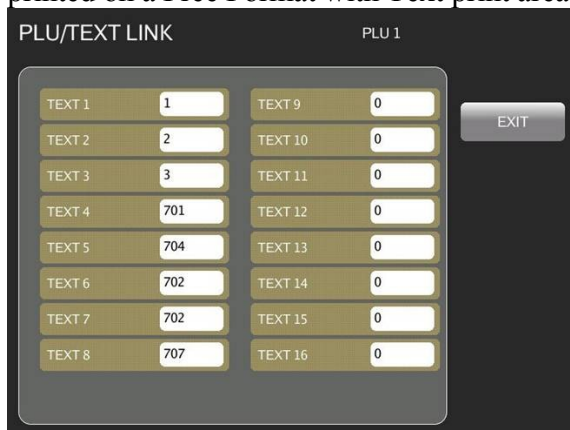

Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.

Note: Touch [CLEAR] key to clear.

Note: Touch [GO TO] to search Product info programming

40) Text Link

Text is used for printing the fixed data on label such as 'Unit Price', 'Packed Date' etc and can be printed on a Free Format with Text print area

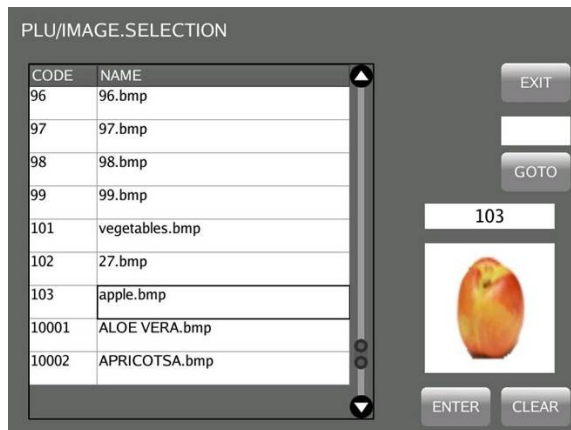

Note: Touch text area to select text that had programmed in [text programming](#)

41) IMAGE

Image Printing on Label Entry

Image can be printed on a Free Format with the image print area. Maximum 5 images can be printed on one label. Image Number can be selected from Master Image's data programmed in advance.

- Touch [IMAGE] key.
- Touch desired Image and touch [ENTER] key to select. To Clear Touch [CLEAR] key.
- Enter Group Number by keypad and Press PLU key to select image from other group.

Note 1: To Program Image for selection, check [Image Programming](#)

Note 2: Touch [ARROW DOWN] key to go to the next page to program Image 6 to 10

42) Storage Temp 1 & 2

Storage Temperature, where the item storing environment data

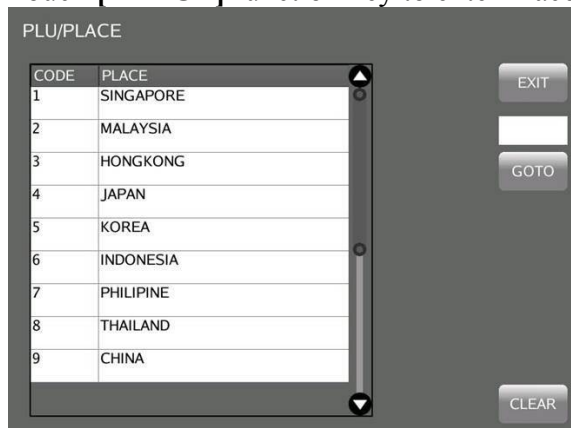

- Touch [STORAGE TEMP.1 (+)] or [STORAGE TEMP.2 (+)] key.
- Enter the Storage Temperature value by using keypad.

Note: after touched the (+) will change to (-) and reversed.

43) Place

This key is used to select the desirable Place data to be printed on item label.

- Touch [PLACE] function key to enter Place list screen.

- Enter any of the place indicators from 1 to 99 or key in the place number by ten key.

44) Next

Touch [NEXT] key to go next page other selection

45) Ref.PLU

When set [YES] It will allow to call Ref PLU in Registration Mode when Reference PLU key assign in Preset key

46) Couple PLU

This function used to call Other PLU when do transaction using Receipt Printing. For Example In Registration Mode Call PLU #2 with couple PLU #10, It will appear PLU#2, add to clerk it will auto show PLU#10

Note: For Couple PLU it should non weight item type

47) Customer Disc

Customer discount used to set allow or disallow use of Customer Discount for the PLU Touch [CUSTOMER DISC] key to toggle “ALLOW” or “NOT ALLOW”

48) Auto Copy QTY

To automatically copy the qty for Couple PLU when call PLU

Note: Should Set YES for Couple PLU in PLU programming

For Couple PLU it should non weight item type

49) Auto Reg Couple

To automatically register / call-up Couple PLU when call PLU with couple PLU

Touch [AUTO-REG COUPLE] key to toggle “YES” or “NO”

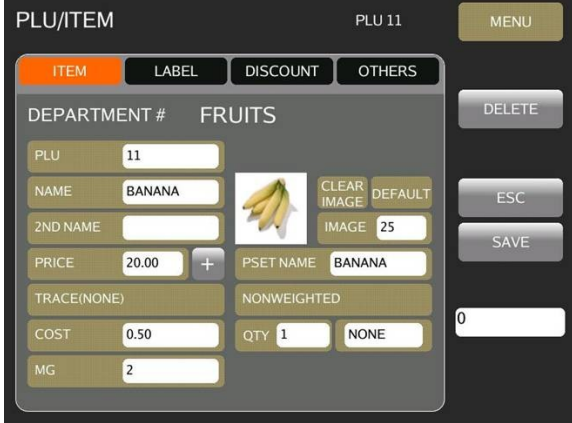

50) Exclude From SUB

51) Previous

Touch [PREVIOUS] key to back to previous page

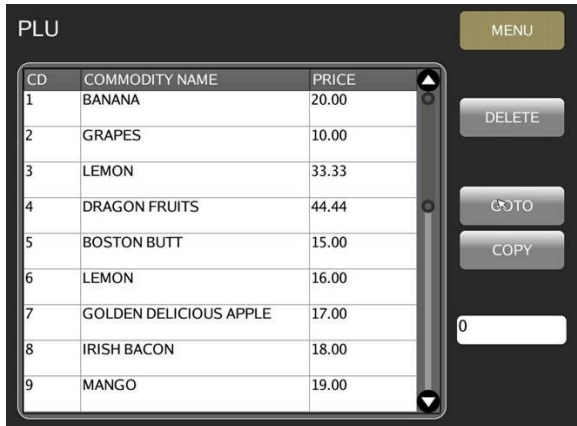

4. Copy a PLU File

The programmed PLU data can be easily copied into a new PLU. The function is very useful to save time or avoid mistake for the similar PLU data programming, especially in case of long description of Ingredients.

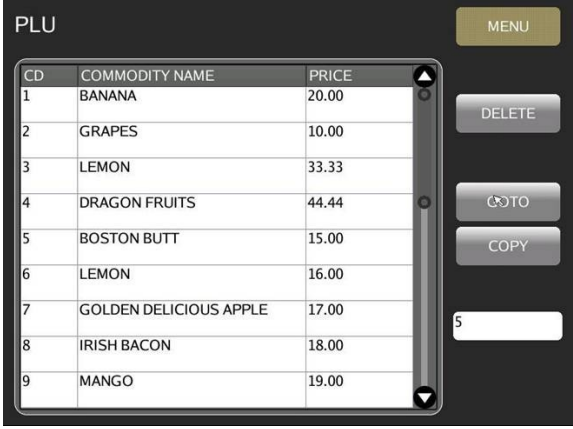

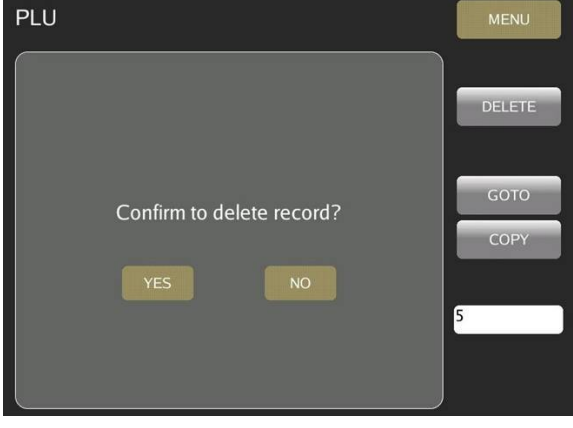

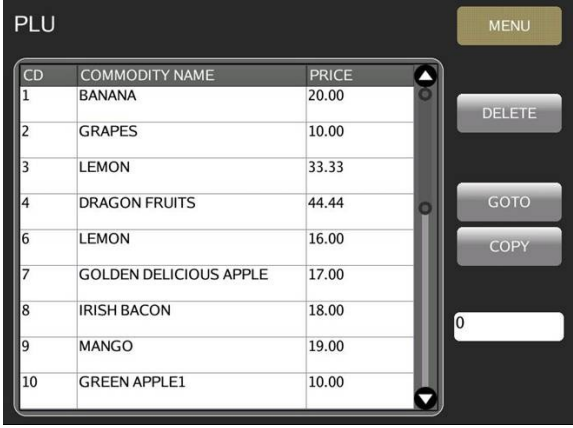

OPERATION	DISPLAY
<p>1. In PLU Programming Mode, enter a new PLU number. (e.g. 11)</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	
<p>2. Touch the desired PLU data to copy from. (e.g. PLU 1 - BANANA)</p> <p>Note: Change the necessary data if required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

5. Go To Files

PLU programming provide a fast way to search a PLU within the PLU display, this function is useful as a user can direct go to desired searched PLU without need to browse screen by screen.

OPERATION	DISPLAY
<p>1. In PLU Programming Mode, Enter the PLU number to be search. (e.g.1)</p>	 <p>The screenshot shows a 'PLU' display with a table of items. The table has columns for 'CD', 'COMMODITY NAME', and 'PRICE'. The first row is '10 GREEN APPLE1 10.00'. The second row is '11 EGG PLANT 5.00'. Below these are three rows with '999997', '999998', and '999999' in the CD column and '0.00' in the PRICE column. To the right of the table are buttons for 'MENU', 'DELETE', 'GOTO', and 'COPY'. At the bottom right, there is a search input field containing the number '1'.</p>
<p>2. Touch the [GO TO] key.</p> <p>Note: The searched PLU number will be on the top listing</p>	 <p>The screenshot shows a 'PLU' display with a table of items. The table has columns for 'CD', 'COMMODITY NAME', and 'PRICE'. The first row is '1 BANANA 20.00'. The second row is '2 GRAPES 10.00'. The third row is '3 LEMON 33.33'. The fourth row is '4 DRAGON FRUITS 44.44'. The fifth row is '5 BOSTON BUTT 15.00'. The sixth row is '6 LEMON 16.00'. The seventh row is '7 GOLDEN DELICIOUS APPLE 17.00'. The eighth row is '8 IRISH BACON 18.00'. The ninth row is '9 MANGO 19.00'. To the right of the table are buttons for 'MENU', 'DELETE', 'GOTO', and 'COPY'. At the bottom right, there is a search input field containing the number '0'.</p>

6. Delete a Programmed PLU File

OPERATION	DISPLAY																														
<p>1. In PLU Programming Mode, enter the PLU Number to be deleted. (e.g. PLU 5)</p> <p>Note: Also can browse and touch the PLU name (without entering the PLU)</p>	 <p>The screenshot shows a 'PLU' menu with a table of items. The table has columns for 'CD', 'COMMODITY NAME', and 'PRICE'. Item 5, 'BOSTON BUTT', is highlighted. To the right of the table are buttons for 'MENU', 'DELETE', 'GOTO', and 'COPY'. Below these buttons is a text input field containing the number '5'.</p> <table border="1"> <thead> <tr> <th>CD</th> <th>COMMODITY NAME</th> <th>PRICE</th> </tr> </thead> <tbody> <tr><td>1</td><td>BANANA</td><td>20.00</td></tr> <tr><td>2</td><td>GRAPES</td><td>10.00</td></tr> <tr><td>3</td><td>LEMON</td><td>33.33</td></tr> <tr><td>4</td><td>DRAGON FRUITS</td><td>44.44</td></tr> <tr><td>5</td><td>BOSTON BUTT</td><td>15.00</td></tr> <tr><td>6</td><td>LEMON</td><td>16.00</td></tr> <tr><td>7</td><td>GOLDEN DELICIOUS APPLE</td><td>17.00</td></tr> <tr><td>8</td><td>IRISH BACON</td><td>18.00</td></tr> <tr><td>9</td><td>MANGO</td><td>19.00</td></tr> </tbody> </table>	CD	COMMODITY NAME	PRICE	1	BANANA	20.00	2	GRAPES	10.00	3	LEMON	33.33	4	DRAGON FRUITS	44.44	5	BOSTON BUTT	15.00	6	LEMON	16.00	7	GOLDEN DELICIOUS APPLE	17.00	8	IRISH BACON	18.00	9	MANGO	19.00

PRESET KEY ASSIGNMENT

1. General Information

The Preset Keys assignment of PLU and Function keys can speed up the operation in REGISTRATION MODE. There are four kinds of preset keys layout:

- PRIMARY KEYS LAYOUT
- SECONDARY KEYS LAYOUT
- ACCUMULATION LAYOUT
- CHANGE MODE LAYOUT

Preset Key Assignment structure:

2. Preset Key Layout

2.1 Primary Key Layout

PRIMARY KEYS/PLU PAGE1

MENU

GROUP: 1

1 Group1

NEXT

PLU 0 BROWSE

BANANA	GRAPES	LEMON	DRAGON FRUITS	GRANNY SMITH APPLE
LEMON	GOLDEN DELICIOUS APPLE	IRISH BACON	MANGO	GREEN APPLE1
EGG PLANT	GREEN BELL PEPPERS	BOSTON BUTT	JALAPENO PEPPERS	WATER MELON

Annotations:

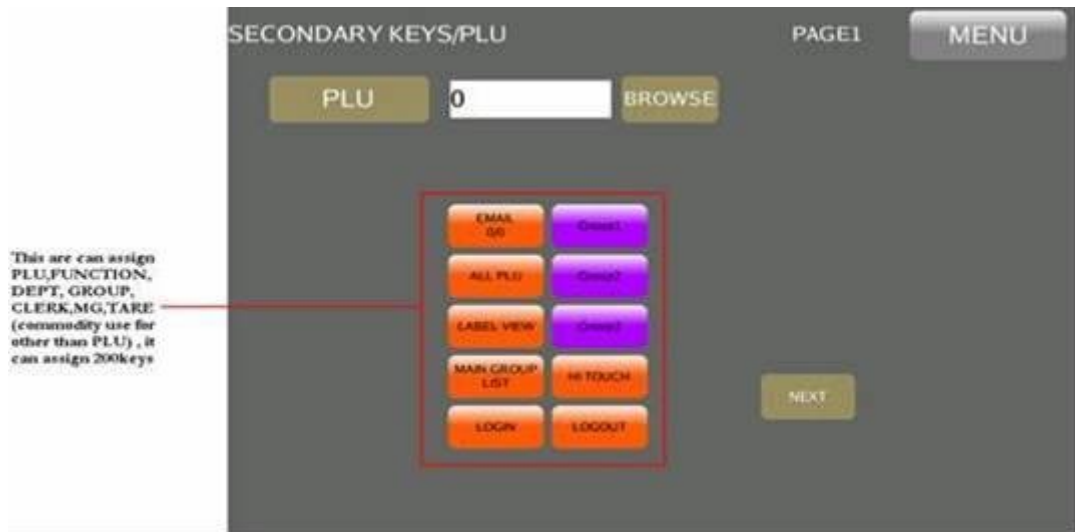

- This key when touch will allow the selection of PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, S URCHARGE, LABEL FORMAT
- This area can assign PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, S URCHARGE, LABEL FORMAT
- This area can only used for FUNCTION and CLERK (can assign 200keys)

Bottom section (Function/CLERK keys):

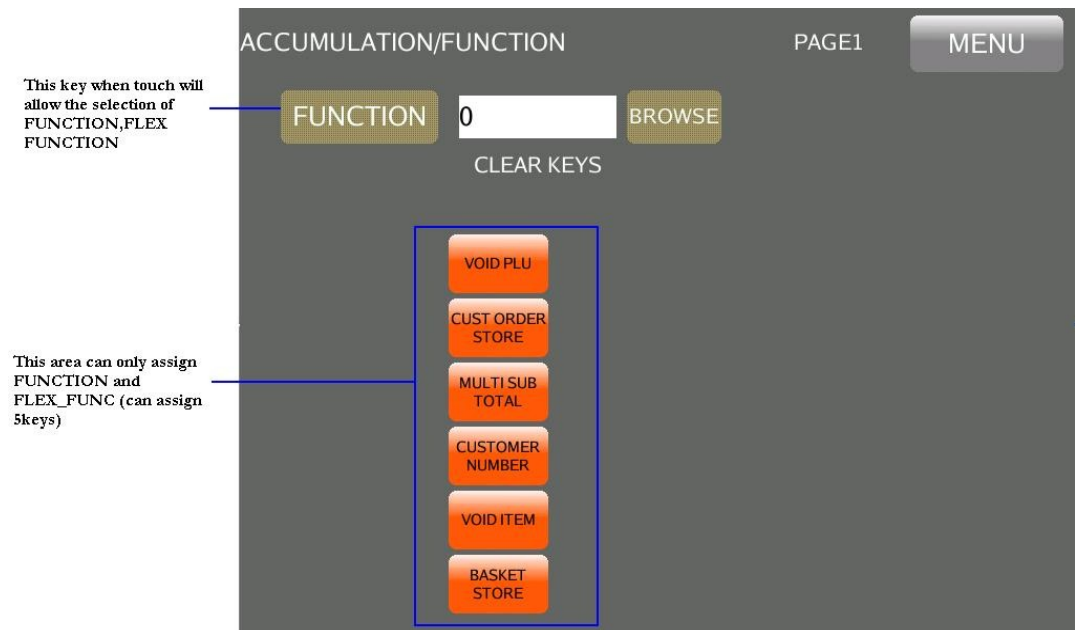

SANGKY	JIM BRADELL	THOMAS LEE	DAVIDSON	LOUIS S
MARRY	SHARON	SANDRA	RINNI	TAMARA

Buttons: NEXT, MANUAL

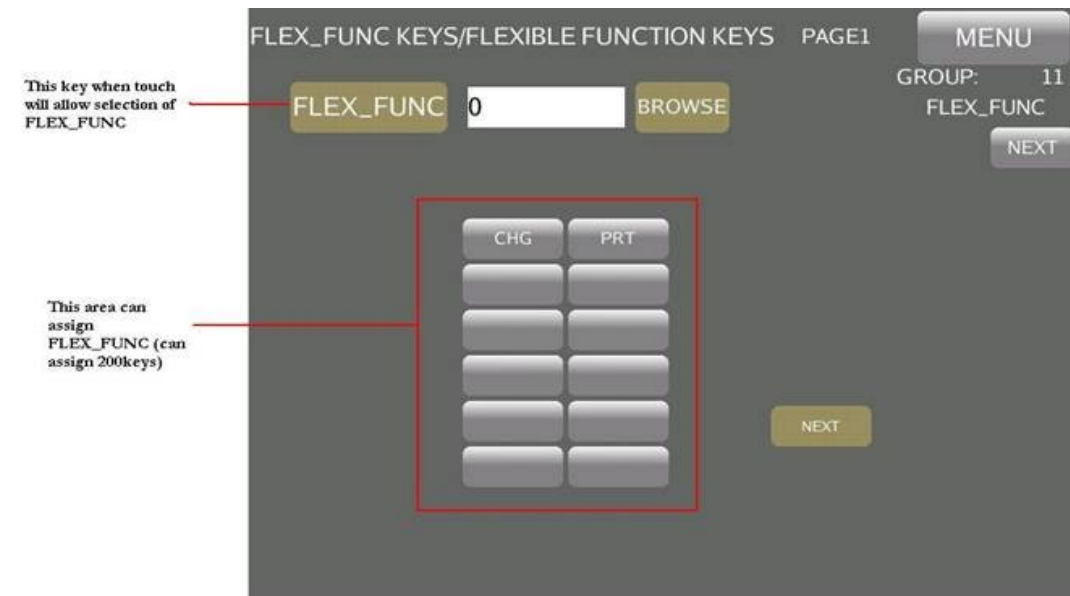

2.2 Secondary Key Layout

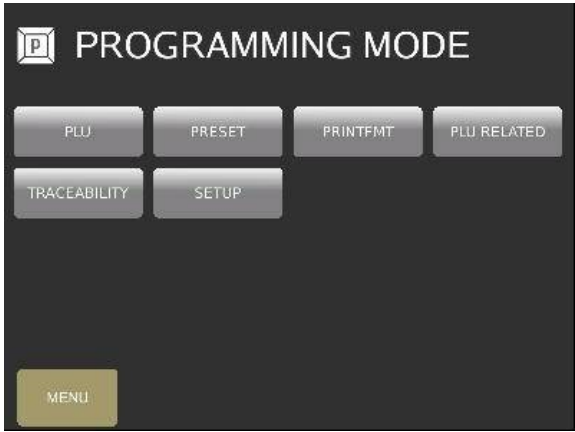

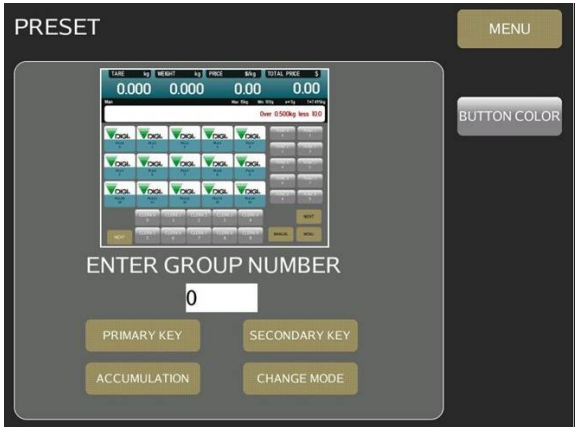

2.3 Accumulation key Layout

2.4 Change Mode key Layout

3. Entry to Preset Key Programming

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.</p>	
<p>4. Enter Group number and press PLU key at keypad. (e.g. 0)</p> <p>Note: Allow setting any group number for preset key. Preset key group display in registration Mode depend on Scale File Setting under Programming (Preset Key Grouping Number)</p>	

4. Programming of Preset Keys

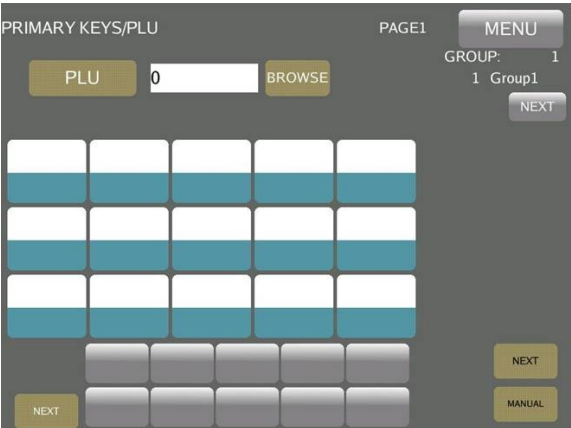

4.1 Primary Key Programming

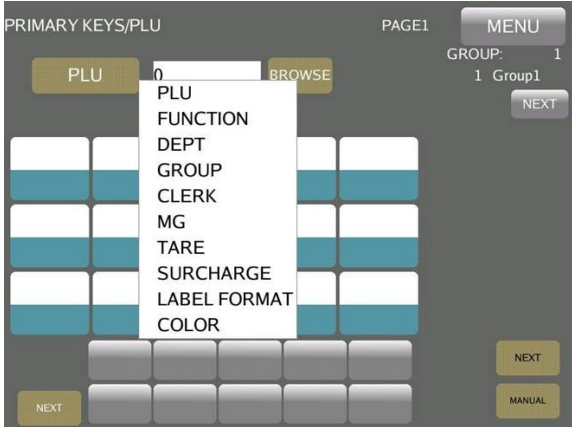

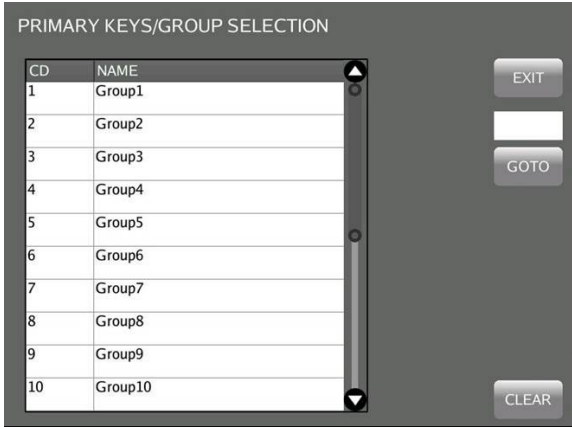

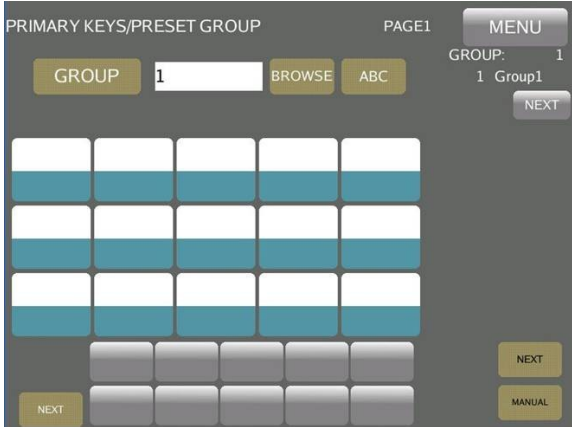

There are 12 pages of preset keys in Primary Keys Programming Mode. In this mode allow assigning maximum of 400 preset keys and it is divided into two sections, whereby the first section can assign 200 keys for all the PLU and other Functions Keys and the second section can assign 200 keys only for Clerk and Function Keys, ([refer to 2.1 Primary Key Layout](#)). Usually in the first section, only PLU is being assigned and other Function Keys are being assigned either in the second section or in Secondary Keys.

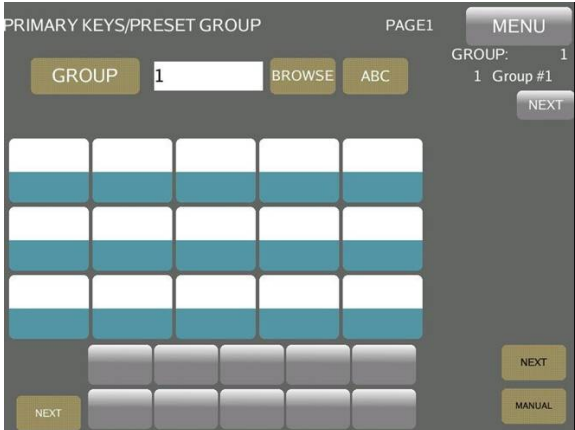

4.1.1 Program Group Name for Preset Key

It is advisable to program the Group Name first before doing the Preset Key Assign. Up to 10 Group can be program and this Group Function helps to group the preset key.

Example: Group 1 is to assign PLU and Group 2 is to assign all the Functions.
Maximum 16 characters can be entered for the Group Name with 1 line.

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	

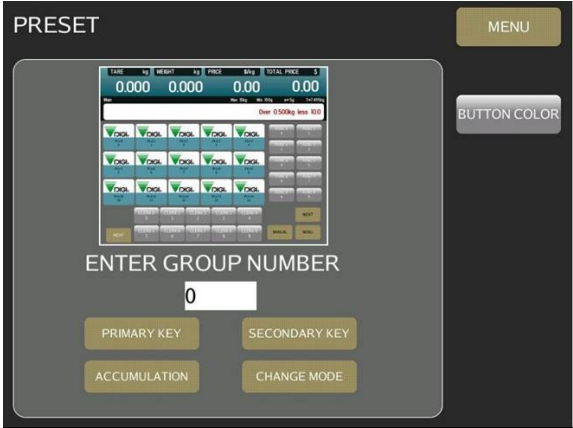

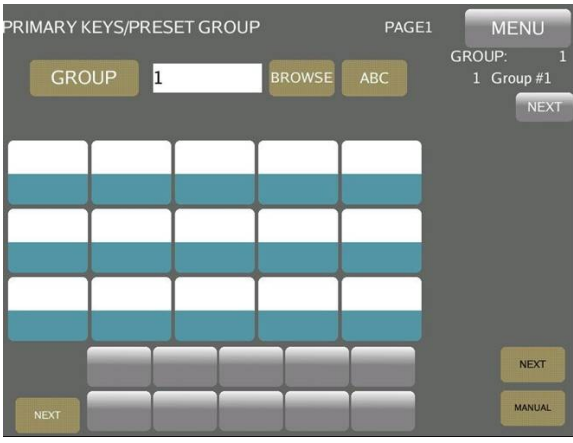

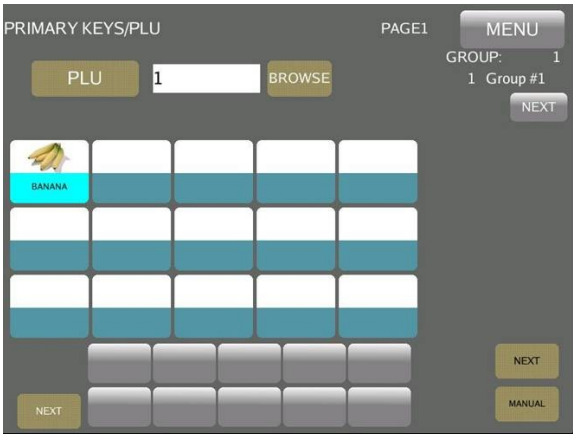

OPERATION	DISPLAY
<p>3. Touch [PLU] key select the word GROUP display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	
<p>4. Touch [BROWSER] key, to select Group number</p>	
<p>5. Then touch desired group number (e.g. 1)</p> <p>Note: Also allow to just Enter the Group number from 1 to 10 by the keypad without need to browse.</p>	

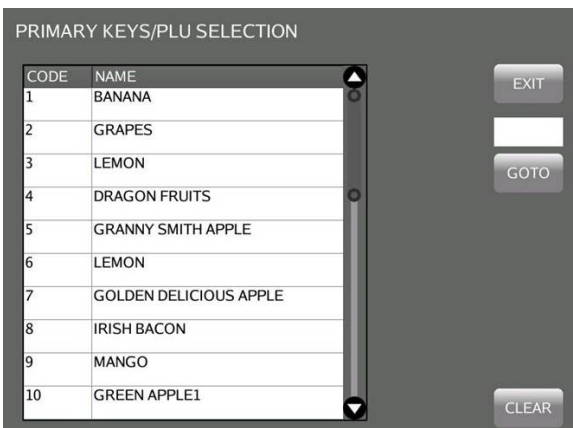

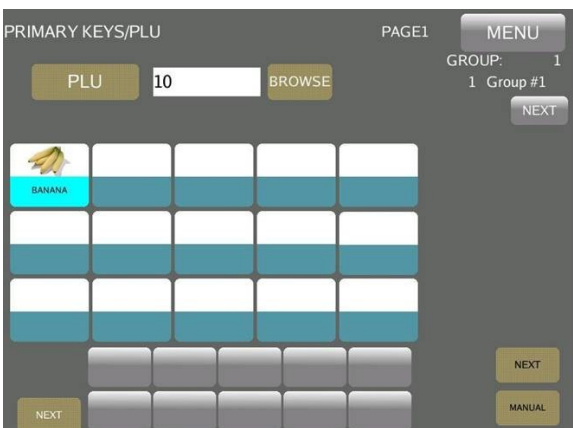

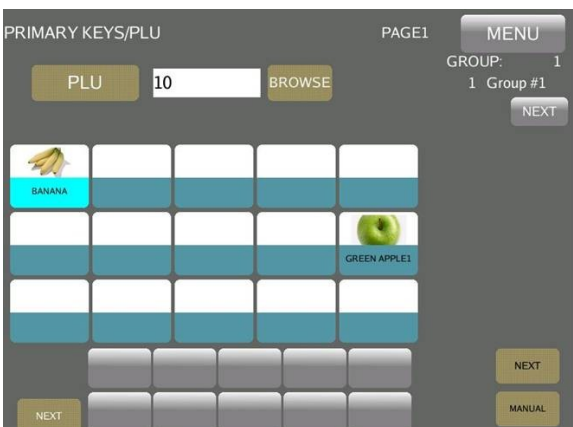

OPERATION	DISPLAY
<p>6. Touch [Abc] key to enter the Group Name by touching desired characters keys. (e.g. GROUP # 1)</p>	
<p>7. Touch [ENTER] key when finished programming.</p> <p>Note 1: Touch [MENU] key if you want to exit without saving.</p> <p>Note 2: To continue programming the Group Name repeat step 4 to 7</p>	

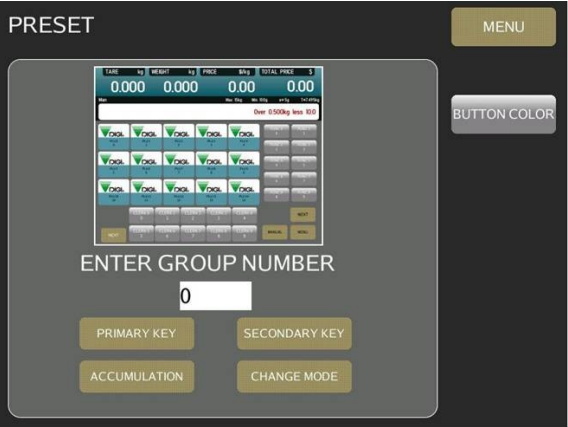

4.1.2 PLU Assignment

PLU can be assigned to a preset key to call up PLU data by pressing the assigned preset key in Registration Mode. There are two methods to assign PLU on preset key.

Note: Non-existing PLU Number cannot be assigned.

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Method 1: Assign by entering the existing PLU Number by using the keypad.</p> <p>Enter the PLU Number by the keypad. (e.g. 1)</p> <p>Touch the desired preset key. (e.g. Row #1, Column #1)</p>	

OPERATION	DISPLAY																						
<p>4. Method 2: Assign by browsing the existing PLU Data.</p> <p>Touch [BROWSE] key to browse the existing PLU Data.</p> <p>Note: Touch  or  key for more selection.</p>	 <p>PRIMARY KEYS/PLU SELECTION</p> <table border="1"> <thead> <tr> <th>CODE</th> <th>NAME</th> </tr> </thead> <tbody> <tr><td>1</td><td>BANANA</td></tr> <tr><td>2</td><td>GRAPES</td></tr> <tr><td>3</td><td>LEMON</td></tr> <tr><td>4</td><td>DRAGON FRUITS</td></tr> <tr><td>5</td><td>GRANNY SMITH APPLE</td></tr> <tr><td>6</td><td>LEMON</td></tr> <tr><td>7</td><td>GOLDEN DELICIOUS APPLE</td></tr> <tr><td>8</td><td>IRISH BACON</td></tr> <tr><td>9</td><td>MANGO</td></tr> <tr><td>10</td><td>GREEN APPLE1</td></tr> </tbody> </table> <p>Buttons: EXIT, GOTO, CLEAR</p>	CODE	NAME	1	BANANA	2	GRAPES	3	LEMON	4	DRAGON FRUITS	5	GRANNY SMITH APPLE	6	LEMON	7	GOLDEN DELICIOUS APPLE	8	IRISH BACON	9	MANGO	10	GREEN APPLE1

OPERATION	DISPLAY
<p>7. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	 <p>The screenshot shows a 'PRESET' screen with a central keypad. Above the keypad, there are four numerical displays showing '0.000', '0.000', '0.00', and '0.00'. Below the keypad, the text 'ENTER GROUP NUMBER' is displayed above a text input field containing the number '0'. At the bottom of the screen, there are four buttons: 'PRIMARY KEY', 'SECONDARY KEY', 'ACCUMULATION', and 'CHANGE MODE'. On the right side of the screen, there are two additional buttons: 'MENU' and 'BUTTON COLOR'.</p>

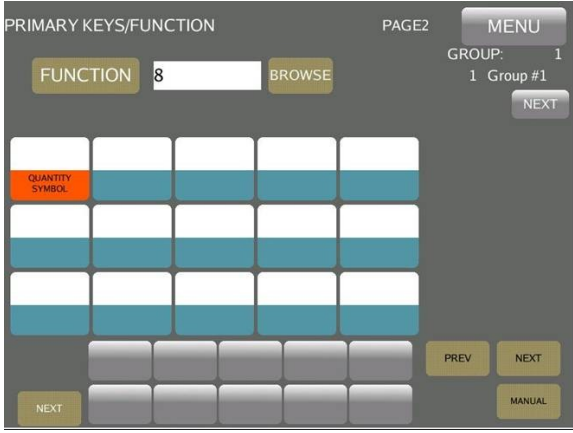

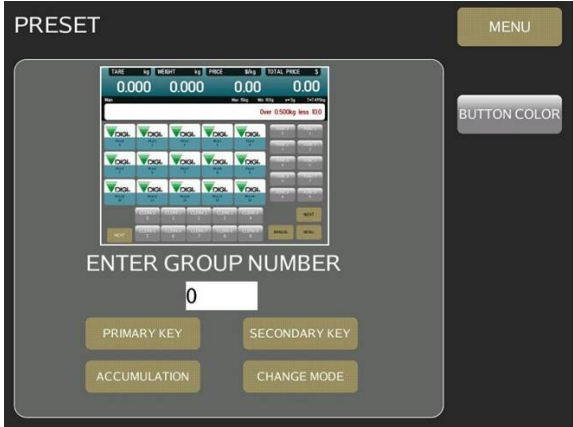

4.1.3 Function Assignment

Function keys are used to change the original programmed data (**Example:** Unit Price, Sell by Date, etc...) at one touch operation, when issuing labels. Using Function keys, operators can issue necessary labels speedier, convenient without resetting the data. There are two methods to assign Function on preset key.

Note: Non-existing Function Number cannot be assigned.

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Touch [PLU] key select the word FUNCTION display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	

OPERATION	DISPLAY
<p>4. Method 1: Assign by entering the existing Function Number by using the keypad.</p> <p>Enter the Function Number by the keypad. (e.g. 238 for BROWSE SEC KEY)</p> <p>Touch the desired preset key. (e.g. Row #3, Column #5)</p>	
<p>5. Method 2: Assign by browsing the existing Function.</p> <p>Touch [BROWSE] key to browse the existing Function.</p> <p>Note: Touch  or  key for more selection.</p>	
<p>6. Touch the desired Function key. (e.g. Function 8 – QUANTITY SYMBOL)</p>	

OPERATION	DISPLAY
<p>7. Touch the desired preset key. (e.g. Row #1, Column #1 Page 2)</p> <p>Note: Touch [NEXT] key under Manual key to next page.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	
<p>8. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	

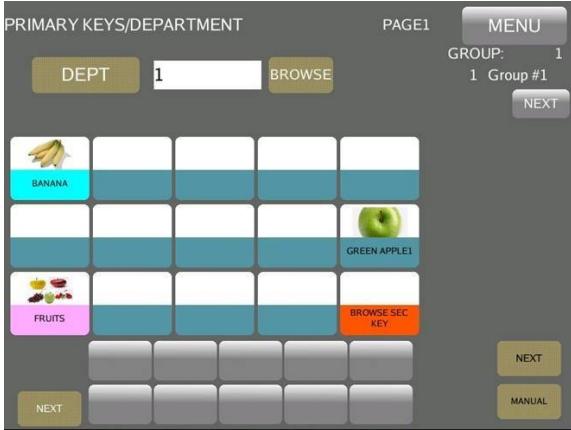

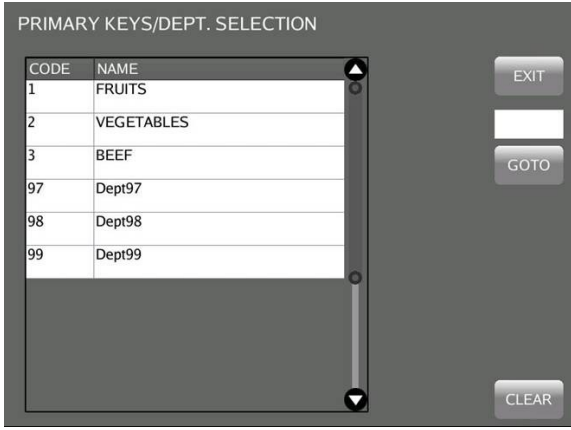

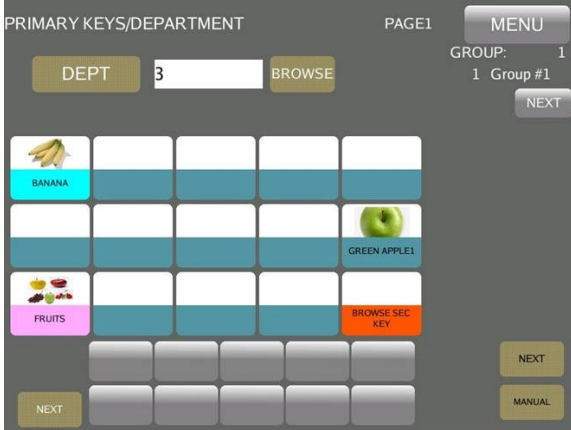

Note: More detail regarding Functions Available at [Preset Function Keys](#).

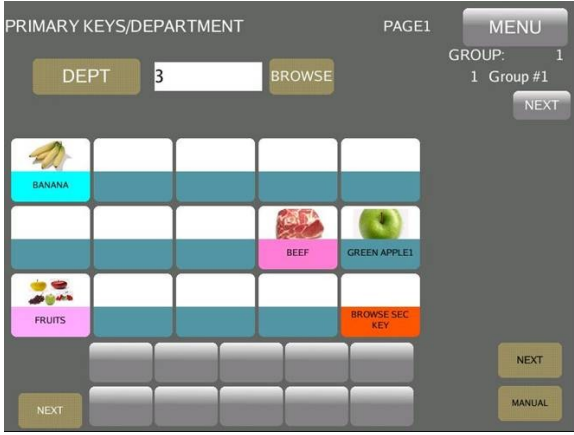

4.1.4 Department Assignment

Department can be assigned to a preset key to call up Department data by pressing the assigned preset key in Registration Mode. There are two methods to assign Department on preset key.

Note: Non-existing Department Number cannot be assigned.

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Touch [PLU] key select the word DEPT display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	

OPERATION	DISPLAY
<p>4. Method 1: Assign by entering the existing Department Number by using the keypad.</p> <p>Enter the Department Number by the keypad. (e.g. 1: FRUITS)</p> <p>Touch the desired preset key. (e.g. Row #3, Column #1)</p>	
<p>5. Method 2: Assign by browsing the existing Department Data.</p> <p>Touch [BROWSE] key to browse the existing Department Data.</p> <p>Note: Touch  or  key for more selection.</p>	
<p>6. Touch the desired Department key. (e.g. Dept 3 - BEEF)</p>

4.1.5 Group Assignment

Group can be assigned to a preset key to view or select the preset key under the Group Number by pressing the assigned preset key in Registration Mode. There are two methods to assign Group on preset key.

Note: Non-existing Group Number cannot be assigned.

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Touch [PLU] key select the word GROUP display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	

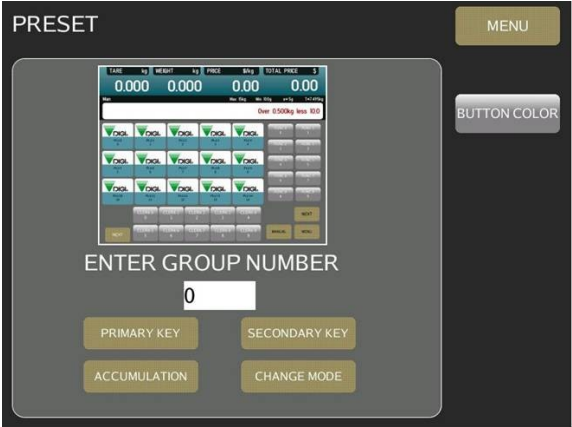

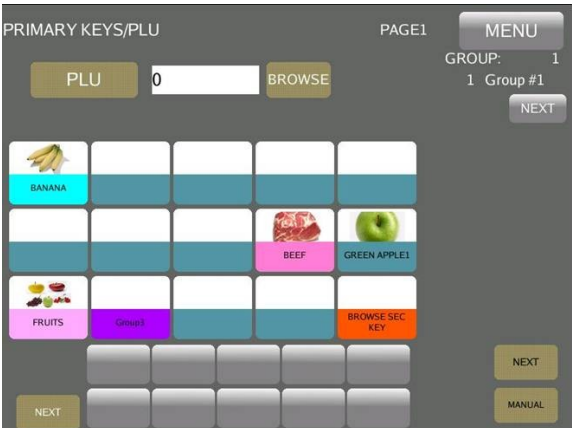

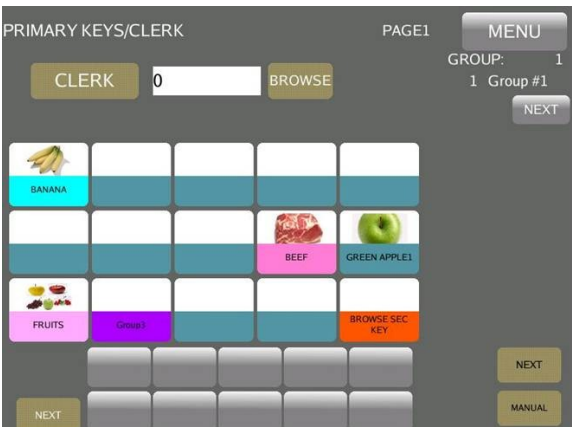

OPERATION	DISPLAY
<p>4. Method 1: Assign by entering the existing Group Number by using the keypad.</p> <p>Enter the Group Number by the keypad. (e.g. 3)</p> <p>Touch the desired preset key. (e.g. Row #3, Column #2)</p>	
<p>5. Method 2: Assign by browsing the existing Group Data.</p> <p>Touch [BROWSE] key to browse the existing Group Data.</p> <p>Note: Touch  or  key for more selection.</p>	
<p>6. Touch the desired Group key. (e.g. Group 1)</p>	

OPERATION	DISPLAY
<p>7. Touch the desired preset key. (e.g. Row #5, Column #4)</p> <p>Note: touch NEXT button go to Page 2</p>	
<p>8. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	

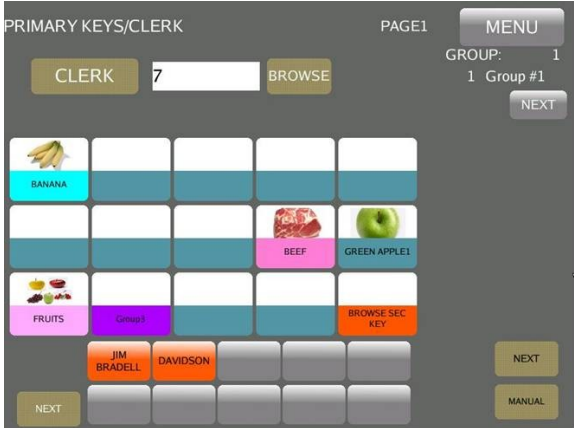

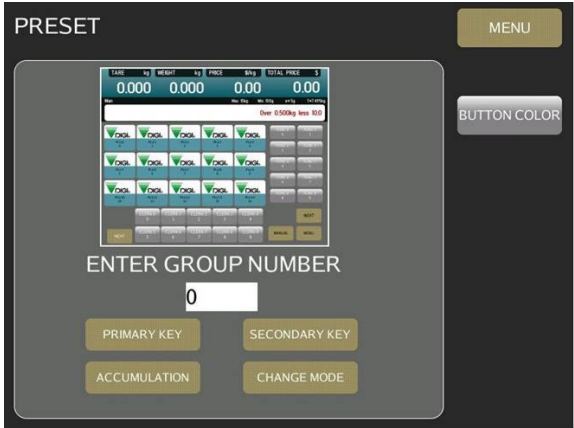

4.1.6 Clerk Assignment

Clerk key is used to accumulate the sales data of the operator that has been assigned for the Clerk key. There are 4 default Clerk keys (9995 [+A] key, 9996 [+B] key, 9997 [+C] key & 9998 [+D] key). If you want to use other Clerk keys, you need to program the Clerk key and assign on preset keys in advance. There are two methods to assign PLU on preset key.

Note: Non-existing Clerk Number cannot be assigned.

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Touch [PLU] key select the word CLERK display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	

OPERATION	DISPLAY
<p>4. Method 1: Assign by entering the existing Clerk Number by using the keypad.</p> <p>Enter the Clerk Number by the keypad. (e.g. 5)</p> <p>Touch the desired preset key.</p>	
<p>5. Method 2: Assign by browsing the existing Clerk Data.</p> <p>Touch [BROWSE] key to browse the existing Clerk Data.</p> <p>Note: Touch  or  key for more selection</p>	
<p>6. Touch the desired Clerk key. (e.g. Clerk 7 - DAVIDSON)</p>	

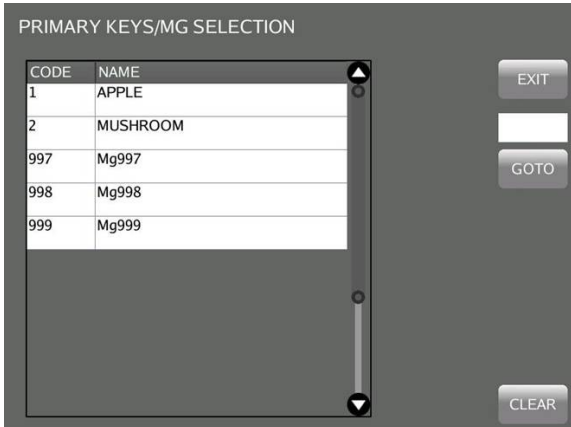

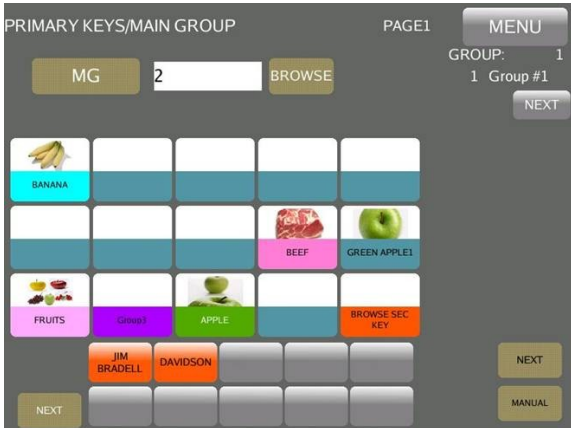

OPERATION	DISPLAY
<p>7. Touch the desired preset key. (e.g. Row #3, Column #4)</p>	
<p>8. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	

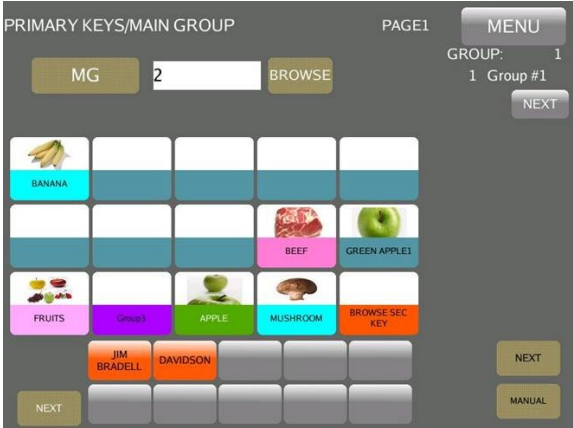

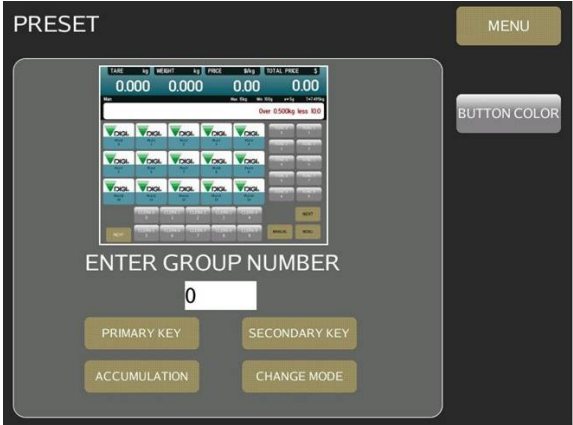

4.1.7 Main Group Assignment

Main Group can be assigned to a preset key to call up Main Group data by pressing the assigned preset key in Registration Mode. There are two methods to assign Main Group on preset key.

Note: Non-existing Main Group Number cannot be assigned.

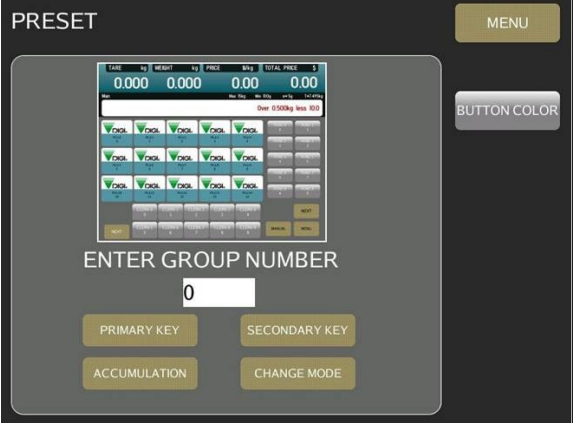

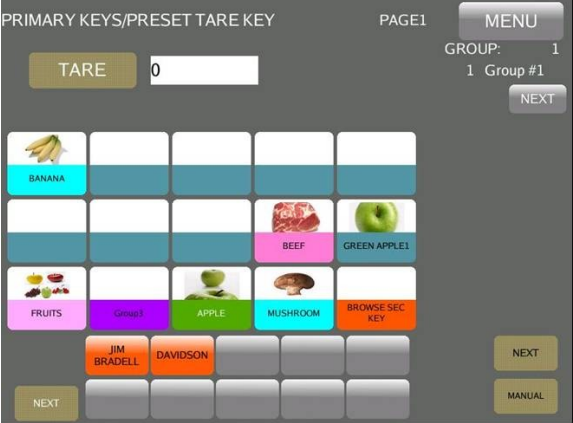

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Touch [PLU] key until the word MG display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	

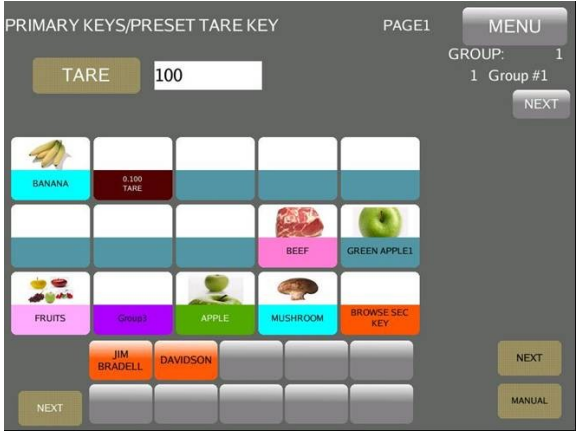

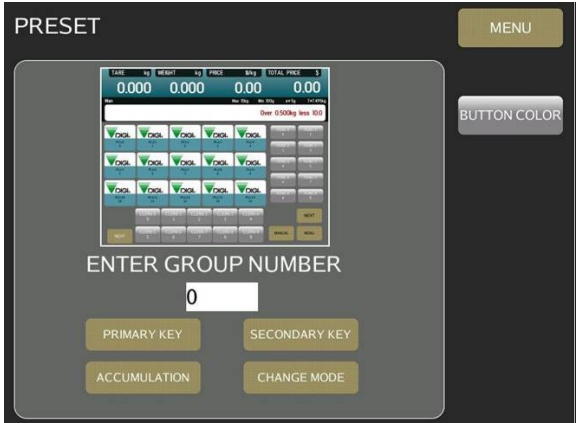

OPERATION	DISPLAY												
<p>4. Method 1: Assign by entering the existing Main Group Number by using the keypad.</p> <p>Enter the Main Group Number by the keypad. (e.g. 1)</p> <p>Touch the desired preset key. (e.g. Row #13, Column #3)</p>	 <p>PRIMARY KEYS/MAIN GROUP PAGE1 MENU GROUP: 1 1 Group #1 NEXT</p> <p>MG 1 BROWSE</p> <p>BANANA</p> <p>BEEF GREEN APPLE</p> <p>FRUITS GROUP APPLE BROWSE SEC KEY</p> <p>JIM BRADELL DAVIDSON</p> <p>NEXT MANUAL</p>												
<p>5. 998	Mg998												
999	Mg999												
<p>6. Touch the desired Main Group key. (e.g. LEAVES)</p>	 <p>PRIMARY KEYS/MAIN GROUP PAGE1 MENU GROUP: 1 1 Group #1 NEXT</p> <p>MG 2 BROWSE</p> <p>BANANA</p> <p>BEEF GREEN APPLE</p> <p>FRUITS GROUP APPLE BROWSE SEC KEY</p> <p>JIM BRADELL DAVIDSON</p> <p>NEXT MANUAL</p>												

OPERATION	DISPLAY
<p>7. Touch the desired preset key. (e.g. Row #3, Column #4)</p>	
<p>8. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	

4.1.8 Tare Assignment

Tare value can be assigned to a preset key for call up Tare data by pressing the assigned preset key in Registration Mode.

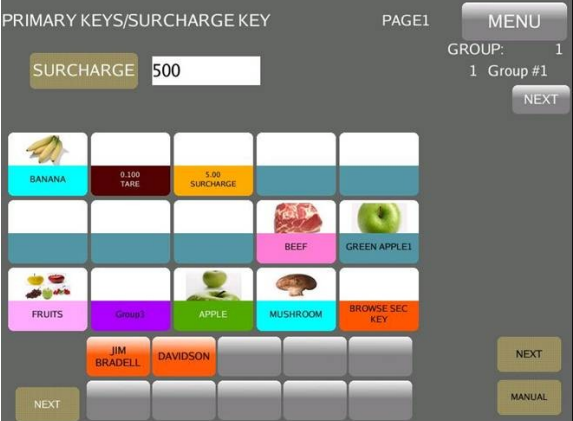

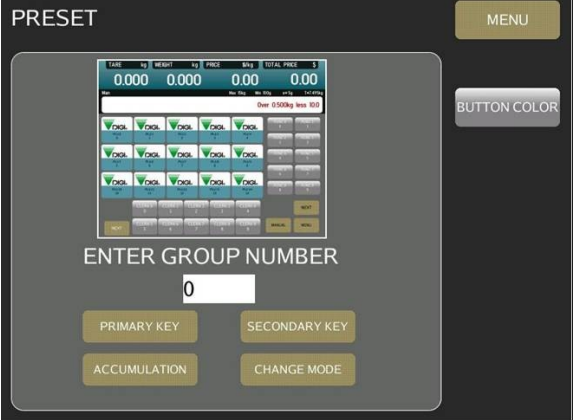

OPERATION	DISPLAY
<p>1. Menu Mode ~> Programming ~> PLU Related ~> Preset key.</p> <p>In Preset Key Programming, Enter group number and press PLU key (e.g.: 0).</p> <p>Note: Adjust Primary keys, Secondary keys and Accumulation keys to desired display size.</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Touch [PLU] key until the word TARE display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	

OPERATION	DISPLAY
<p>4. Assign by entering the existing actual tare value by using the keypad.</p> <p>Enter the actual tare value by the keypad (e.g. 100).</p> <p>Touch the desired preset key (e.g. Row #1, Column #2).</p>	
<p>5. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	

4.1.9 Surcharge Assignment

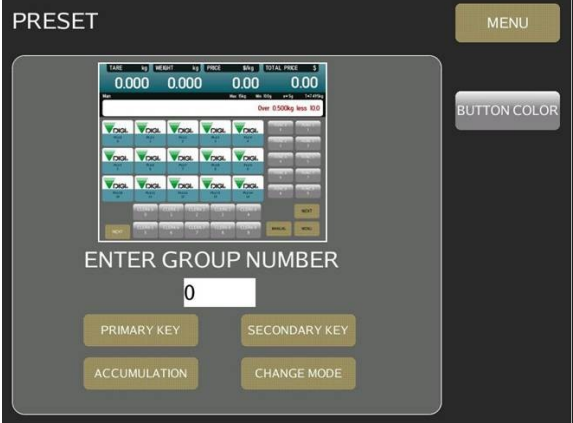

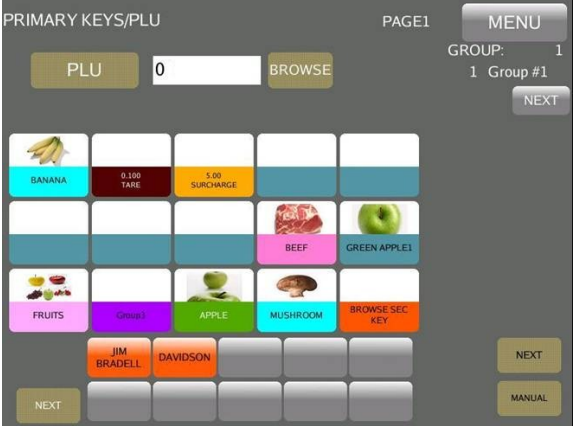

Surcharge amount can be assigned to a preset key for call up Surcharge data by pressing the assigned preset key in Registration Mode.

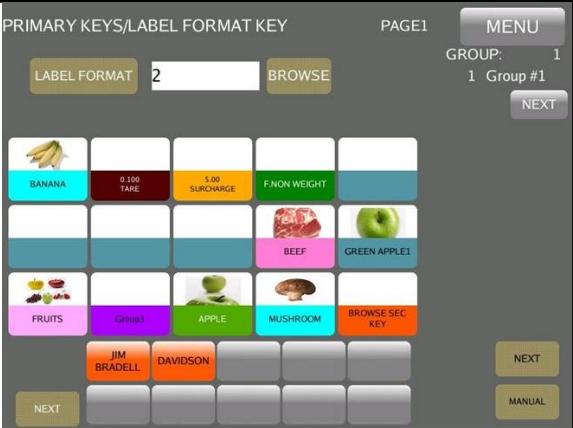

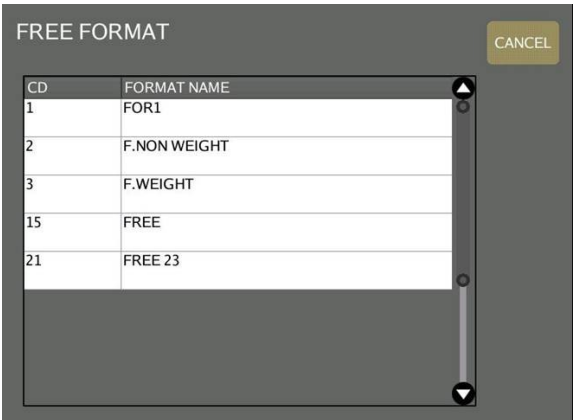

OPERATION	DISPLAY
<p>1. Menu Mode ~> Programming ~> PLU Related ~> Preset key.</p> <p>In Preset Key Programming, Enter group number and press PLU key (e.g.: 0).</p> <p>Note: Adjust Primary keys, Secondary keys and Accumulation keys to desired display size.</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Touch [PLU] key until the word SURCHARGE display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	

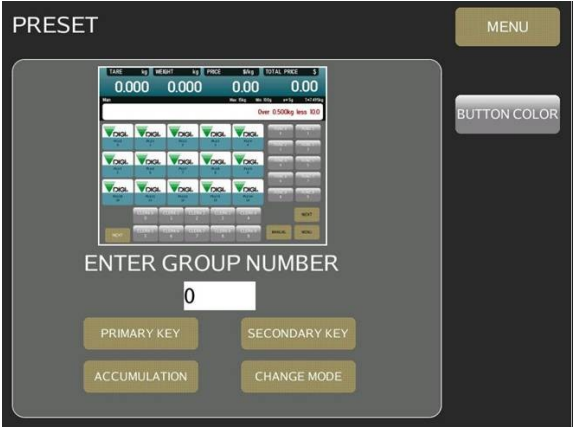

OPERATION	DISPLAY
<p>4. Assign by entering the existing actual tare value by using the keypad.</p> <p>Enter the actual surcharge amount by the keypad (e.g. 500).</p> <p>Touch the desired preset key (e.g. Row #1, Column #3).</p>	
<p>5. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	

4.1.10 Label Format Assignment

Label Format can be assigned to a preset key for change label format data by pressing the assigned preset key in Registration Mode.

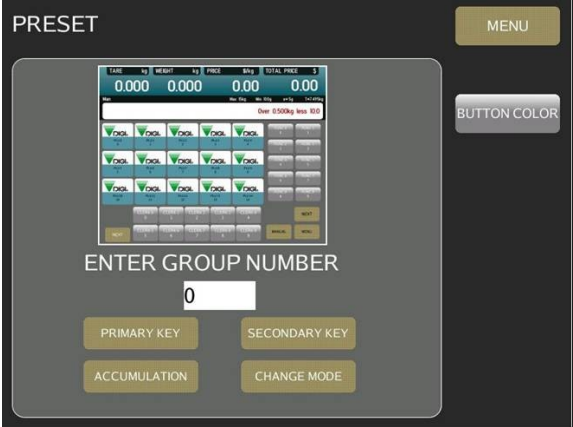

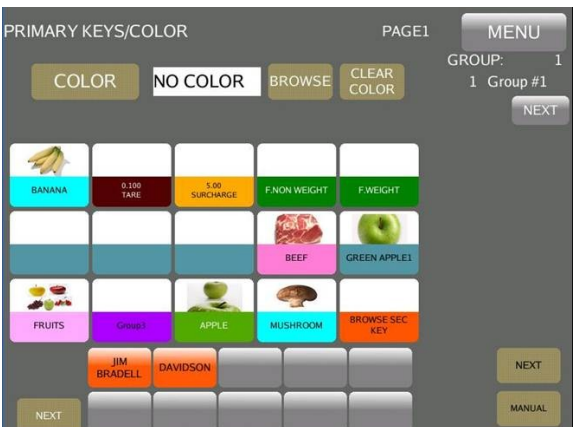

OPERATION	DISPLAY
<p>1. Menu Mode ~> Programming ~> PLU Related ~> Preset key.</p> <p>In Preset Key Programming, Enter group number and press PLU key (e.g.: 0).</p> <p>Note: Adjust Primary keys, Secondary keys and Accumulation keys to desired display size.</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Touch [PLU] key until the word LABEL FORMAT display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	

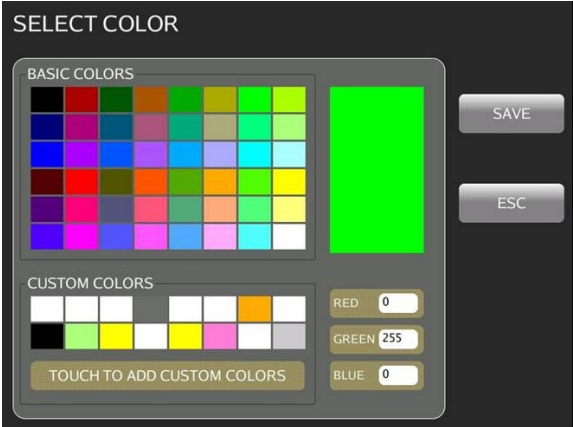

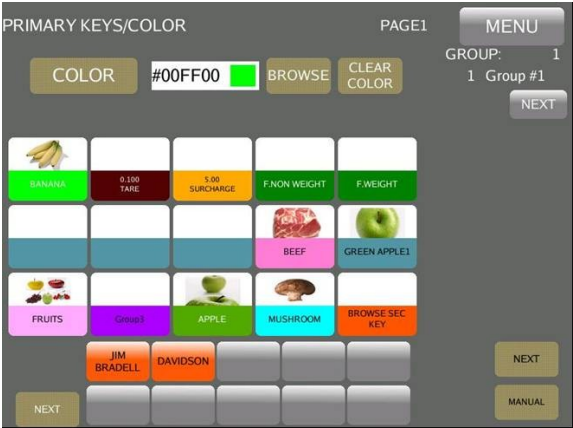

OPERATION	DISPLAY
<p>4. Method 1: Assign by entering the existing Label Format Number by using the keypad.</p> <p>Enter the Main Group Number by the keypad. (e.g. 2)</p> <p>Touch the desired preset key. (e.g. Row #1, Column #4)</p>	
<p>5. Method 2: Assign by browsing the existing Label Format Data.</p> <p>Touch [BROWSE] key to browse the existing Main Group Data.</p> <p>Note: Touch  or  key for more selection.</p>	
<p>6. Touch the desired preset key. (e.g. Row #1, Column #4)</p>	

OPERATION	DISPLAY
<p>7. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	 <p>The screenshot shows a 'PRESET' screen with a central keypad. Above the keypad, there are four digital displays showing '0.000', '0.000', '0.00', and '0.00'. Below the keypad, the text 'ENTER GROUP NUMBER' is displayed above a text input field containing the number '0'. At the bottom of the screen, there are four buttons: 'PRIMARY KEY', 'SECONDARY KEY', 'ACCUMULATION', and 'CHANGE MODE'. On the right side of the screen, there are two additional buttons: 'MENU' and 'BUTTON COLOR'.</p>

4.1.11 COLOR Assignment

COLOR selection has purposed to change color preset key in Registration Mode.

OPERATION	DISPLAY
<p>1. Menu Mode ~> Programming ~> PLU Related ~> Preset key.</p> <p>In Preset Key Programming, Enter group number and press PLU key (e.g.: 0).</p> <p>Note: Adjust Primary keys, Secondary keys and Accumulation keys to desired display size.</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Touch [PLU] key until the word LABEL FORMAT display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	

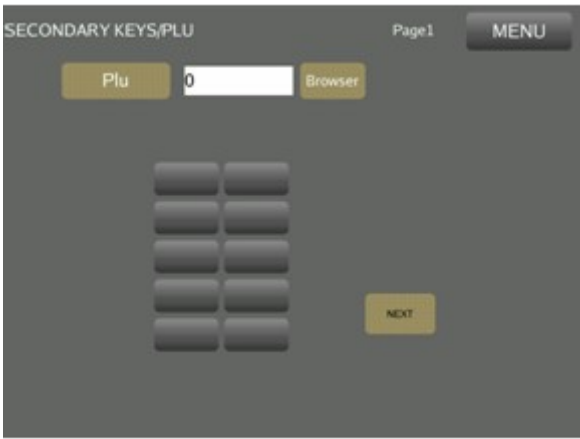

OPERATION	DISPLAY
<p>4. Touch [BROWSE] key to browse the existing COLOR and select the color.(e.g. GREEN)</p> <p>Note : Press [SAVE] key to save the selection and back to PRIMARY KEYS mode Press [ESC]key to back PRIMARY KEYS mode without saving the color</p>	
<p>5. Assign the color to preset key e.g. BANANA Key. It will change the color key's to GREEN</p> <p>Note : [CLEAR COLOR] key purpose to clear color selection and if assign to preset key, it will change the color key to default color</p>	
<p>6. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	

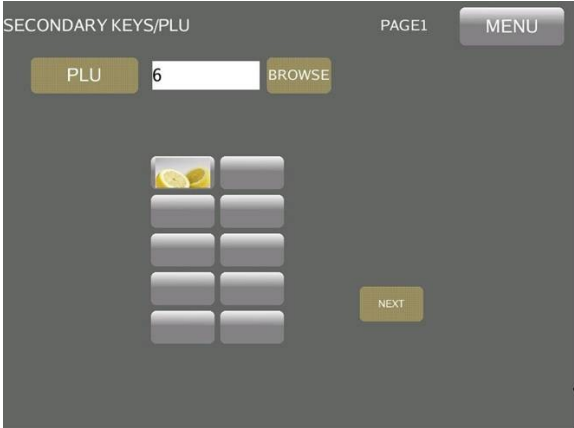

4.2 Secondary Key Programming

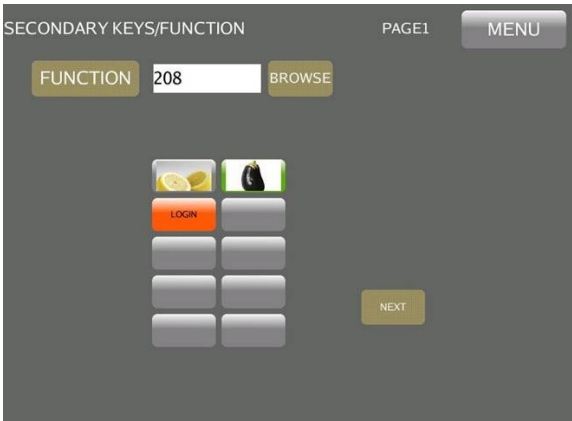

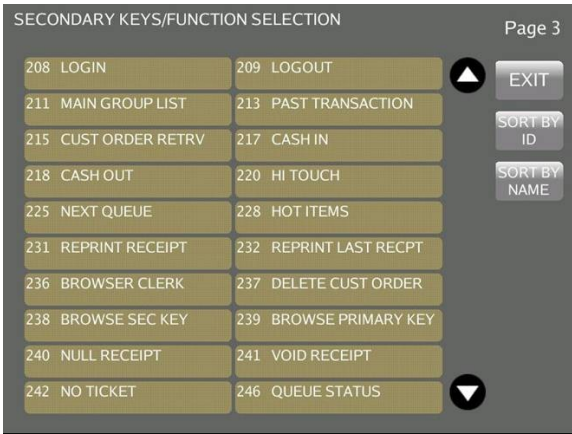

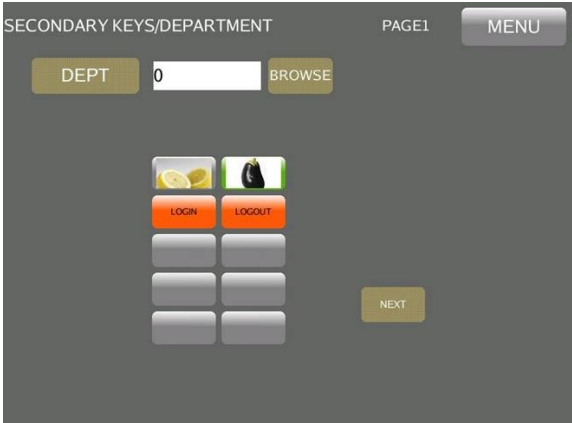

There are 3 pages of preset keys in Secondary Keys Programming Mode. In this mode allow assigning maximum of 10 preset keys for the entire PLU and other Functions Keys (refer to [2.2 Secondary Key Layout](#)). Usually in Secondary Keys, Function and other Functions Keys is being assigned. In Registration Mode, Secondary Key can be select by using the FUNCTION key on top of the numeric keys. There are two methods to assign PLU and other Functions on preset key.

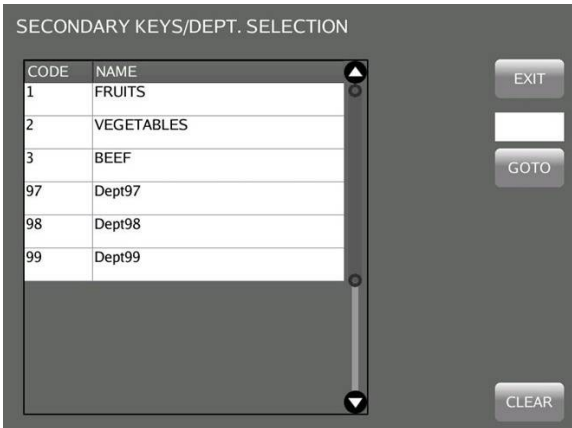

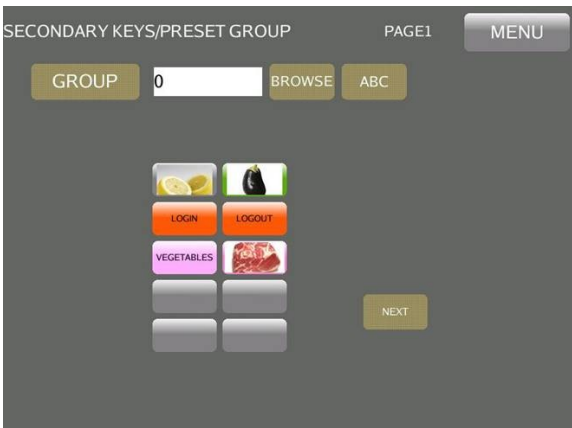

Note: Non-existing PLU and Function Numbers cannot be assigned.

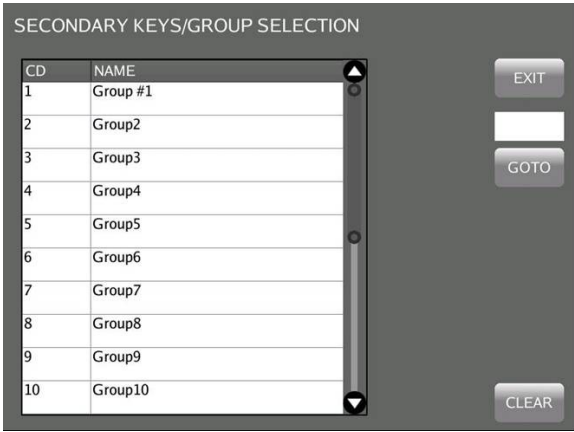

4.2.1 PLU and other Function Assignment

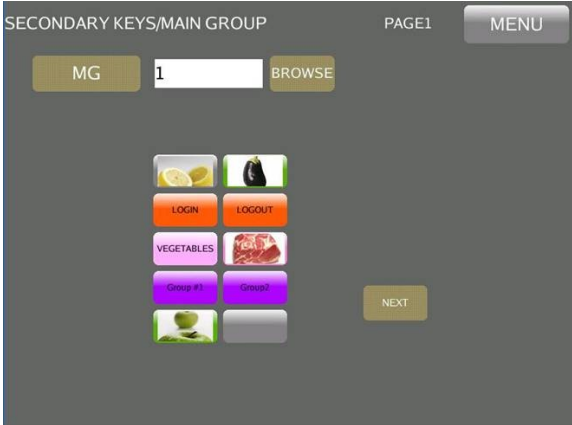

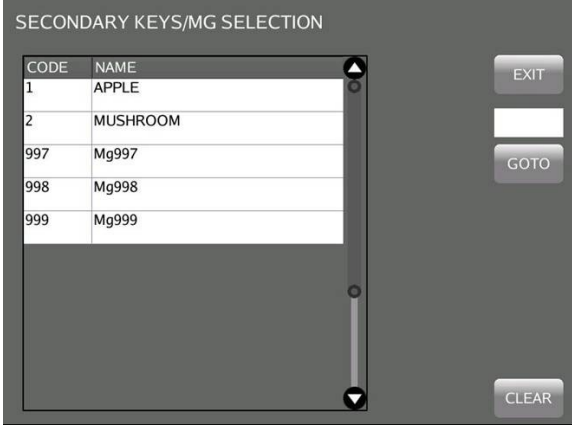

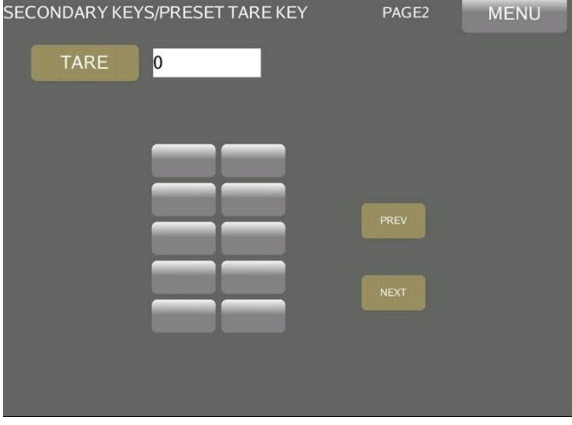

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [SECONDARY KEYS] key.</p>	

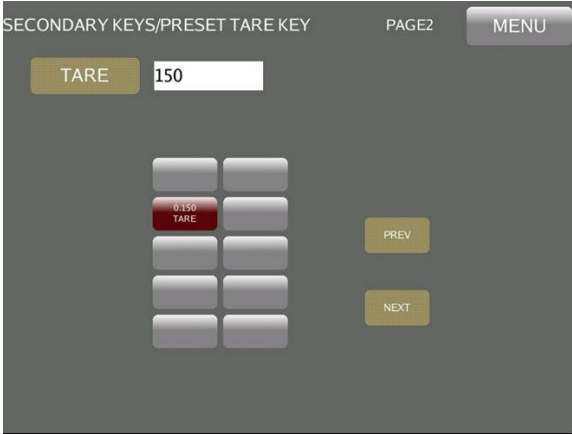

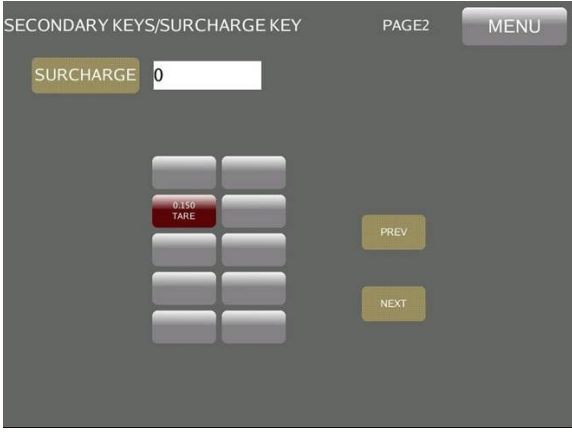

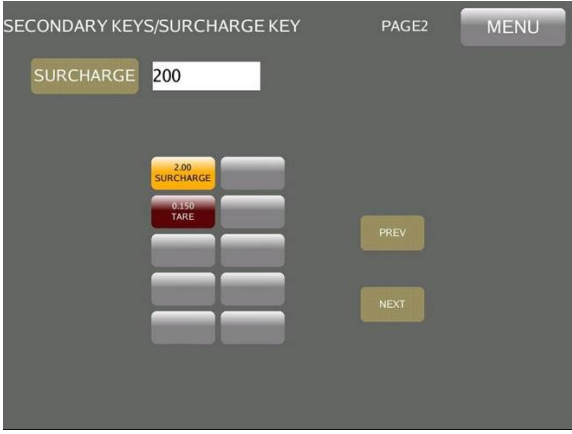

OPERATION	DISPLAY
<p>3. Method 1: Assign by entering the existing PLU Number by using the keypad.</p> <p>Enter the PLU Number by the keypad. (e.g. 6)</p> <p>Touch the desired preset key.</p>	
<p>4. Method 2: Assign by browsing the existing PLU Data.</p> <p>Touch [BROWSE] key to browse the existing PLU Data.</p> <p>Touch the desired PLU key. (e.g. PLU 11–EGG PLANT)</p> <p>Touch the desired preset key.</p>	
<p>5. Touch [PLU] key select the word [FUNCTION] display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR.</p>	

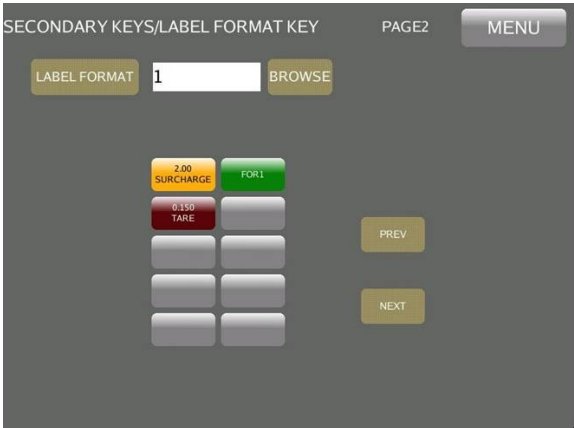

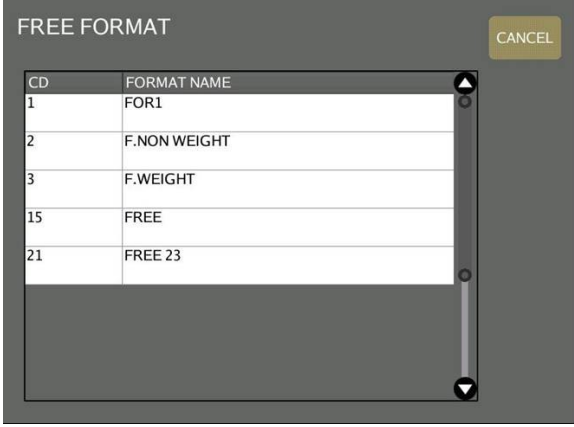

OPERATION	DISPLAY
<p>6. Method 1: Assign by entering the existing Function Number by using the keypad.</p> <p>Enter the Function Number by the keypad. (e.g. 208 for LOGIN)</p> <p>Touch the desired preset key.</p>	
<p>7. Method 2: Assign by browsing the existing Function.</p> <p>Touch [BROWSE] key to browse the existing Function.</p> <p>Note: make sure start the browse from 0 if not will list out from the number will put.</p> <p>Touch the desired Function key. (e.g. LOGOUT 209)</p> <p>Touch the desired preset key.</p>	
<p>8. Touch [PLU] key select the word DEPT display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR.</p>	

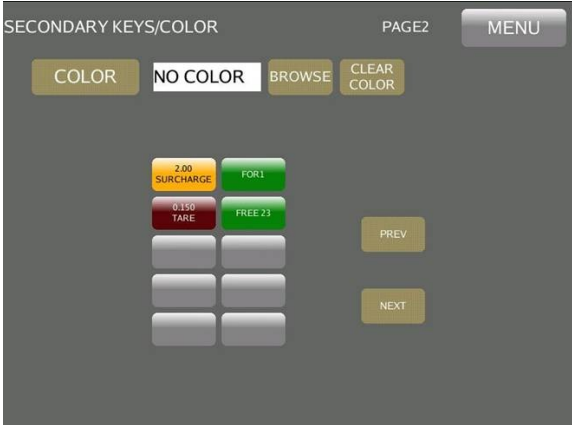

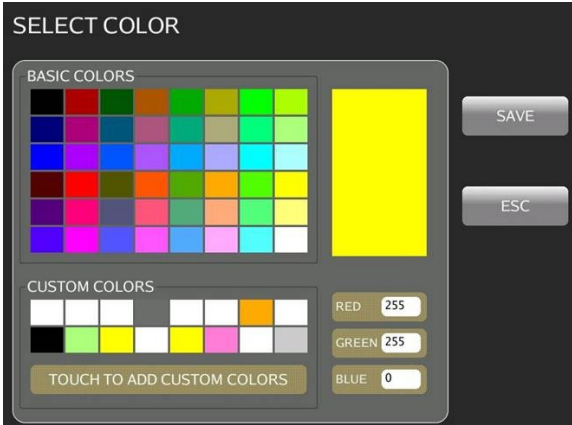

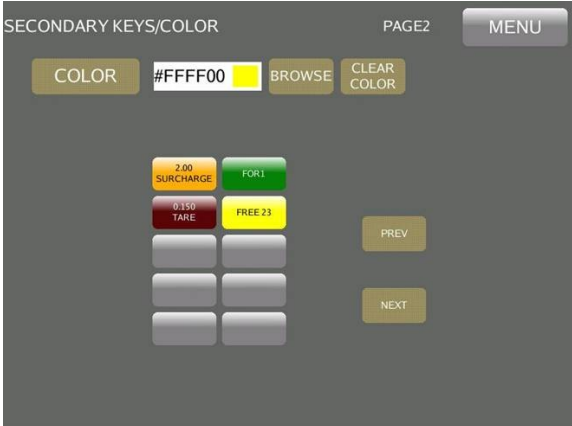

OPERATION	DISPLAY
<p>9. Method 1: Assign by entering the existing Department Number by using the keypad.</p> <p>Enter the Department Number by the keypad. (e.g. 2)</p> <p>Touch the desired preset key.</p>	
<p>10. Method 2: Assign by browsing the existing Department Data.</p> <p>Touch [BROWSE] key to browse the existing Dept Data.</p> <p>Touch the desired Dept key. (e.g. Dept 2 - MEAT)</p> <p>Touch the desired preset key.</p>	
<p>11. Touch [PLU] key select the word GROUP display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	

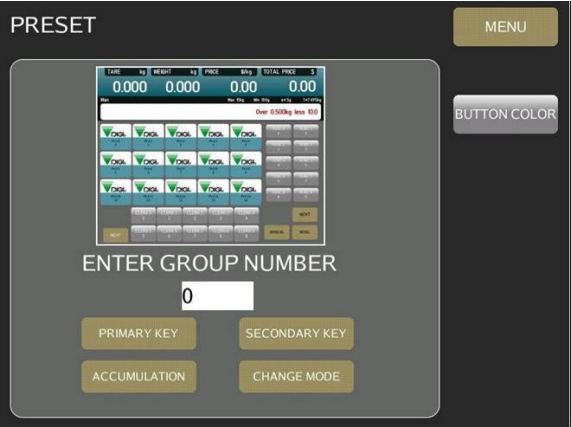

OPERATION	DISPLAY																						
<p>12. Method 1: Assign by entering the existing Group Number by using the keypad.</p> <p>Enter the Group Number by the keypad. (e.g. 3)</p> <p>Touch the desired preset key.</p>																							
<p>13. Method 2: Assign by browsing the existing Group Data.</p> <p>Touch [BROWSE] key to browse the existing Group Data.</p> <p>Touch the desired Group key. OPERATION	DISPLAY
<p>24. Touch [PLU] key select the word COLOR display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, MG, TARE, SURCHARGE, LABEL FORMAT, and COLOR</p>	
<p>25. Assign by browsing the COLOR the existing color. Touch [BROWSE] key to browse the existing color Touch the desired color (e.g. yellow)</p> <p>Note : Press [SAVE] key to save the selection and back to PRIMARY KEYS mode Press [ESC]key to back PRIMARY KEYS mode without saving the color</p>	
<p>26. Touch the desired preset key that had assigned (e.g. Preset key for Free23) The COLOR Key will change to yellow</p>	

OPERATION	DISPLAY
<p>27 Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	 <p>The screenshot shows a 'PRESET' screen with a central keypad. Above the keypad, there are four columns of data: 'PRICE 1', 'PRICE 2', 'PRICE 3', and 'TOTAL PRICE', each with a value of '0.00'. Below the keypad, the text 'ENTER GROUP NUMBER' is displayed above a text input field containing the number '0'. To the right of the keypad, there are four buttons: 'MENU', 'BUTTON COLOR', 'PRIMARY KEY', 'SECONDARY KEY', 'ACCUMULATION', and 'CHANGE MODE'.</p>

4.3 Accumulation Key Programming

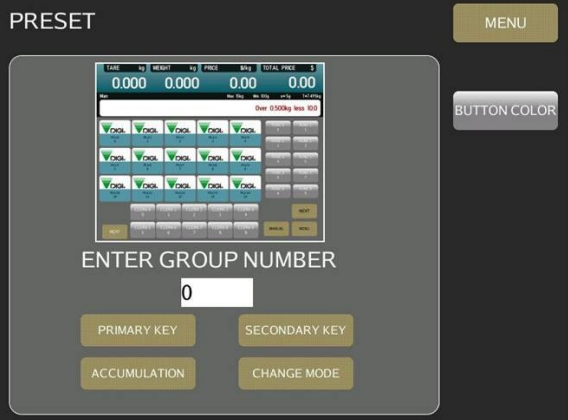

There is 1 page of preset keys in Accumulation Keys Programming Mode. In this mode allow assigning maximum of 5 preset keys for Functions Keys and Flex_Func only, ([refer to 2.3 Accumulation Key Layout](#)). In Registration Mode, Accumulation Key can be use in the Accumulation Mode. There are two methods to assign Functions on preset key.

Note: Non-existing Function Numbers cannot be assigned.

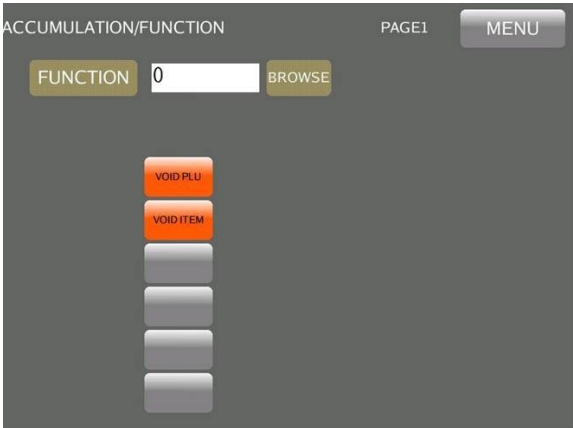

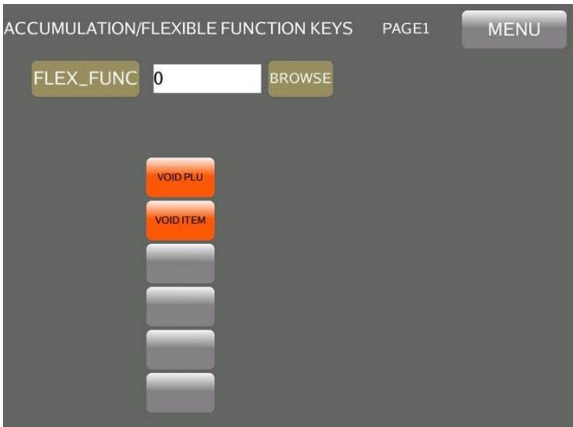

4.3.1 Function Assignment

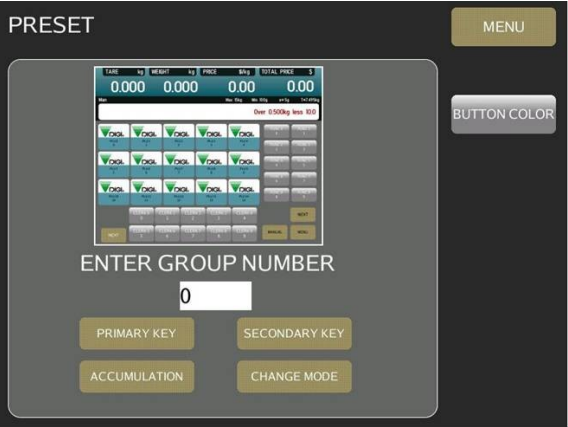

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [ACCUMULATION] key.</p> <p>Note: [DATA TYPE] key for the following selection, FUNCTION, FLEX_FUNC. COLOR</p>	
<p>4. Method 1: Assign by entering the existing Function Number by using the keypad.</p> <p>Enter the Function Number by the keypad. (e.g. 41 for VOID PLU)</p> <p>Touch the desired preset key.</p>	

OPERATION	DISPLAY
<p>5. Method 2: Assign by browsing the existing Function.</p> <p>Touch [BROWSE] key to browse the existing Function.</p>	
<p>6. Touch the desired Function key. (e.g. Function 216 – VOID ITEM)</p>	
<p>7. Touch the desired preset key.</p>	

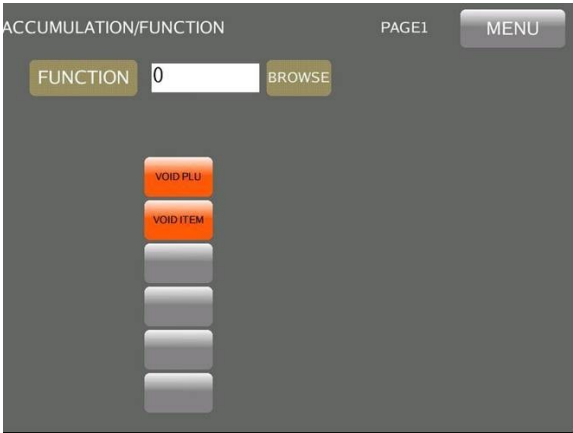

OPERATION	DISPLAY
<p>8. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	 <p>The screenshot shows a 'PRESET' screen with a keypad. At the top, there are four columns of data: 'TARE', 'WEIGHT', 'PRICE', and 'TOTAL PRICE', each with a value of '0.00'. Below this is a keypad with 16 buttons, each labeled 'F001'. To the right of the keypad are two buttons: 'MENU' and 'BUTTON COLOR'. Below the keypad, the text 'ENTER GROUP NUMBER' is displayed above a text input field containing the number '0'. At the bottom, there are four buttons: 'PRIMARY KEY', 'SECONDARY KEY', 'ACCUMULATION', and 'CHANGE MODE'.</p>

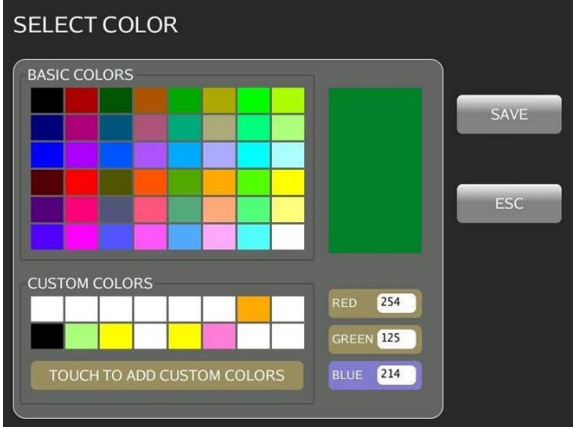

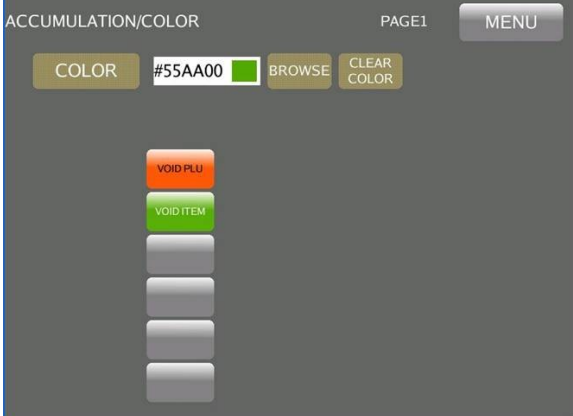

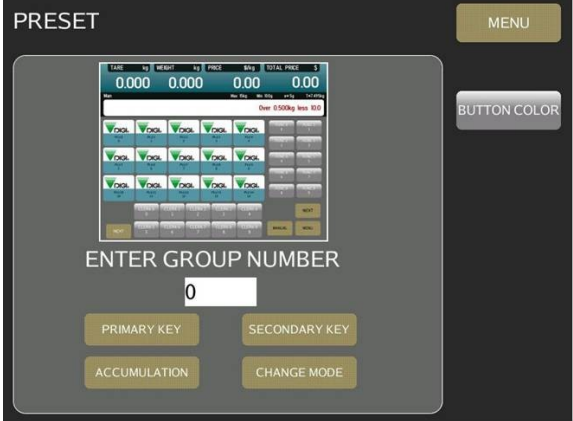

4.3.2 Flex_Function Assignment

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [ACCUMULATION] key.</p>	
<p>3. Touch [FUNCTION] key select the word FLEX_FUNC display on the key.</p> <p>Note: [DATA TYPE] key for the following selection, FUNCTION & FLEX_FUNC (cannot be assign because not discount type).</p>	

OPERATION	DISPLAY
<p>4. Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode.</p>	 <p>The screenshot shows a 'PRESET' screen with a central keypad. Above the keypad, there are four numerical displays showing '0.000' and '0.00'. Below the keypad, the text 'ENTER GROUP NUMBER' is displayed above a text input field containing the number '0'. At the bottom of the screen, there are four buttons: 'PRIMARY KEY', 'SECONDARY KEY', 'ACCUMULATION', and 'CHANGE MODE'. On the right side of the screen, there are two additional buttons: 'MENU' and 'BUTTON COLOR'.</p>

4.3.2 Color Assignment

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [ACCUMULATION] key.</p>	
<p>3. Touch [FUNCTION] key select the word COLOR display on the key.</p>	

OPERATION	DISPLAY
<p>4. Assign by browsing the COLOR the existing color. Touch [BROWSE] key to browse the existing color Touch the desired color (e.g. Green) Note : Press [SAVE] key to save the selection and back to ACCUMULATION mode Press [ESC]key to back ACCUMULATION mode without saving the color</p>	
<p>5. Touch the desired preset key that had assigned (e.g. VOID ITEM) The COLOR Key will change to Green</p>	
<p>6. Press [X] key at keypad to exit to keys selection mode. Note: Touch [MENU] key to exit to the Programming Mode.</p>	

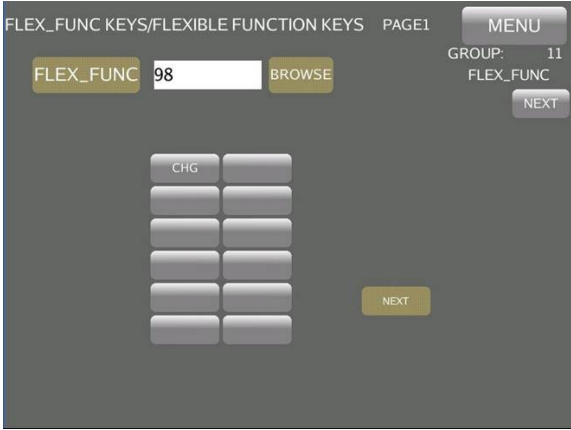

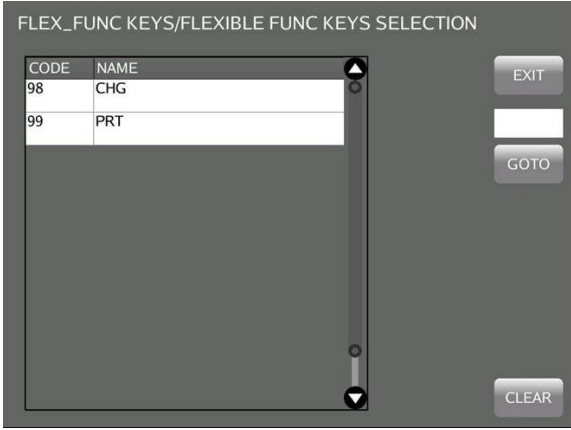

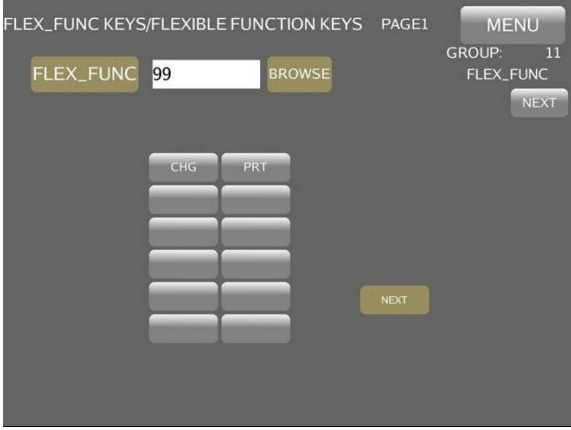

4.4 Change Mode key Programming

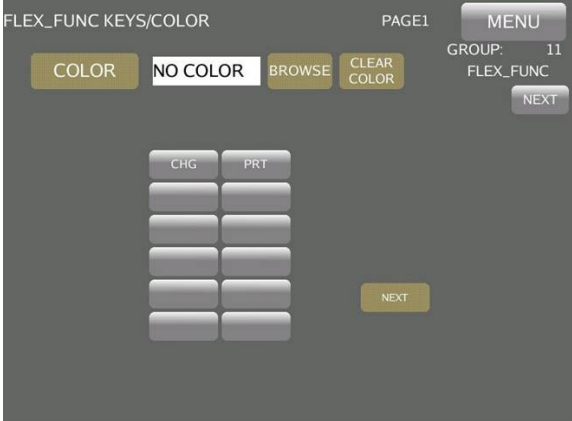

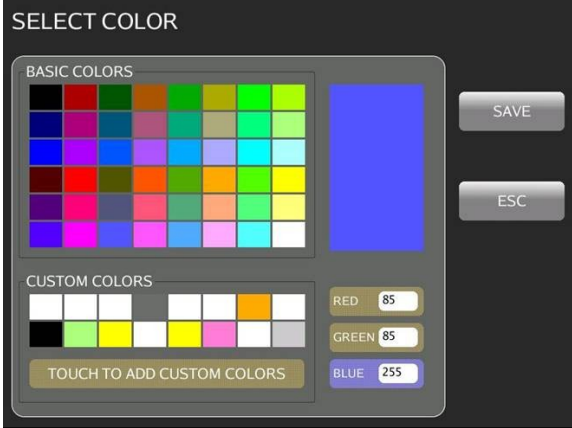

There are 2 pages of preset keys in Change Mode Keys Programming Mode. In this mode allow assigning maximum of 200 preset keys for all the PLU and other Functions Keys, ([refer to 2.4 Change Mode Key Layout](#)).

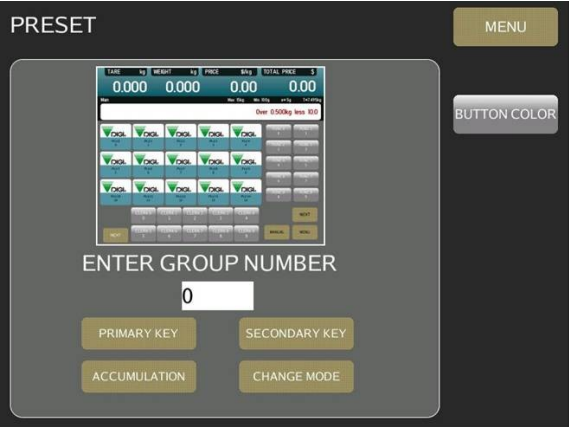

Note: Non-existing PLU and Function Numbers cannot be assigned.

4.4.1 Flex_Func Assignment

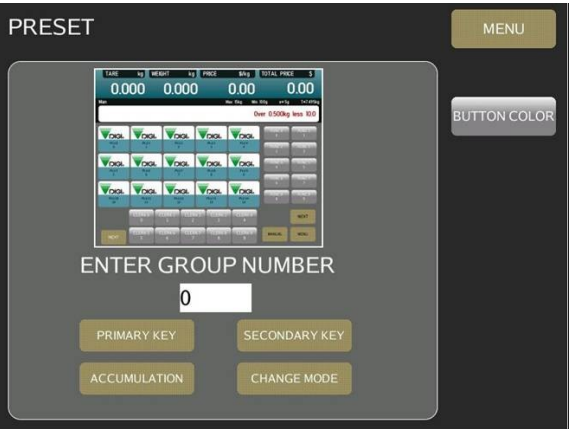

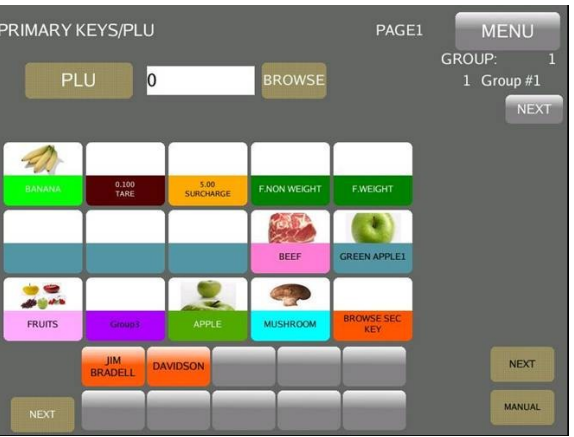

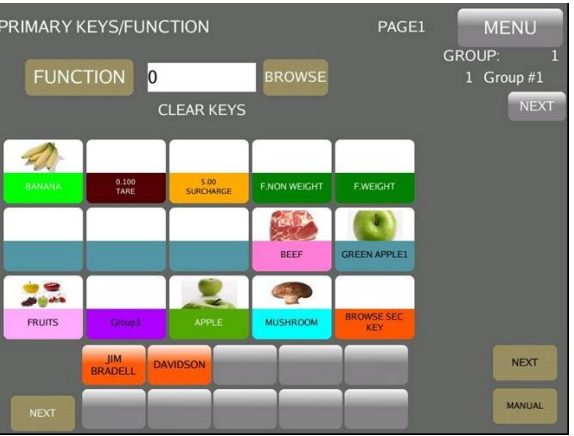

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [CHANGE MODE KEYS] key.</p>	
<p>3. Touch the word [FLEX_FUNC] display on the key.</p> <p>Note: [DATA TYPE] key only show FLEX_FUNC and COLOR.</p>	

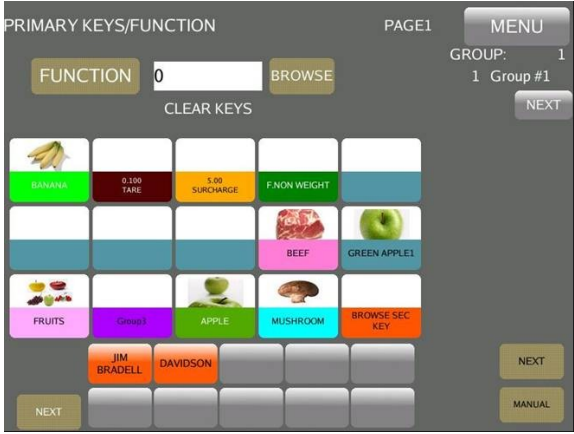

OPERATION	DISPLAY
<p>4. Method 1: Assign by entering the existing Flex_Function Number by using the keypad.</p> <p>Enter the Flex_Function Number by the keypad. (e.g. 98 for CHANGE)</p> <p>Touch the desired preset key.</p>	
<p>5. Method 2: Assign by browsing the existing Flex_Function.</p> <p>Touch [BROWSE] key to browse the existing Flex_Function.</p>	
<p>6. Touch the desired Flex_Function key. (e.g. Flex_Function 99 PRINT)</p> <p>Touch the desired preset key.</p>	

OPERATION	DISPLAY
<p>7. Touch [FLEX_FUNC] key select the word COLOR display on the key.</p>	
<p>8. Touch [BROWSE] key to browse the existing color Touch the desired color (e.g. Blue) Note : Press [SAVE] key to save the selection and back to FLEX_FUNC KEYS mode Press [ESC]key to back FLEX_FUNC KEYS mode without saving the color</p>	
<p>7. Touch the desired preset key that had assigned (e.g. PRT key) The COLOR Key will change to Green</p>	

OPERATION	DISPLAY
<p>Press [X] key at keypad to exit to keys selection mode.</p> <p>Note: Touch [MENU] key to exit to the Programming Mode</p>	 <p>The screenshot shows a 'PRESET' screen with a central keypad. The keypad has a grid of buttons, some labeled 'V.O.C.S.' and others with symbols. Below the keypad, the text 'ENTER GROUP NUMBER' is displayed above a numeric input field containing '0'. To the right of the keypad, there are two buttons: 'MENU' and 'BUTTON COLOR'. Below the keypad, there are four buttons: 'PRIMARY KEY', 'SECONDARY KEY', 'ACCUMULATION', and 'CHANGE MODE'. At the top of the screen, there are several data fields with values like '0.000' and '0.00'.</p>

5. Clear Assigned Preset Key

OPERATION	DISPLAY
<p>1. In Preset Key Programming, Enter group number and press PLU key. (e.g. 0)</p> <p>Note: adjust Primary keys, Secondary keys and Accumulation keys to desired display size</p>	
<p>2. Touch [PRIMARY KEYS] key.</p>	
<p>3. Touch [PLU] key select the word FUNCTION display on the key.</p> <p>Note: [DATA TYPE] key will toggle for the following selection, PLU, FUNCTION, DEPT, GROUP, CLERK, MG, TARE, SUCHARGE, LABEL FORMAT and COLOR</p>	

OPERATION	DISPLAY
<p>4. Touch the desired preset key to be deleted/clear. (e.g. Preset Key Row #1, Column #5)</p> <p>Note 1: Press [X] key at keypad to exit to the keys selection mode.</p> <p>Note 2: Touch [MENU] key to exit to the Programming Mode.</p>	 <p>The screenshot shows a keypad interface titled 'PRIMARY KEYS/FUNCTION'. At the top, there is a 'FUNCTION' field with the number '0' and a 'BROWSE' button. Below this is a 'CLEAR KEYS' button. The keypad consists of several rows of colored buttons with icons and text: <ul style="list-style-type: none"> Row 1: BANANA (green), 0.150 TARE (dark red), 5.00 SURCHARGE (orange), F.NON WEIGHT (green), and a blank button. Row 2: A blank button, a blank button, BEEF (pink), and GREEN APPLE (light blue). Row 3: FRUITS (pink), a blank button, APPLE (green), MUSHROOM (cyan), and BROWSE SEC KEY (orange). Row 4: JIM BRADELL (orange), DAVIDSON (orange), and three blank buttons. On the right side of the keypad, there is a 'MENU' button at the top, followed by 'GROUP: 1' and '1 Group #1'. Below these are 'NEXT' and 'MANUAL' buttons. The text 'PAGE1' is visible in the top right corner of the keypad area.</p>

PRINT FORMAT

The Free Format enables you to design your own label formats, by setting print angles, print positions and the character size of the programmable items. You can create new formats by copying an existing label format and use it as a base or make a totally new label format within the limits of the label size.

1. General Information

Labels format within the following height and width can be created.

- Up to 99 Free Formats can be stored in the memory, apart from the other 16 standard formats.
- Standard format can be used as a basic format for creating a new format.
- Visual screen editing or numeric data setting performs layout creation.
- Print position of each item is programmed using mm or dots.
- One Item Label or one Total Label is available for each Free Format number (F1 ~ F8).
- 4 Print Angles can be set for all item data: 0, 90, 180 and 270 degrees.

2. Print Area, Print Position and Print Angles

All changeable item data should be programmed 10mm below from the top of the label. The top 10mm of the label should be used for invariable data such as Shop Name, since this area is printed when issuing the last label. Please do not program any item closer than 1mm to the edges of the label.

The print position of each item is determined by setting the interval from point (X = 0, Y = 0) to the base position of the data position (C point on schematic 3 below). The X, Y values need to be entered by mm.

- 1 dot (horizontal) = 0.135mm
- 1 dot (vertical) = 0.155mm

2.1 Print Area

The drawing shows two labels. The gray area is the area that will be printed in one print operation. The top 10mm of the label should be reserved for Item Data that is invariable, such as Shop Name. You should not position Item data closer than 1mm to the edges of the label.

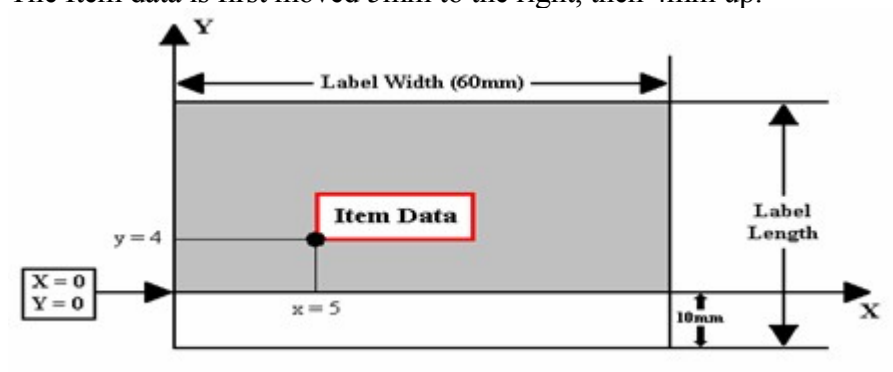

2.2 Print Position

The printing position of each item data is decided by setting the distance from 0 point (X = 0, Y = 0) to the base position (X value, Y value).

Example: (measurement is in mm)

$$X = 5 \quad Y = 4$$

The Item data is first moved 5mm to the right, then 4mm up.

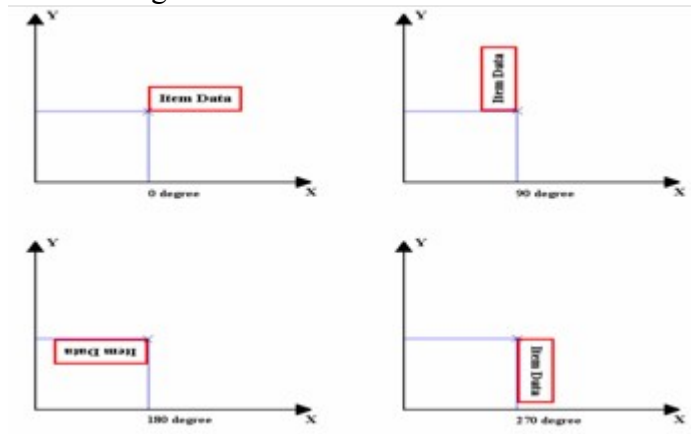

2.3 Print Angles

Print angle of each Print Item data can be selected from 4 different angles, 0 degree, 90 degree,

180 degree and 270 degree.

The drawing below shows the direction the item data is facing at the different angles.

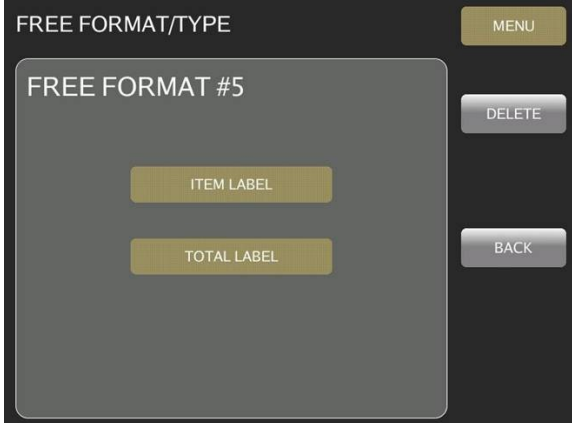

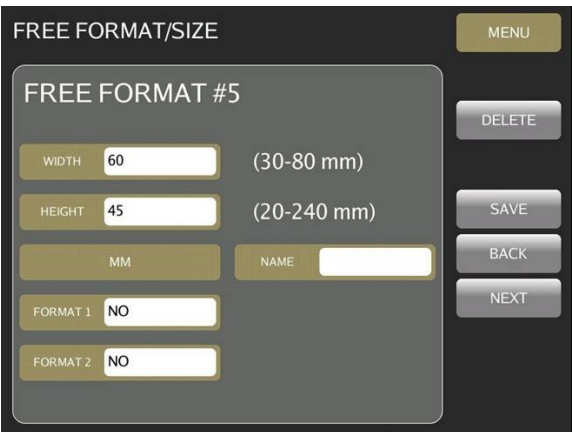

3. Entry to Free Format Programming

There are 2 types of label:

- **Item Label:** The Item Label can be programmed with up to 72 different item data and is used for printing single transactions at Manual Mode and Prepack Mode.
- **Total Label:** The Total Label can be programmed with up to 23 different item data and is used for printing multiple transaction labels for counter sales at Manual Mode, Sub Totals and Grand Totals at Prepack Mode.

OPERATION	DISPLAY
1. In MENU Mode	
2. Touch [PROGRAMMING] key [to enter to Programming Mode.	

OPERATION	DISPLAY																																								
<p>3. Touch [PRINTFMT] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed Free Format File will be listed in FREE FORMAT PROGRAMMING Display Screen.</p> <p>Note 3: Display Screen also used to browse existing Format/Free Format Files using the scroll bar and to select file for modification.</p>	 <table border="1" data-bbox="911 360 1347 712"> <thead> <tr> <th>TYPE</th> <th>WIDTH</th> <th>HEIGHT</th> <th>NAME</th> </tr> </thead> <tbody> <tr><td>F1</td><td>80</td><td>60</td><td>FOR1</td></tr> <tr><td>F2</td><td>60</td><td>40</td><td>F.NON WEIGHT</td></tr> <tr><td>F3</td><td>50</td><td>40</td><td>F.WEIGHT</td></tr> <tr><td>F10</td><td>50</td><td>61</td><td>ALL</td></tr> <tr><td>F14</td><td>50</td><td>61</td><td>FSD</td></tr> <tr><td>F15</td><td>80</td><td>60</td><td>FREE</td></tr> <tr><td>F20</td><td>50</td><td>61</td><td>FSD W43</td></tr> <tr><td>F21</td><td>80</td><td>60</td><td>FREE 23</td></tr> <tr><td>F22</td><td>50</td><td>61</td><td>TRACE</td></tr> </tbody> </table>	TYPE	WIDTH	HEIGHT	NAME	F1	80	60	FOR1	F2	60	40	F.NON WEIGHT	F3	50	40	F.WEIGHT	F10	50	61	ALL	F14	50	61	FSD	F15	80	60	FREE	F20	50	61	FSD W43	F21	80	60	FREE 23	F22	50	61	TRACE

<p>4. Enter a new Free Format number. (e.g. 5 – F5) Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>																																									
<p>5. Touch the desired Label Format data to copy from. (e.g. T12)</p>																																									

OPERATION	DISPLAY
<p>6. If to create a format used for Item Label, touch [ITEM LABEL] key to enter Item Free Format screen.</p> <p>Note: If necessary to change Width or Height value, touch the desired blue key area and enter the value by keypad.</p>	
<p>7. Press [PLU] key to enter, follow by touch [FIELDS] folder to select the item data.</p> <p>Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 2: To save data, touch [DISPLAY] folder and touch [SAVE] key.</p>	
<p>8. If to create a format used for Total Label, touch [TOTAL LABEL] key to enter Total Free Format screen.</p> <p>Note: If necessary to change Width or Height value, touch the desired key area and enter the value by keypad.</p>	

OPERATION	DISPLAY
<p>9. Press [PLU] key to enter, follow by touch [FIELDS] folder to select the item data.</p> <p>Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 2: To save data, touch [DISPLAY] folder and touch [SAVE] key.</p>	

4. Test Printing

You can print a sample label with all the print areas of programmed items to show the positions and sizes.

OPERATION	DISPLAY
<p>1. In Item Free Format mode, under [DISPLAY] folder.</p>	
<p>2. Touch [PRINT] key to print out label.</p>	
<p>3. Touch [MENU] key to return to Programming Mode.</p> <p>Note: A message “Do you want to save before exit to main menu?” will appear.</p>	

OPERATION	DISPLAY
<p>4. Touch the desired key.</p> <p>Note: Touch [SAVE] key to exit with saving data. Touch [QUIT] key to exit without saving data. Touch [CANCEL] key to return back to the previous Free Format page.</p>	

5. Item Data Positioning

The following item data listed below is the full list of the items possible to program on a Free Format.

The method of setting the numerous Item data differs and is therefore grouped into 5 types.

Item Label Format			
Item Data	Type	Item Data	Type
PLU No.	1	Original Price	1
Item Price Before Tax	1	Original Unit Price	1
Unit Price	1	Frame 1 ~ 10	6
Weight	1	Image 1 ~ 10	4
Quantity	1	Text 1 ~ 16	5
Packed Date	1	Born	1
Packed Time	1	Fatten	1
Commodity Name	2	Slaughter House	1
Quantity Symbol	1	Cutting Hall	1
Sell By Date	1	Reference	1
Sell By Time	1	Origin	1
Barcode	3	Multi Barcode 1	7
Shop Name	2	Multi Barcode 2	7
Discount Value	1	Temperature	1
Used By Date	1	Serial Number	1
Logo	2	Gross Weight	1
Main Group Code	1	Rewrap	1
Department Code	1	KIND	1
Scale Number	1	Category	1
Ingredients	2	Breed	1
Special Message	2	Contact	1
Item Price After Tax	1	GTIN	1
Item Tax Rate	1	Supplier Code	1
Clerk Code	1	Supplier Name	1
Tare	1	Supplier Address 1	1
Place	2	Supplier Address 2	1
Average Price	1	Traceability ID	1
Average Weight	1	2 nd Unit Price	1

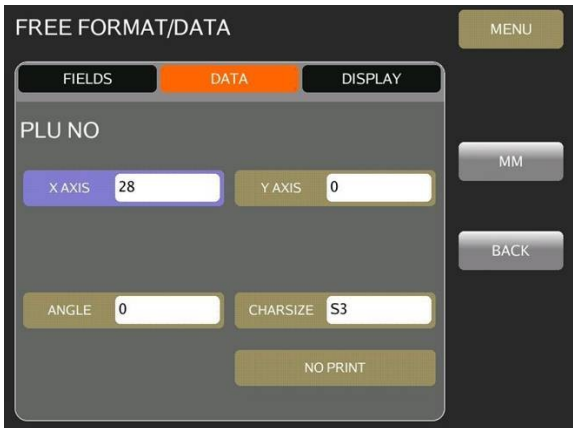

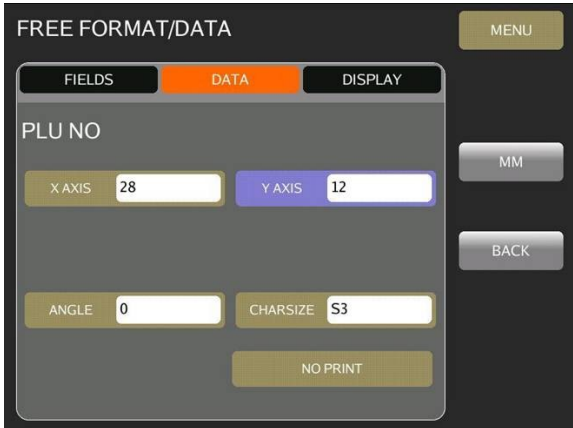

Total Label Format			
Item Data	Type	Item Data	Type
PLU No.	1	TT Tittle	1
Pack Date	1	Barcode	3
Weight	1	Clerk	1
Quantity	1	TEXT 17 ~ 20	5
QTY Unit	1	Multi Barcode 1	7
Price after tax	1	Multi Barcode 2	7
Pack time	1	Serial No	1

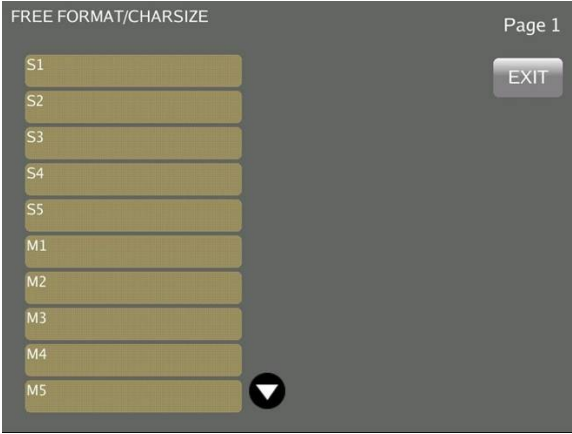

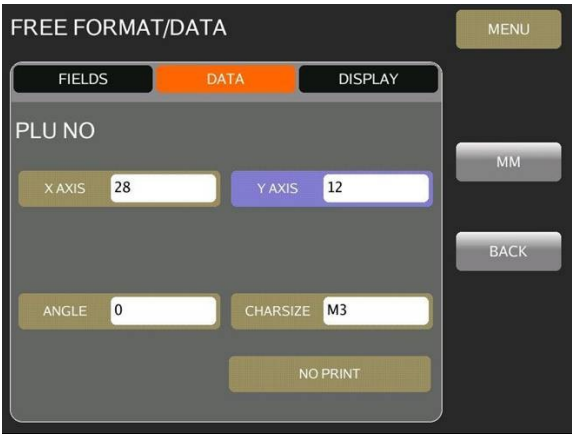

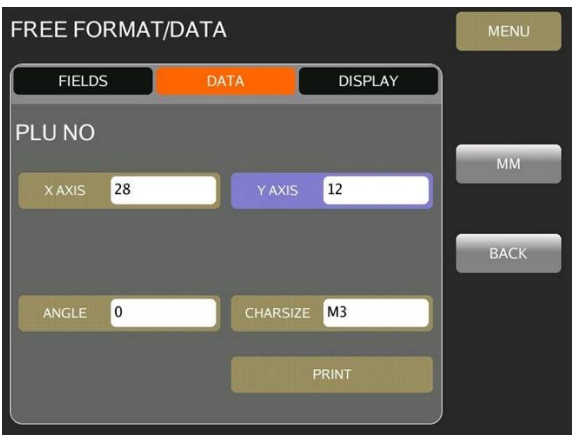

Programmable Data	Type1	Type2	Type3	Type4	Type5	Type6	Type7
X Position	YES	YES	YES	YES	YES	YES	YES
Y Position	YES	YES	YES	YES	YES	YES	YES
Angle	YES	YES	YES	YES	YES	NO	YES
Status	YES	YES	YES	YES	YES	YES	YES
Character Size	YES	NO	NO	NO	NO	NO	NO
Width	NO	YES	NO	YES	YES	NO	NO
Height	NO	YES	YES	YES	YES	NO	YES
Image Link	NO	NO	NO	YES	NO	NO	NO
Text Link	NO	NO	NO	NO	YES	NO	NO
Thicknet dot	NO	NO	NO	NO	NO	YES	NO
Multi Barcode Link	NO	NO	NO	NO	NO	NO	YES

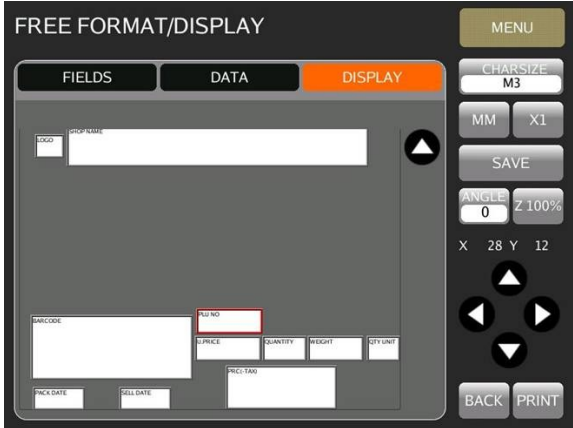

5.1 Type 1 Data Setting

The Type 1 data setting is the numeric and fixed data. The position of Type 1 item data is decided by X, Y values, character size, angle and status. 10 different character sizes are available. The size of the print area varies according to the character size selected.

Example: Procedure to set **PLU NO.**

OPERATION	DISPLAY
<p>1. In Item Free Format mode, under [FIELDS] folder, select the item data. (e.g. PLU NO)</p> <p>Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 2: Touch the selected item field; display will automatically go to DATA folder.</p>	
<p>2. Touch [X AXIS] key and enter the value by keypad. (e.g. 38)</p>	
<p>3. Touch [Y AXIS] key and enter the value by keypad. (e.g. 14)</p>	

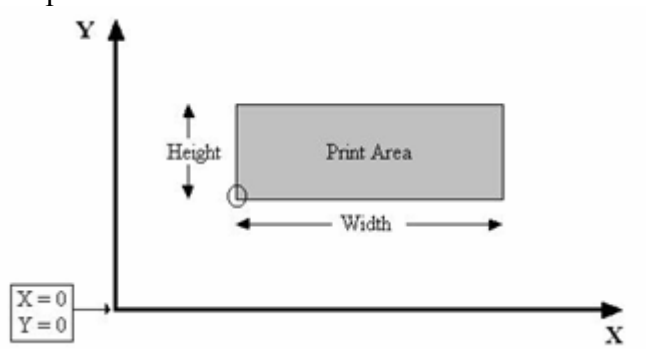

OPERATION	DISPLAY
<p>4. Touch [CHARSIZE] key.</p> <p>Note: All Character Size will be listed</p>	
<p>5. Touch the desired character size. (e.g. M3)</p>	
<p>6. Touch [STATUS] key until the word PRINT display on the key.</p> <p>Note: [STATUS] key will toggle for the following selection, NONWEIGHT, WEIGHT, PRINT and NO PRINT.</p>	

OPERATION	DISPLAY																																								
<p>7. Touch [DISPLAY] folder to view the programmed screen.</p> <p>Note: In this Display Mode, character size, position and angle still allowed to be changed. (Refer to Note 1.)</p>																																									
<p>8. Touch [SAVE] key to store the data. Will prompt out message “4357 Saving In Progress”</p> <p>Note: Touch [MENU] key to exit without saving the data. A message “Do you want to save before exit to main menu?” will appear. Then touch the desired key.</p>	 <table border="1" data-bbox="912 786 1348 1137"> <thead> <tr> <th>TYPE</th> <th>WIDTH</th> <th>HEIGHT</th> <th>NAME</th> </tr> </thead> <tbody> <tr><td>F1</td><td>80</td><td>60</td><td>FOR1</td></tr> <tr><td>F2</td><td>60</td><td>40</td><td>F.NON WEIGHT</td></tr> <tr><td>F3</td><td>50</td><td>40</td><td>F.WEIGHT</td></tr> <tr><td>F5</td><td>60</td><td>45</td><td>FREE FORMAT 5</td></tr> <tr><td>F10</td><td>50</td><td>61</td><td>ALL</td></tr> <tr><td>F14</td><td>50</td><td>61</td><td>FSD</td></tr> <tr><td>F15</td><td>80</td><td>60</td><td>FREE</td></tr> <tr><td>F20</td><td>50</td><td>61</td><td>FSD W43</td></tr> <tr><td>F21</td><td>80</td><td>60</td><td>FREE 23</td></tr> </tbody> </table>	TYPE	WIDTH	HEIGHT	NAME	F1	80	60	FOR1	F2	60	40	F.NON WEIGHT	F3	50	40	F.WEIGHT	F5	60	45	FREE FORMAT 5	F10	50	61	ALL	F14	50	61	FSD	F15	80	60	FREE	F20	50	61	FSD W43	F21	80	60	FREE 23
TYPE	WIDTH	HEIGHT	NAME																																						
F1	80	60	FOR1																																						
F2	60	40	F.NON WEIGHT																																						
F3	50	40	F.WEIGHT																																						
F5	60	45	FREE FORMAT 5																																						
F10	50	61	ALL																																						
F14	50	61	FSD																																						
F15	80	60	FREE																																						
F20	50	61	FSD W43																																						
F21	80	60	FREE 23																																						

- Note 1:** Touch **[CHARSIZE]** key for character size selection.
 Touch **[X1]** key for movement interval selection (X1, X10 & X50) and use **[UP]**, **[DOWN]**, **[LEFT]** and **[RIGHT]** key to move the position of the programmed item data.
 Touch **[ANGLE]** key for angle selection (0, 90, 180 & 270).
 Touch **[ARROW UP]** or **[ARROW DOWN]** key to move the screen up and down.
 Touch Item and drag to change the position.

5.2 Type 2 Data Setting

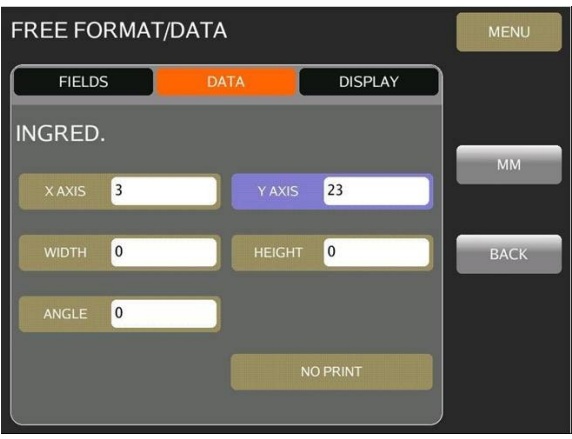

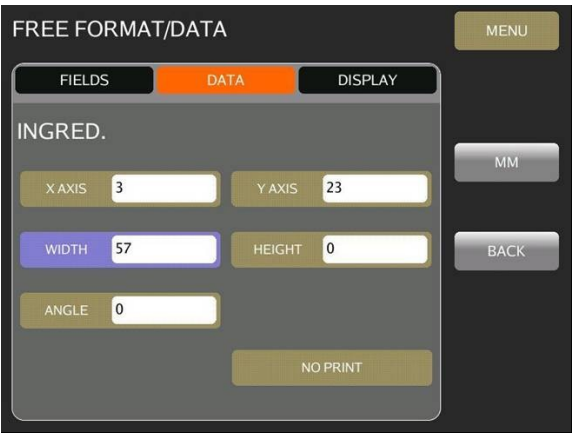

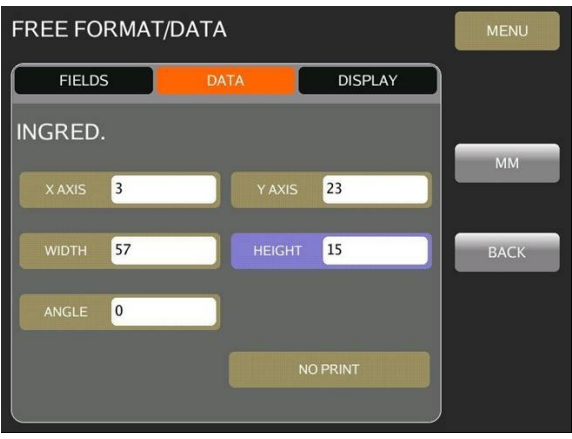

The Type 2 data setting is the positioning of alphanumeric data. The positioning of Type 2 data is decided by X, Y values, height, width, angle and status. The height and width decides the print area size as shown below.

Note: The number of lines printed on the label will depend on the selected character size and the size of the programmed print area.

Example: Procedure to set Ingredient.

OPERATION	DISPLAY
<p>1. In Item Free Format mode, under [FIELDS] folder, select the item data. (e.g. Ingredient)</p> <p>Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 2: Touch the selected item field; display will automatically go to DATA folder.</p>	
<p>2. Touch [X AXIS] key and enter the value by keypad. (e.g. 2)</p>	

OPERATION	DISPLAY
<p>3. Touch [Y AXIS] key and enter the value by keypad. (e.g. 24)</p>	
<p>4. Touch [WIDTH] key and enter the value by keypad. (e.g. 57)</p>	
<p>5. Touch [HEIGHT] key and enter the value by keypad. (e.g. 13)</p>	

OPERATION	DISPLAY																																								
<p>6. Touch [STATUS] key until the word PRINT display on the key.</p> <p>Note: [STATUS] key will toggle for the following selection, NONWEIGHT, WEIGHT, PRINT and NO PRINT.</p>																																									
<p>7. Touch [DISPLAY] folder to view the programmed screen.</p> <p>Note: In this Display Mode, position, width, height and angle still allowed to be changed. (Refer to Note 1.)</p>																																									
<p>8. Touch [SAVE] key to store the data with message “4367 Saving in Progress”</p> <p>Note: Touch [MENU] key to exit without saving the data. A message “Do you want to save before exit to main menu?” will appear. Then touch the desired key.</p>	<table border="1"> <thead> <tr> <th>TYPE</th> <th>WIDTH</th> <th>HEIGHT</th> <th>NAME</th> </tr> </thead> <tbody> <tr><td>F1</td><td>80</td><td>60</td><td>FOR1</td></tr> <tr><td>F2</td><td>60</td><td>40</td><td>F.NON WEIGHT</td></tr> <tr><td>F3</td><td>50</td><td>40</td><td>F.WEIGHT</td></tr> <tr><td>F5</td><td>60</td><td>45</td><td>FREE FORMAT 5</td></tr> <tr><td>F10</td><td>50</td><td>61</td><td>ALL</td></tr> <tr><td>F14</td><td>50</td><td>61</td><td>FSD</td></tr> <tr><td>F15</td><td>80</td><td>60</td><td>FREE</td></tr> <tr><td>F20</td><td>50</td><td>61</td><td>FSD W43</td></tr> <tr><td>F21</td><td>80</td><td>60</td><td>FREE 23</td></tr> </tbody> </table>	TYPE	WIDTH	HEIGHT	NAME	F1	80	60	FOR1	F2	60	40	F.NON WEIGHT	F3	50	40	F.WEIGHT	F5	60	45	FREE FORMAT 5	F10	50	61	ALL	F14	50	61	FSD	F15	80	60	FREE	F20	50	61	FSD W43	F21	80	60	FREE 23
TYPE	WIDTH	HEIGHT	NAME

F3	50	40	F.WEIGHT																																						
F5	60	45	FREE FORMAT 5																																						
F10	50	61	ALL																																						
F14	50	61	FSD																																						
F15	80	60	FREE																																						
F20	50	61	FSD W43																																						
F21	80	60	FREE 23																																						

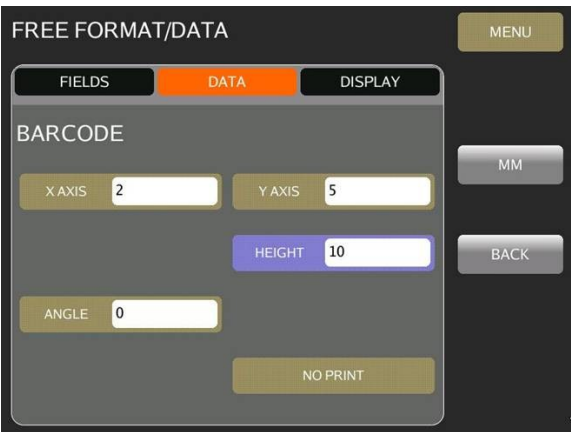

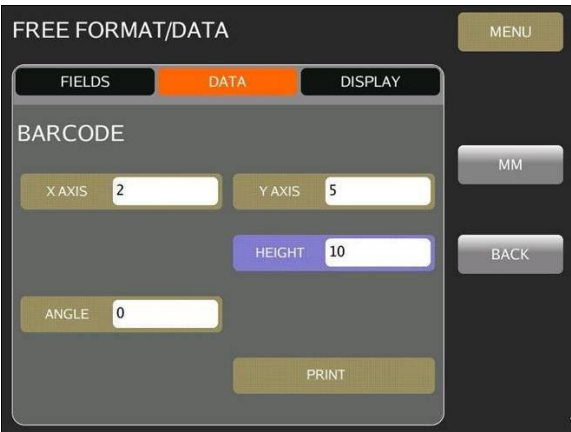

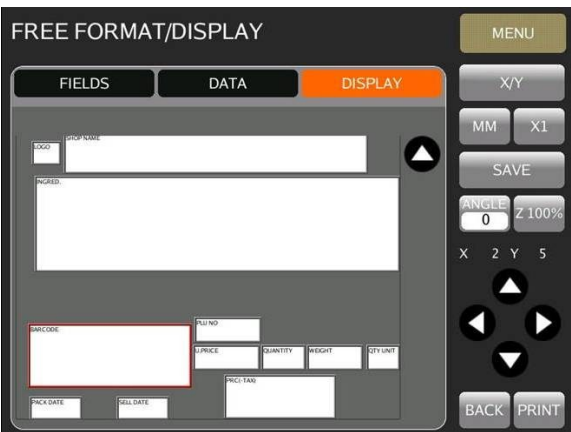

- Note 1:** Touch **[W/H]** key for switching key between **[X/Y]** and **[W/H]**.
 Touch **[X1]** key for movement interval selection (X1, X10 & X50) and use **[UP]**, **[DOWN]**, **[LEFT]** and **[RIGHT]** key to move the position of the programmed item data.
 Touch **[ANGLE]** key for angle selection (0, 90, 180 & 270).
 Touch **[ARROW UP]** or **[ARROW DOWN]** key to move the screen up and down.
 Touch Item and drag to change the position.

5.3 Type 3 Data Setting

The Type 3 data setting is the barcode. Barcode position is decided by X, Y values.

Example: Procedure to set Barcode.

OPERATION	DISPLAY
<p>1. In Item Free Format mode, under [FIELDS] folder, select the item data. (e.g. Barcode)</p> <p>Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 2: Touch the selected item field; display will automatically go to DATA folder.</p>	
<p>2. Touch [X AXIS] key and enter the value by keypad. (e.g. 2)</p>	
<p>3. Touch [Y AXIS] key and enter the value by keypad. (e.g. 1)</p>	

OPERATION	DISPLAY
<p>4. Touch [HT] key and enter the value by keypad. (e.g. 16)</p>	
<p>5. Touch [STATUS] key until the word PRINT display on the key.</p> <p>Note: [STATUS] key will toggle for the following selection, NONWEIGHT, WEIGHT, PRINT and NO PRINT.</p>	
<p>6. Touch [DISPLAY] folder to view the programmed screen.</p> <p>Note: In this Display Mode, position, width, height and angle still allowed to be changed. (Refer to Note 1.)</p>	

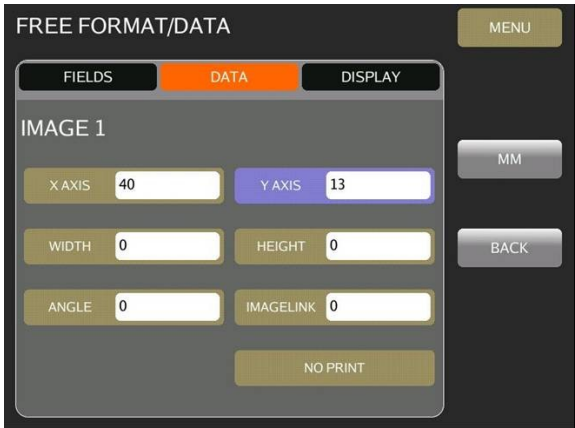

OPERATION	DISPLAY																																								
<p>7. Touch [SAVE] key to store the data. with message “4367 Saving in Progress”</p> <p>Note: Touch [MENU] key to exit without saving the data. A message “Do you want to save before exit to main menu?” will appear. Then touch the desired key.</p>	<table border="1"> <thead> <tr> <th>TYPE</th> <th>WIDTH</th> <th>HEIGHT</th> <th>NAME</th> </tr> </thead> <tbody> <tr><td>F1</td><td>80</td><td>60</td><td>FOR1</td></tr> <tr><td>F2</td><td>60</td><td>40</td><td>F.NON WEIGHT</td></tr> <tr><td>F3</td><td>50</td><td>40</td><td>F.WEIGHT</td></tr> <tr><td>F5</td><td>60</td><td>45</td><td>FREE FORMAT 5</td></tr> <tr><td>F10</td><td>50</td><td>61</td><td>ALL</td></tr> <tr><td>F14</td><td>50</td><td>61</td><td>FSD</td></tr> <tr><td>F15</td><td>80</td><td>60</td><td>FREE</td></tr> <tr><td>F20</td><td>50</td><td>61</td><td>FSD W43</td></tr> <tr><td>F21</td><td>80</td><td>60</td><td>FREE 23</td></tr> </tbody> </table>	TYPE	WIDTH	HEIGHT	NAME	F1	80	60	FOR1	F2	60	40	F.NON WEIGHT	F3	50	40	F.WEIGHT	F5	60	45	FREE FORMAT 5	F10	50	61	ALL	F14	50	61	FSD	F15	80	60	FREE	F20	50	61	FSD W43	F21	80	60	FREE 23
TYPE	WIDTH	HEIGHT	NAME																																						
F1	80	60	FOR1																																						
F2	60	40	F.NON WEIGHT																																						
F3	50	40	F.WEIGHT																																						
F5	60	45	FREE FORMAT 5																																						
F10	50	61	ALL																																						
F14	50	61	FSD																																						
F15	80	60	FREE																																						
F20	50	61	FSD W43																																						
F21	80	60	FREE 23																																						

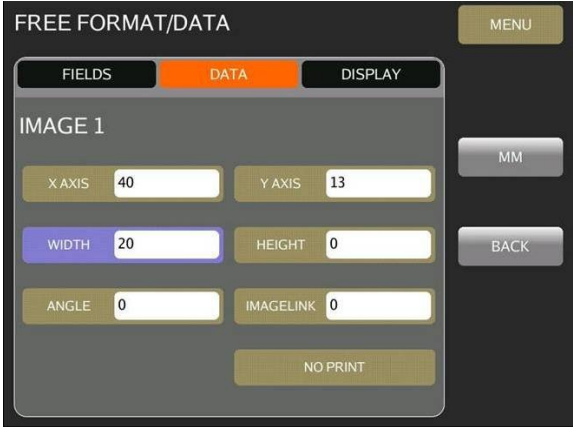

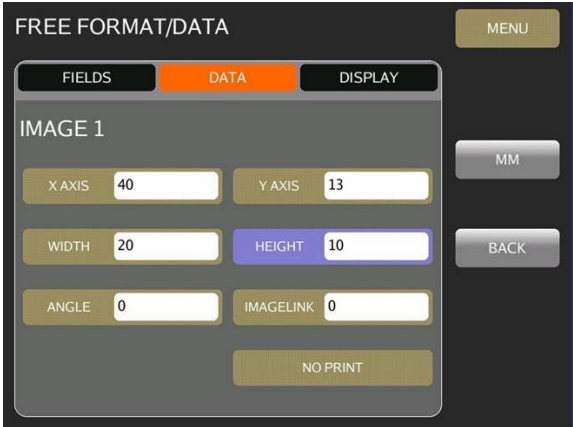

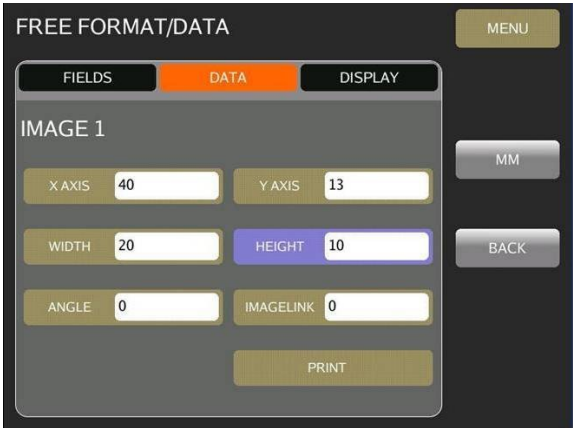

- Note 1:** Touch **[W/H]** key for switching key between **[X/Y]** and **[W/H]**.
 Touch **[X1]** key for movement interval selection (X1, X10 & X50) and use **[UP]**, **[DOWN]**, **[LEFT]** and **[RIGHT]** key to move the position of the programmed item data.
 Touch **[ANGLE]** key for angle selection (0, 90, 180 & 270).
 Touch **[ARROW UP]** or **[ARROW DOWN]** key to move the screen up and down.
 Touch Item and drag to change the position.

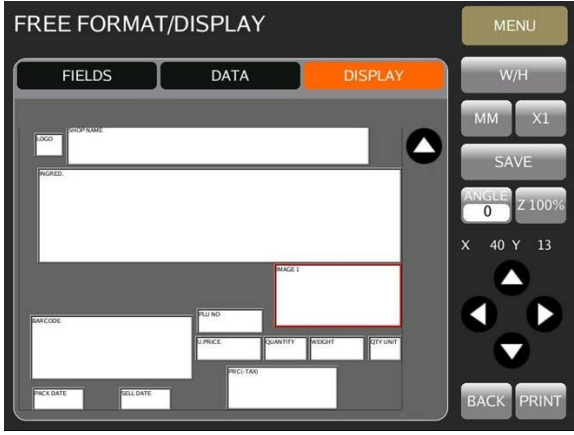

5.4 Type 4 Data Setting

The Type 4 data setting is the image. The position of the image is decided by X, Y values. The print area is decided by setting of Height and Width. Up to 10 images can be set per format.

Example: Procedure to set **Image**.

OPERATION	DISPLAY
<p>1. In Item Free Format mode, under [FIELDS] folder, select the item data. (e.g. Image 1)</p> <p>Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 2: Touch the selected item field; display will automatically go to DATA folder.</p>	
<p>2. Touch [X AXIS] key and enter the value by keypad. (e.g. 35)</p>	
<p>3. Touch [Y AXIS] key and enter the value by keypad. (e.g. 24)</p>	

OPERATION	DISPLAY
<p>4. Touch [WT] key and enter the value by keypad. (e.g. 21)</p>	
<p>5. Touch [HT] key and enter the value by keypad. (e.g. 13)</p>	
<p>6. Touch [STATUS] key until the word PRINT display on the key.</p> <p>Note: [STATUS] key will toggle for the following selection, NONWEIGHT, WEIGHT, PRINT and NO PRINT.</p>	

OPERATION	DISPLAY																																								
<p>7. Touch [DISPLAY] folder to view the programmed screen.</p> <p>Note: In this Display Mode, position, width, height and angle still allowed to be changed. (Refer to Note 1.)</p>																																									
<p>8. Touch [SAVE] key to store the data with message “4367 Saving in Progress”</p> <p>Note: Touch [MENU] key to exit without saving the data. A message “Do you want to save before exit to main menu?” will appear. Then touch the desired key.</p>	 <table border="1" data-bbox="911 786 1347 1137"> <thead> <tr> <th>TYPE</th> <th>WIDTH</th> <th>HEIGHT</th> <th>NAME</th> </tr> </thead> <tbody> <tr><td>F1</td><td>80</td><td>60</td><td>FOR1</td></tr> <tr><td>F2</td><td>60</td><td>40</td><td>F.NON WEIGHT</td></tr> <tr><td>F3</td><td>50</td><td>40</td><td>F.WEIGHT</td></tr> <tr><td>F5</td><td>60</td><td>45</td><td>FREE FORMAT 5</td></tr> <tr><td>F10</td><td>50</td><td>61</td><td>ALL</td></tr> <tr><td>F14</td><td>50</td><td>61</td><td>FSD</td></tr> <tr><td>F15</td><td>80</td><td>60</td><td>FREE</td></tr> <tr><td>F20</td><td>50</td><td>61</td><td>FSD W43</td></tr> <tr><td>F21</td><td>80</td><td>60</td><td>FREE 23</td></tr> </tbody> </table>	TYPE	WIDTH	HEIGHT	NAME	F1	80	60	FOR1	F2	60	40	F.NON WEIGHT	F3	50	40	F.WEIGHT	F5	60	45	FREE FORMAT 5	F10	50	61	ALL	F14	50	61	FSD	F15	80	60	FREE	F20	50	61	FSD W43	F21	80	60	FREE 23

F5	60	45	FREE FORMAT 5																																						
F10	50	61	ALL																																						
F14	50	61	FSD																																						
F15	80	60	FREE																																						
F20	50	61	FSD W43																																						
F21	80	60	FREE 23																																						

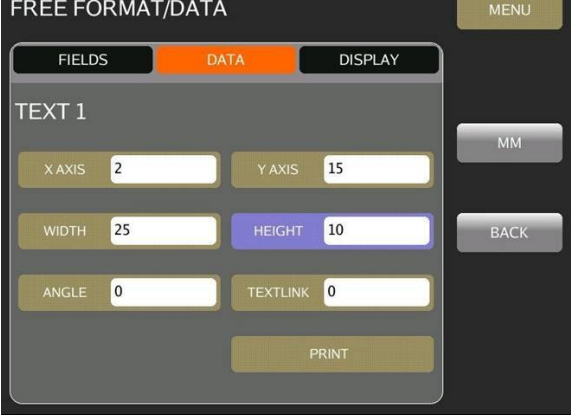

- Note 1:** Touch **[W/H]** key for switching key between **[X/Y]** and **[W/H]**.
 Touch **[X1]** key for movement interval selection (X1, X10 & X50) and use **[UP]**, **[DOWN]**, **[LEFT]** and **[RIGHT]** key to move the position of the programmed item data.
 Touch **[ANGLE]** key for angle selection (0, 90, 180 & 270).
 Touch **[IMAGE LINK]** to select the image.
 Touch **[ARROW UP]** or **[ARROW DOWN]** key to move the screen up and down.
 Touch Item and drag to change the position.

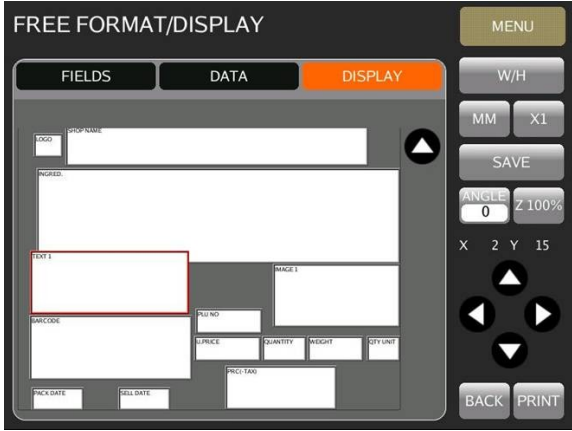

5.5 Type 5 Data Setting

The Type 5 data setting is the text. The position of the image is decided by X, Y values. The print area is decided by setting of Height and Width. Up to 16 texts can be set per format on item label format and 5 texts on Total Label format

Example: Procedure to set **Image**.

OPERATION	DISPLAY
<p>1. In Item Free Format mode, under [FIELDS] folder, select the item data. (e.g. Text 1)</p> <p>Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 2: Touch the selected item field; display will automatically go to DATA folder.</p>	
<p>2. Touch [X AXIS] key and enter the value by keypad. (e.g. 2)</p>	
<p>3. Touch [Y AXIS] key and enter the value by keypad. (e.g. 15)</p>	

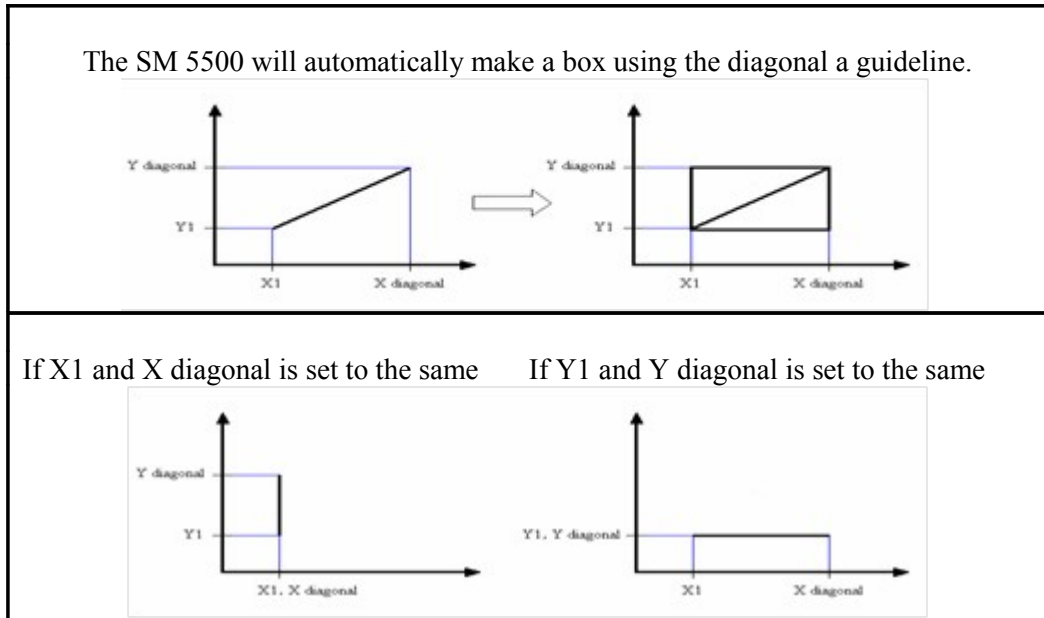

OPERATION	DISPLAY
<p>4. Touch [WT] key and enter the value by keypad. (e.g. 25)</p>	
<p>5. Touch [HT] key and enter the value by keypad. (e.g. 10)</p>	
<p>6. Touch [STATUS] key until the word PRINT display on the key.</p> <p>Note: [STATUS] key will toggle for the following selection, NONWEIGHT, WEIGHT, PRINT and NO PRINT.</p>	

OPERATION	DISPLAY																																								
<p>7. Touch [DISPLAY] folder to view the programmed screen.</p> <p>Note: In this Display Mode, position, width, height and angle still allowed to be changed. (Refer to Note 1.)</p>																																									
<p>8. Touch [SAVE] key to store the data with message “4367 Saving in Progress”</p> <p>Note: Touch [MENU] key to exit without saving the data. A message “Do you want to save before exit to main menu?” will appear. Then touch the desired key.</p>	 <table border="1" data-bbox="911 792 1347 1146"> <thead> <tr> <th>TYPE</th> <th>WIDTH</th> <th>HEIGHT</th> <th>NAME</th> </tr> </thead> <tbody> <tr><td>F1</td><td>80</td><td>60</td><td>FOR1</td></tr> <tr><td>F2</td><td>60</td><td>40</td><td>F.NON WEIGHT</td></tr> <tr><td>F3</td><td>50</td><td>40</td><td>F.WEIGHT</td></tr> <tr><td>F5</td><td>60</td><td>45</td><td>FREE FORMAT 5</td></tr> <tr><td>F10</td><td>50</td><td>61</td><td>ALL</td></tr> <tr><td>F14</td><td>50</td><td>61</td><td>FSD</td></tr> <tr><td>F15</td><td>80</td><td>60</td><td>FREE</td></tr> <tr><td>F20</td><td>50</td><td>61</td><td>FSD W43</td></tr> <tr><td>F21</td><td>80</td><td>60</td><td>FREE 23</td></tr> </tbody> </table>	TYPE	WIDTH	HEIGHT	NAME	F1	80	60	FOR1	F2	60	40	F.NON WEIGHT	F3	50	40	F.WEIGHT	F5	60	45	FREE FORMAT 5	F10	50	61	ALL	F14	50	61	FSD	F15	80	60	FREE	F20	50	61	FSD W43	F21	80	60	FREE 23

- Note 1:** Touch **[W/H]** key for switching key between **[X/Y]** and **[W/H]**.
 Touch **[X1]** key for movement interval selection (X1, X10 & X50) and use **[UP]**, **[DOWN]**, **[LEFT]** and **[RIGHT]** key to move the position of the programmed item data.
 Touch **[ANGLE]** key for angle selection (0, 90, 180 & 270).
 Touch **[TEXT LINK]** to select the default text that had programmed in advance.
 Touch **[ARROW UP]** or **[ARROW DOWN]** key to move the screen up and down.
 Touch Item and drag to change the position.

5.6 Type 6 Data Setting

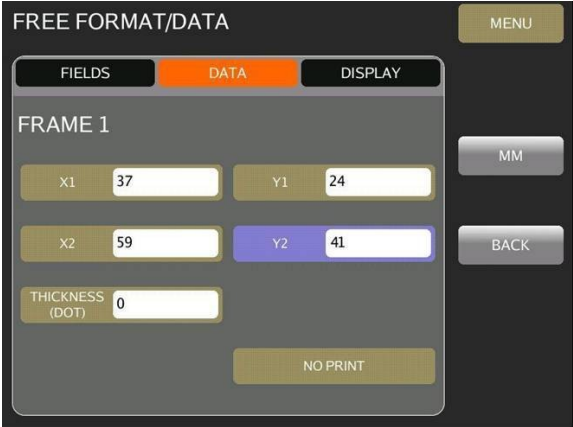

The Type 6 data setting is frame. The frame file is used for decorating the Free Format label. 10 frames can be set per Format. You can make boxes and lines that limit features on the label, emphasize important information or just make the label more comprehensible. Each 4 different data X, Y values, X, Y-Diagonals, Thickness of line and Print Status.

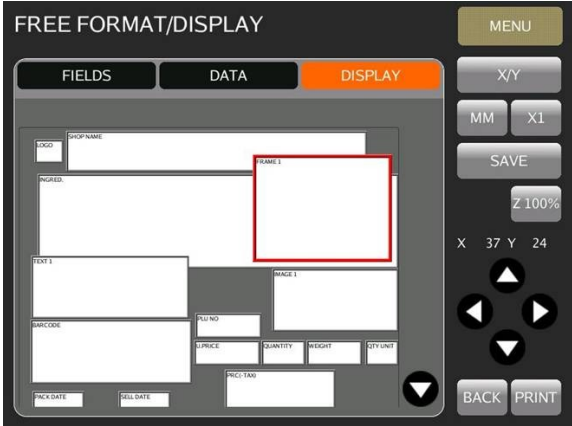

Example: Procedure to set **Frame**.

OPERATION	DISPLAY
<p>1. In Item Free Format mode, under [FIELDS] folder, select the item data. (e.g. Frame 1)</p> <p>Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 2: Touch the selected item field; display will automatically go to DATA folder.</p>	

OPERATION	DISPLAY
<p>2. Touch [X1] key and enter the value by keypad. (e.g. 37)</p>	
<p>3. Touch [Y1] key and enter the value by keypad. (e.g. 24)</p>	
<p>4. Touch [X2] key and enter the value by keypad. (e.g. 59)</p>	

OPERATION	DISPLAY
<p>5. Touch [Y2] key and enter the value by keypad. (e.g. 41)</p>	
<p>6. Touch [THICKNESS] key and enter the value by keypad. (e.g. 5)</p>	
<p>7. Touch [STATUS] key until the word PRINT display on the key.</p> <p>Note: [STATUS] key will toggle for the following selection, NONWEIGHT, WEIGHT, PRINT and NO PRINT.</p>	

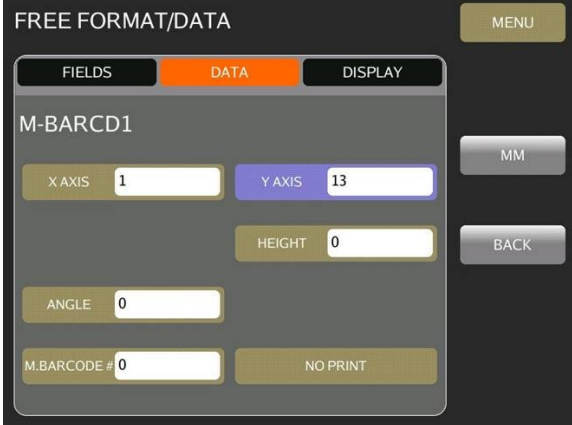

OPERATION	DISPLAY
<p>8. Touch [DISPLAY] folder to view the programmed screen.</p> <p>Note: In this Display Mode, position, width and height still allowed to be changed. (Refer to Note 1.)</p>	
<p>9. Touch [SAVE] key to store the data with message “4367 Saving in Progress”</p> <p>Note: Touch [MENU] key to exit without saving the data. A message “Do you want to save before exit to main menu?” will appear. Then touch the desired key.</p>	

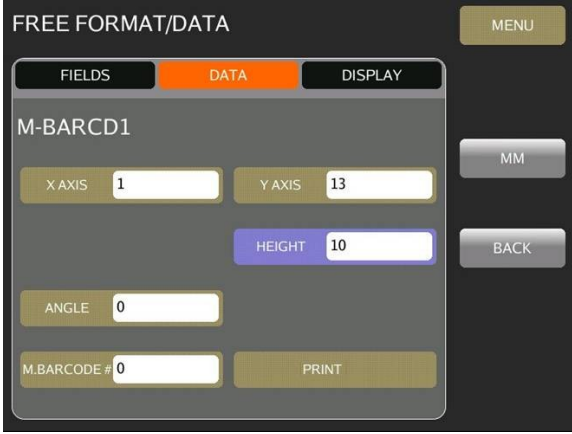

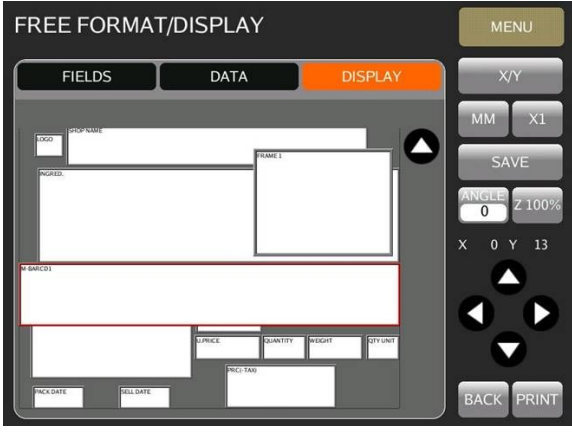

Note 1: Touch **[W/H]** key for switching key between **[X/Y]** and **[W/H]**.
 Touch **[X1]** key for movement interval selection (X1, X10 & X50) and use **[UP]**, **[DOWN]**, **[LEFT]** and **[RIGHT]** key to move the position of the programmed item data.
 Touch **[ARROW UP]** or **[ARROW DOWN]** key to move the screen up and down.
 Touch Item and drag to change the position.

5.7 Type 7 Data Setting

The Type 7 data setting is the Multibarcode. Barcode position is decided by X, Y values.

Procedure to set Multi barcode

OPERATION	DISPLAY
<p>1. In Item Free Format mode, under [FIELDS] folder, select the item data. (e.g. Multi Barcode1)</p> <p>Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 2: Touch the selected item field; display will automatically go to DATA folder.</p>	
<p>2. Touch [X AXIS] key and enter the value by keypad. (e.g. 2)</p>	
<p>3. Touch [Y AXIS] key and enter the value by keypad. (e.g. 1)</p>	

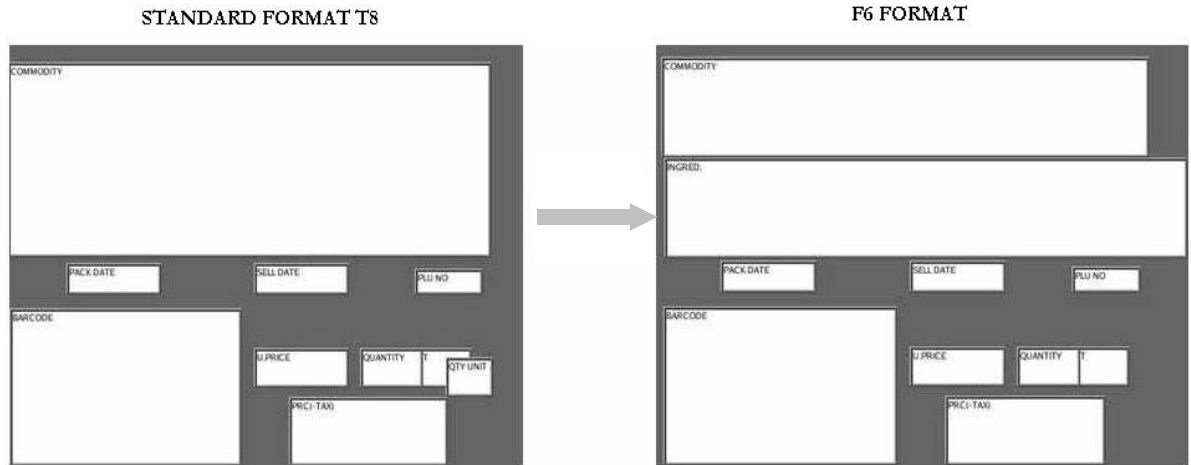

OPERATION	DISPLAY
<p>4. Touch [HT] key and enter the value by keypad. (e.g. 16)</p>	
<p>5. Touch [STATUS] key until the word PRINT display on the key.</p> <p>Note: [STATUS] key will toggle for the following selection, NONWEIGHT, WEIGHT, PRINT and NO PRINT.</p>	
<p>6. Touch [DISPLAY] folder to view the programmed screen.</p> <p>Note: In this Display Mode, position, width, height and angle still allowed to be changed. (Refer to Note 1.)</p>	

OPERATION	DISPLAY																																								
<p>7. Touch [SAVE] key to store the data. with message “4367 Saving in Progress”</p> <p>Note: Touch [MENU] key to exit without saving the data. A message “Do you want to save before exit to main menu?” will appear. Then touch the desired key.</p>	 <table border="1"> <thead> <tr> <th>TYPE</th> <th>WIDTH</th> <th>HEIGHT</th> <th>NAME</th> </tr> </thead> <tbody> <tr> <td>F1</td> <td>80</td> <td>60</td> <td>FOR1</td> </tr> <tr> <td>F2</td> <td>60</td> <td>40</td> <td>F.NON WEIGHT</td> </tr> <tr> <td>F3</td> <td>50</td> <td>40</td> <td>F.WEIGHT</td> </tr> <tr> <td>F5</td> <td>60</td> <td>45</td> <td>FREE FORMAT 5</td> </tr> <tr> <td>F10</td> <td>50</td> <td>61</td> <td>ALL</td> </tr> <tr> <td>F14</td> <td>50</td> <td>61</td> <td>FSD</td> </tr> <tr> <td>F15</td> <td>80</td> <td>60</td> <td>FREE</td> </tr> <tr> <td>F20</td> <td>50</td> <td>61</td> <td>FSD W43</td> </tr> <tr> <td>F21</td> <td>80</td> <td>60</td> <td>FREE 23</td> </tr> </tbody> </table>	TYPE	WIDTH	HEIGHT	NAME	F1	80	60	FOR1	F2	60	40	F.NON WEIGHT	F3	50	40	F.WEIGHT	F5	60	45	FREE FORMAT 5	F10	50	61	ALL	F14	50	61	FSD	F15	80	60	FREE	F20	50	61	FSD W43	F21	80	60	FREE 23

- Note 1:** Touch [W/H] key for switching key between [X/Y] and [W/H].
 Touch [X1] key for movement interval selection (X1, X10 & X50) and use [UP], [DOWN], [LEFT] and [RIGHT] key to move the position of the programmed item data.
 Touch [ANGLE] key for angle selection (0, 90, 180 & 270).
 Touch [ARROW UP] or [ARROW DOWN] key to move the screen up and down.
 Touch Item and drag to change the position.
 Entry Number of Multibarcode that had programmed

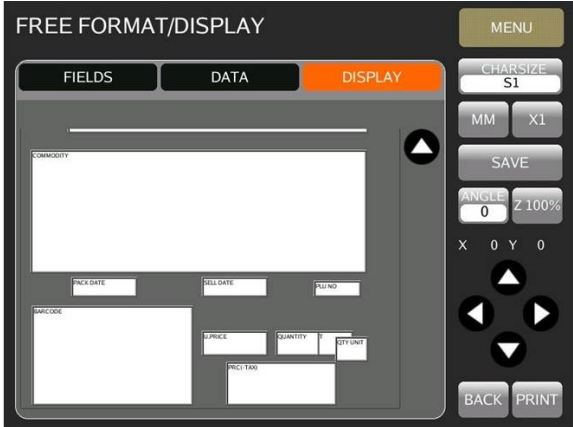

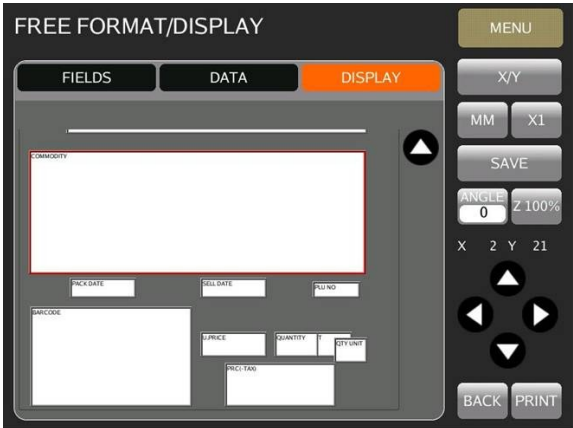

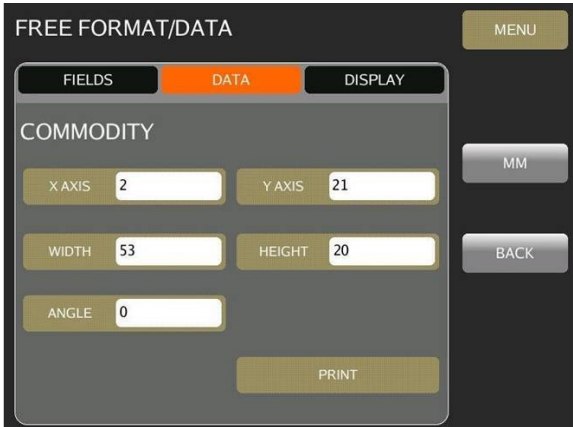

6. Create a Format by Modifying an Existing Format

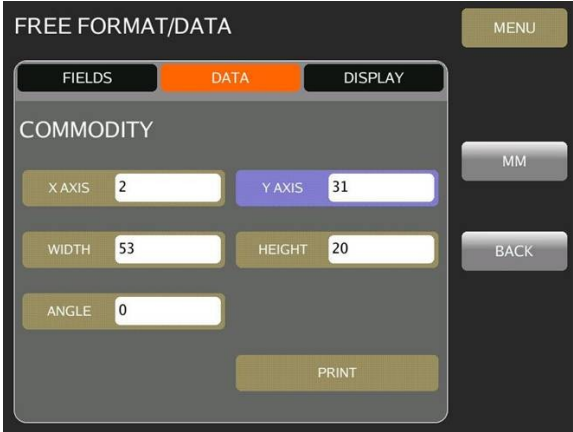

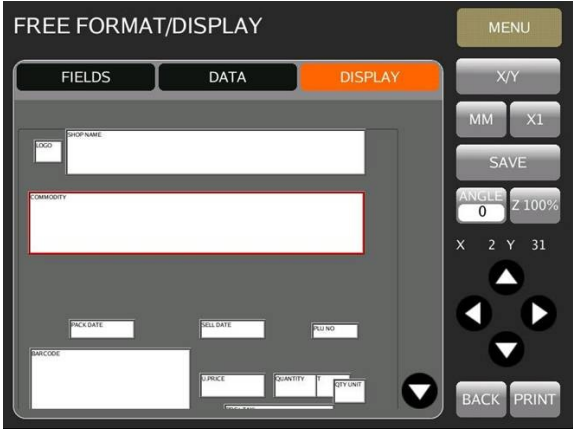

You can create your desired label format by copying an existing format and modifying it to your needs. Following is an **example** of how to customize standard format T7 to your needs. **E.g.** add an ingredient text and remove the PLU# from the standard Item Label Format.

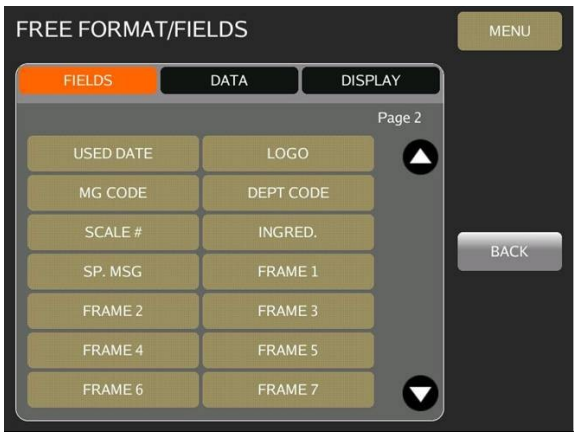

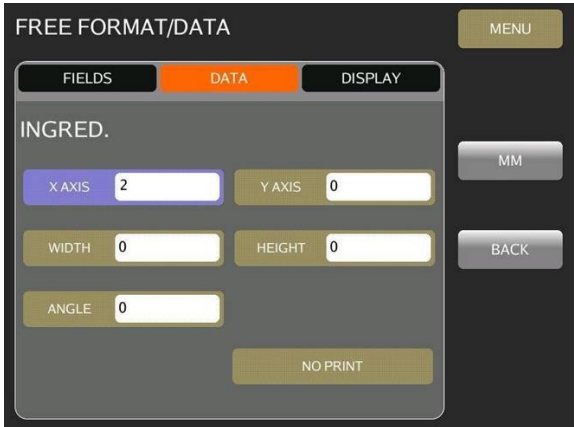

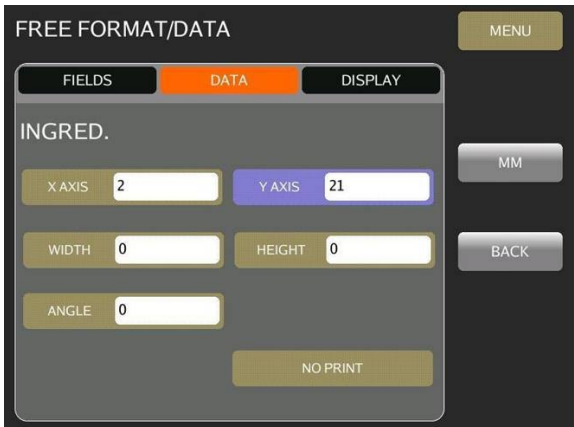

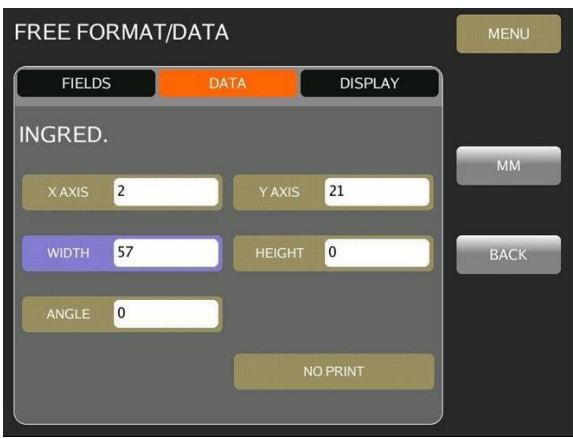

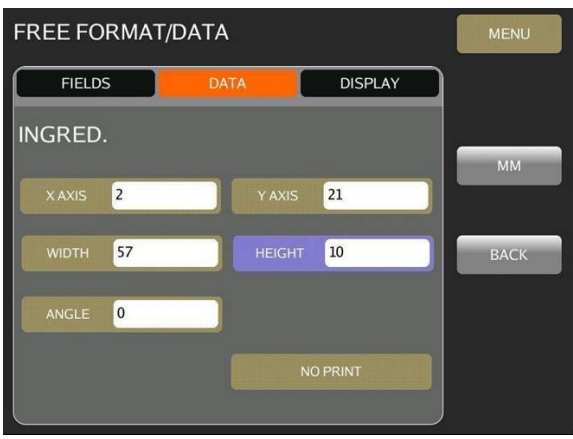

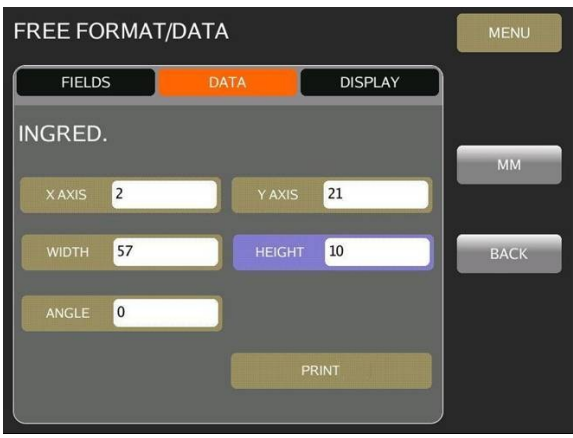

OPERATION	DISPLAY																																								
<p>1. In PROGRAMMING MODE, touch [PRINTFMT] key to enter to Free Format Programming.</p>																																									
<p>2. Enter a new Free Format number. (e.g. 6 – F6)</p>	<table border="1" data-bbox="901 1568 1340 1926"> <thead> <tr> <th>TYPE</th> <th>WIDTH</th> <th>HEIGHT</th> <th>NAME</th> </tr> </thead> <tbody> <tr> <td>F1</td> <td>80</td> <td>60</td> <td>FOR1</td> </tr> <tr> <td>F2</td> <td>60</td> <td>40</td> <td>F.NON WEIGHT</td> </tr> <tr> <td>F3</td> <td>50</td> <td>40</td> <td>F.WEIGHT</td> </tr> <tr> <td>F5</td> <td>60</td> <td>45</td> <td>FREE FORMAT 5</td> </tr> <tr> <td>F10</td> <td>50</td> <td>61</td> <td>ALL</td> </tr> <tr> <td>F14</td> <td>50</td> <td>61</td> <td>FSD</td> </tr> <tr> <td>F15</td> <td>80</td> <td>60</td> <td>FREE</td> </tr> <tr> <td>F20</td> <td>50</td> <td>61</td> <td>FSD W43</td> </tr> <tr> <td>F21</td> <td>80</td> <td>60</td> <td>FREE 23</td> </tr> </tbody> </table>	TYPE	WIDTH	HEIGHT	NAME	F1	80	60	FOR1	F2	60	40	F.NON WEIGHT	F3	50	40	F.WEIGHT	F5	60	45	FREE FORMAT 5	F10	50	61	ALL	F14	50	61	FSD	F15	80	60	FREE	F20	50	61	FSD W43	F21	80	60	FREE 23
TYPE	WIDTH	HEIGHT	NAME																																						
F1	80	60	FOR1																																						
F2	60	40	F.NON WEIGHT																																						
F3	50	40	F.WEIGHT																																						
F5	60	45	FREE FORMAT 5																																						
F10	50	61	ALL																																						
F14	50	61	FSD																																						
F15	80	60	FREE																																						
F20	50	61	FSD W43																																						
F21	80	60	FREE 23																																						

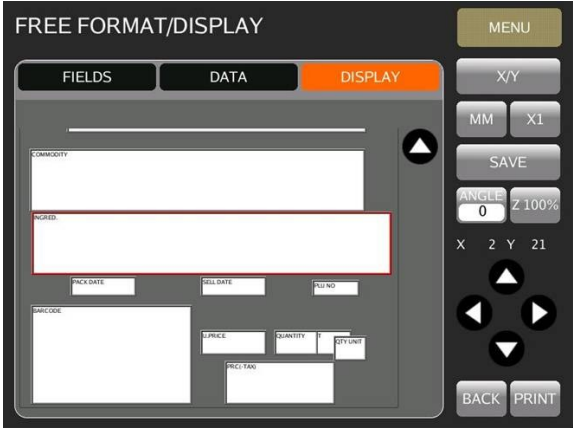

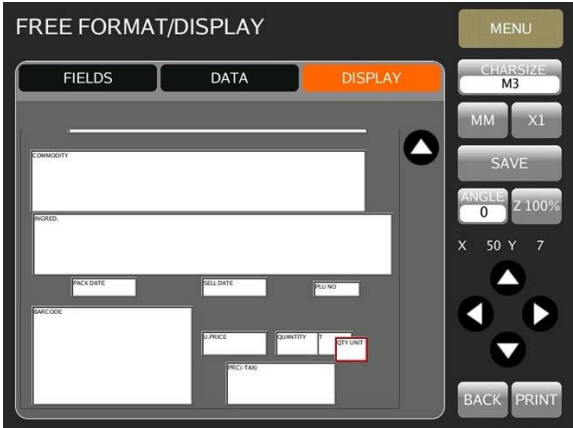

OPERATION	DISPLAY
<p>3. Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	
<p>4. Touch the desired Label Format data to copy from. (e.g. T8)</p>	
<p>5. Touch [ITEM LABEL] key to enter Item Free Format screen.</p> <p>Note: If necessary to change Width or Height value, touch the desired key area and enter the value by numeric key.</p>	

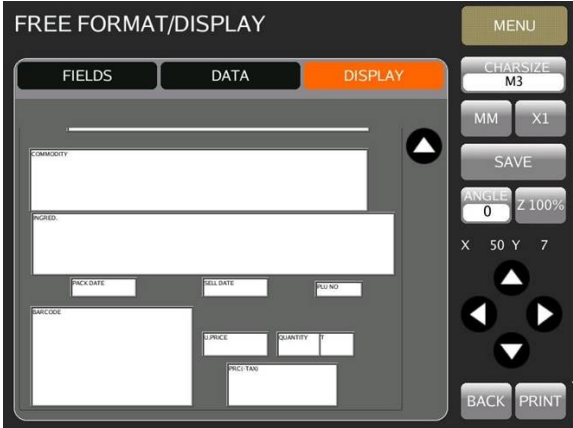

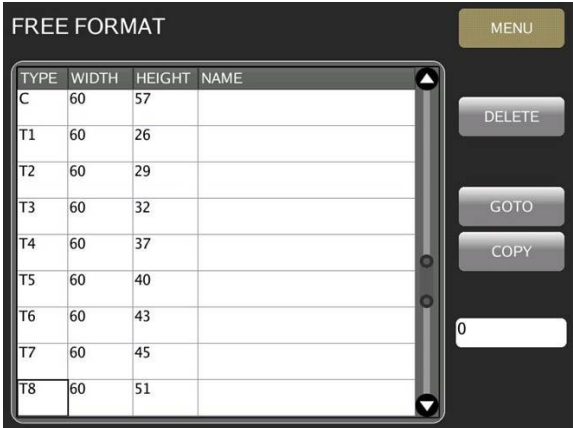

OPERATION	DISPLAY
<p>6. Press [PLU] key at keypad.</p>	
<p>7. Touch [COMMODITY] print area to change the Commodity Name position and size.</p> <p>Note: In order to position a print area for Ingredient, Commodity Name print area must be made smaller and moved to a new position, to make space for the Ingredient print area.</p>	
<p>8. Touch [DATA] tab.</p>	

OPERATION	DISPLAY
<p>9. Touch [Y AXIS] key and enter the new Y Axis position of diagonal point by keypad. (e.g. 31)</p>	
<p>10. Touch [HEIGHT] key and enter the new Height value by keypad. (e.g. 10)</p>	
<p>11. Touch [DISPLAY] tab to view the programmed screen.</p> <p>Note: Adjust the position of Commodity Name if necessary.</p>	

OPERATION	DISPLAY
<p>12. Touch [FIELDS] tab and select the item data of Ingredients.</p> <p>Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 2: Touch the selected item field; display will automatically go to DATA folder.</p>	
<p>13. Touch [X AXIS] key and enter the value by keypad. (e.g. 2)</p>	
<p>14. Touch [Y AXIS] key and enter the value by keypad. (e.g. 21)</p>	

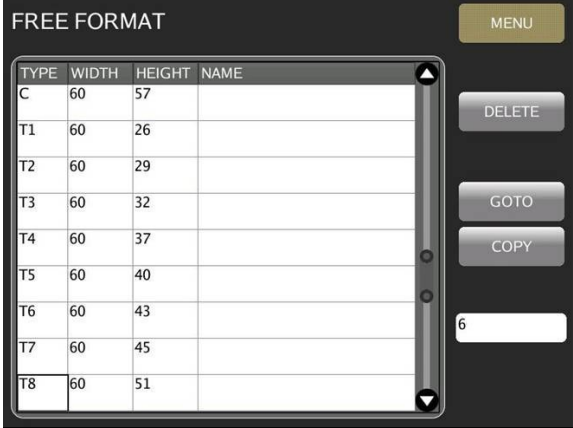

OPERATION	DISPLAY
<p>15. Touch [WT] key and enter the value by keypad. (e.g. 57)</p>	
<p>16. Touch [HT] key and enter the value by keypad. (e.g. 10)</p>	
<p>17. Touch [STATUS] key until the word PRINT display on the key.</p> <p>Note: [STATUS] key will toggle for the following selection, NONWEIGHT, WEIGHT, PRINT and NO PRINT.</p>	

OPERATION	DISPLAY
<p>18. Touch [DISPLAY] tab to view the programmed screen.</p>	
<p>19. Touch the [QTY UNIT] print area.</p>	
<p>20. Touch [DATA] tab.</p> <p>Touch [STATUS] key until the word NO PRINT display on the key.</p> <p>Note: [STATUS] key will toggle for the following selection, NONWEIGHT, WEIGHT, PRINT and NO PRINT.</p>	

OPERATION	DISPLAY																																								
<p>21. Touch [DISPLAY] tab to view the programmed screen.</p>																																									
<p>22. Touch [SAVE] key to store the data with message “4367 Saving in Progress”</p> <p>Note: Touch [MENU] key to exit without saving the data. A message “Do you want to save before exit to main menu?” will appear. Then touch the desired key.</p>	 <table border="1" data-bbox="911 786 1348 1137"> <thead> <tr> <th>TYPE</th> <th>WIDTH</th> <th>HEIGHT</th> <th>NAME</th> </tr> </thead> <tbody> <tr> <td>C</td> <td>60</td> <td>57</td> <td></td> </tr> <tr> <td>T1</td> <td>60</td> <td>26</td> <td></td> </tr> <tr> <td>T2</td> <td>60</td> <td>29</td> <td></td> </tr> <tr> <td>T3</td> <td>60</td> <td>32</td> <td></td> </tr> <tr> <td>T4</td> <td>60</td> <td>37</td> <td></td> </tr> <tr> <td>T5</td> <td>60</td> <td>40</td> <td></td> </tr> <tr> <td>T6</td> <td>60</td> <td>43</td> <td></td> </tr> <tr> <td>T7</td> <td>60</td> <td>45</td> <td></td> </tr> <tr> <td>T8</td> <td>60</td> <td>51</td> <td></td> </tr> </tbody> </table>	TYPE	WIDTH	HEIGHT	NAME	C	60	57		T1	60	26		T2	60	29		T3	60	32		T4	60	37		T5	60	40		T6	60	43		T7	60	45		T8	60	51

8. Delete a Programmed Free Format File

OPERATION	DISPLAY
<p>1. In Free Format Programming Mode, enter the Free Format Number to be deleted. (e.g. 20)</p> <p>Note: Also can browse and touch the free format name (without entering the free format)</p>	
<p>2. Touch [DELETE] key.</p>	
<p>3. Touch [YES] key to delete the data.</p> <p>Note: Touch [NO] key to escape deleting the data.</p>	

Note: Another method of deleting the Free Format Data is by entering Free Format File and touches the DELETE key.

DEPARTMENT FILE

Department Name file is used for categorizing Main Groups. Department Number between 1 ~ 97 are available for programming. Department Number 97 is automatically assigned to Main Groups that are not linked to any Department. Maximum 16 characters can be entered per Department and with 1 line.

Note: Department Number 98 – 99 is set by default:

- 1 Non-PLU data (Weighing items) will be assigned to Department Number 98.
- 2 Non-PLU data (Non-Weighed items) will be assigned to Department number 99.
- 3 The Department names programmed are not printed on the label or receipt but are for reporting.

1. Program Department File

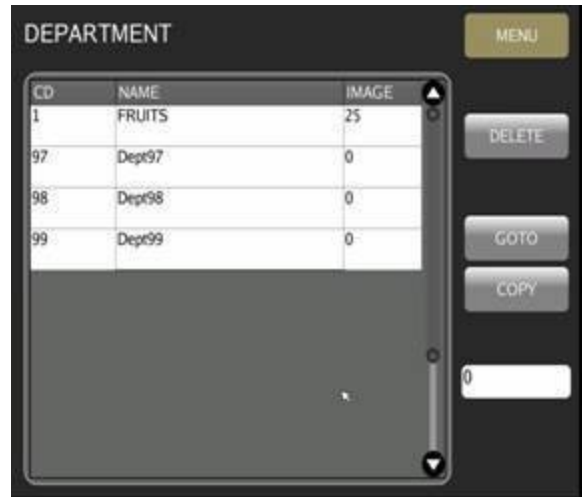

OPERATION	DISPLAY
1. In MENU Mode	
2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.	

3. Touch [DEPT] key.

Note 1: Touch [MENU] key to return back to Programming Mode.

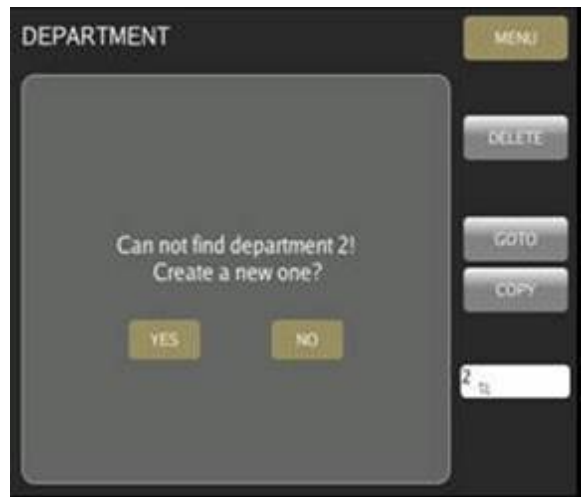

Note 2: All programmed Dept File will be listed in DEPARTMENT PROGRAMMING Display Screen.

Note 3: Display Screen also used to browse existing Dept Files using the scroll bar and to select file for modification

4. Enter Department number. (e.g. 2)

Press [PLU] key at keypad.

5. To create a new Department, touch [YES] key.

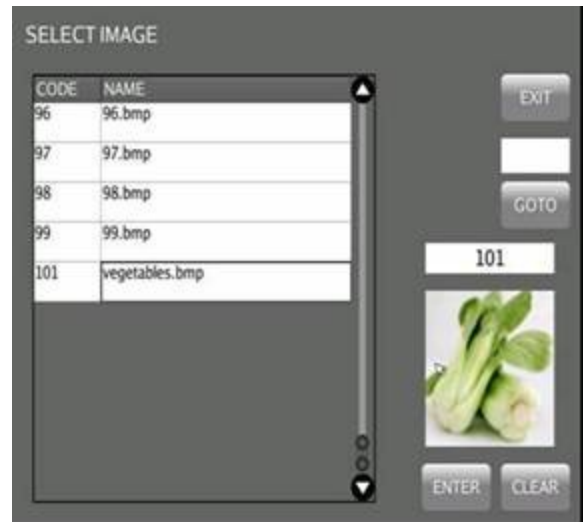

Note: Touch [NO] key to abort.

6. Touch [IMAGE FILE] area to select the image for this department.

Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.

Note 2: To Program Image for selection, check [Image Programming](#)

7. Touch the desired image and touch Enter button to select. (e.g. Vegetables)

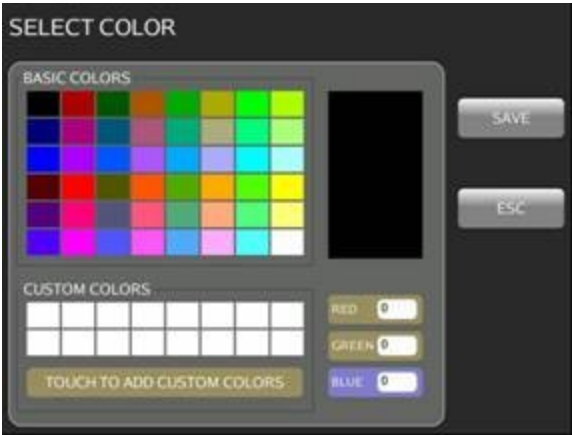

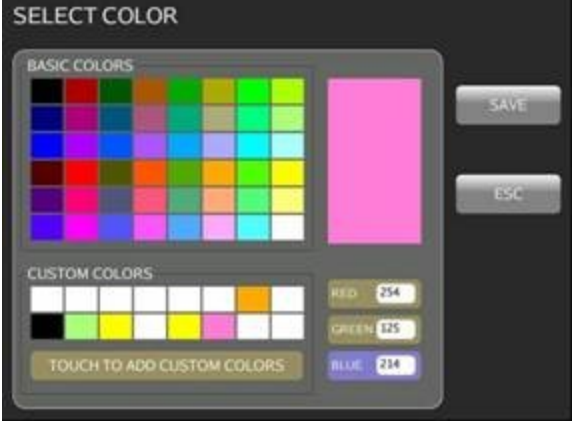

8. Touch [DEPARTMENT NAME] area to enter the Department name.

Enter Department Name by touching desired character keys. (e.g. VEGETABLES)

Note: Touch [EXIT] key if you want to exit without saving.

<p>9. Touch [ENTER] key</p> <p>Note: Touch [ESC] key if you want to exit without saving.</p>	
<p>10. Touch [COLOR] area to select color of department preset key</p> <p>Note: Touch [ESC] key if you want to exit without saving.</p>	
<p>11. Select the Color from BASIC COLORS and touch [SAVE] to exit</p> <p>Also can create new color by enter RGB Value (RED, GREEN AND BLUE) and touch box of CUSTOM COLORS to add the new color selection</p> <p>Note: Touch [ESC] key if you want to exit without saving.</p>	

<p>12. Touch [BARCODE CD] area to enter the Department Code.</p> <p>Enter Department Code by touching desired Ten key. (e.g. 1234)</p>																			
<p>13. Touch [SAVE] key to save the data for Dept 2.</p> <p>Note: Touch [MENU] key if you want to exit without saving.</p>	<table border="1"> <thead> <tr> <th>CD</th> <th>NAME</th> <th>IMAGE</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>FRUITS</td> <td>25</td> </tr> <tr> <td>2</td> <td>VEGETABLES</td> <td>101</td> </tr> <tr> <td>97</td> <td>Dept97</td> <td>0</td> </tr> <tr> <td>98</td> <td>Dept98</td> <td>0</td> </tr> <tr> <td>99</td> <td>Dept99</td> <td>0</td> </tr> </tbody> </table>	CD	NAME	IMAGE	1	FRUITS	25	2	VEGETABLES	101	97	Dept97	0	98	Dept98	0	99	Dept99	0
CD	NAME	IMAGE																	
1	FRUITS	25																	
2	VEGETABLES	101																	
97	Dept97	0																	
98	Dept98	0																	
99	Dept99	0																	

2. Copy a Department File

The programmed Department data can be easily copied into a new Department. The function is very useful to save time or avoid mistake for the similar Department data programming, especially in case of long description of Department Name.

OPERATION	DISPLAY																					
<p>1. In Department Programming Mode, enter a new Department number. (e.g. 3)</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	 <p>The screenshot shows the 'DEPARTMENT' menu with a list of departments. A 'COPY' dialog box is overlaid on the screen, asking the user to 'Please select or enter a value:'. The dialog box has a text input field containing '0' and buttons for 'ENTER' and 'ESC'. The background menu shows a table with columns 'CD', 'NAME', and 'IMAGE'.</p> <table border="1"> <thead> <tr> <th>CD</th> <th>NAME</th> <th>IMAGE</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>FRUITS</td> <td>25</td> </tr> <tr> <td>2</td> <td>VEGETABLES</td> <td>101</td> </tr> <tr> <td>97</td> <td></td> <td>0</td> </tr> <tr> <td>98</td> <td></td> <td>0</td> </tr> <tr> <td>99</td> <td></td> <td>0</td> </tr> </tbody> </table>	CD	NAME	IMAGE	1	FRUITS	25	2	VEGETABLES	101	97		0	98		0	99		0			
CD	NAME	IMAGE																				
1	FRUITS	25																				
2	VEGETABLES	101																				
97		0																				
98		0																				
99		0																				
<p>2. Touch the desired Department data to copy from. (e.g. DEPT 2)</p> <p>Note: Change the necessary data if required.</p>	 <p>The screenshot shows the 'DEPARTMENT # 3' programming screen. It has several input fields: 'IMAGE' (vegetables.bmp), 'DEPARTMENT NAME' (VEGETABLES), 'COLOR' (#FF55FF), and 'BARCODE CD' (1234). There are also 'CLEAR IMAGE' and 'CLEAR COLOR' buttons. On the right side, there are buttons for 'MENU', 'DELETE', 'ESC', and 'SAVE'.</p>																					
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	 <p>The screenshot shows the 'DEPARTMENT' menu after saving. The table now includes a new entry for 'FRUITS' with 'IMAGE' 102. The 'COPY' button is highlighted. The 'BARCODE CD' input field at the bottom now contains '0'.</p> <table border="1"> <thead> <tr> <th>CD</th> <th>NAME</th> <th>IMAGE</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>FRUITS</td> <td>25</td> </tr> <tr> <td>2</td> <td>VEGETABLES</td> <td>101</td> </tr> <tr> <td>3</td> <td>FRUITS</td> <td>102</td> </tr> <tr> <td>97</td> <td>Dept97</td> <td>0</td> </tr> <tr> <td>98</td> <td>Dept98</td> <td>0</td> </tr> <tr> <td>99</td> <td>Dept99</td> <td>0</td> </tr> </tbody> </table>	CD	NAME	IMAGE	1	FRUITS	25	2	VEGETABLES	101	3	FRUITS	102	97	Dept97	0	98	Dept98	0	99	Dept99	0
CD	NAME	IMAGE																				
1	FRUITS	25																				
2	VEGETABLES	101																				
3	FRUITS	102																				
97	Dept97	0																				
98	Dept98	0																				
99	Dept99	0																				

3. Search a Department Files

Dept programming provide a fast way to search a Dept within the Dept display, this function is useful as a user can direct go to desired searched Dept without need to browse screen by screen.

OPERATION	DISPLAY																														
<p>1. In Department Programming Mode, Enter the Dept Number to be search. (e.g. 90)</p>	 <p>The screenshot shows a screen titled 'DEPARTMENT' with a table of departments. The table has columns for CD, NAME, and IMAGE. The rows are as follows:</p> <table border="1"> <thead> <tr> <th>CD</th> <th>NAME</th> <th>IMAGE</th> </tr> </thead> <tbody> <tr><td>1</td><td>FRUITS</td><td>25</td></tr> <tr><td>2</td><td>VEGETABLES</td><td>101</td></tr> <tr><td>3</td><td>FRUITS</td><td>102</td></tr> <tr><td>40</td><td>DEPT40</td><td>4</td></tr> <tr><td>50</td><td>DEPARTMENTS50</td><td>0</td></tr> <tr><td>51</td><td>DEPARTMENTS51</td><td>0</td></tr> <tr><td>52</td><td>DEPARTMENTS51</td><td>0</td></tr> <tr><td>53</td><td>DEPARTMENTS52</td><td>0</td></tr> <tr><td>54</td><td>DEPARTMENTS54</td><td>0</td></tr> </tbody> </table> <p>On the right side of the screen, there are buttons for MENU, DELETE, GOTO, and COPY. Below these buttons is a search input field containing the number '90'.</p>	CD	NAME	IMAGE	1	FRUITS	25	2	VEGETABLES	101	3	FRUITS	102	40	DEPT40	4	50	DEPARTMENTS50	0	51	DEPARTMENTS51	0	52	DEPARTMENTS51	0	53	DEPARTMENTS52	0	54	DEPARTMENTS54	0

97	Dept97	0																													
98	Dept98	0																													
99	Dept99	0																													

Note: Another method of deleting the Department Data is by entering the dept file and touches the DELETE key.

MAIN GROUP FILE

Main Group is the middle category. All Main Groups can be assigned to a Department. The Main Group file is used categorizing the PLU. Main Group Number between of 1 ~ 997 is available for programming. Main Group Number 997 is automatically assigned to PLU that are not linked to any Main Group Number. Tax can be assigned to every Main Group. The assigned Tax will apply for all PLU assigned to the Main Group. Maximum 16 characters can be entered per Main Group and with 1 line.

Note: Main Group Number 98 – 99 is set by default:

- 4 Non-PLU data (Weighing items) will be assigned to Main Group Number 998
- 5 Non-PLU data (Non-Weighing items) will be assigned to Main Group Number 999
- 6 The Main Group names programmed are not printed on the label or receipt but are for reporting.

1. Program Main Group File

OPERATION	DISPLAY
1. In MENU Mode	
2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.	

3. Touch [MG] key.

Note 1: Touch [MENU] key to return back to Programming Mode.

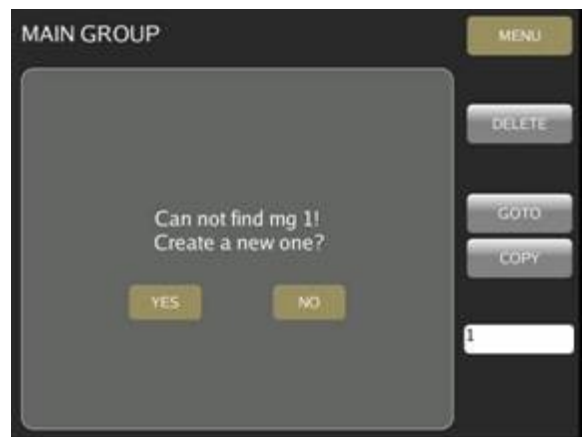

Note 2: All programmed MG File will be listed in MAINGROUP PROGRAMMING Display Screen.

Note 3: Display Screen also used to browse existing MG Files using the scroll bar and to select file for modification

4. Enter MG number. (e.g. 1)

Press [PLU] key at keypad.

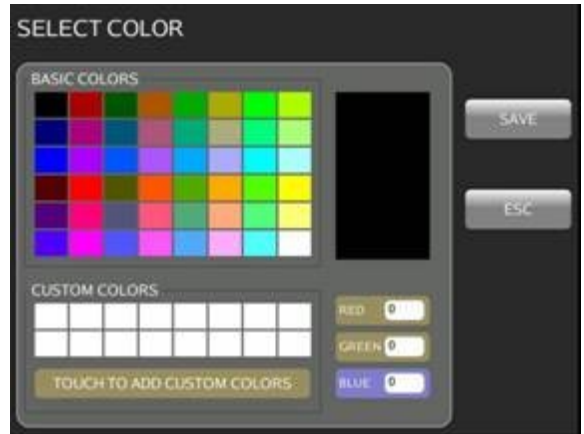

5. To create a new MG, touch [YES] key.

Note: Touch [NO] key to abort.

6. Touch [COLOR] area to select color of Main group preset key

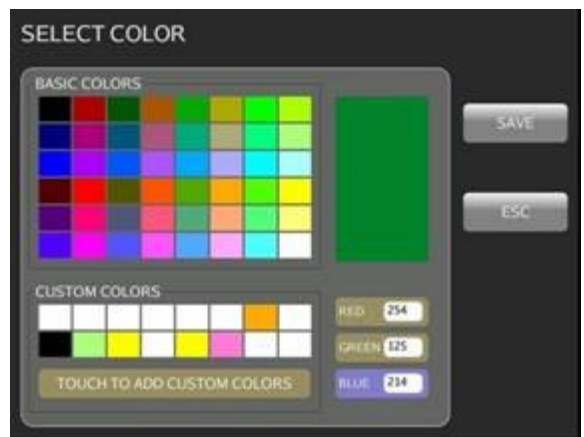

Note: Touch [ESC] key if you want to exit without saving.

7. Select the Color from BASIC COLORS and touch [SAVE] to exit

Also can create new color by enter RGB Value (RED, GREEN AND BLUE) and touch box of CUSTOM COLORS to add the new color selection

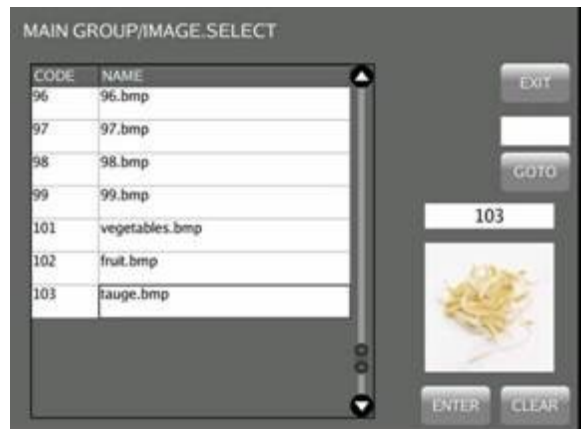

Note: Touch [ESC] key if you want to exit without saving.

8. Touch [IMAGE FILE] area to select the image for this MG.

Note 1: Touch [ARROW DOWN] or [ARROW UP] for more selection.

Note 2: To Program Image for selection, check [Image Programming](#)

9. Touch the desired image. (e.g. TAUGE)

10. Touch [LINK DEPARTMENT] area to select the Department to be link to this Main Group.

Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.

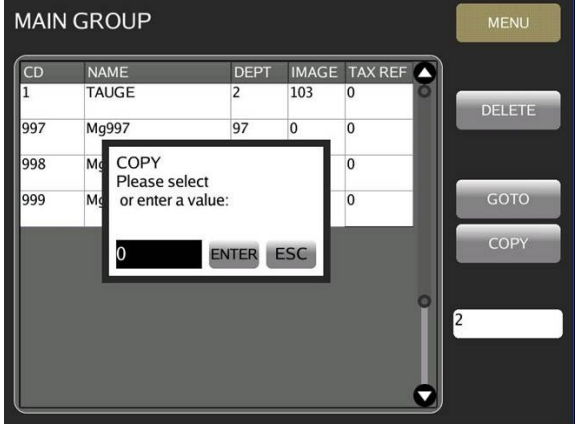

11. Touch the desired department. (e.g. DEPT 2 - VEGETABLES)

<p>12. Touch [MAINGROUP NAME] area to enter the Main Group name.</p> <p>Enter Main Group Name by touching desired character keys. (e.g. TAUGE)</p> <p>Note: Touch [EXIT] key if you want to exit without saving.</p>																										
<p>13. Touch [ENTER] key when finished programming.</p> <p>Note: Touch [ESC] key if you want to exit without saving.</p>																										
<p>14. Touch [SAVE] key to save the data for MG 4.</p> <p>Note: Touch [MENU] key if you want to exit without saving.</p>	<table border="1"> <thead> <tr> <th>CD</th> <th>NAME</th> <th>DEPT</th> <th>IMAGE</th> <th>TAX REF</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>TAUGE</td> <td>2</td> <td>103</td> <td>0</td> </tr> <tr> <td>997</td> <td>Mg997</td> <td>97</td> <td>0</td> <td>0</td> </tr> <tr> <td>998</td> <td>Mg998</td> <td>98</td> <td>0</td> <td>0</td> </tr> <tr> <td>999</td> <td>Mg999</td> <td>99</td> <td>0</td> <td>0</td> </tr> </tbody> </table>	CD	NAME	DEPT	IMAGE	TAX REF	1	TAUGE	2	103	0	997	Mg997	97	0	0	998	Mg998	98	0	0	999	Mg999	99	0	0
CD	NAME	DEPT	IMAGE	TAX REF																						
1	TAUGE	2	103	0																						
997	Mg997	97	0	0																						
998	Mg998	98	0	0																						
999	Mg999	99	0	0																						

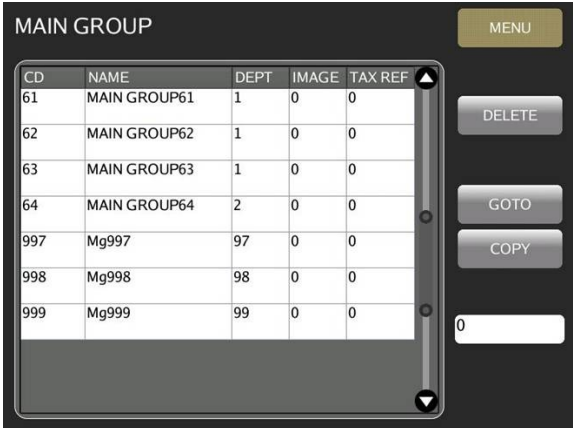

2. Copy a Main Group File

The programmed Main Group data can be easily copied into a new Main Group. The function is very useful to save time or avoid mistake for the similar Main Group data programming, especially in case of long description of Ingredients.

OPERATION	DISPLAY
<p>1. In Main Group Programming Mode, enter a new Main Group number. (e.g. 2)</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	 <p>The screenshot shows the 'MAIN GROUP' menu with a table of items. A dialog box is overlaid on the screen with the text 'COPY Please select or enter a value:' and a numeric input field containing '0'. Buttons for 'ENTER' and 'ESC' are visible. On the right side of the menu, there are buttons for 'MENU', 'DELETE', 'GOTO', and 'COPY'. A numeric input field at the bottom right contains the value '2'.</p>
<p>2. Key in the desired Main Group data to copy from (e.g. MG 1) and press PLU key.</p> <p>Note: Change the necessary data if required.</p>	 <p>The screenshot shows the 'MAIN GROUP' menu with a form for entering data for 'MAIN GROUP # 2'. Fields include 'COLOR' (set to #55FFFF), 'IMAGE FILE' (set to apple.bmp), 'LINK DEPARTMENT' (set to 1), and 'MAINGROUP NAME' (set to RED APPLE). There is a small image of a red apple. Buttons for 'MENU', 'DELETE', 'ESC', and 'SAVE' are on the right.</p>
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	 <p>The screenshot shows the 'MAIN GROUP' menu with an updated table of items. The table now includes a new entry for 'RED APPLE' with CD '2', DEPT '1', and IMAGE '104'. Buttons for 'MENU', 'DELETE', 'GOTO', and 'COPY' are on the right. A numeric input field at the bottom right contains the value '0'.</p>

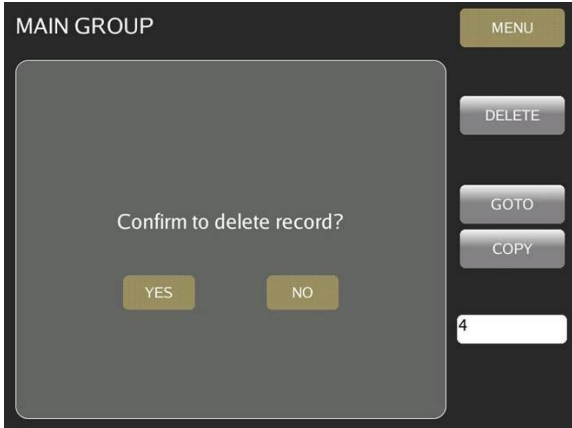

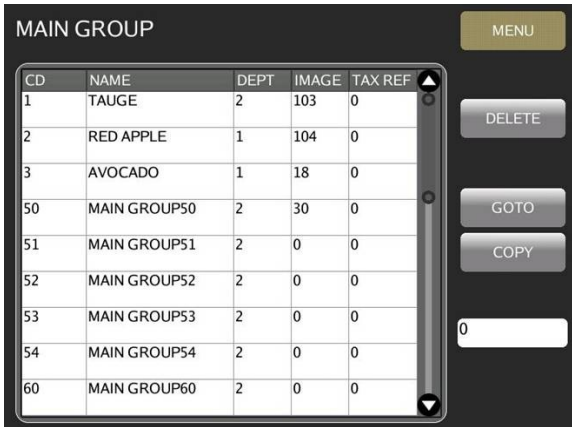

3. Search a Main Group Files

Dept programming provide a fast way to search a Dept within the Dept display, this function is useful as a user can direct go to desired searched Dept without need to browse screen by screen.

OPERATION	DISPLAY																																																		
<p>1. In Main Group Programming Mode, Enter the MG Number to be search. (e.g. 61)</p>	 <p>MAIN GROUP</p> <table border="1"> <thead> <tr> <th>CD</th> <th>NAME</th> <th>DEPT</th> <th>IMAGE</th> <th>TAX REF</th> </tr> </thead> <tbody> <tr><td>1</td><td>TAUGE</td><td>2</td><td>103</td><td>0</td></tr> <tr><td>2</td><td>RED APPLE</td><td>1</td><td>104</td><td>0</td></tr> <tr><td>3</td><td>AVOCADO</td><td>1</td><td>18</td><td>0</td></tr> <tr><td>4</td><td>CORN</td><td>2</td><td>24</td><td>0</td></tr> <tr><td>50</td><td>MAIN GROUP50</td><td>2</td><td>30</td><td>0</td></tr> <tr><td>51</td><td>MAIN GROUP51</td><td>2</td><td>0</td><td>0</td></tr> <tr><td>52</td><td>MAIN GROUP52</td><td>2</td><td>0</td><td>0</td></tr> <tr><td>53</td><td>MAIN GROUP53</td><td>2</td><td>0</td><td>0</td></tr> <tr><td>54</td><td>MAIN GROUP54</td><td>2</td><td>0</td><td>0</td></tr> </tbody> </table> <p>Buttons: MENU, DELETE, GOTO, COPY. Search input: 61</p>	CD	NAME	DEPT	IMAGE	TAX REF	1	TAUGE	2	103	0	2	RED APPLE	1	104	0	3	AVOCADO	1	18	0	4	CORN	2	24	0	50	MAIN GROUP50	2	30	0	51	MAIN GROUP51	2	0	0	52	MAIN GROUP52	2	0	0	53	MAIN GROUP53	2	0	0	54	MAIN GROUP54	2	0	0

999	Mg999	99	0	0																																															

4. Delete a Programmed Main Group File

When the PLU FILE exists under the Main Group File, the Main Group Number data cannot be deleted. In addition, the Main Group Number 997, 998 and 999 cannot be deleted.

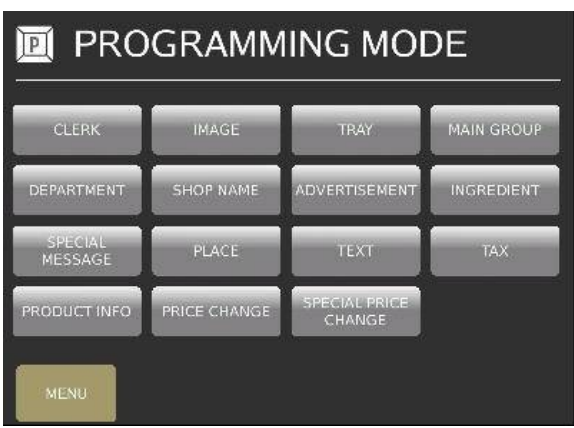

OPERATION	DISPLAY
<p>1. In Main Group Programming Mode, enter the Main Group Number to be deleted. (e.g. MG 4)</p> <p>Note: Also can browse and touch the Main Group name (without entering the Main Group)</p>	
<p>2. Touch [DELETE] key.</p>	
<p>3. Touch [YES] key to delete the data.</p> <p>Note: Touch [NO] key to escape deleting the data.</p>	

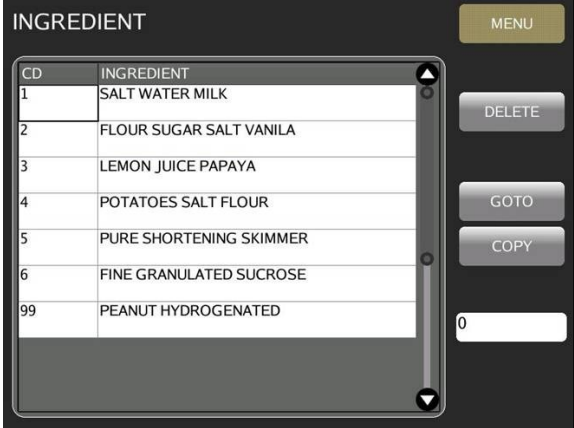

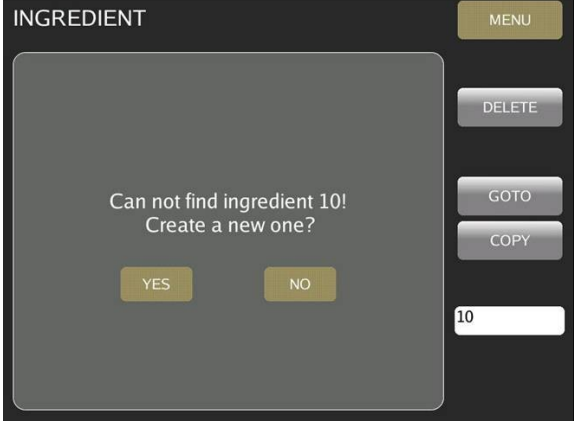

Note: Another method of deleting the Main Group Data is by entering the Main Group file and touches the DELETE key.

INGREDIENT FILE

Ingredient texts, programmed in this file can be assigned to any PLU that uses a format with an Ingredient print area. The print area size, set on the format used, will decide the number of lines that can be programmed. The maximum number of Ingredient lines is 15. It is possible to program up to 16 Ingredient files. Since standard format S, A, B, C and T1 ~ T12 does not have a print area set for Ingredient, Ingredient cannot be printed when using these formats. To print Ingredient on the label, it is required to use a Free Format with an Ingredient print area programmed.

1. Program Ingredient File

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.</p>	

OPERATION	DISPLAY
<p>3. Touch [INGREDIENT] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed Ingredient File will be listed in INGREDIENT PROGRAMMING Display Screen.</p> <p>Note 3: Display Screen also used to browse existing Ingredient Files using the scroll bar and to select file for modification</p>	
<p>4. Enter Ingredient number. (e.g. 10)</p> <p>Touch [ENTER] key.</p>	
<p>5. To create a new Ingredient, touch [YES] key.</p> <p>Note: Touch [NO] key to abort.</p>	

OPERATION	DISPLAY
<p>6. Touch [INGREDIENT] area to enter the Ingredient Name.</p> <p>Enter Ingredient Name by touching desired character keys. (e.g. INGREDIENT --- SUGAR)</p> <p>Note 1: Touch  key to program 2nd line with same procedure as the 1st line if necessary.</p> <p>Note 2: Touch [EXIT] key if you want to exit without saving.</p>	
<p>7. Touch [ENTER] key when finished programming.</p> <p>Touch [SAVE] key to save the data for Ingredient #10.</p> <p>Note: Touch [MENU] key if you want to exit without saving.</p>	

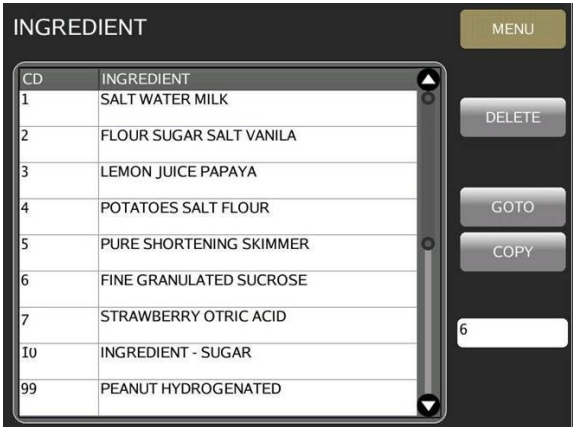

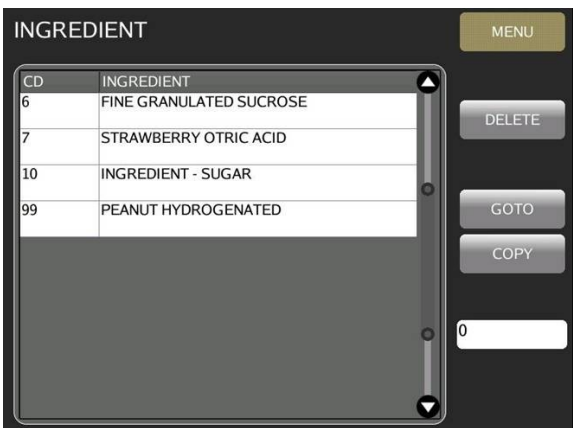

2. Copy a Ingredient File

The programmed Ingredient data can be easily copied into a new Ingredient. The function is very useful to save time or avoid mistake for the similar Ingredient data programming, especially in case of long description of Ingredients.

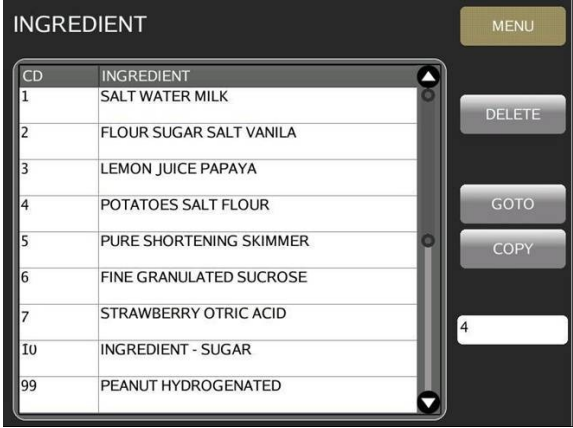

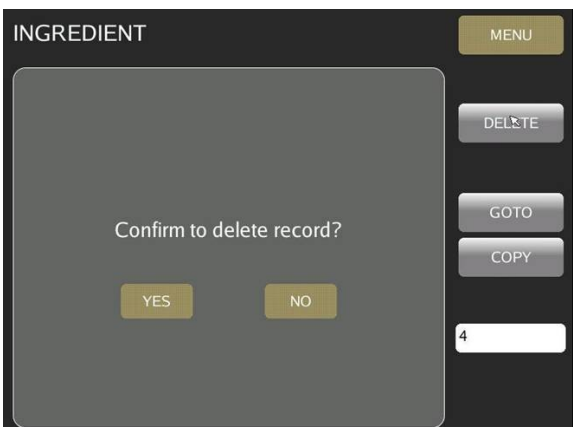

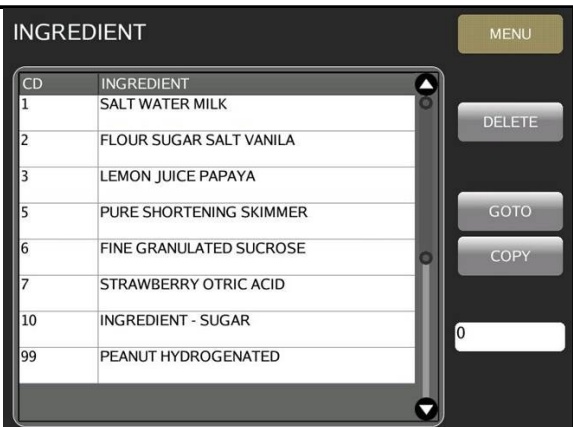

OPERATION	DISPLAY
<p>1. In Ingredient Programming Mode, enter a new Ingredient number. (e.g. 7)</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	
<p>2. Touch the desired Ingredient data to copy from. (e.g. Ingredient # 4)</p> <p>Note: Change the necessary data if required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

3. Search a Ingredient Files

Ingredient programming provide a fast way to search a Ingredient within the Ingredient display, this function is useful as a user can direct go to desired searched Ingredient without need to browse screen by screen.

OPERATION	DISPLAY
<p>1. In Ingredient Programming Mode, Enter the Ingredient number to be search. (e.g. 5)</p>	
<p>2. Touch the [GO TO] key.</p> <p>Note: The searched Ingredient number will be top listed</p>	

4. Delete a Programmed Ingredient File

OPERATION	DISPLAY
<p>1. In Ingredient Programming Mode, enter the Ingredient Number to be deleted. (e.g. Ingredient 4).</p> <p>Note: Also can browse and touch the Ingredient name (without entering the Ingredient)</p>	 <p>The screenshot shows a list of ingredients with columns 'CD' and 'INGREDIENT'. The list includes: 1 SALT WATER MILK, 2 FLOUR SUGAR SALT VANILA, 3 LEMON JUICE PAPAYA, 4 POTATOES SALT FLOUR, 5 PURE SHORTENING SKIMMER, 6 FINE GRANULATED SUCROSE, 7 STRAWBERRY OTRIC ACID, 10 INGREDIENT - SUGAR, and 99 PEANUT HYDROGENATED. A search bar at the bottom right contains the number '4'. The 'DELETE' button is highlighted in grey.</p>
<p>2. Touch [DELETE] key.</p>	 <p>The screenshot shows a confirmation dialog box with the text 'Confirm to delete record?' and two buttons: 'YES' and 'NO'. The 'DELETE' button from the previous screen is still visible on the right side of the interface.</p>
<p>3. Touch [YES] key to delete the data.</p> <p>Note: Touch [NO] key to escape deleting the data.</p>	 <p>The screenshot shows the same list of ingredients as before, but ingredient 4 is no longer present. The search bar at the bottom right now contains the number '0'.</p>

Note: Another method of deleting the Ingredient Data is by entering the Ingredient file and touches the DELETE key.

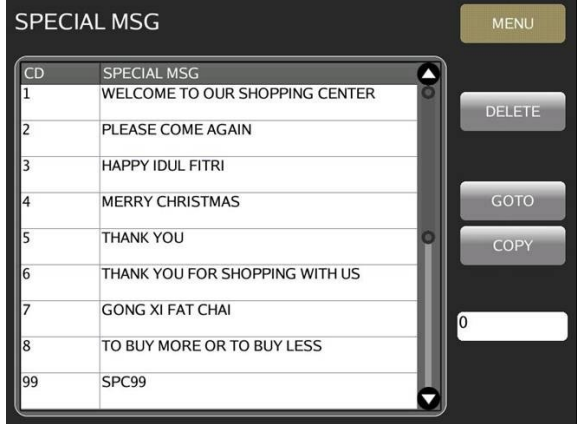

SPECIAL MESSAGE FILE

Special Message texts, programmed in this file can be used as a description on the label such as recipes, which can be assigned to any PLU that uses a format with a Special Message print area. The print area size, set on the format used, will decide the number of lines that can be programmed.

The maximum number of Special Message lines is 8. It is possible to program up to 16 Special Message files. Since standard format S, A, B, C and T1 ~ T12 does not have a print area set for Special Message, Special Message cannot be printed when using these formats. To print Special Message on the label, it is required to use a Free Format with a Special Message print area programmed.

1. Program Special Message File

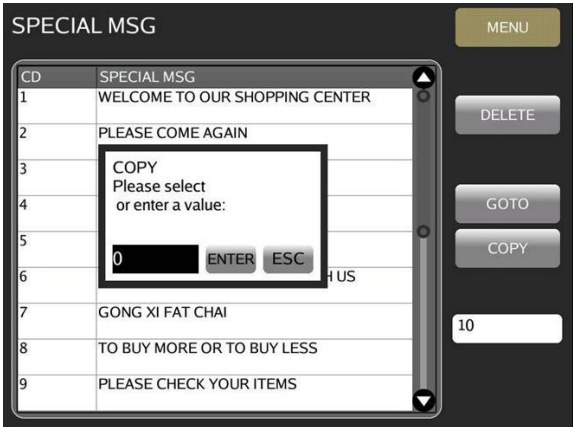

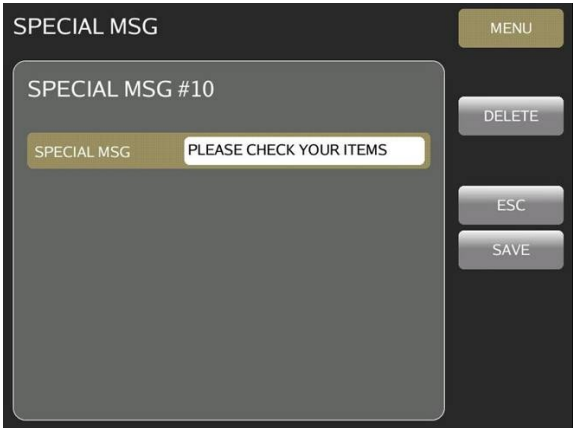

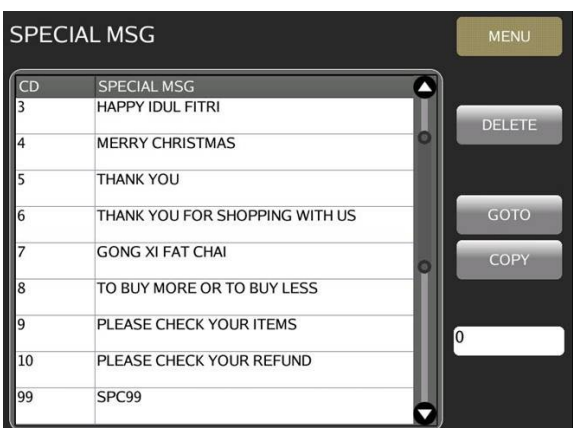

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.</p>	

OPERATION	DISPLAY
<p>3. Touch [SPECIAL MESSAGE] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed Special Message File will be listed in SPC. MESSAGE PROGRAMMING Display Screen.</p> <p>Note 3: Display Screen also used to browse existing Special Message Files using the scroll bar and to select file for modification</p>	
<p>4. Enter Special Message number. (e.g. 9)</p> <p>Press [PLU] key at keypad.</p>	
<p>5. To create a new Special Message, touch [YES] key.</p> <p>Note: Touch [NO] key to abort.</p>	

OPERATION	DISPLAY
<p>6. Touch [SPECIAL MSG] area to enter the Special Message Name.</p> <p>Enter Special Message Name by touching desired character keys. (e.g. PLEASE CHECK YOUR ITEMS)</p> <p>Note 1: Touch  key to program 2nd line with same procedure as the 1st line if necessary.</p> <p>Note 2: Touch [EXIT] key if you want to exit without saving.</p>	
<p>7. Touch [ENTER] key when finished programming.</p> <p>Touch [SAVE] key to save the data for Special Message 5.</p> <p>Note: Touch [MENU] key if you want to exit without saving.</p>	

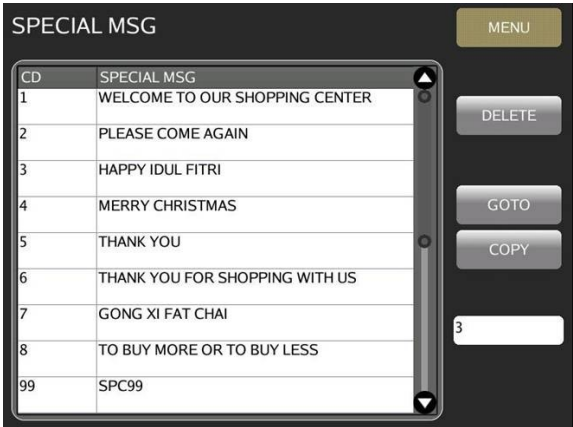

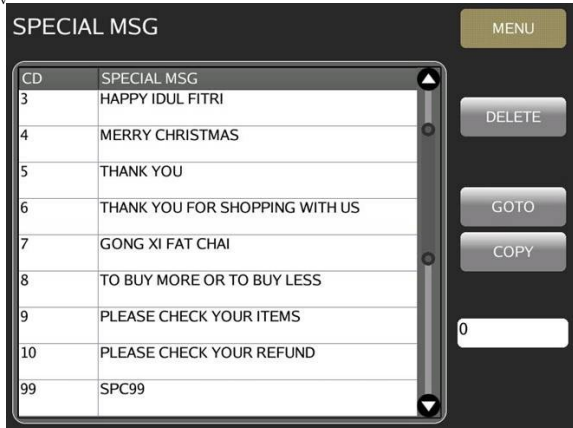

2. Copy a Special Message File

The programmed Special Message data can be easily copied into a new Special Message. The function is very useful to save time or avoid mistake for the similar Special Message data programming, especially in case of long description of Ingredients.

OPERATION	DISPLAY
<p>1. In Special Message Programming Mode, enter a new Special Message number. (e.g. 10)</p> <p>Touch [COPY] key.</p> <p>Note: Touch  or  for more selection.</p>	
<p>2. Touch the desired Special Message data to copy from. (e.g. Special Message 9)</p> <p>Note: Change the necessary data if required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

3. Search a Special Message Files

Special Message programming provide a fast way to search a Special Message within the Special Message display, this function is useful as a user can direct go to desired searched Special Message without need to browse screen by screen.

OPERATION	DISPLAY																				
<p>1. In Special Message Programming Mode, Enter the Special Message number to be search. (e.g. 3)</p>	 <p>The screenshot shows a 'SPECIAL MSG' screen with a list of messages. The search field on the right contains the number '3'. The list is as follows:</p> <table border="1"> <thead> <tr> <th>CD</th> <th>SPECIAL MSG</th> </tr> </thead> <tbody> <tr><td>1</td><td>WELCOME TO OUR SHOPPING CENTER</td></tr> <tr><td>2</td><td>PLEASE COME AGAIN</td></tr> <tr><td>3</td><td>HAPPY IDUL FITRI</td></tr> <tr><td>4</td><td>MERRY CHRISTMAS</td></tr> <tr><td>5</td><td>THANK YOU</td></tr> <tr><td>6</td><td>THANK YOU FOR SHOPPING WITH US</td></tr> <tr><td>7</td><td>GONG XI FAT CHAI</td></tr> <tr><td>8</td><td>TO BUY MORE OR TO BUY LESS</td></tr> <tr><td>99</td><td>SPC99</td></tr> </tbody> </table>	CD	SPECIAL MSG	1	WELCOME TO OUR SHOPPING CENTER	2	PLEASE COME AGAIN	3	HAPPY IDUL FITRI	4	MERRY CHRISTMAS	5	THANK YOU	6	THANK YOU FOR SHOPPING WITH US	7	GONG XI FAT CHAI	8	TO BUY MORE OR TO BUY LESS	99	SPC99

4. Delete a Programmed Special Message File

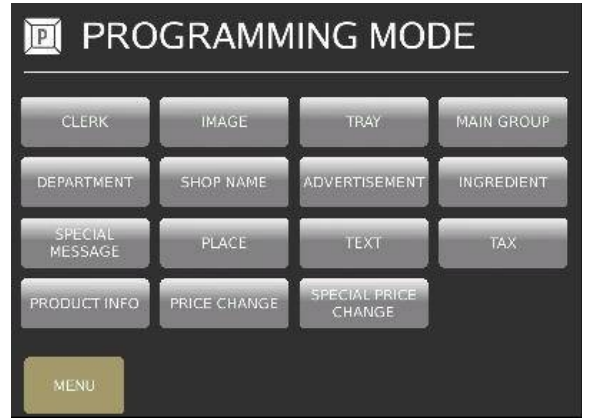

OPERATION	DISPLAY
<p>1. In Special Message Programming Mode, enter the Special Message Number to be deleted. (e.g. Special Message 4)</p>	
<p>2. Touch [DELETE] key.</p>	
<p>3. Touch [YES] key to delete the data.</p> <p>Note: Touch [NO] key to escape deleting the data.</p>	

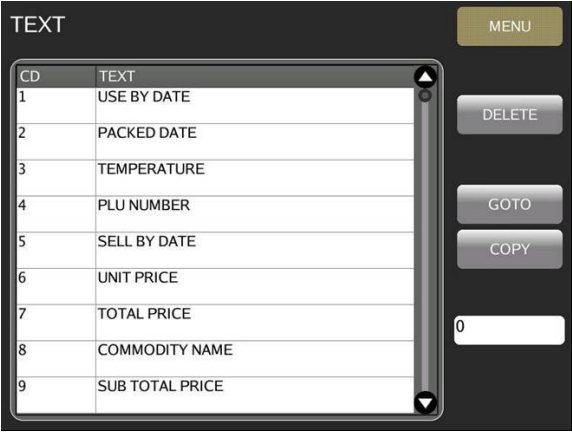

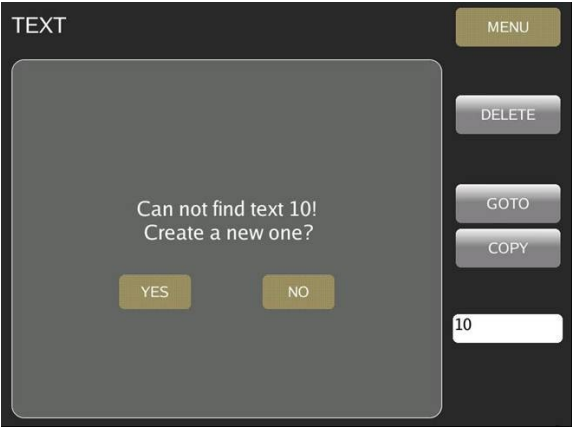

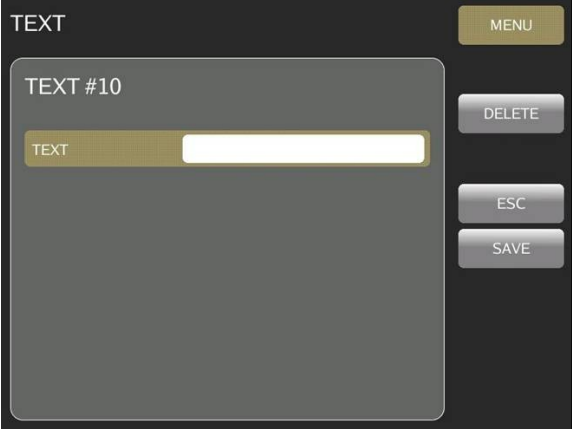

Note: Another method of deleting the Special Message Data is by entering the Special Message file and touches the DELETE key.

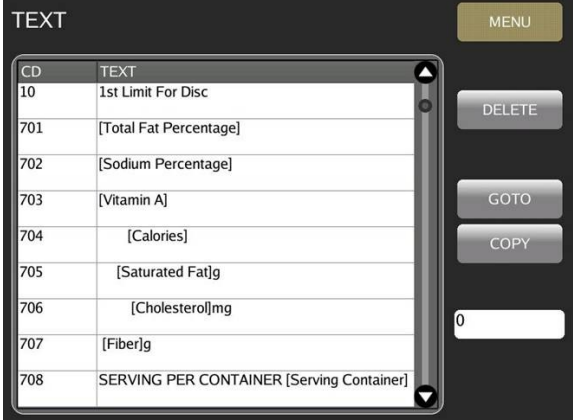

TEXT FILE

Maximum 20 Texts are available (Text 1 ~ 16 are for Item Label and text 17 ~ 20 are for Total Label). Text is used for printing the fixed data on label such as 'Unit Price', 'Packed Date'. Text cannot be printed when using standard format S, A, B, C and T1 ~ T12, since they do not have any Text print area set. You must use a Free Format with a Text print area programmed. Maximum 2 lines per Text can be programmed and number of line is depends on the size of print area of the selected label format or Character Size entry.

1. Program Text File

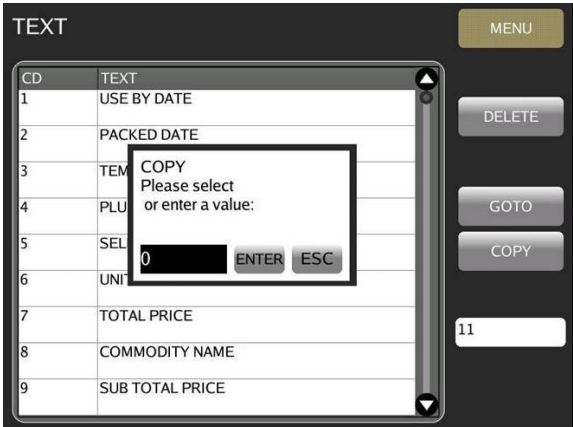

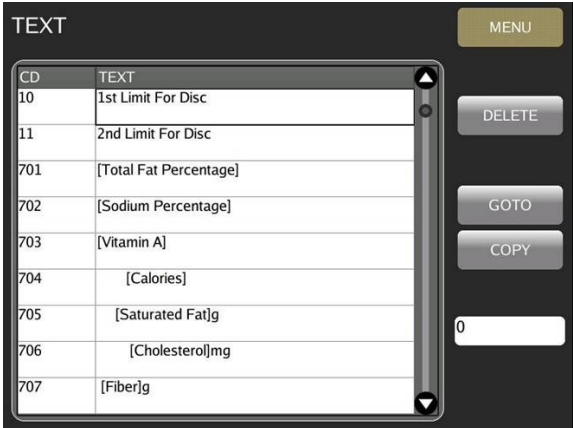

OPERATION	DISPLAY
<p>1. In MENU Mode.</p>	
<p>2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.</p>	

OPERATION	DISPLAY
<p>3. Touch [TEXT] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed Text File will be listed in TEXT PROGRAMMING Display Screen.</p>	
<p>4. Enter Text number. (e.g. 10)</p> <p>Touch [PLU] key.</p>	
<p>5. To create a new Text, touch [YES] key.</p> <p>Note: Touch [NO] key to abort.</p>	

OPERATION	DISPLAY
<p>6. Touch [TEXT] area to enter the Text Name.</p> <p>Enter Text Name by touching desired character keys. (e.g. PRICE)</p> <p>Note 1: Touch  to program 2nd line with same procedure as the 1st line if necessary.</p> <p>Note 2: Touch [EXIT] key if you want to exit without saving.</p> <p>Note 3: [TEXT] key in keyboard layout used for select default text</p>	
<p>7. Touch [ENTER] key when finished programming.</p> <p>Touch [SAVE] key to save the data for Text 21.</p> <p>Note: Touch [MENU] key if you want to exit without saving.</p>	

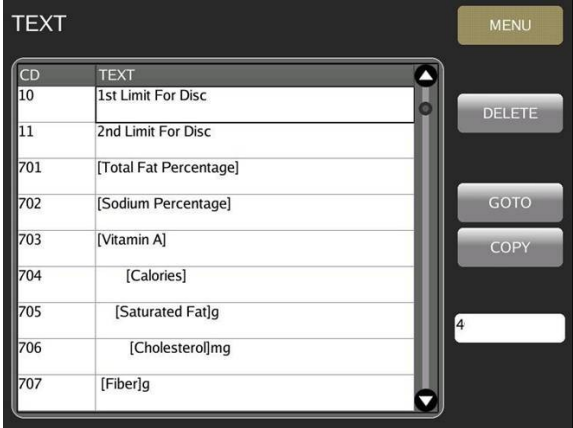

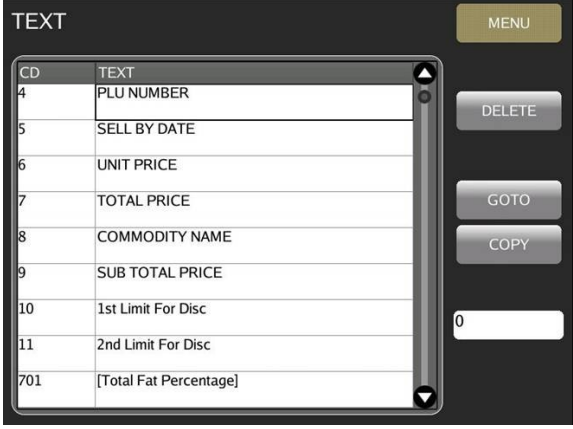

2. Copy a Text File

The programmed Text data can be easily copied into a new Text. The function is very useful to save time or avoid mistake for the similar Text data programming, especially in case of long description of Ingredients.

OPERATION	DISPLAY
<p>1. In Text Programming Mode, enter a new Text number. (e.g.11)</p> <p>Touch [COPY] key.</p> <p>Note: Touch  or  for more selection.</p>	
<p>2. Touch the desired Text data to copy from. (e.g. Text 10)</p> <p>Note: Change the necessary data if required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

3. Search a Text File

Text programming provide a fast way to search a text within text display, this function is useful as a user can direct go to desired searched text without need to browse screen by screen.

OPERATION	DISPLAY																				
<p>1. In Text Programming Mode, enter the Text Number to be searched. (e.g. Text 4)</p>	 <p>The screenshot shows a 'TEXT' display screen with a list of items. The search input field on the right contains the number '4'. The list items are:</p> <table border="1"> <thead> <tr> <th>CD</th> <th>TEXT</th> </tr> </thead> <tbody> <tr><td>10</td><td>1st Limit For Disc</td></tr> <tr><td>11</td><td>2nd Limit For Disc</td></tr> <tr><td>701</td><td>[Total Fat Percentage]</td></tr> <tr><td>702</td><td>[Sodium Percentage]</td></tr> <tr><td>703</td><td>[Vitamin A]</td></tr> <tr><td>704</td><td>[Calories]</td></tr> <tr><td>705</td><td>[Saturated Fat]g</td></tr> <tr><td>706</td><td>[Cholesterol]mg</td></tr> <tr><td>707</td><td>[Fiber]g</td></tr> </tbody> </table>	CD	TEXT	10	1st Limit For Disc	11	2nd Limit For Disc	701	[Total Fat Percentage]	702	[Sodium Percentage]	703	[Vitamin A]	704	[Calories]	705	[Saturated Fat]g	706	[Cholesterol]mg	707	[Fiber]g

4. Delete a Programmed Text File

OPERATION	DISPLAY
<p>1. In Text Programming Mode, enter the Text Number to be deleted. (e.g. Text 4)</p> <p>Note: Also can browse and touch the Text (without entering the Text Number)</p>	
<p>2. Touch [DELETE] key.</p>	
<p>3. Touch [YES] key to delete the data.</p> <p>Note: Touch [NO] key to escape deleting the data.</p>	

Note: Another method of deleting the Text is by entering the Text file and touches the DELETE key.

CLERK FILE

Clerk file is used for programming names of operators. Maximum 16 characters can be entered per Clerk name and maximum 9999 Clerk names can be programmed. A programmed Clerk name can be assigned to a preset key.

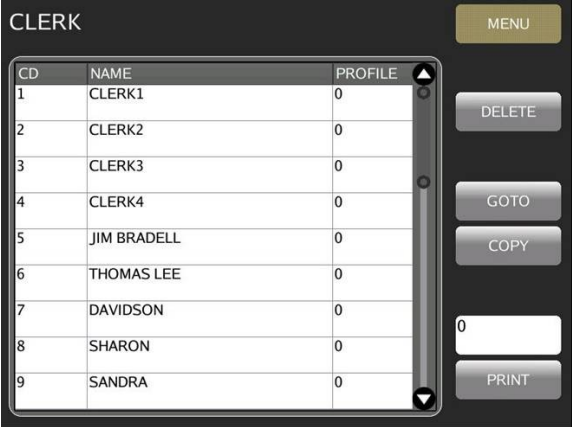

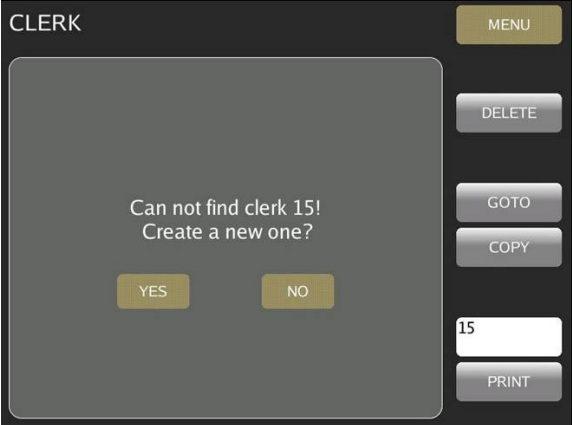

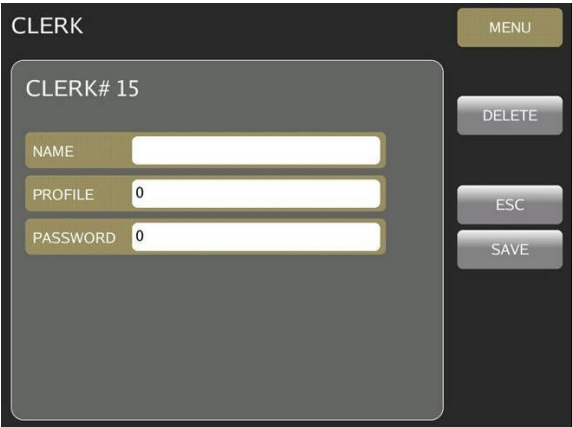

The Clerk number can then be printed on the label, if a print area for Clerk number is set on the label format used. The programmed Clerk name can be printed on receipt when **SPEC141B031 “Selection of Printing Operator Name on Receipt and Label”** in User/Receipt Printing Spec set to “Name”.

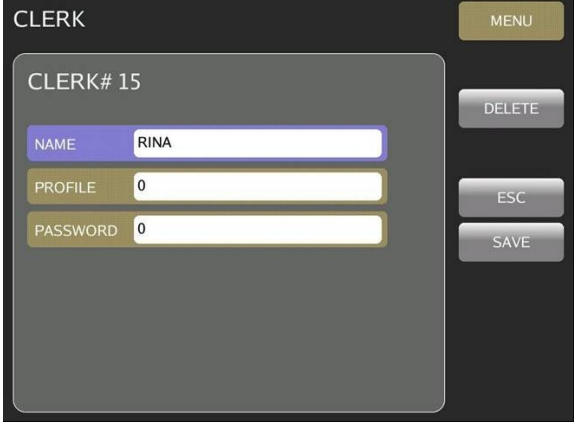

There is two type of clerk can be select NORMAL CLERK and TRAINING CLERK:

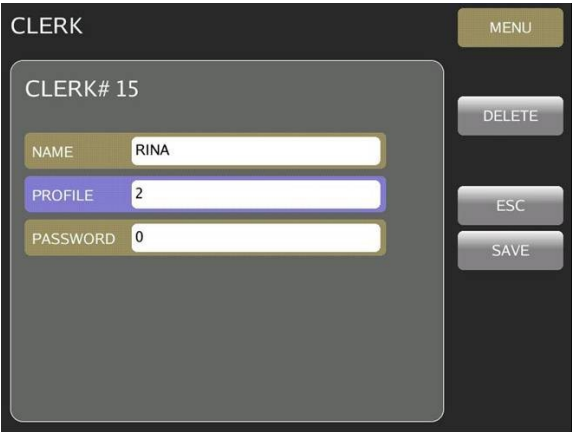

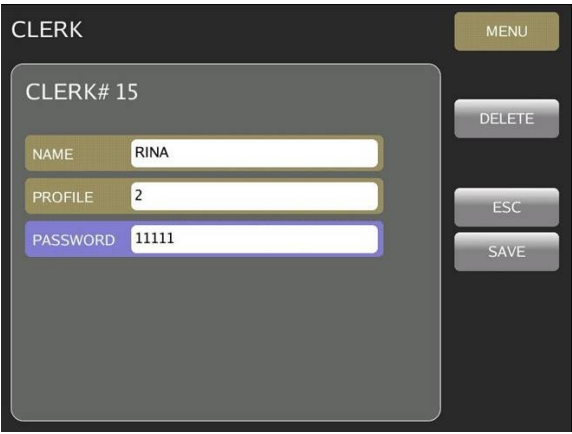

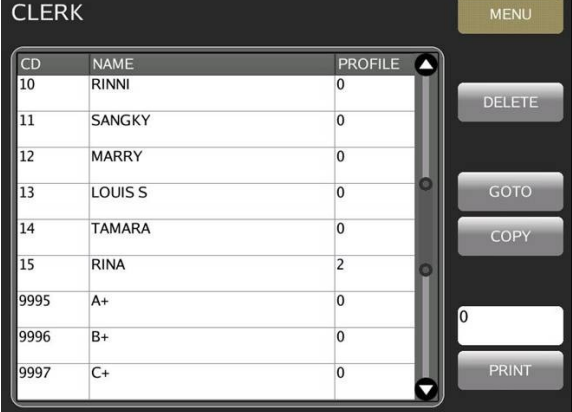

- Normal Clerk – is used for available operation ex. Accumulation, inventory and etc. Also will update the report.
- Training Clerk – is used for training purpose only, and the operation done, will not update the report, inventory or etc

1. Program Clerk File

OPERATION	DISPLAY
1. In MENU Mode.	
2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.	

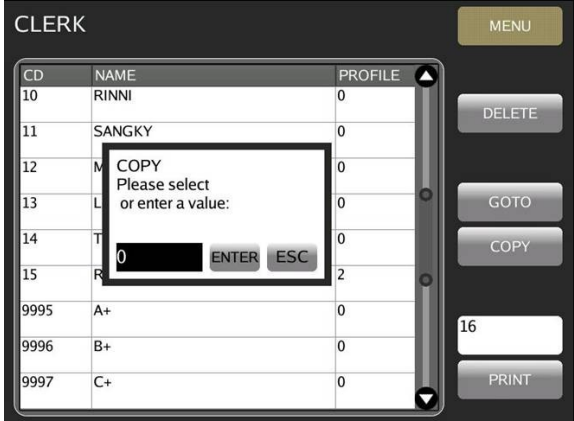

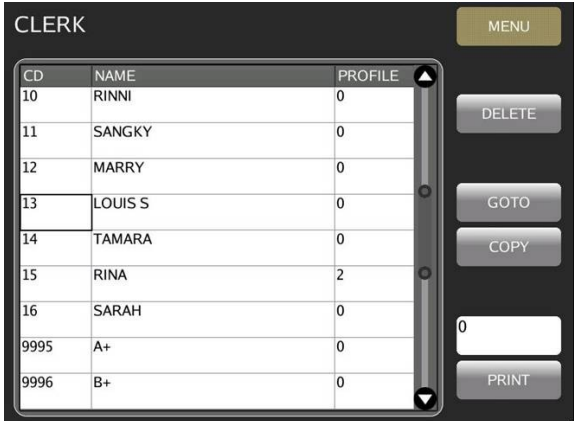

OPERATION	DISPLAY
<p>3. Touch [CLERK] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed Clerk File will be listed in CLERK PROGRAMMING Display Screen.</p> <p>Note 3: Display Screen also used to browse existing Clerk Files using the scroll bar and to select file for modification</p> <p>Note 4 : [PRINT] key used for print all clerk files in receipt printing</p>	
<p>4. Enter Clerk number. (e.g. 15)</p> <p>Touch [ENTER] key.</p>	
<p>5. To create a new Clerk, touch [YES] key.</p> <p>Note: Touch [NO] key to abort.</p>	

OPERATION	DISPLAY
<p>6. Touch [NAME] area to enter the Clerk Name.</p> <p>Enter Clerk Name by touching desired character keys. (e.g. max)</p>	
<p>7. Touch [ENTER] key when finished programming.</p> <p>Note: Touch [ESC] key if you want to exit without saving.</p>	
<p>8. Touch [PROFILE] area to select the Clerk Profile.</p> <p>Note: Press [CLEAR] key, to clear selected profile and exit profile selection screen</p> <p>Note: Profile data must be created in advance</p>	

OPERATION	DISPLAY																														
<p>9. Touch desired Profile number. (e.g. 2)</p> <p>Note: when select profile number it will automatically exit profile selection screen</p>																															
<p>10. Touch [PASSWORD] area and enter a password for the clerk e.g.12323</p>																															
<p>11. Touch [SAVE] key to save the data for Clerk 15.</p> <p>Note: Touch [MENU] key if you want to exit without saving.</p>	 <table border="1" data-bbox="906 1227 1343 1581"> <thead> <tr> <th>CD</th> <th>NAME</th> <th>PROFILE</th> </tr> </thead> <tbody> <tr> <td>10</td> <td>RINNI</td> <td>0</td> </tr> <tr> <td>11</td> <td>SANGKY</td> <td>0</td> </tr> <tr> <td>12</td> <td>MARRY</td> <td>0</td> </tr> <tr> <td>13</td> <td>LOUIS S</td> <td>0</td> </tr> <tr> <td>14</td> <td>TAMARA</td> <td>0</td> </tr> <tr> <td>15</td> <td>RINA</td> <td>2</td> </tr> <tr> <td>9995</td> <td>A+</td> <td>0</td> </tr> <tr> <td>9996</td> <td>B+</td> <td>0</td> </tr> <tr> <td>9997</td> <td>C+</td> <td>0</td> </tr> </tbody> </table>	CD	NAME	PROFILE	10	RINNI	0	11	SANGKY	0	12	MARRY	0	13	LOUIS S	0	14	TAMARA	0	15	RINA	2	9995	A+	0	9996	B+	0	9997	C+	0

2. Copy a Clerk File

The programmed Clerk data can be easily copied into a new Clerk. This function is very useful to save time or avoid mistake for the similar Clerk data programming.

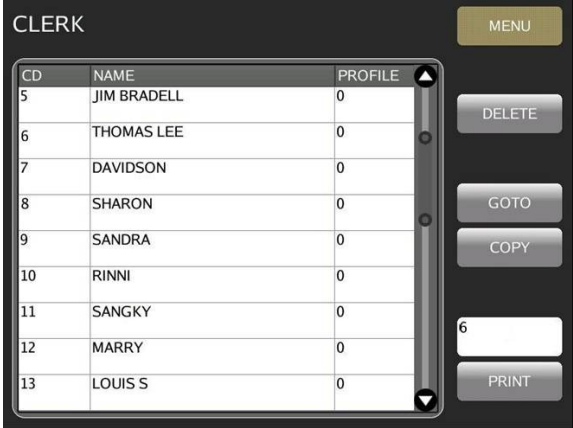

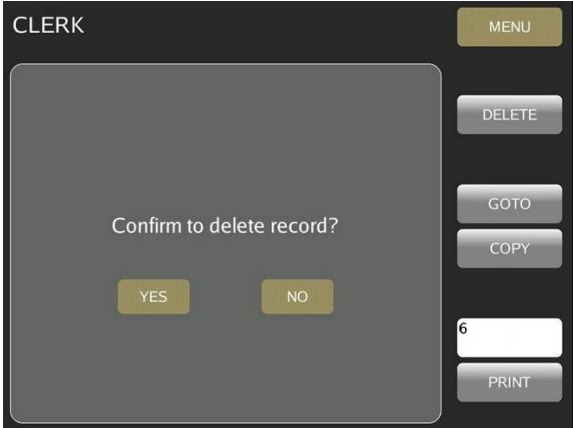

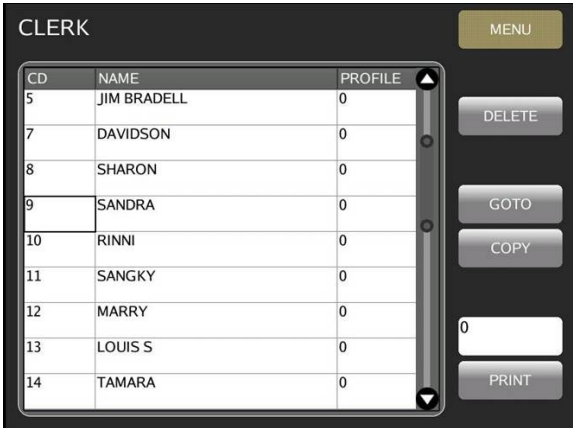

OPERATION	DISPLAY
<p>1. In Clerk Programming Mode, enter a new Clerk number. (e.g. 16)</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	 <p>The screenshot shows the 'CLERK' menu with a list of clerks (CD, NAME, PROFILE) and a 'COPY' dialog box. The dialog box prompts the user to 'Please select or enter a value:' and shows '0' in a text field with 'ENTER' and 'ESC' buttons. The list includes clerks 10-15 and 9995-9997. The 'MENU' button is in the top right, and 'DELETE', 'GOTO', 'COPY', and 'PRINT' buttons are on the right side. A text field with '16' is visible below the 'COPY' button.</p>
<p>2. Touch the desired Clerk data to copy from. (e.g. FARAH)</p> <p>Note: Change the necessary data if required.</p>	 <p>The screenshot shows the 'CLERK# 16' edit screen. It has three input fields: 'NAME' with 'SARAH', 'PROFILE' with '0', and 'PASSWORD' with '0'. The 'MENU' button is in the top right, and 'DELETE', 'ESC', and 'SAVE' buttons are on the right side.</p>
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	 <p>The screenshot shows the 'CLERK' menu with the updated list of clerks. The list now includes clerk 16 (SARAH) with profile 0. The 'MENU' button is in the top right, and 'DELETE', 'GOTO', 'COPY', and 'PRINT' buttons are on the right side. A text field with '0' is visible below the 'COPY' button.</p>

3. Search a Clerk File

Clerk programming provide a fast way to search a Clerk within the Clerk display, this function is useful as a user can direct go to desired searched Clerk without need to browse screen by screen.

OPERATION	DISPLAY																														
<p>1. In Clerk Programming Mode, enter the Clerk Number to be searched. (e.g. 5)</p>	 <table border="1" data-bbox="900 483 1342 831"> <thead> <tr> <th>CD</th> <th>NAME</th> <th>PROFILE</th> </tr> </thead> <tbody> <tr><td>10</td><td>RINNI</td><td>0</td></tr> <tr><td>11</td><td>SANGKY</td><td>0</td></tr> <tr><td>12</td><td>MARRY</td><td>0</td></tr> <tr><td>13</td><td>LOUIS S</td><td>0</td></tr> <tr><td>14</td><td>TAMARA</td><td>0</td></tr> <tr><td>15</td><td>RINA</td><td>2</td></tr> <tr><td>16</td><td>SARAH</td><td>0</td></tr> <tr><td>9995</td><td>A+</td><td>0</td></tr> <tr><td>9996</td><td>B+</td><td>0</td></tr> </tbody> </table>	CD	NAME	PROFILE	10	RINNI	0	11	SANGKY	0	12	MARRY	0	13	LOUIS S	0	14	TAMARA	0	15	RINA	2	16	SARAH	0	9995	A+	0	9996	B+	0

Note: Another method of deleting the Clerk is by entering the Clerk file and touches the DELETE key.

IMAGE FILE

Image is used to make attractive looking labels. Up to 9999 images can be store in the SM-5500's memory. Any bmp files can be use as Image file where need to be store in the Linux directory in **/opt/pcscale/files/img**.

Note: To make Image available for selection in programming, set image as:

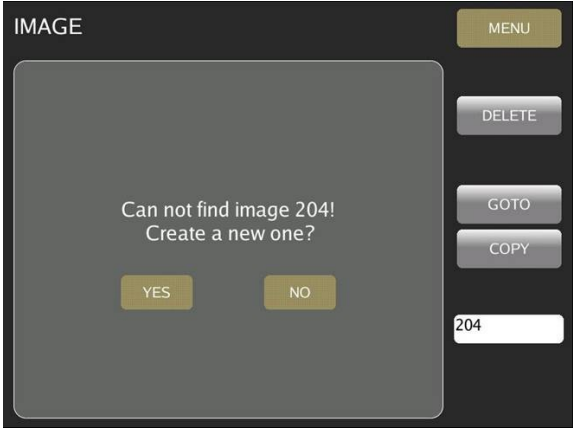

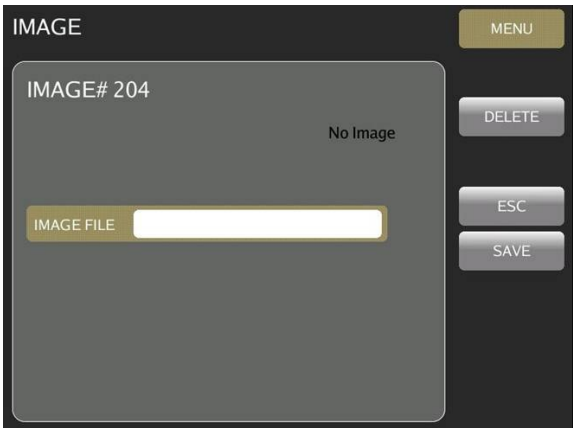

Example 1: For MG1, create image from 1000 – 1999, this is used for MG1 only and

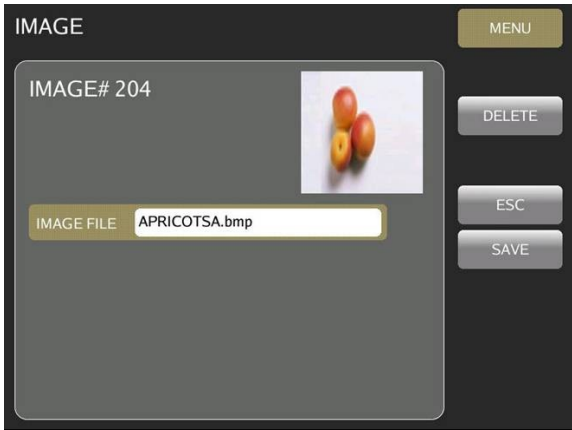

For MG2, create images from 2000 – 2999.

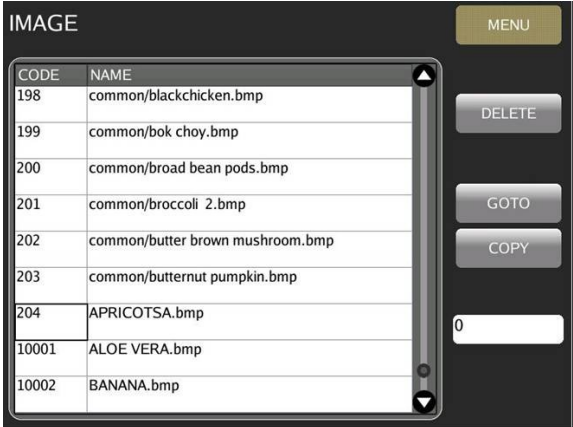

Example 2: For other selection image can be create any number and the example 1 image also will be included.

1. Program Image File

OPERATION	DISPLAY
1. In MENU Mode.	
2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.	

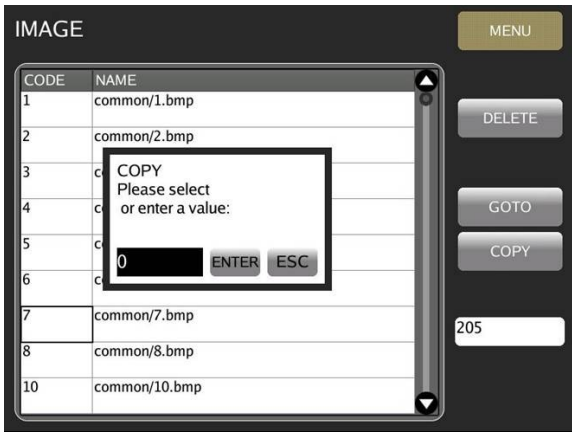

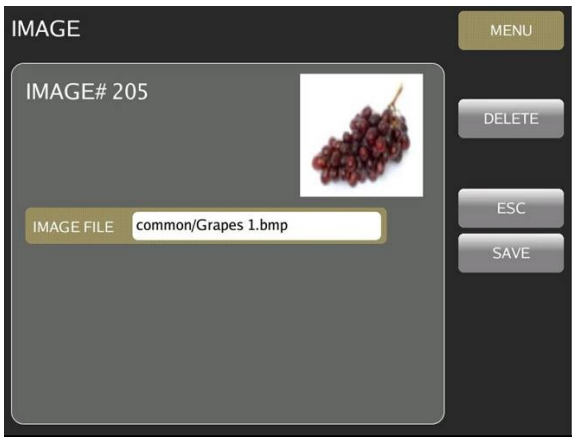

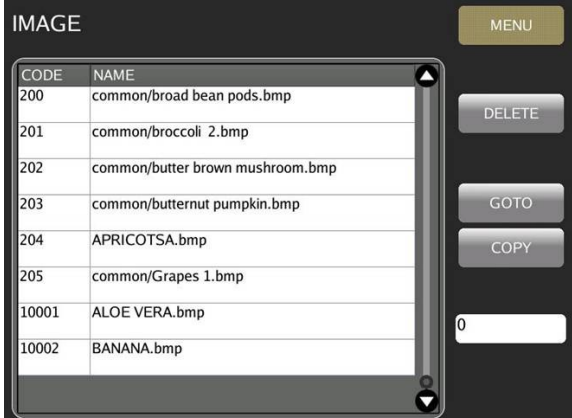

OPERATION	DISPLAY
<p>3. Touch [IMAGE] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note 3: All programmed Image File will be listed in IMAGE PROGRAMMING Display Screen.</p> <p>Note 4: Display Screen also used to browse existing Image Files using the scroll bar and to select file for modification</p> <p>Note 5: image from 1 – 99 is default image.</p>	
<p>4. Enter Image number. (e.g. 204)</p> <p>Touch [ENTER] key.</p>	
<p>5. To create a new Image, touch [YES] key.</p> <p>Note: Touch [NO] key to abort.</p>	

OPERATION	DISPLAY
<p>6. Touch [IMAGE FILE] area to select the Image.</p>	
<p>7. Select Image bmp file. (e.g. Apricotsa)</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p> <p>Note: Touch [CLEAR] to clear selected image.</p>	
<p>8. Touch [ENTER] key.</p> <p>Note: Touch [MENU] key if you want to exit but will prompt out selection for [SAVE], [QUIT] and [CANCEL] buttons.</p>	

OPERATION	DISPLAY
<p>9. Touch [SAVE] key to save the data for Image 204.</p> <p>Note: Touch [MENU] key if you want to exit without saving.</p>	

2. Copy a Image File

The programmed image data can be easily copied into a new Image. This function is time saving and avoid mistake for the similar Image data programming.

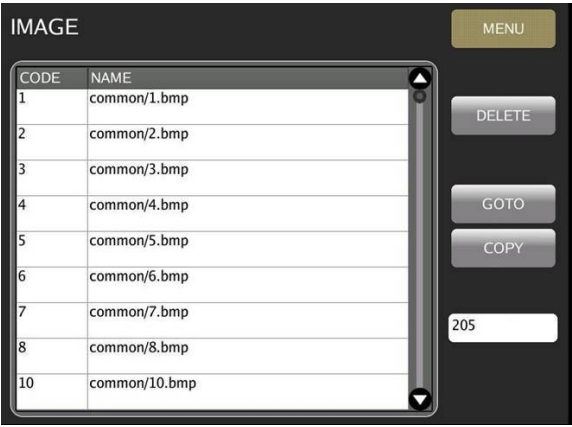

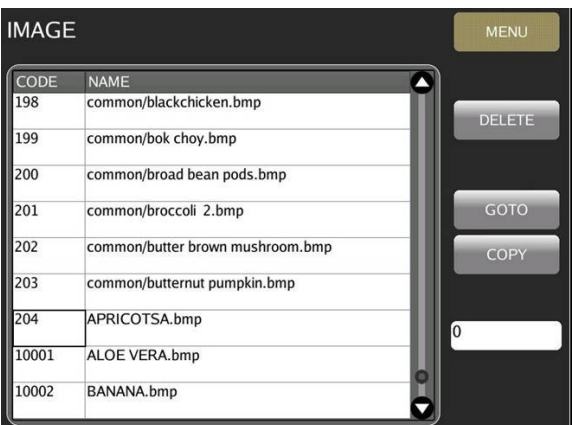

OPERATION	DISPLAY
<p>1. In Image Programming Mode, enter a new Image number. (e.g. 205)</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	
<p>2. Touch the desired Image data to copy from. (e.g. 124)</p> <p>Note: Change the necessary data if it is required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

3. Search an Image File

Image programming provide a fast way to search an Image File within the Image display, this function is useful as a user can direct go to desired searched Image File without need to browse screen by screen.

OPERATION	DISPLAY																				
<p>1. In Image Programming Mode, enter the Image Number to be searched. (e.g. 21)</p>	 <p>The screenshot shows a dark-themed interface titled 'IMAGE'. At the top right is a 'MENU' button. Below it are 'DELETE', 'GOTO', and 'COPY' buttons. A search input field at the bottom right contains the number '21'. The main area is a scrollable list with two columns: 'CODE' and 'NAME'. The list contains the following items:</p> <table border="1"> <thead> <tr> <th>CODE</th> <th>NAME</th> </tr> </thead> <tbody> <tr><td>1</td><td>common/1.bmp</td></tr> <tr><td>2</td><td>common/2.bmp</td></tr> <tr><td>3</td><td>common/3.bmp</td></tr> <tr><td>4</td><td>common/4.bmp</td></tr> <tr><td>5</td><td>common/5.bmp</td></tr> <tr><td>6</td><td>common/6.bmp</td></tr> <tr><td>7</td><td>common/7.bmp</td></tr> <tr><td>8</td><td>common/8.bmp</td></tr> <tr><td>10</td><td>common/10.bmp</td></tr> </tbody> </table>	CODE	NAME	1	common/1.bmp	2	common/2.bmp	3	common/3.bmp	4	common/4.bmp	5	common/5.bmp	6	common/6.bmp	7	common/7.bmp	8	common/8.bmp	10	common/10.bmp

26	common/26.bmp																				
27	common/27.bmp																				
28	common/28.bmp																				
29	common/29.bmp																				

4. Delete a Programmed Image File

OPERATION	DISPLAY
<p>1. In Image Programming Mode, enter the Image Number to be deleted. (e.g. Image295)</p> <p>Note: Also can browse and touch the Image (without entering the Image Number)</p>	
<p>2. Touch [DELETE] key.</p>	
<p>3. Touch [YES] key to delete the data.</p> <p>Note Touch [NO]: key to escape deleting the data.</p>	

Note: Another method of deleting the Image is by entering the Image file and touches the DELETE key.

SHOP NAME FILE

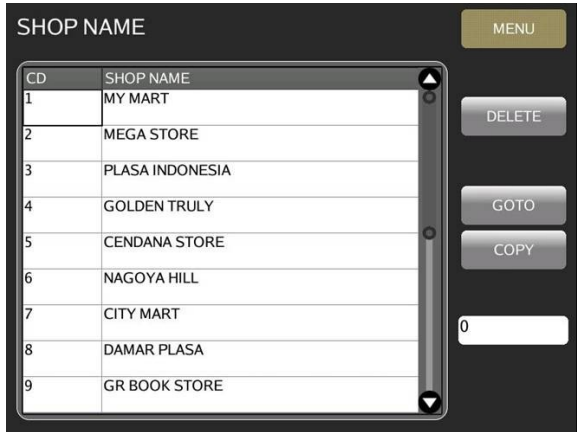

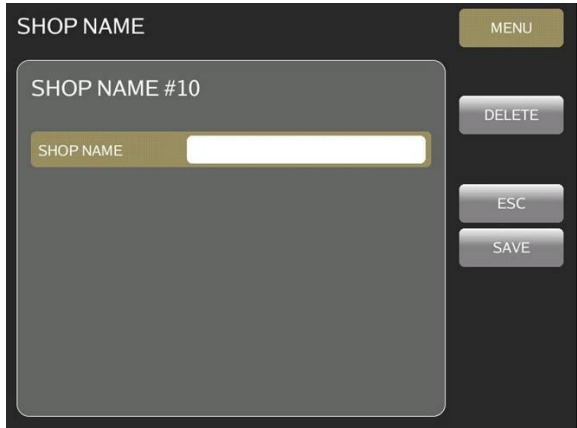

Shop Name file is used for programming of Shop Name. Shop Name is automatically printed on the label in REGISTRATION MODE, if print area for Shop Name is set on the label format used. The maximum number of characters possible to enter varies according to the size of print area and the character size used.

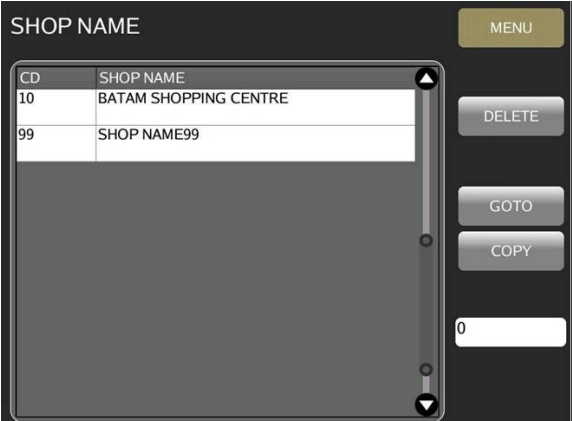

Up to 32 Shop Names can be programmed with each 3 lines as maximum. The default Shop Name print on label can be set at **SPEC141B010 “Default Shop Name Number for Label Printing”** in Label Printing Spec of User Setup and default Shop Name print on receipt can be set at **SPEC141B011 “Default Shop Name Number for Receipt Printing”** in Receipt Printing Spec of User Setup.

Note: Shop Name will not be printed on the label if the selected label format without print area for Shop Name or default spec set to 0.

1. Program Shop Name File

OPERATION	DISPLAY
1. MENU Mode	
2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.	

OPERATION	DISPLAY
<p>3. Touch [SHOP NAME] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed Shop Name File will be listed in SHOPNAME PROGRAMMING Display Screen.</p> <p>Note 3: Display Screen also used to browse existing Shop Name Files using the scroll bar and to select file for modification</p>	 <p>The screenshot shows a screen titled 'SHOP NAME'. At the top right is a 'MENU' button. Below it is a list of shop names with a scroll bar on the right. The list has two columns: 'CD' and 'SHOP NAME'. The items are: 1 MY MART, 2 MEGA STORE, 3 PLASA INDONESIA, 4 GOLDEN TRULY, 5 CENDANA STORE, 6 NAGOYA HILL, 7 CITY MART, 8 DAMAR PLASA, 9 GR BOOK STORE. To the right of the list are buttons for 'DELETE', 'GOTO', and 'COPY'. At the bottom right is a numeric input field containing the number '0'.</p>
<p>4. Enter Shop Name number. (e.g. 10)</p> <p>Touch [ENTER] key.</p>	 <p>The screenshot shows a screen titled 'SHOP NAME'. At the top right is a 'MENU' button. Below it are buttons for 'DELETE', 'GOTO', and 'COPY'. In the center, there is a message: 'Can not find shop name 10! Create a new one?'. Below the message are two buttons: 'YES' and 'NO'. At the bottom right is a numeric input field containing the number '10'.</p>
<p>5. To create a new Shop Name, touch [YES] key.</p> <p>Note: Touch [NO] key to abort.</p>	 <p>The screenshot shows a screen titled 'SHOP NAME'. At the top right is a 'MENU' button. Below it is a form titled 'SHOP NAME #10'. The form has a label 'SHOP NAME' and a numeric input field. To the right of the form are buttons for 'DELETE', 'ESC', and 'SAVE'.</p>

OPERATION	DISPLAY
<p>6. Touch [SHOPNAME] area to enter the Shop Name.</p> <p>Enter Shop Name by touching desired character keys. (e.g. NTUC SINGAPORE)</p> <p>Note 1: Touch [ARROW DOWN] to program 2nd line with same procedure as the 1st line if necessary.</p> <p>Note 2: Touch [EXIT] key if you want to exit without saving.</p>	
<p>7. Touch [ENTER] key when finished programming.</p> <p>Touch [SAVE] key to save the data for Shop Name 3.</p> <p>Note: Touch [MENU] key if you want to exit without saving.</p>	

2. Copy a Shop Name File

The programmed Shop Name data can be easily copied into a new Shop Name. This function is very useful to save time or avoid mistake for the similar Shop Name data programming.

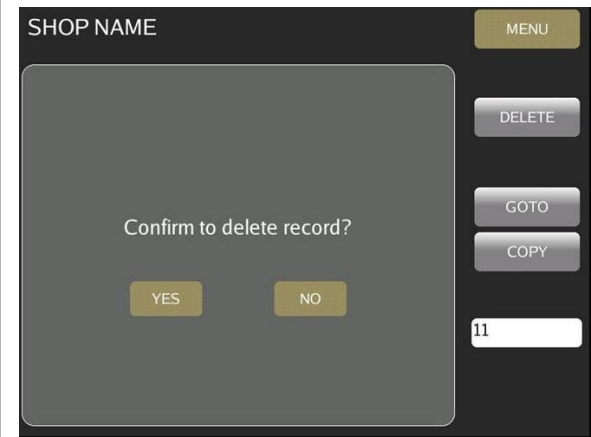

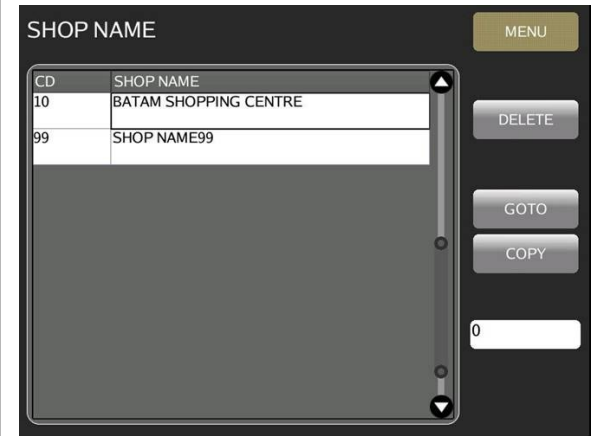

OPERATION	DISPLAY
<p>1. In Shop Name Programming Mode, enter a new Shop Name number. (e.g. 3)</p> <p>Touch [COPY] key.</p>	
<p>2. Touch the desired Shop Name data to copy from. (e.g. Shop Name #1)</p> <p>Note: Change the necessary data if required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

3. Search a SHOP NAME File

Shop Name programming provide a fast way to search a Shop Name within the Shop Name display, this function is useful as a user can direct go to desired searched Shop Name without need to browse screen by screen.

OPERATION	DISPLAY
<p>1. In Shop Name Programming Mode, enter the Shop Name Number to be searched. (e.g. 11)</p>	 <p>The screenshot shows a 'SHOP NAME' display with a list of shop names. The search field contains the number '11'. The list includes: 1 MY MART, 2 MEGA STORE, 3 PLASA INDONESIA, 4 GOLDEN TRULY, 5 CENDANA STORE, 6 NAGOYA HILL, 7 CITY MART, 8 DAMAR PLASA, and 9 GR BOOK STORE. Buttons for MENU, DELETE, GOTO, and COPY are visible on the right.</p>
<p>2. Touch [GO TO] key.</p> <p>Note: The searched Shop Name will be top listed.</p>	 <p>The screenshot shows the 'SHOP NAME' display after the search. The list now shows '11 MALL INDONESIA' at the top and '99 SHOP NAME99' below it. The search field is empty. Buttons for MENU, DELETE, GOTO, and COPY are visible on the right.</p>

4. Delete a Programmed Shop Name File

OPERATION	DISPLAY
<p>1. In Shop Name Programming Mode, enter the Shop Name Number to be deleted. (e.g. Shop Name 11)</p> <p>Note: Also can browse and touch the Shop Name (without entering the Shop Name Number)</p>	 <p>The screenshot shows a screen titled 'SHOP NAME'. At the top right is a 'MENU' button. Below it is a list with two columns: 'CD' and 'SHOP NAME'. The list contains three entries: '11 TWS', '55 MEGAMART', and '99 RAMAYANA DEPARTMENT STORE'. The first entry is highlighted. To the right of the list are buttons for 'DELETE', 'GOTO', and 'COPY'. At the bottom right, there is a text input field containing the number '11'.</p>
<p>2. Touch [DELETE] key.</p>	 <p>The screenshot shows the same 'SHOP NAME' screen, but the list is hidden behind a grey dialog box. The dialog box contains the text 'Confirm to delete record?' and two buttons: 'YES' and 'NO'. The 'MENU', 'DELETE', 'GOTO', 'COPY', and input field buttons are still visible on the right side of the screen.</p>
<p>3. Touch [YES] key to delete the data.</p> <p>Note: Touch [NO] key to escape deleting the data.</p>	 <p>The screenshot shows the 'SHOP NAME' screen after the deletion. The list now contains two entries: '10 BATAM SHOPPING CENTRE' and '99 SHOP NAME99'. The first entry is highlighted. The 'MENU', 'DELETE', 'GOTO', 'COPY', and input field buttons are still visible on the right side of the screen, with the input field now containing the number '0'.</p>

Note: Another method of deleting the Shop Name is by entering the Shop Name file and touches the DELETE key.

TAX FILE

This function enables you to program consumption tax rate included or excluded in the price. Up to 10 Tax Numbers (1~10) can be programmed. The programmed Tax rates that are linked to a Main Group will apply for all PLU in the Main Group. Tax Rates can be entered between 00.00% and 99.99%. To enable TAX function, 'TAX' must be selected at the SPEC140C001 "Tax" (in W&M/Tax Spec) in advance.

There are two types of taxes:

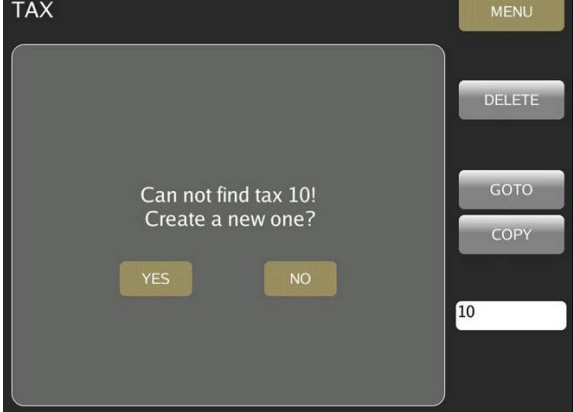

- ❖ ATX: Tax is added to the Total Price.
- ❖ VTX: Tax is included in the Total Price.

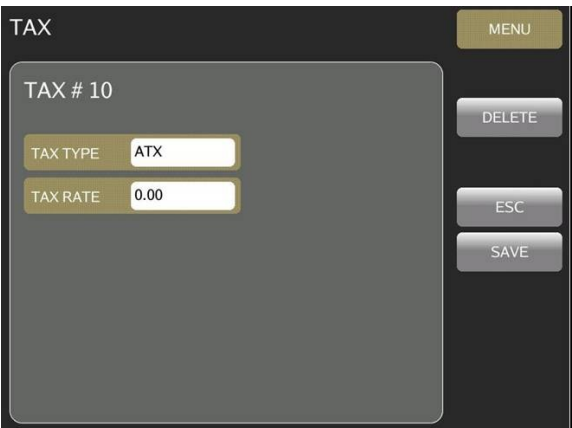

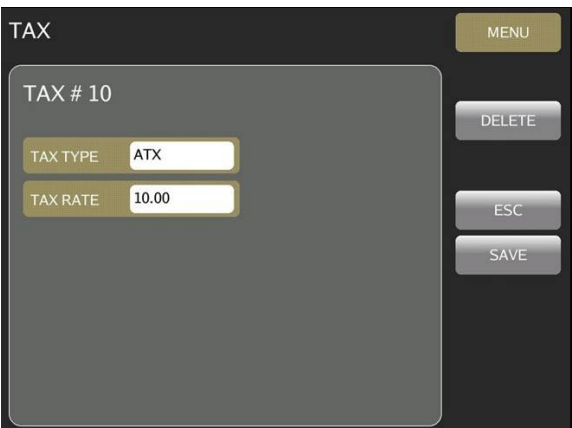

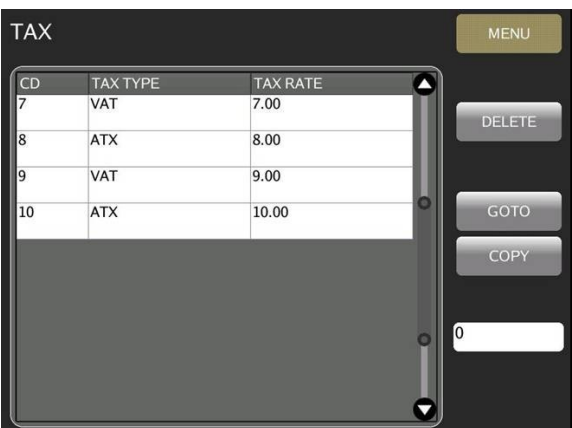

Note: If you want to print **Price with Tax** on Item Label, the selected label format must have print area for **Item Price after Tax**.

To enable this function, please set **Spec 140C001** to selection "**1.TAX**"

1. Program Tax File

OPERATION	DISPLAY
1. In MENU Mode	
2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.	

OPERATION	DISPLAY
<p>3. Touch [TAX] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed Tax File will be listed in TAX PROGRAMMING Display Screen.</p> <p>Note 3: Display Screen also used to browse existing Tax Files using the scroll bar and to select file for modification</p>	
<p>4. Enter Tax number. (e.g. 10)</p> <p>Touch [YES] key.</p>	
<p>5. To create a new Tax, touch [YES] key.</p> <p>Note: Touch [NO] key to abort.</p>	

OPERATION	DISPLAY															
<p>6. Touch [VAT] key to select the Tax Type. (e.g. ATX)</p> <p>Note: [TAX TYPE] key will toggle for the following selection, VAT and ATX.</p>	 <p>TAX # 10</p> <p>TAX TYPE ATX</p> <p>TAX RATE 0.00</p> <p>MENU, DELETE, ESC, SAVE</p>															
<p>7. Enter the Tax value by the numeric key. (e.g. 10%)</p>	 <p>TAX # 10</p> <p>TAX TYPE ATX</p> <p>TAX RATE 10.00</p> <p>MENU, DELETE, ESC, SAVE</p>															
<p>8. Touch [SAVE] key to save the data for Tax 10.</p> <p>Note: Touch [MENU] key if you want to exit without saving.</p>	 <p>TAX</p> <table border="1"> <thead> <tr> <th>CD</th> <th>TAX TYPE</th> <th>TAX RATE</th> </tr> </thead> <tbody> <tr> <td>7</td> <td>VAT</td> <td>7.00</td> </tr> <tr> <td>8</td> <td>ATX</td> <td>8.00</td> </tr> <tr> <td>9</td> <td>VAT</td> <td>9.00</td> </tr> <tr> <td>10</td> <td>ATX</td> <td>10.00</td> </tr> </tbody> </table> <p>MENU, DELETE, GOTO, COPY, 0</p>	CD	TAX TYPE	TAX RATE	7	VAT	7.00	8	ATX	8.00	9	VAT	9.00	10	ATX	10.00
CD	TAX TYPE	TAX RATE														
7	VAT	7.00														
8	ATX	8.00														
9	VAT	9.00														
10	ATX	10.00														

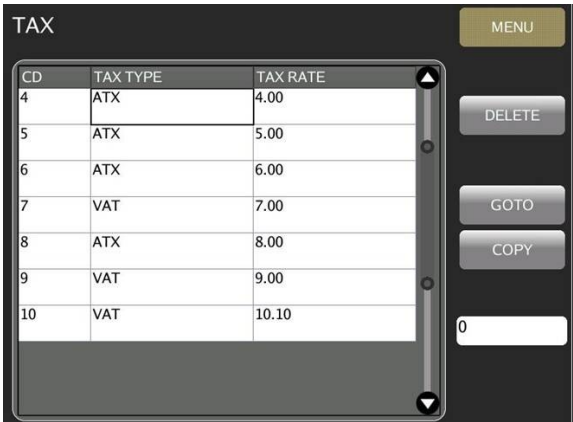

2. Copy a Tax File

The programmed Tax data can be easily copied into a new Tax. This function is very useful to save time or avoid mistake for the similar Tax data programming.

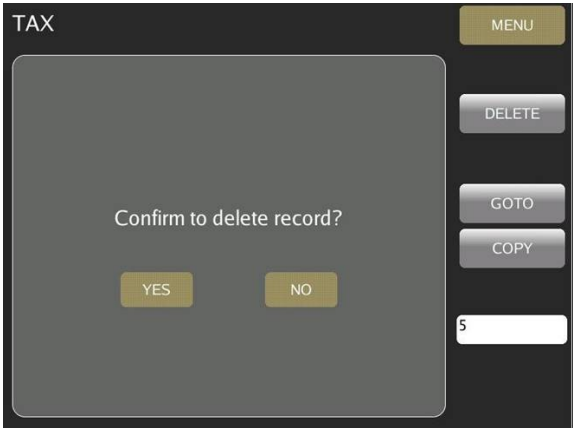

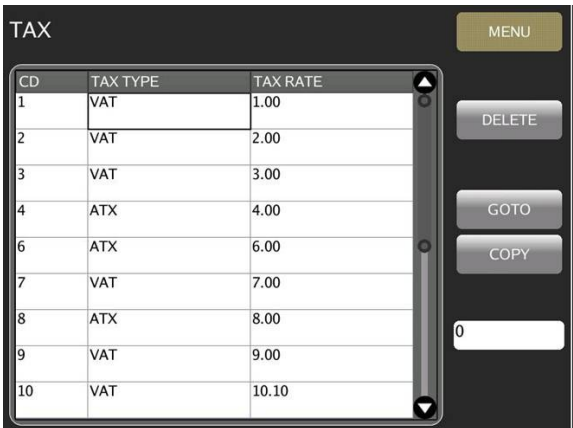

OPERATION	DISPLAY
<p>1. In Tax Programming Mode, enter a new Tax number. (e.g. 10)</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	
<p>2. Touch the desired Tax data to copy from. (e.g. Tax 3)</p> <p>Note: Change the necessary data if required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

3. Search a Tax Files

Tax programming provide a fast way to search a Tax within the Tax display, this function is useful as a user can direct go to desired searched Tax without need to browse screen by screen.

OPERATION	DISPLAY																								
<p>1. In TAX Programming Mode, enter the TAX Number to be searched. (e.g. 4)</p>	 <p>The screenshot shows a 'TAX' display with a table of tax entries. The search field at the bottom right contains the number '4'. The table lists the following entries:</p> <table border="1"> <thead> <tr> <th>CD</th> <th>TAX TYPE</th> <th>TAX RATE</th> </tr> </thead> <tbody> <tr><td>5</td><td>ATX</td><td>5.00</td></tr> <tr><td>6</td><td>ATX</td><td>6.00</td></tr> <tr><td>7</td><td>VAT</td><td>7.00</td></tr> <tr><td>8</td><td>ATX</td><td>8.00</td></tr> <tr><td>9</td><td>VAT</td><td>9.00</td></tr> <tr><td>10</td><td>VAT</td><td>10.10</td></tr> </tbody> </table>	CD	TAX TYPE	TAX RATE	5	ATX	5.00	6	ATX	6.00	7	VAT	7.00	8	ATX	8.00	9	VAT	9.00	10	VAT	10.10			
CD	TAX TYPE	TAX RATE

Note: Another method of deleting the Tax is by entering the Tax t file and touches the DELETE key.

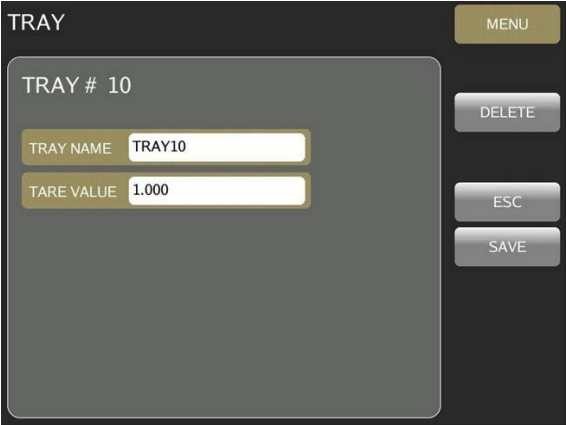

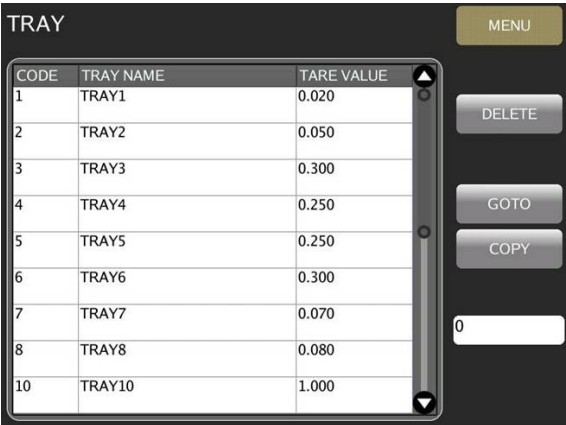

TRAY FILE

Tray file is used to program Tare file, which can be selected in PLU programming. This function can be used in condition like when more than 1 product using the same tare value.

Note: To use Tray function SPEC141D056 “Tare from Tray File” in User/Operation Spec must be set to “Yes”

1. Programming TRAY FILE

OPERATION	DISPLAY																														
<p>1. In PROGRAMMING MODE [PLU RELATED] screen.</p>	 <p>The screenshot shows a 'PROGRAMMING MODE' screen with a grid of buttons: CLERK, IMAGE, TRAY, MAIN GROUP, DEPARTMENT, SHOP NAME, ADVERTISEMENT, INGREDIENT, SPECIAL MESSAGE, PLACE, TEXT, TAX, PRODUCT INFO, PRICE CHANGE, SPECIAL PRICE CHANGE, and a MENU button at the bottom.</p>																														
<p>2. Touch [TRAY FILE] key to enter Tray File Programming screen.</p> <p>Note: a) Touch [MENU] key back to PROGRAMMING MODE [PLU RELATED] screen. b) Touch [GO TO] key to search and view the existing Tray Files c) Touch the data file you want to modify. d) Touch [COPY] key to select existing Tray File copied to new Tray File.</p>	 <p>The screenshot shows a 'TRAY' programming screen with a table of tray files. The table has columns for CODE, TRAY NAME, and TARE VALUE. The data is as follows:</p> <table border="1"> <thead> <tr> <th>CODE</th> <th>TRAY NAME</th> <th>TARE VALUE</th> </tr> </thead> <tbody> <tr><td>1</td><td>TRAY1</td><td>0.020</td></tr> <tr><td>2</td><td>TRAY2</td><td>0.050</td></tr> <tr><td>3</td><td>TRAY3</td><td>0.300</td></tr> <tr><td>4</td><td>TRAY4</td><td>0.250</td></tr> <tr><td>5</td><td>TRAY5</td><td>0.250</td></tr> <tr><td>6</td><td>TRAY6</td><td>0.300</td></tr> <tr><td>7</td><td>TRAY7</td><td>0.070</td></tr> <tr><td>8</td><td>TRAY8</td><td>0.080</td></tr> <tr><td>99</td><td>TRAY99</td><td>0.016</td></tr> </tbody> </table> <p>Buttons on the right include MENU, DELETE, GOTO, COPY, and a numeric input field showing '0'.</p>	CODE	TRAY NAME	TARE VALUE	1	TRAY1	0.020	2	TRAY2	0.050	3	TRAY3	0.300	4	TRAY4	0.250	5	TRAY5	0.250	6	TRAY6	0.300	7	TRAY7	0.070	8	TRAY8	0.080	99	TRAY99	0.016
CODE	TRAY NAME	TARE VALUE																													
1	TRAY1	0.020

3	TRAY3	0.300																													
4	TRAY4	0.250																													
5	TRAY5	0.250																													
6	TRAY6	0.300																													
7	TRAY7	0.070																													
8	TRAY8	0.080																													
10	TRAY10	1.000																													
<p>6. Touch [MENU] key to return to PROGRAMMING MODE [PLU RELATED] screen.</p>																															

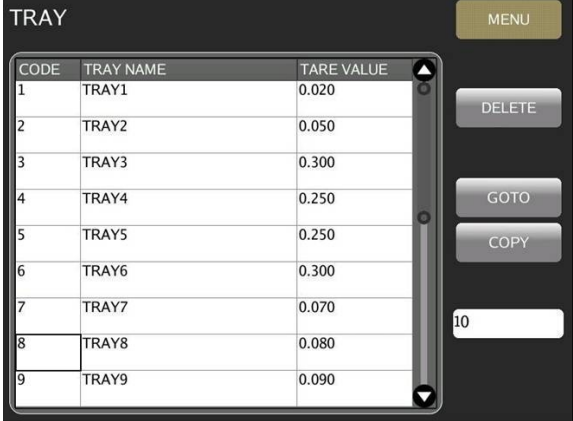

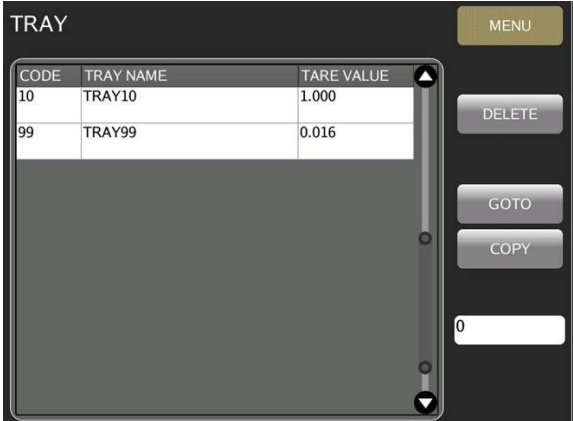

2. Copy a Tray File

The programmed Country data can be easily copied into a new Tray. This function is very useful to save time or avoid mistake for the similar Tray data programming.

OPERATION	DISPLAY
<p>1. In Country Programming Mode, enter a new Tray number. (e.g. 9)</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	
<p>2. Touch the desired Tray data to copy from. (e.g. Tray 8)</p> <p>Note: Change the necessary data if required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

3. Search Tray File

Tray programming provide a fast way to search a Tray File within the Tray display, this function is useful as a user can direct go to desired searched Trayy File without need to browse screen by screen.

OPERATION	DISPLAY																														
<p>1. In Tray Programming Mode, enter the Tray Number to be searched. (e.g. 10)</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	 <p>The screenshot shows a 'TRAY' display with a table of tray information. The table has three columns: CODE, TRAY NAME, and TARE VALUE. The rows are numbered 1 through 9. To the right of the table are buttons for MENU, DELETE, GOTO, and COPY. Below the buttons is a search input field containing the number '10'.</p> <table border="1" data-bbox="906 521 1345 875"> <thead> <tr> <th>CODE</th> <th>TRAY NAME</th> <th>TARE VALUE</th> </tr> </thead> <tbody> <tr><td>1</td><td>TRAY1</td><td>0.020</td></tr> <tr><td>2</td><td>TRAY2</td><td>0.050</td></tr> <tr><td>3</td><td>TRAY3</td><td>0.300</td></tr> <tr><td>4</td><td>TRAY4</td><td>0.250</td></tr> <tr><td>5</td><td>TRAY5</td><td>0.250</td></tr> <tr><td>6</td><td>TRAY6</td><td>0.300</td></tr> <tr><td>7</td><td>TRAY7</td><td>0.070</td></tr> <tr><td>8</td><td>TRAY8</td><td>0.080</td></tr> <tr><td>9</td><td>TRAY9</td><td>0.090</td></tr> </tbody> </table>	CODE	TRAY NAME	TARE VALUE	1	TRAY1	0.020	2	TRAY2	0.050	3	TRAY3	0.300	4	TRAY4	0.250	5	TRAY5	0.250	6	TRAY6	0.300	7	TRAY7	0.070	8	TRAY8	0.080	9	TRAY9	0.090
CODE	TRAY NAME	TARE VALUE																													
1	TRAY1	0.020																													
2	TRAY2	0.050																													
3	TRAY3	0.300																													
4	TRAY4	0.250																													
5	TRAY5	0.250

7	TRAY7	0.070																													
8	TRAY8	0.080																													
9	TRAY9	0.090																													
<p>2. Touch [GO TO] key.</p> <p>Note: The searched Country will be top listed.</p>	 <p>The screenshot shows the 'TRAY' display after a search. The table now shows '10' as the first entry and '99' as the second entry. The search input field is now empty.</p> <table border="1" data-bbox="906 974 1345 1328"> <thead> <tr> <th>CODE</th> <th>TRAY NAME</th> <th>TARE VALUE</th> </tr> </thead> <tbody> <tr><td>10</td><td>TRAY10</td><td>1.000</td></tr> <tr><td>99</td><td>TRAY99</td><td>0.016</td></tr> </tbody> </table>	CODE	TRAY NAME	TARE VALUE	10	TRAY10	1.000	99	TRAY99	0.016																					
CODE	TRAY NAME	TARE VALUE																													
10	TRAY10	1.000																													
99	TRAY99	0.016																													

4. Delete a Programmed Tray File

OPERATION	DISPLAY
<p>1. In Tray Programming Mode, enter the Tray Number to be deleted. (e.g. Tray 0)</p> <p>Note: Also can browse and touch the Programmed Tray (without entering the Programmed Number)</p>	<p>The screenshot shows a table with columns CODE, TRAY NAME, and TARE VALUE. The rows are numbered 1 through 9. The TARE VALUE for each tray is: TRAY1 (0.020), TRAY2 (0.050), TRAY3 (0.300), TRAY4 (0.250), TRAY5 (0.250), TRAY6 (0.300), TRAY7 (0.070), TRAY8 (0.080), and TRAY9 (0.090). On the right side, there are buttons for MENU, DELETE, GOTO, and COPY, and a numeric input field containing the number 9.</p>
<p>2. Touch [DELETE] key.</p>	<p>The screenshot shows the same TRAY menu as above, but with a confirmation dialog box overlaid in the center. The dialog box contains the text 'Confirm to delete record?' and two buttons labeled YES and NO. The input field on the right now contains the number 9.</p>
<p>3. Touch [YES] key to delete the data.</p> <p>Note: Touch [NO] key to escape deleting the data.</p>	<p>The screenshot shows the TRAY menu after the deletion of tray 9. The table now includes a new row for TRAY10 with a TARE VALUE of 1.000. The input field on the right now contains the number 0.</p>

Note: Another method of deleting the Programmed is by entering the Programmed file and touches the DELETE key.

PRODUCT INFO

Product Info file is an Information System tool to provide information to the customer or operator. There is two type of information "PLU (Product) Information" and "General Information".

Product Information file is an information about product (ingredient, cooking tip, nutrifact, etc) and General Information file is an information about general information (any information).

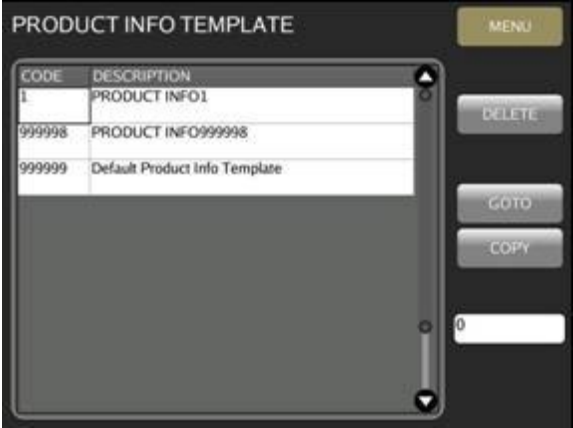

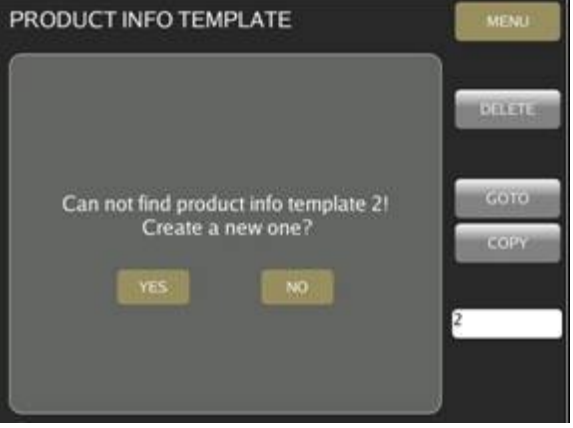

Each Product Information record can contain 10 information of the product in variant format (in GIF, BMP, and html). Maximum 999999 Product Info can be programmed, Product Info 999999 only can be used for General Information.

Note1: To get the product information, call up the item (PLU), then press the Product Info Function Key, Please refer to Preset Function key programming.

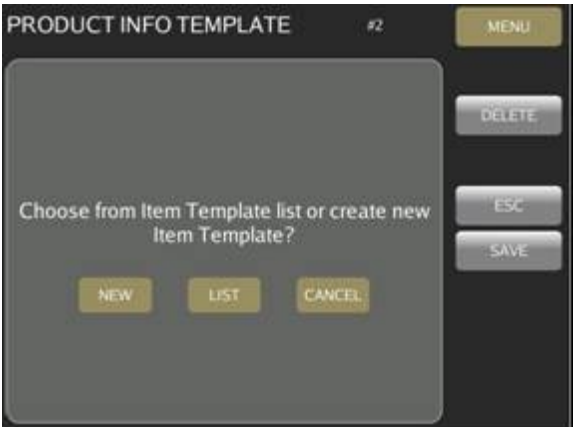

Note2: For PLU (Product) Information, this Function should be assigned to PLU Programming. Required to program in PLU Programming in advance, Please refer to [PLU Programming](#).

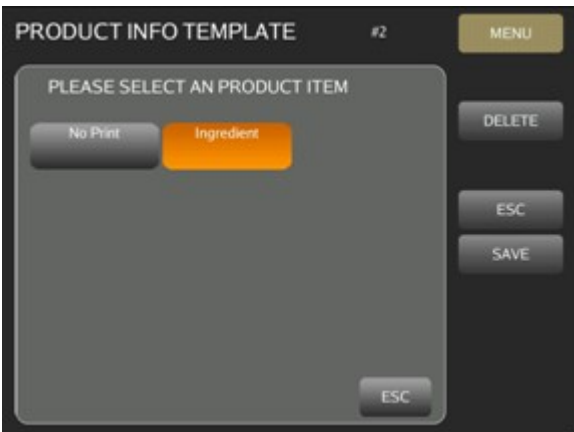

1. Program Product Info File

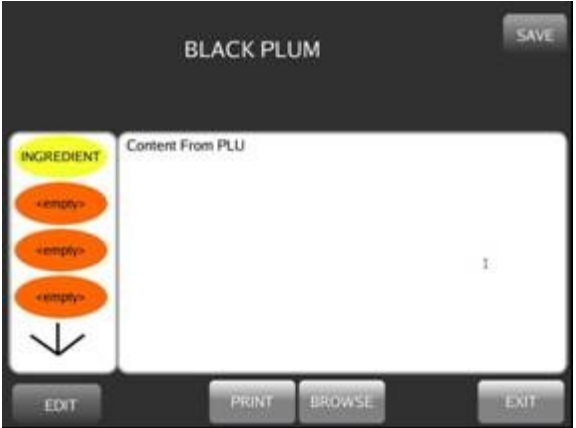

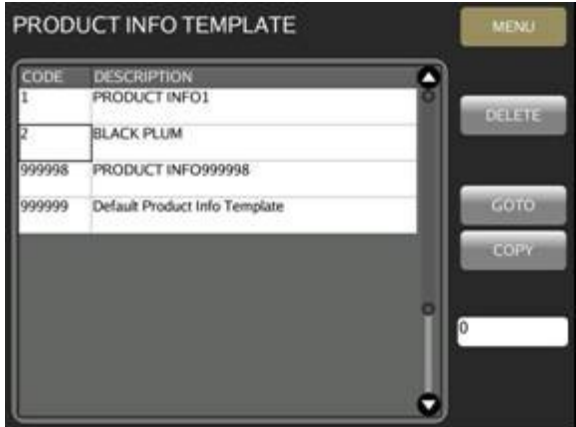

OPERATION	DISPLAY
1. In MENU Mode.	
2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.	

OPERATION	DISPLAY
<p>3. Touch [PRODUCT INFO] key.</p> <p>Note1: Touch [MENU] key to return back to programming Mode</p> <p>Note2: All programmed Product Info File will be listed in PRODUCT INFO PROGRAMMING Display Screen.</p> <p>Note3: Display Screen also used to browse existing Product Info Files using the scroll bar and to select file for modification.</p>	
<p>4. Enter Product Info Code (e.g. 2).</p> <p>Press [PLU] key at keypad.</p>	
<p>5. To create a new Product Info File, touch [YES] key.</p> <p>Note1: Touch [NO] key to abort.</p> <p>Note3: Touch [MENU] key to return back to programming Mode</p>	

OPERATION	DISPLAY
<p>6. Touch [DESCRIPTION] area to enter the Product Info Name.</p> <p>Enter Product Info Description by touching desired character keys (e.g. BLACK PLUM).</p>	
<p>7. Touch [ENTER] key to save Product Info Description.</p> <p>Note: Press [EXIT] button to exit without saving.</p>	
<p>8. Touch [DISPLAY] key to set Product Info Display.</p> <p>Note1: Auto Display - It will auto prompt/display product info screen, when the PLU with product info called.</p> <p>Note2: Manual Display - After called PLU with product info, required to press [Product Info] function key to display product info screen.</p> <p>Note3: No Display - After called PLU with product info, required to press [Product Info] function key will not display product info screen.</p>	

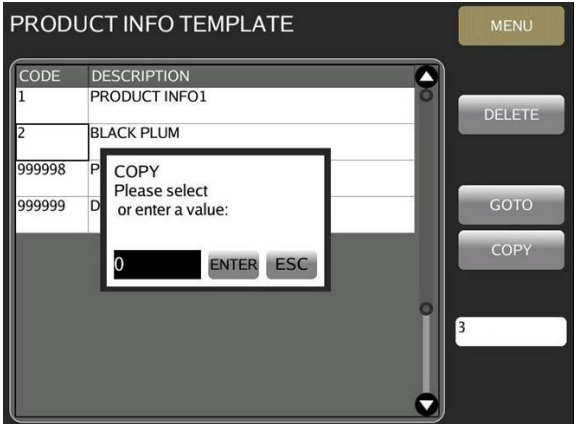

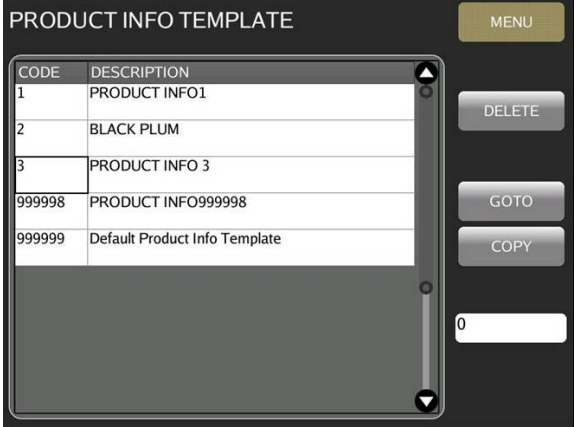

OPERATION	DISPLAY
<p>9. Setting for Auto Display (e.g. Display is set for "Auto Display" and Auto Print are set to "No Print").</p>	
<p>10. Touch [empty] area to select the product info template file type selection (can be select to FILE or LINK) e.g. button [2].</p> <p>Note 1: Touch [NEW] key to create new template file.</p> <p>Note 2: Touch [LIST] key to list out all created old template file.</p> <p>Note 3: Touch [CANCEL] key to back to product info menu.</p>	
<p>11. Touch [LIST] area to browse and select file to be used.</p> <p>Note 1: Touch [ESC] key to exit.</p> <p>Note 2: Touch [CLEAR] key to clear selected template file. e.g. clear the template file type #2 PROD INFO.</p> <p>Note 3: Touch [ENTER] key to confirm the selected file to be chosen. e.g. select the INGREDIENT.</p>	

OPERATION	DISPLAY
<p>12. Touch [AUTO PRINT] and select [Ingredient]</p> <p>Note: Touch [ESC] key to exit.</p>	
<p>13. Prompt out [PRINTING] key to select/save FILE NAME 2.</p>	
<p>14. Touch [PRINTING] key will list out many selections. e.g. User Select.</p>	

OPERATION	DISPLAY
<p>15. Touch [PREVIEW] key.</p>	
<p>16. Touch [SAVE] key to save PRODUCT INFO 2 Data.</p>	

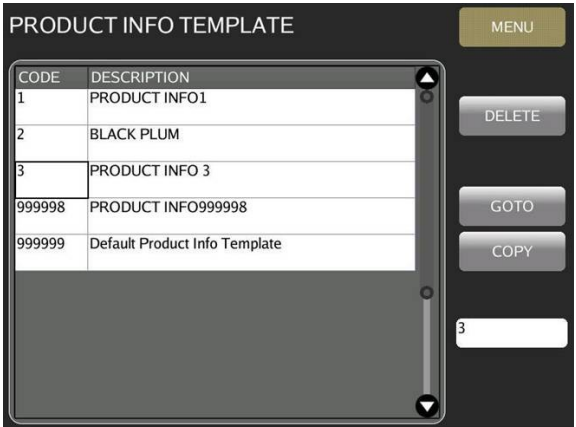

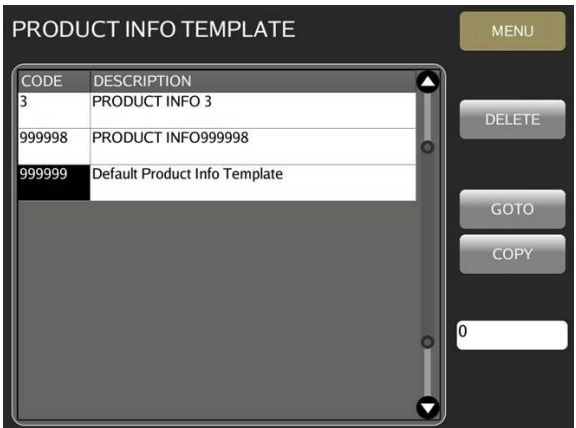

2. Copy a Product Info File

The Product Info data can be easily copied into a new Product Info. The function is very useful to save time or avoid mistake for the similar Product Info data programming, especially in case of long description of Product Info Name.

OPERATION	DISPLAY
<p>1. Menu Mode ~> Programming ~> PLU Related ~> Product Info.</p> <p>In Product Info Programming Mode, enter a new Product Info number (e.g. 3).</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	
<p>2. Touch the desired Product Info data to copy from (e.g. 1).</p> <p>Note: Change the necessary data if required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

3. Search a Product Info File

Product Info Programming provide a fast way to search a Product Info Programming within the Product Info Programming display, this function is useful as a user can direct go to desired searched Product Info Programming without need to browse screen by screen.

OPERATION	DISPLAY
<p>1. In Product Info Programming Mode, enter the Product Info Programming Number to be search (e.g. 3).</p>	
<p>2. Touch the [GO TO] key.</p> <p>Note: The Searched Product Info number will be on the top list.</p>	

4. Delete a Product Info File

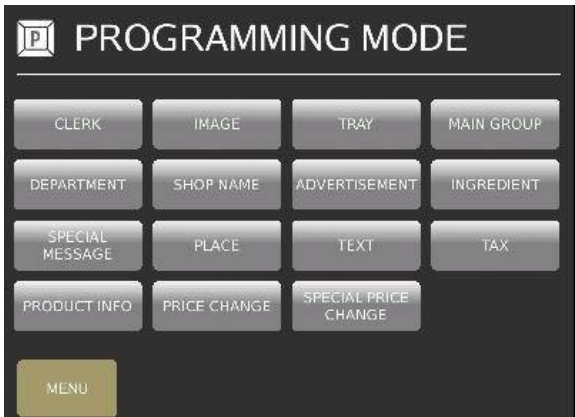

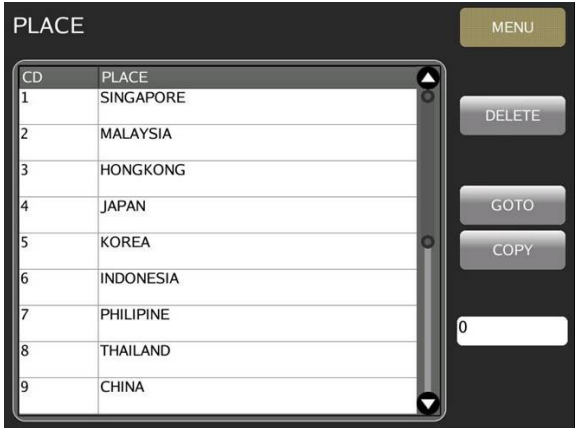

OPERATION	DISPLAY
<p>1. In Product Info Programming Mode, enter the Product Info Number to be deleted (e.g. 3).</p> <p>Note: Also can browse and touch the Product Info name. (without entering the Product Info)</p>	
<p>2. Touch [DELETE] key.</p>	
<p>3. Touch [YES] key to delete the data.</p> <p>Note: Touch [NO] key to escape deleting the data.</p>	

Note: Another method of deleting the Product Info Data is by entering the Product Info File and touches the [DELETE] key.

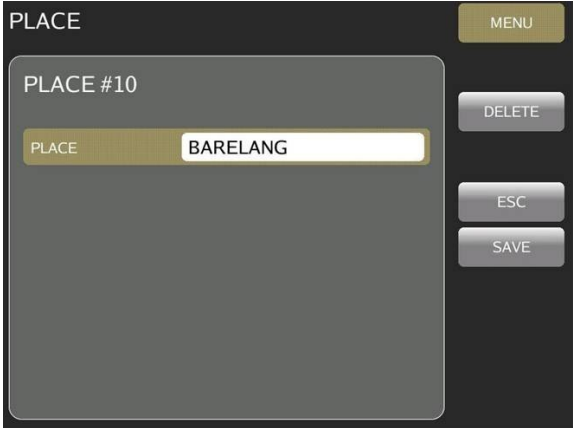

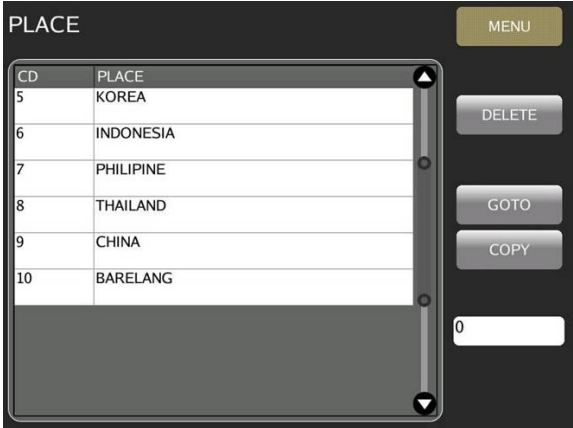

PLACE FILE

Place File is used to program place name for PLU programming and printed on Label. Since standard format does not have a print area set for Place name, the Place Name cannot be printed when using these formats. To print Place Name on the label, it is required to use a Free Format with a Place Name print area programmed. Maximum 99 Place Files can be programmed

1. Program Place File

OPERATION	DISPLAY																				
<p>1. In MENU Mode</p>																					
<p>2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.</p>																					
<p>3. Touch [PLACE] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed Place File will be listed in PLACE PROGRAMMING Display Screen.</p> <p>Note 3: Display Screen also used to browse existing Country Files using the scroll bar and to select file for modification</p>	 <table border="1" data-bbox="906 1563 1347 1924"> <thead> <tr> <th>CD</th> <th>PLACE</th> </tr> </thead> <tbody> <tr><td>1</td><td>SINGAPORE</td></tr> <tr><td>2</td><td>MALAYSIA</td></tr> <tr><td>3</td><td>HONGKONG</td></tr> <tr><td>4</td><td>JAPAN</td></tr> <tr><td>5</td><td>KOREA</td></tr> <tr><td>6</td><td>INDONESIA</td></tr> <tr><td>7</td><td>PHILIPPINE</td></tr> <tr><td>8</td><td>THAILAND</td></tr> <tr><td>9</td><td>CHINA</td></tr> </tbody> </table>	CD	PLACE	1	SINGAPORE	2	MALAYSIA	3	HONGKONG	4	JAPAN	5	KOREA	6	INDONESIA	7	PHILIPPINE	8	THAILAND	9	CHINA

2. Copy a Place File

The programmed Place data can be easily copied into a new Place. This function is very useful to save time or avoid mistake for the similar Place data programming.

OPERATION	DISPLAY
<p>1. In Place Programming Mode, enter a Place number. (e.g. 11)</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	
<p>2. Touch the desired Advertisement data to copy from. (e.g. Place 10 - Barelang)</p> <p>Note: Change the necessary data if required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

3. Search Place Files

Place programming provide a fast way to search a Place File within the Place display, this function is useful as a user can direct go to desired searched Place File without need to browse screen by screen.

OPERATION	DISPLAY																				
<p>1. In Place Programming Mode, enter the Place Number to be searched. (e.g. 6)</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	 <p>PLACE</p> <table border="1"> <thead> <tr> <th>CD</th> <th>PLACE</th> </tr> </thead> <tbody> <tr><td>1</td><td>SINGAPORE</td></tr> <tr><td>2</td><td>MALAYSIA</td></tr> <tr><td>3</td><td>HONGKONG</td></tr> <tr><td>4</td><td>JAPAN</td></tr> <tr><td>5</td><td>KOREA</td></tr> <tr><td>6</td><td>INDONESIA</td></tr> <tr><td>7</td><td>PHILIPINE</td></tr> <tr><td>8</td><td>THAILAND</td></tr> <tr><td>9</td><td>CHINA</td></tr> </tbody> </table> <p>MENU DELETE GOTO COPY 6</p>	CD	PLACE	1	SINGAPORE	2	MALAYSIA	3	HONGKONG	4	JAPAN	5	KOREA	6	INDONESIA	7	PHILIPINE	8	THAILAND	9	CHINA

4. Delete a Programmed Country File

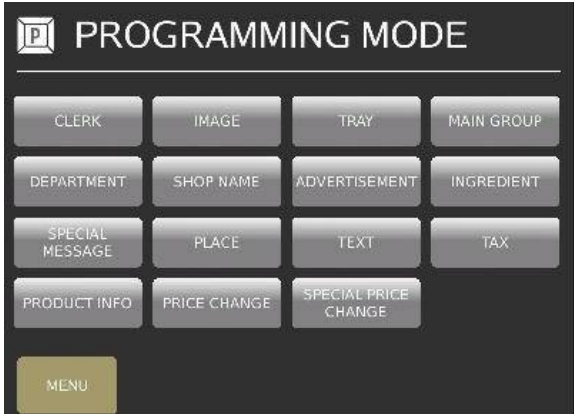

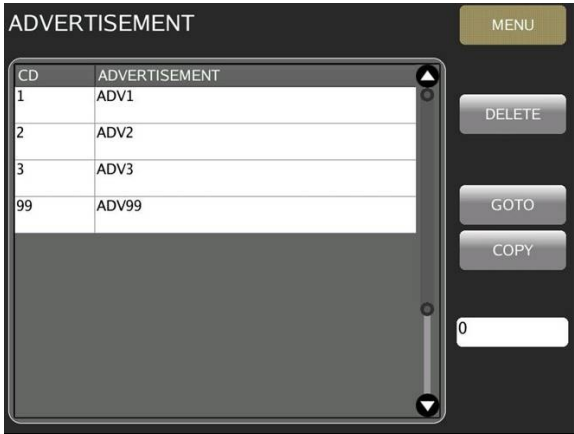

OPERATION	DISPLAY
<p>1. In Place Programming Mode, enter the Place to be deleted. (e.g. Place 6)</p> <p>Note: Also can browse and touch the Programmed Place (without entering the Programmed Number)</p>	
<p>2. Touch [DELETE] key.</p>	
<p>3. Touch [YES] key to delete the data.</p> <p>Note: Touch [NO] key to escape deleting the data.</p>	

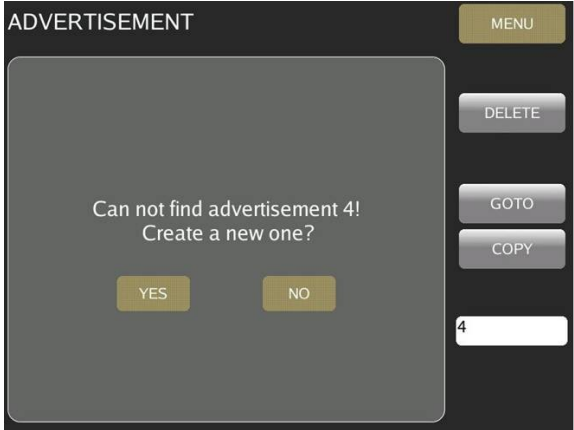

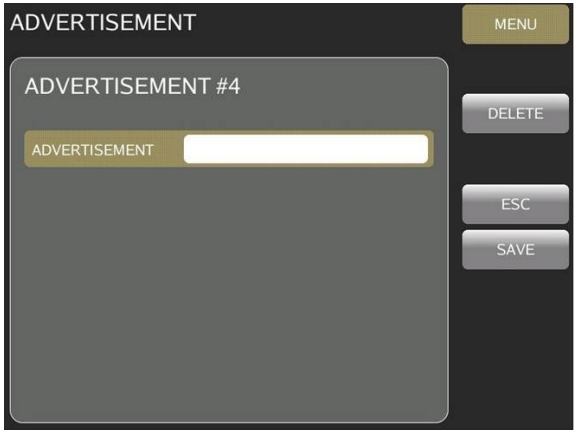

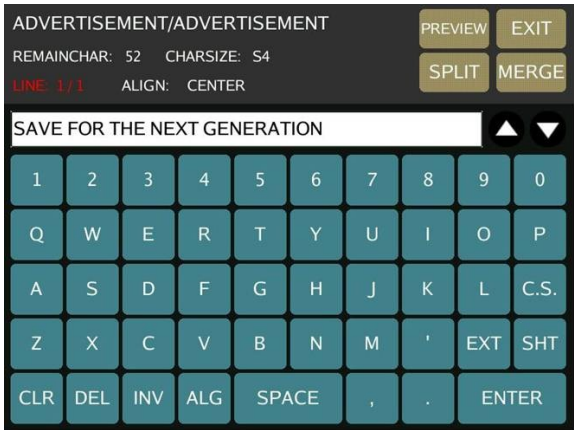

Note: Another method of deleting the Programmed is by entering the Programmed file and touches the DELETE key.

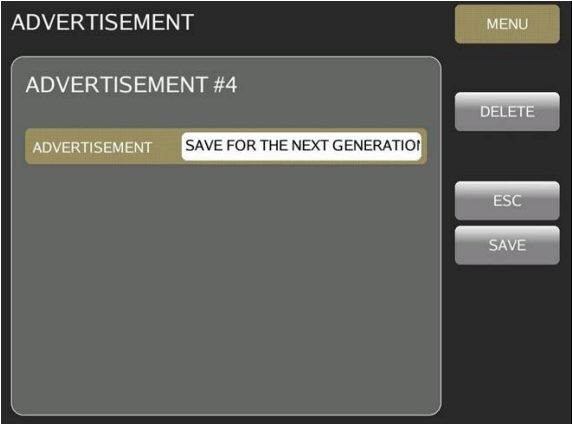

ADVERTISEMENT FILE

Advertisement File is used to program advertisement name for PLU programming and printed on Label. Since standard format does not have a print area set for Advertisement name, the advertisement Name cannot be printed when using these formats. To print advertisement Name on the label, it is required to use a Free Format with an Advertisement Name print area programmed. Maximum 99 Advertisement Files can be programmed

1. Program Advertisement File

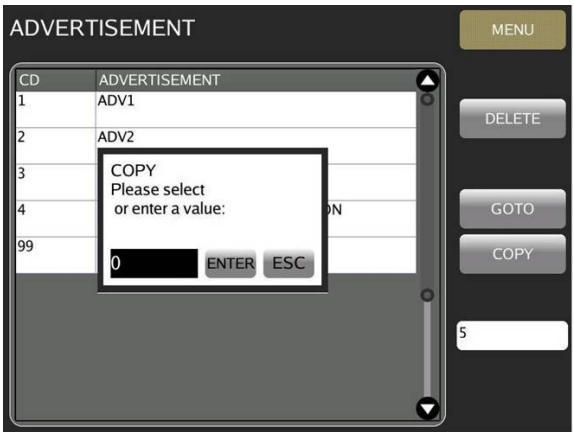

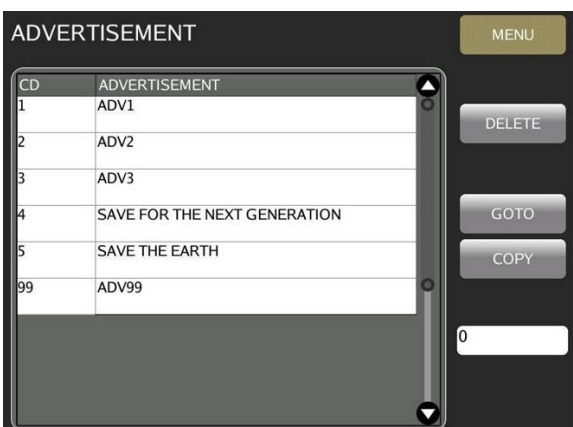

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.</p>	
<p>3. Touch [ADVERTISEMENT] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed Advertisement File will be listed in ADVERTISEMENT PROGRAMMING Display Screen.</p> <p>Note 3: Display Screen also used to browse existing advertisement Files using the scroll bar and to select file for modification</p>	

OPERATION	DISPLAY
<p>4. Enter Advertisement number. (e.g. 4)</p> <p>Touch [PLU] key in the ten key.</p>	
<p>5. To create a new Advertisement, touch [YES] key.</p> <p>Note: Touch [NO] key to abort.</p>	
<p>6. Touch [ADVERTISEMENT] area to enter the Advertisement Name.</p> <p>Enter Advertisement Name by touching desired character keys. (e.g. SAVE FOR THE NEXT GENERATION)</p>	

OPERATION	DISPLAY
<p>7. Touch [ENTER] key when finished programming.</p> <p>Note: Touch [ESC] key if you want to exit without saving.</p>	
<p>8. Touch [SAVE] key to save the data for Advertisement 4.</p> <p>Note: Touch [MENU] key if you want to exit without saving.</p>	

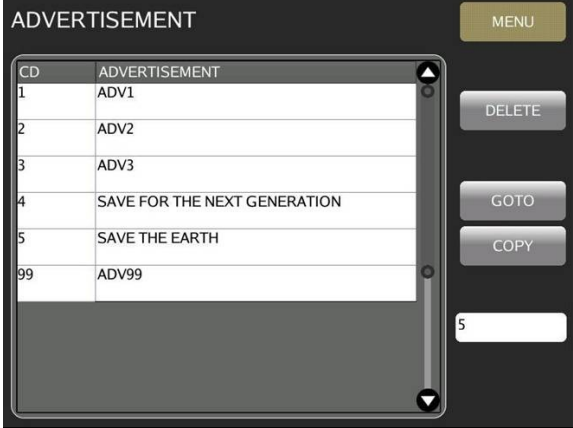

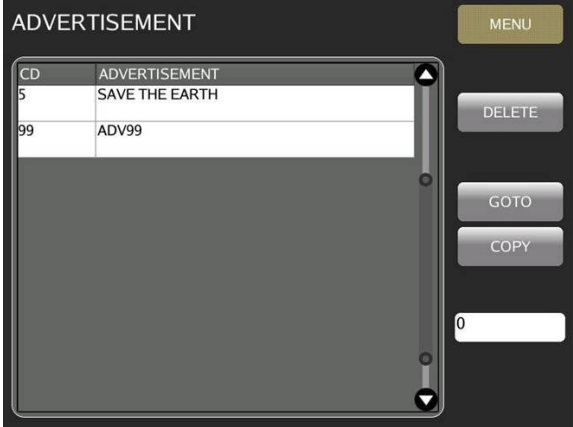

2. Copy a Advertisement File

The programmed Advertisement data can be easily copied into a new advertisement. This function is very useful to save time or avoid mistake for the similar Advertisement data programming.

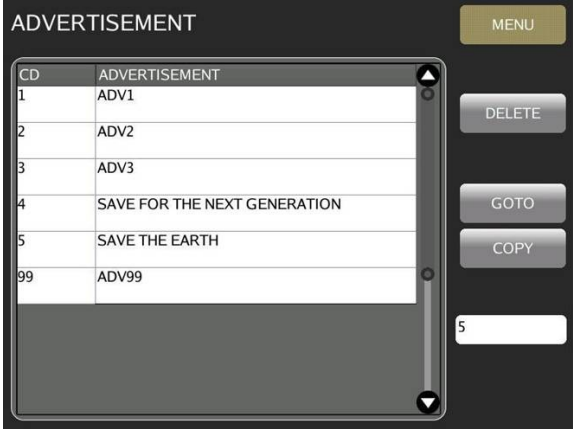

OPERATION	DISPLAY
<p>1. In Place Programming Mode, enter a advertisement number. (e.g. 5)</p> <p>Touch [COPY] key.</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	
<p>2. Touch the desired advertisement data to copy from.(e.g. 4)</p> <p>Note: Change the necessary data if required.</p>	
<p>3. Touch [SAVE] key to save the programmed data.</p> <p>Note: Touch [MENU] key to escape saving data.</p>	

3. Search Advertisement Files

Advertisement programming provide a fast way to search a advertisement File within the advertisement display, this function is useful as a user can direct go to desired searched advertisement File without need to browse screen by screen.

OPERATION	DISPLAY														
<p>1. In Advertisement Programming Mode, enter the Advertisement Number to be searched. (e.g. 6)</p> <p>Note: Touch [ARROW DOWN] or [ARROW UP] for more selection.</p>	 <p>ADVERTISEMENT</p> <table border="1"> <thead> <tr> <th>CD</th> <th>ADVERTISEMENT</th> </tr> </thead> <tbody> <tr><td>1</td><td>ADV1</td></tr> <tr><td>2</td><td>ADV2</td></tr> <tr><td>3</td><td>ADV3</td></tr> <tr><td>4</td><td>SAVE FOR THE NEXT GENERATION</td></tr> <tr><td>5</td><td>SAVE THE EARTH</td></tr> <tr><td>99</td><td>ADV99</td></tr> </tbody> </table> <p>5</p>	CD	ADVERTISEMENT	1	ADV1	2	ADV2	3	ADV3	4	SAVE FOR THE NEXT GENERATION	5	SAVE THE EARTH	99	ADV99

4. Delete a Programmed Advertisement File

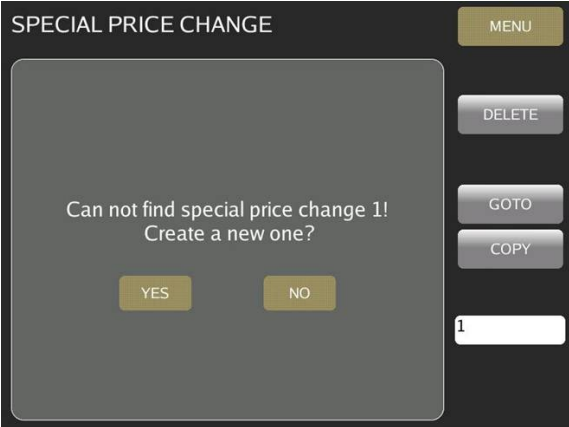

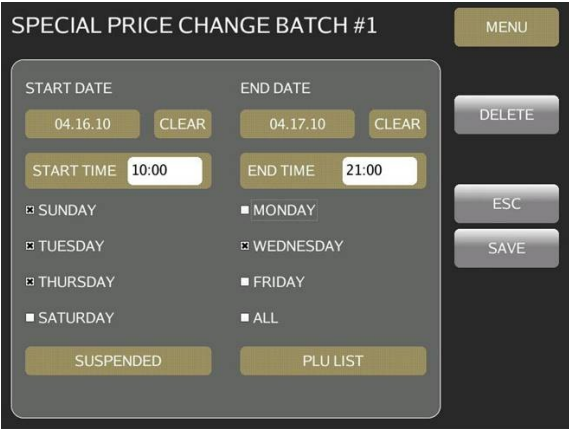

OPERATION	DISPLAY
<p>1. In Advertisement Programming Mode, enter the Advertisement to be deleted. (e.g. Advertisement 5)</p> <p>Note: Also can browse and touch the Programmed Advertisement (without entering the Programmed Number)</p>	
<p>2. Touch [DELETE] key.</p>	
<p>3. Touch [YES] key to delete the data.</p> <p>Note: Touch [NO] key to escape deleting the data.</p>	

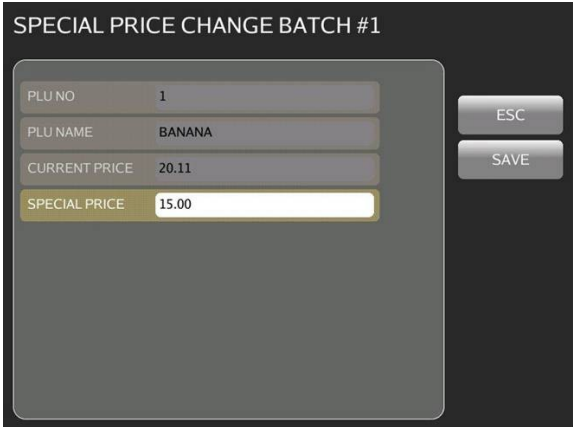

Note: Another method of deleting the Programmed is by entering the Programmed file and touches the DELETE key.

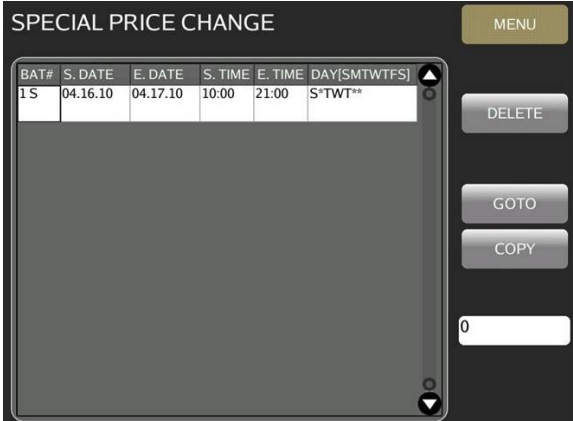

SPECIAL PRICE CHANGE FILE

This function is used to change the PLU unit price without going to PLU Programming and the price will change base on the date and time that had programmed. Also can programmed until 99 max batch number

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [PLU RELATED] key to enter to Programming Mode.</p>	
<p>3. Touch [SPECIAL PRICE CHANGE] key.</p> <p>Note 1: Touch [MENU] key to return back to Programming Mode.</p> <p>Note 2: All programmed Batch File of Price change will be listed in PRICE CHANGE BATCH Display Screen.</p> <p>Note 3: Display Screen also used to browse existing batch Files using the scroll bar and to select file for modification</p>	

OPERATION	DISPLAY
<p>4. Enter Special Price Change number (e.g. 1)</p> <p>Touch [PLU] key in the ten key</p>	
<p>5. To create a new batch price change, touch [YES] key.</p> <p>Note: Touch [NO] key to abort.</p>	
<p>6. Set the necessary thing and touch [PLU LIST] key to select PLU that want to change</p>	

OPERATION	DISPLAY																																	
<p>7. Touch [ADD] key to add and select one of PLU list (e.g. PLU #1 with original price 20.11)</p> <p>Note : Touch[EXIT] key to abort Touch [GO TO] to browse another PLU</p>	 <table border="1"> <thead> <tr> <th>CODE</th> <th>NAME</th> <th>PRICE</th> </tr> </thead> <tbody> <tr><td>1</td><td>BANANA</td><td>20.11</td></tr> <tr><td>2</td><td>GRAPES</td><td>12.33</td></tr> <tr><td>3</td><td>LEMON</td><td>20.00</td></tr> <tr><td>4</td><td>DRAGON FRUITS</td><td>40.00</td></tr> <tr><td>5</td><td>GRANNY SMITH APPLE</td><td>44.44</td></tr> <tr><td>6</td><td>LEMON</td><td>16.00</td></tr> <tr><td>7</td><td>GOLDEN DELICIOUS APPLE</td><td>17.00</td></tr> <tr><td>8</td><td>IRISH BACON</td><td>18.00</td></tr> <tr><td>9</td><td>MANGO</td><td>19.00</td></tr> <tr><td>10</td><td>GREEN APPLE1</td><td>10.00</td></tr> </tbody> </table>	CODE	NAME	PRICE	1	BANANA	20.11	2	GRAPES	12.33	3	LEMON	20.00	4	DRAGON FRUITS	40.00	5	GRANNY SMITH APPLE	44.44	6	LEMON	16.00	7	GOLDEN DELICIOUS APPLE	17.00	8	IRISH BACON	18.00	9	MANGO	19.00	10	GREEN APPLE1	10.00

BARCODE LOOKUP

This function used Barcode of Flag code (F1 & F2) Lookup during Scanning. During scanning it refer the flag code in Barcode Lookup to display data.

Note: CCCCC in barcode refer to Item Code (PLU Code)

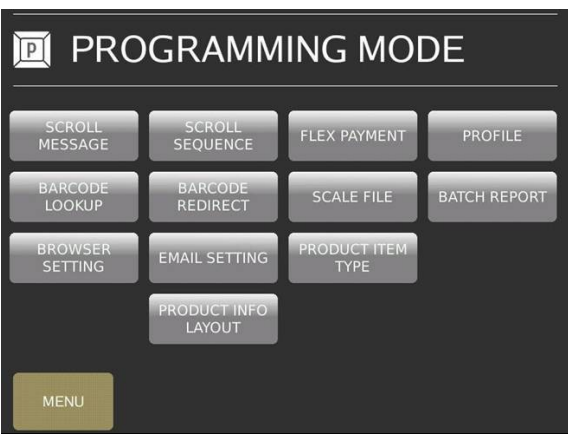

Note: XXXXX in barcode refer to Weight, Price or Quantity Data (refer on selection)

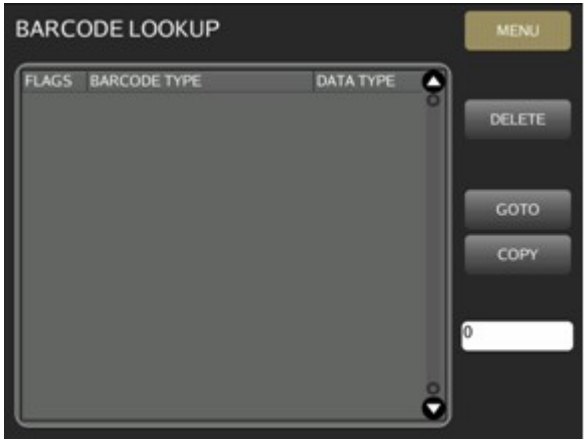

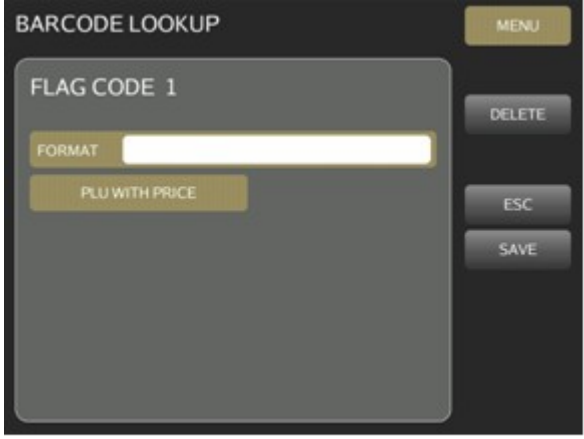

Note: - Item Code – If all barcode data is (CCCC), when scan it display PLU no, item (e.g. 1) and price (of Unit price)

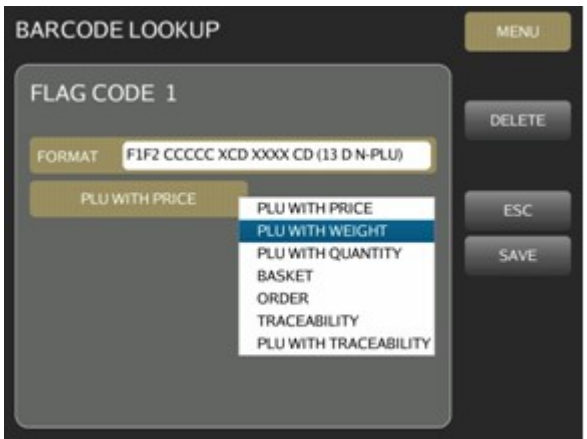

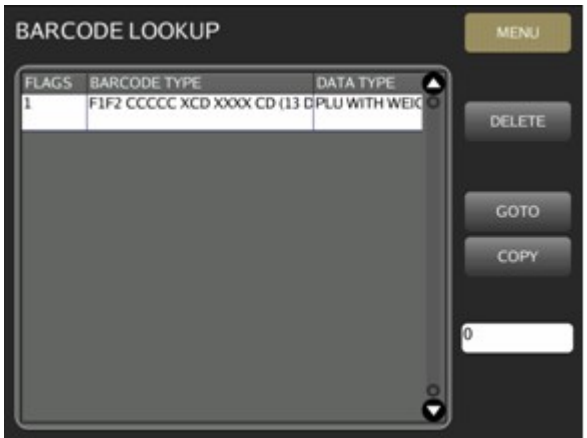

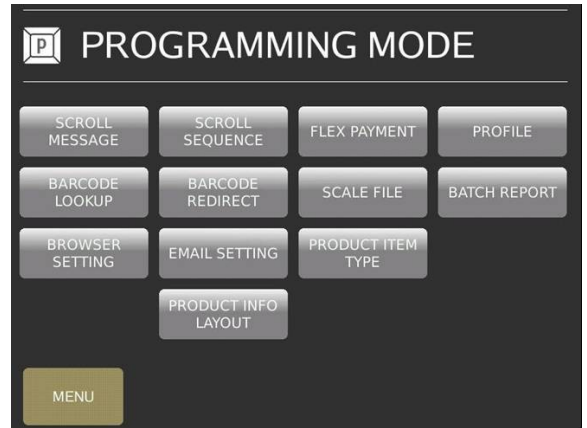

- Weight – when scan it display PLU no, weight and price

- Price - when scan it display PLU no, item (e.g. 1) and price

- Quantity - when scan it display PLU no, number of quantity and price (also can do multiply press X, enter quantity then scan barcode (it calculates as: scan qty X enter qty)

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [SETUP] key to enter to Programming Mode.</p>	

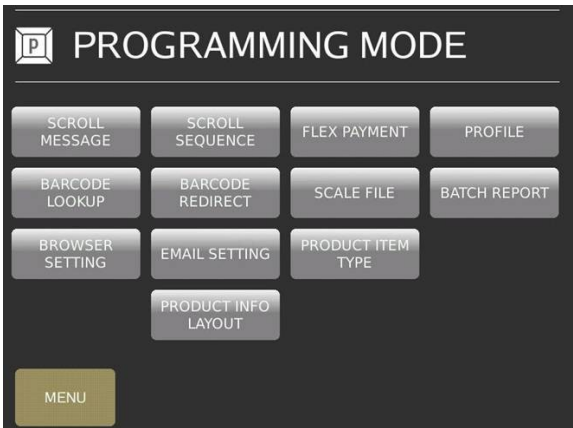

OPERATION	DISPLAY
<p>3. Touch [BARCODE LOOKUP] key to enter BARCODE LOOKUP PROGRAMMING screen.</p> <p>Note: Touch [MENU] key back to PROGRAMMING MODE [SETUP] screen. Touch [GO TO] key to view the existing Barcode Lookup Files and help for entering the Barcode Lookup file you want to modify. Touch [COPY] key to select existing Barcode Lookup File copied to new Barcode Lookup File.</p>	
<p>4. Enter new Barcode Lookup number (e.g. 1) by numeric key and press [PLU] key.</p> <p>Note: Prompt out message “Can not find barcode lookup 1! Create a new one?” YES and NO button to press.</p>	
<p>5. Touch [FORMAT] key and select barcode type</p>	

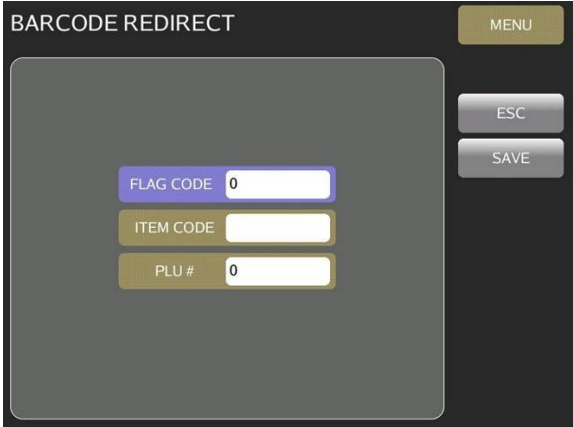

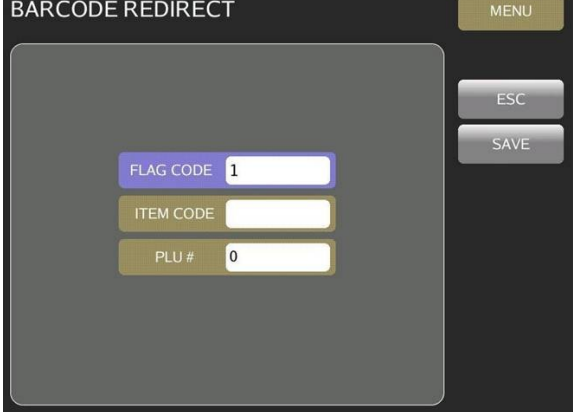

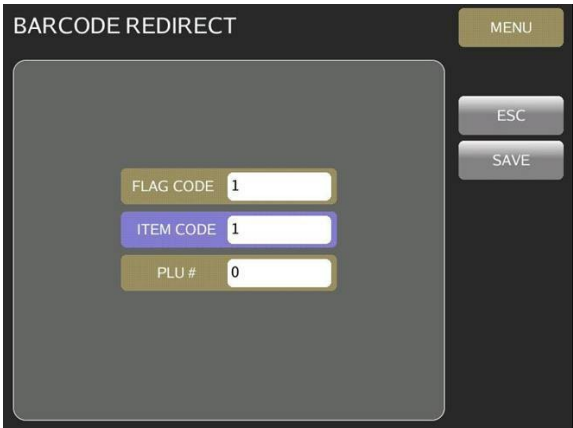

OPERATION	DISPLAY
<p>6. Touch [ENTER] key, to select and choose 'XXXX' data by touch [PLU WITH WEIGHT] key.</p>	 <p>The screenshot shows the 'BARCODE LOOKUP' screen. At the top, there is a 'MENU' button. Below it, a box displays 'FLAG CODE 1' and 'FORMAT F1F2 CCCCC XCD XXXX CD (13 D N-PLU)'. A dropdown menu is open, listing options: 'PLU WITH PRICE', 'PLU WITH WEIGHT' (highlighted), 'PLU WITH QUANTITY', 'BASKET', 'ORDER', 'TRACEABILITY', and 'PLU WITH TRACEABILITY'. On the right side, there are buttons for 'DELETE', 'ESC', and 'SAVE'.</p>
<p>7. Touch [SAVE] key to save or touch [ESC] key to exit without saving data.</p> <p>Note: Select or key number and touch [DELETE] key to delete existing Barcode Lookup File.</p> <p>Note: Select or key number and touch [GOTO] key to search existing Barcode Lookup File.</p> <p>Note: Select or key number and touch [COPY] key to copy existing Barcode Lookup File and paste to another Barcode Lookup File.</p>	 <p>The screenshot shows the 'BARCODE LOOKUP' screen with a table. The table has three columns: 'FLAGS', 'BARCODE TYPE', and 'DATA TYPE'. The first row contains the values '1', 'F1F2 CCCCC XCD XXXX CD (13 D-PLU WITH WEIG', and a scrollable area. On the right side, there are buttons for 'MENU', 'DELETE', 'GOTO', 'COPY', and a numeric input field with '0'.</p>
<p>8. Touch [MENU] key to return to PROGRAMMING MODE [SETUP] screen.</p>	 <p>The screenshot shows the 'PROGRAMMING MODE' screen. It features a grid of buttons for various settings: 'SCROLL MESSAGE', 'SCROLL SEQUENCE', 'FLEX PAYMENT', 'PROFILE', 'BARCODE LOOKUP', 'BARCODE REDIRECT', 'SCALE FILE', 'BATCH REPORT', 'BROWSER SETTING', 'EMAIL SETTING', 'PRODUCT ITEM TYPE', and 'PRODUCT INFO LAYOUT'. A 'MENU' button is located at the bottom left.</p>

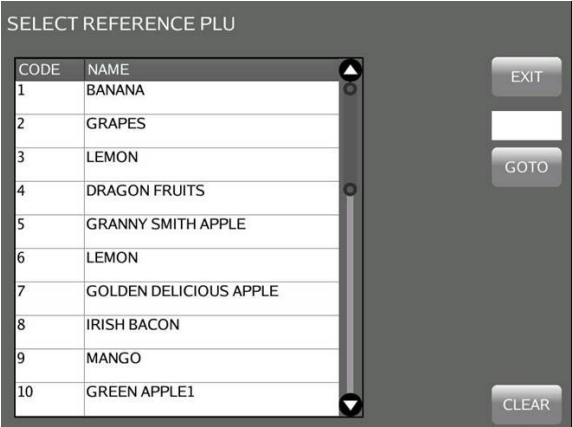

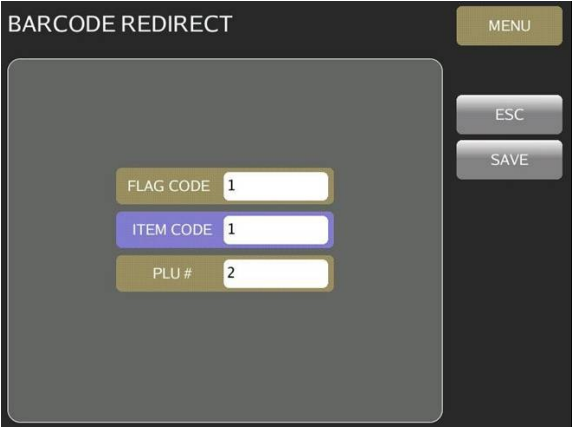

BARCODE REDIRECT

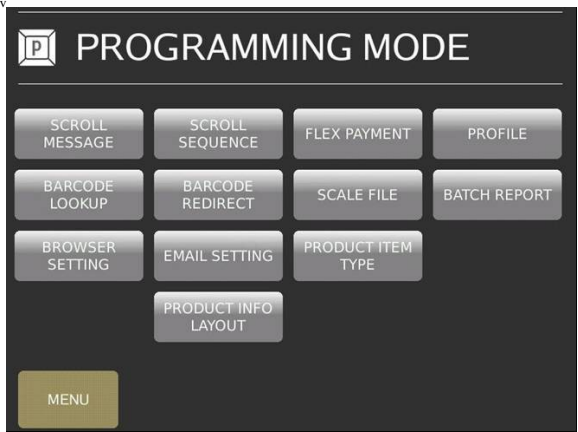

This function used to redirect scanned barcode item to another Barcode item (refer the flag code), this function purpose to use one barcode for many item.

Note: Only support “CCCCC” type barcode only.

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [SETUP] key to enter to Programming Mode.</p>	
<p>3. Touch [BARCODE REDIRECT] key to enter BARCODE REDIRECT PROGRAMMING screen.</p> <p>Note: Touch [MENU] key back to PROGRAMMING MODE [SETUP] screen. Touch [GO TO FLAG] key to view the existing Barcode Lookup Files and help for entering the Barcode Lookup file you want to modify.</p>	

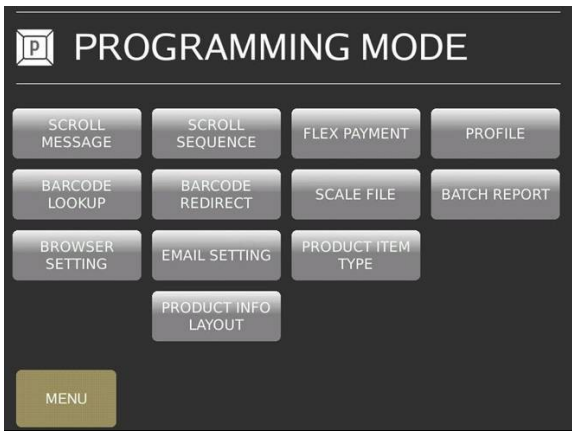

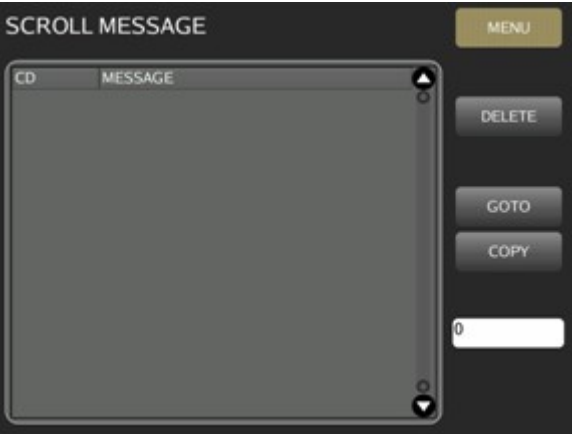

OPERATION	DISPLAY
<p>3. Touch [ADD] key to add new Flag code number</p>	 <p>The screenshot shows the 'BARCODE REDIRECT' screen. At the top right is a 'MENU' button. Below it are 'ESC' and 'SAVE' buttons. The main area contains three input fields: 'FLAG CODE' with the value '0', 'ITEM CODE' (empty), and 'PLU #' with the value '0'.</p>
<p>4. Touch [FLAG CODE] key, enter FLAG CODE number (e.g. 1)</p>	 <p>The screenshot shows the 'BARCODE REDIRECT' screen. At the top right is a 'MENU' button. Below it are 'ESC' and 'SAVE' buttons. The main area contains three input fields: 'FLAG CODE' with the value '1', 'ITEM CODE' (empty), and 'PLU #' with the value '0'.</p>
<p>5. Touch [ITEM CODE] key, enter FLAG CODE number (e.g. 1)</p>	 <p>The screenshot shows the 'BARCODE REDIRECT' screen. At the top right is a 'MENU' button. Below it are 'ESC' and 'SAVE' buttons. The main area contains three input fields: 'FLAG CODE' with the value '1', 'ITEM CODE' with the value '1', and 'PLU #' with the value '0'.</p>

SCROLL MESSAGE

This function is used to program scrolling message (sales promotional message) that can be displayed on customer display.

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [SETUP] key to enter to Programming Mode.</p>	
<p>2. Touch [SCROLL MESSAGE] key to enter Scroll Message Programming screen.</p> <p>Note: Touch [MENU] key back to PROGRAMMING MODE [SETUP] screen. Touch [GO TO] key to view the existing Scroll Message Files and help for entering the Barcode Lookup file you want to modify. Touch [COPY] key to select existing Scroll Message File copied to new Scroll Message File.</p>	

OPERATION	DISPLAY
<p>3. Enter new Scroll Message number (e.g. 1) by numeric key and press [PLU] key.</p> <p>Note: prompt out confirmation message “Can not find scroll message 1! Create a new one?” [YES] agreed and [NO] cancel.</p>	 <p>The screenshot shows a dark interface with the title 'SCROLL MESSAGE' at the top. Below it is a grey box containing 'SCROLL MESSAGE # 1' and a text input field with the placeholder 'SCROLL MESSAGE'. To the right of the input field are four buttons: MENU, DELETE, ESC, and SAVE.</p>
<p>4. Touch [SCROLL MESSAGE] key, enter desired message using internal keyboard</p>	 <p>The screenshot shows the 'SCROLL MESSAGE' menu with 'REMAINCHAR: 82' at the top right. An internal keyboard is overlaid on the screen, and the text 'WELCOME TO TERAOKA' is entered into the input field. The keyboard includes numeric keys (1-0), letters (QWERTYUIOP, ASDFGHJKL, SHFT, ZXC, VBNM, CLR, DEL, SPACE, ., -, ENTER), and an EXIT button at the top right.</p>
<p>5. Touch [ENTER] key to store or touch [ESC] key to escape/exit</p>	 <p>The screenshot shows the 'SCROLL MESSAGE' menu with 'SCROLL MESSAGE # 1' at the top. The text 'WELCOME TO TERAOKA' is now stored in the input field. The buttons on the right are MENU, DELETE, ESC, and SAVE.</p>

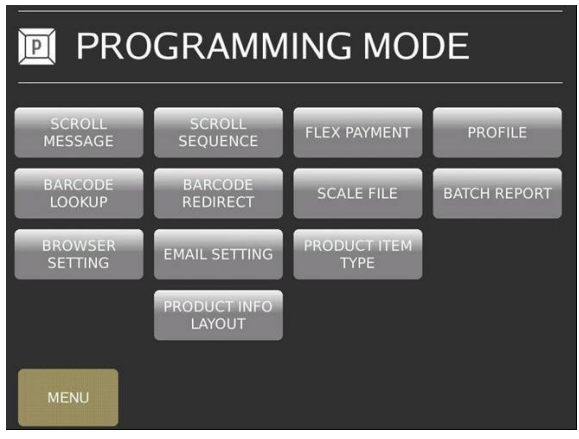

OPERATION	DISPLAY
<p>6. Touch [SAVE] to save the Scroll Message.</p> <p>Note: Select or key number and touch [DELETE] key to delete existing Scroll Message File.</p> <p>Note: Touch [MENU] key to return to <i>PROGRAMMING MODE [SETUP]</i> screen.</p>	

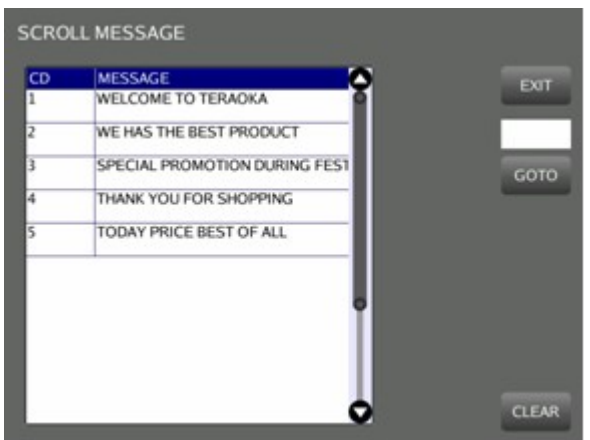

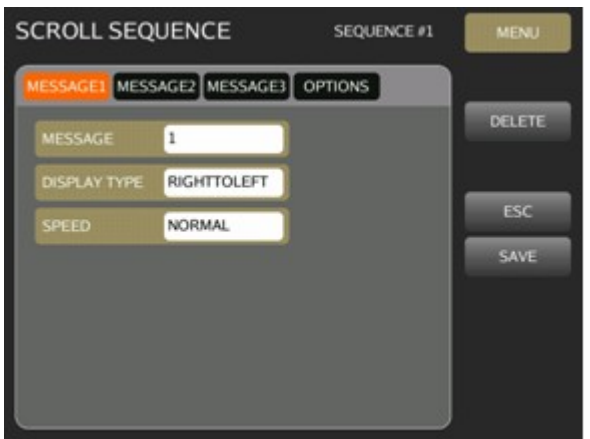

SCROLL SEQUENCE

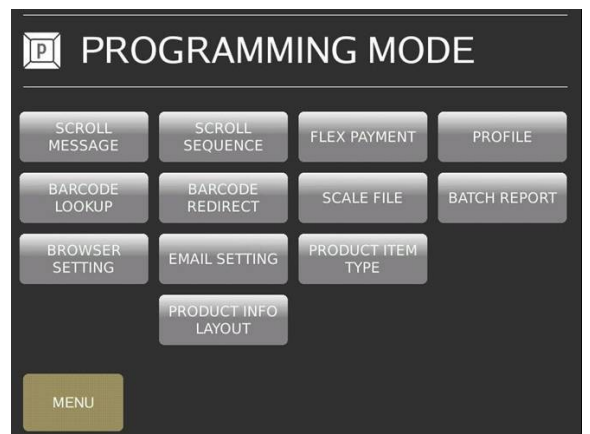

This function is used to program sequence of scrolling message (sales promotional message) displayed on customer display.

Note: Scroll message must be program in advance

Note: To activate Scroll message see [Scale File Programming](#)

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [SETUP] key to enter to Programming Mode.</p>	
<p>3. Touch [SCROLL SEQUENCE] key to enter Scroll Sequence Programming screen.</p> <p>Note: Touch [MENU] key back to PROGRAMMING MODE [SETUP] screen. Touch [GO TO] key to view the existing Scroll Sequence Files and help for entering the Barcode Lookup file you want to modify. Touch [COPY] key to select existing Scroll Sequence File copied to new Scroll Sequence File.</p>	

OPERATION	DISPLAY
<p>4. Enter new Scroll Message number (e.g. 1) by numeric key and press [PLU] key.</p> <p>Note: prompt out confirmation message “Can not find sequence 1! Create a new one?” [YES] agreed and [NO] cancel.</p>	
<p>5. Touch [MESSAGE] key</p>	
<p>6. Touch message to store or touch [EXIT] or [CLEAR] key to escape/exit</p> <p>Note: Select display type and Speed of message</p> <p>Note: Available up to 3 messages to program in a sequence</p>	

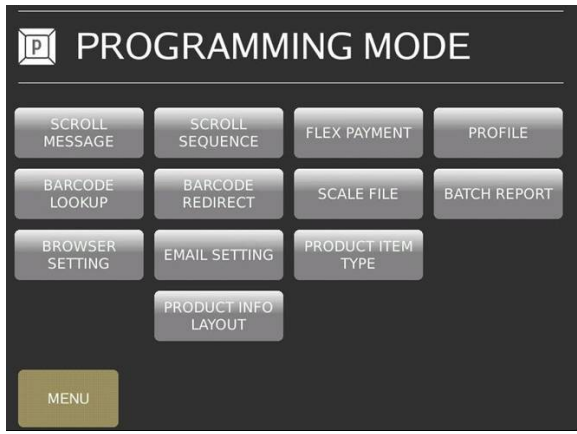

OPERATION	DISPLAY
<p>7. Select Options tab</p> <p>Note: Select scroll option (Scroll Interval, Idle time and step)</p> <p>Note: Touch [CHANGE FONT] key to select displayed fonts option.</p>	
<p>8. Touch [SAVE] to save the Scrolling Message.</p> <p>Note: Select or key number and touch [DELETE] key to delete existing Scrolling Sequence File.</p>	
<p>9. Touch [MENU] key to return to PROGRAMMING MODE [SETUP] screen.</p>	

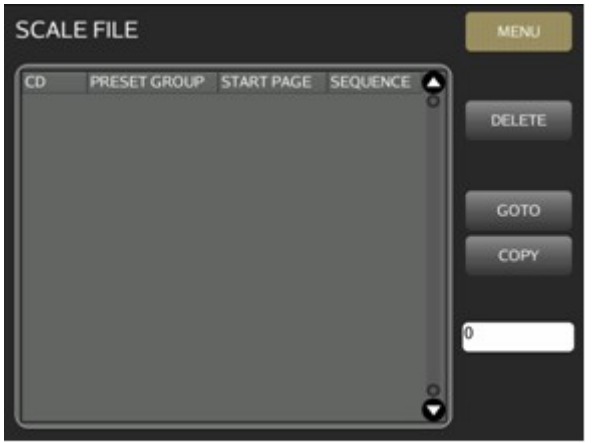

SCALE FILE PROGRAMMING

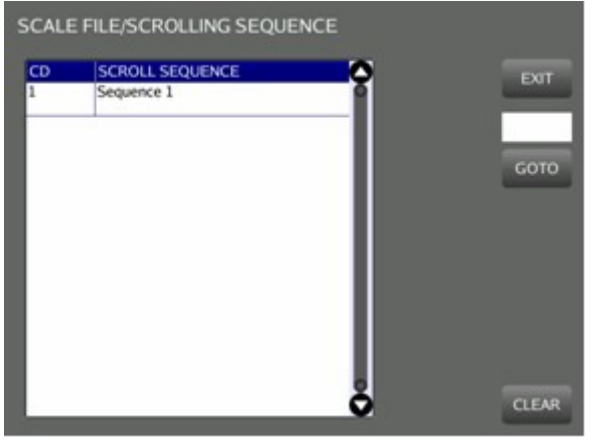

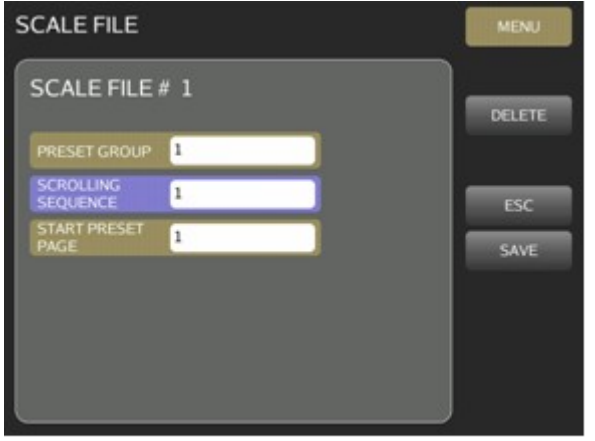

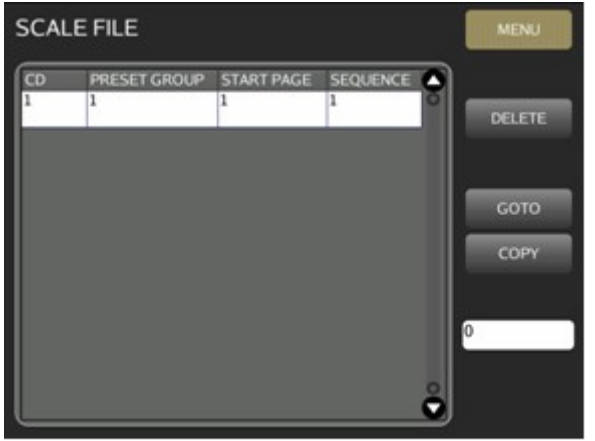

Scale Setting file is used to set preset key group (for registration, prepack and self service) and scrolling message Scrolling Sequence setting to be used for scale.

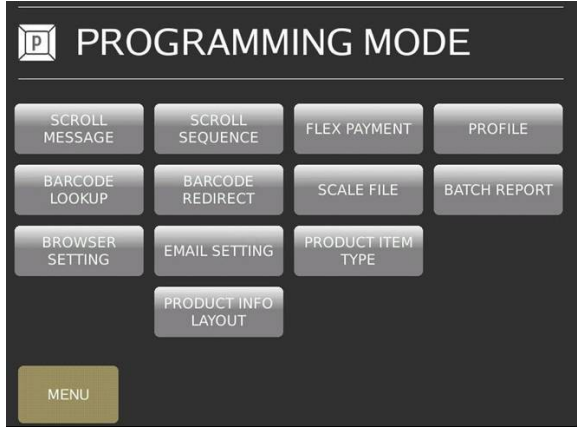

Note: Scale number to be used for program, follow the **SPEC 141C001 SCALE NUMBER** in User/Communication Spec

Note: Also can program for server/client communication, a client take data from server programmed setting.

OPERATION	DISPLAY
<p>1. In MENU Mode</p>	
<p>2. Touch [PROGRAMMING] key follow by [SETUP] key to enter to Programming Mode.</p>	

OPERATION	DISPLAY
<p>3. Touch [SCALE FILE] key to enter Scale File Programming screen.</p> <p>Note: Touch [MENU] key back to PROGRAMMING MODE [SETUP] screen. Touch [GO TO] key to view the existing Scale File and help for entering the Scale File you want to modify. Touch [COPY] key to select existing Scale File copied to new Scale File.</p>	
<p>4. Enter new Scale File number (e.g. 1) by numeric key and press [PLU] key.</p> <p>Note: prompt out message “can not find scale file !! create a new one?”</p>	
<p>5. Touch [PRESET GROUP] key, enter preset group number to be used (e.g. 1) by numeric key</p> <p>Note: also key in start preset page and tray e.g. 1.</p>	

OPERATION	DISPLAY
<p>6. Touch [SCROLLING SEQUENCE] key.</p>	
<p>7. Touch desired sequence message to store or touch [EXIT] or [CLEAR] key to escape/exit.</p>	
<p>8. Touch [SAVE] to save the Scale File.</p> <p>Note: Select key number and touch [DELETE] key to delete existing Scale File.</p>	

OPERATION	DISPLAY
<p>9. Touch [MENU] key to return to PROGRAMMING MODE [SETUP] screen.</p>	

PAYMENT / FLEXIBLE KEY

Payment / Flexible key is used to control printing usage, printing type and printing information made for registration, accumulation (subtotal) and change mode. It also used for creating Flexible function key.

Note: Code 99 automatically replaces the “Total-Print” key functionality.

Note: Code 98 automatically replaces the change value! This allows us to subtract this value from ECR reporting.

1. Payment Method

a. Touch [PAYMENT METHOD] key.

b. Touch desired type payment method.

Note: All type of Payment method will be listed.

No.	Key-Type	Description
1.	Payment	Payment key
2.	Discount	Discount payment key, this key is to add the discount to the net subtotal amount

2. Total save

- a. Touch [TOTAL SAVE] key.
- b. Enter value using numeric key.

3. Name

Name is used for Flexible/payment key name and on receipt printing.

- a. Touch [NAME] key.
- b. Enter Name using the [Internal Keyboard](#) screen.

4. Report Group

Create group to print on report.

- a. Touch [REPORT GROUP] key.
- b. Enter group number using numeric key.

5. Max Usage

Maximum Usage

- a. Touch [Max Usage] key.
- b. Enter the value using numeric key.

6. Currency

Currency name.

- a. Touch [CURRENCY] key.
- b. Enter Currency name using the [Internal Keyboard](#) screen.

7. Euro Rate

Euro conversion rate with local rate.

- a. Touch [EURO RATE] key.
- b. Enter euro conversion rate value using numeric key.

8. Euro Rate DP

Euro conversion rate decimal point position for printing, input and calculation.

- a. Touch [EURO RATE DP] key.
- b. Select desired euro rate decimal point position.

9. Value

This value contains the value for the payment key, tax rate, discount, points or flexes function.

- a. Touch [VALUE] key.
- b. Enter Value using the numeric key and select [+] (added) or [-] (subtracted) entry.

10. Step

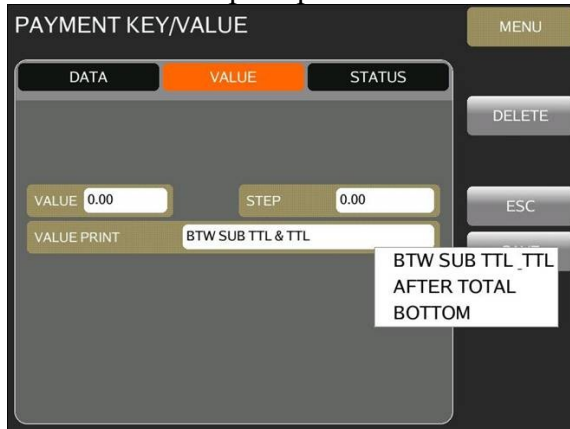

Bonus Points given per step: $\text{Points} = \text{Total to pay} / \text{Step X bonus points}$

- a. Touch [STEP] key.
 - b. Enter Stepping value using the numeric key.
- Note:** only available for Payment Method: Points/Stamps

11. Value Print

To select position of value printed.

- a. Touch [VALUE PRINT] key.
- b. Select value print position.

12. Payment Amount On Receipt

To print or not payment amount on receipt.

- a. Touch [PAY AMT ON RCT] key to select [YES] or [No].

13. Payment Quantity On Receipt

To print or not payment Quantity on receipt.

- a. Touch [PAY QTY ON RCT] key to select [YES] or [No].

14. Payment Name On Receipt

To print or not payment Name on receipt.

- a. Touch [PAY Name ON RCT] key to select [YES] or [No].

15. Use In Subtotal Mode

Allow to use or not In Sub Total (Accumulation) Mode.

- a. Touch [USE IN S.TTL MODE] key to select [YES] or [No].

16. Use In Change Mode

Allow to use or not In Change Mode.

- a. Touch [USE CHG MODE] key to select [YES] or [No].

17. Include Publicity Item

Touch [INCLUDE PUB ITEM] key to select [YES] or [NO]

18. Force Input Amount

19. Item U.Price On Receipt

To print or not unit price on receipt.

- a. Touch [ITEM UP ON RCT] key to select [YES] or [No].

20. Item Qty/Wt On Receipt

To print or not quantity or weight of Item on receipt.

- a. Touch [ITEM QTY/WT ON RCT] key to select [YES] or [No].

21. No. Of Receipt

Number of receipt to be printed.

- a. Touch [NO. OF RECEIPT] key.
- b. Enter number of receipt to print (1-9).

22. Item Price On Receipt

To print or not Item Price on receipt.

- a. Touch [ITEM PR ON RCT] key to select [YES] or [No].

23. Special Message Type

Select Special Message type or option for printing on receipt.

- a. Touch [SPECIAL MSSG TYPE] key.
- b. Select desired Special Message type.

24. Input Customer Number

Enable or disable customer number entry when print in accumulation or change Mode.

- a. Touch [INPUT CUST NO.] key to select [YES] or [No].

25. Direct Print

Direct print when the paid amount not equal to amount to pay, (the balance amount will be displayed)

- a. Touch [DIRECT PRINT] key to select [YES] or [No].

26. Amount Update On Receipt

- a. Touch [AMT UPDATE ON RPT] key to select [YES] or [No].

27. Quantity Update On Receipt

- a. Touch [QTY UPDATE ON RPT] key to select [YES] or [No].

28. Change In Change Mode

- a. Touch [**CHANGE IN CHG MODE**] key to select [**YES**] or [**No**].

29. Multiply In Change Mode

Allow or disable multiply in change mode

- a. Touch [**MULTIPLY IN CHG MODE**] key to select [**YES**] or [**No**]

30. Print Tax info

It allow to print tax information's on receipt

- a. Touch [**PRINT TAX INFO**] key to select [**YES**] or [**NO**]

31. Round Total

It will used to display the rounding of total in display

- a. Touch [**ROUND TOTAL**] key to select [**YES**] or [**NO**]

32. Invoice Text

It will print "INVOICE" Text in Receipt Printing

- a. Touch [**INVOICE TEXT**] key to select [**YES**] or [**NO**]

33. Second Receipt

It will allow printing second receipt, for example when this key select to YES, after issue receipt it will also issue second receipt

- a. Touch [**SECOND RECEIPT**] key to select [**YES**] or [**NO**]

34. Groupable

Future Implementation

35. Open Cash Drawer

It will allow to open cash drawer automatically when issue receipt printing

- a. Touch [**OPEN CASH DRAWER**] key to select [**YES**] or [**NO**]

PRESET FUNCTION KEYS

Function keys can be assigned on Registration Mode preset keys. (Please refer to [Function Key Assignment](#)). Function keys are used to change the original programmed PLU data by one touch operation when issuing labels at Registration Mode or Pre-pack Mode.

The following function keys are available:

CD #	KEY NAME	CD #	KEY NAME	CD #	KEY NAME
1.	ADVERTISEMENT	26.	LABEL FORMAT 2	217.	CASH IN
2.	PRICE DISCOUNT	32.	ITEM CODE	218.	CASH OUT
3.	PRICE % DISCOUNT	37.	REFERENCE PLU	231.	REPRINT RECEIPT
4.	UNIT PRICE DISC	40.	FLAG CODE	232.	REPRINT LAST RECPT
5.	UNIT PRICE % DISC	42.	INGREDIENT	236.	BROWSER CLERK
8.	QUANTITY SYMBOL	43.	SPECIAL MESSAGE	237.	DELETE CUST ORDER
9.	QUANTITY SET	49.	HALF PRICE	238.	BROWSE SEC KEY
10.	UNI PRICE CHANGE	51.	JOB BATCH	239.	BROWSE PRIMARY KEY
11.	REFUND	53.	OPEN CASH DRAWER	240.	NULL RECEIPT
12.	SHOP NAME	75.	WEIGHT CHECK	241.	VOID RECEIPT
15.	SUB TOTAL	80.	TAX	249.	TRAINING
16.	GRAND TOTAL	82.	INVENTORY	250.	BATCH REPORT
17.	PACK QUANTITY	84.	DATE PRINT	251.	ALL PLU
18.	PRICE MARKDOWN	200.	SEARCH	252.	REPACK
19.	PRICE % MARKDOWN	201.	DEPARTMENT	254.	BASKET RETRIEVE
20.	UNIT PRICE MARKDOWN	208.	LOGIN	256.	VOID LABEL
21.	UP % MARKDOWN	209.	LOGOUT	257.	TRAY
22.	UNIT PRICE STORE	211.	MAIN GROUP LIST	260.	BASKET DELETE
23.	PLACE	213.	PAST TRANSACTION	261.	PRODUCT INFO
25.	LABEL FORMAT 1	215.	RETRV	263.	LABEL VIEW

Advertisement Function Key

This function key is used to select the desired Advertisement Message to be printed on item label temporarily when issuing item label. Advertisement message is printed in the print area of the Commodity Name only if there is space for printing.

- Note:** a) Prior to this operation, [ADVERTISEMENT] Function should be assigned to Preset Key in advance (Please refer to [Function Key Assignment](#)),
- b) This function is available for Label printing in Pre-pack Mode and MANUAL MODE,
- c) Advertise Message has to be programmed in advance (Please refer to Advertisement File programming).

OPERATION	DISPLAY
<p>1. At Registration Mode, call up PLU for LEMON by entering PLU number (e.g. 3).</p> <p>Then touch [PLU] key.</p> <p>Note: also can touch on the item selection directly</p>	
<p>2. Touch [ADVERTISEMENT] function key to enter Advertisement list screen.</p> <p>Note1: When select option it will auto exit advertisement list screen.</p> <p>Note2: Touch [NO DATA] key to clear selection.</p> <p>Note3: Touch [CANCEL] key to cancel operation.</p>	

OPERATION	DISPLAY
<p>3. Touch to desired Advertisement message to be used.</p>	
<p>4. Press [PRINT] key at keypad to issue a label (Manual and Prepack non-weight item) or printed label when weight stable (Prepack weight item).</p>	

Price Discount Function Key

This function key is used to enter new price discount for temporary and it will by pass the discount PLU that programmed in PLU Programming

- Note:** a) Prior to this operation, [PRICE DISCOUNT] Function should be assigned to Preset Key in advance (Please refer to [Function Key Assignment](#)),
 b) This function is available for Label printing in Pre-pack Mode and MANUAL MODE,

OPERATION	DISPLAY
<p>1. At Registration Mode, call up PLU Discount for GRANNY SMITH APPLE by entering PLU number (e.g. 5)</p> <p>Then touch [PLU] key.</p> <p>Note: also can touch on the item selection directly</p>	
<p>2. Touch [PRICE DISCOUNT] function key to entry price discount screen</p>	
<p>3. Enter The value of Price Discount e.g.: 2.15</p> <p>Note1: Touch [ENTER] key to save the value and back to R-Mode n.</p> <p>Note2: Touch [ESC] key to cancel operation.</p>	

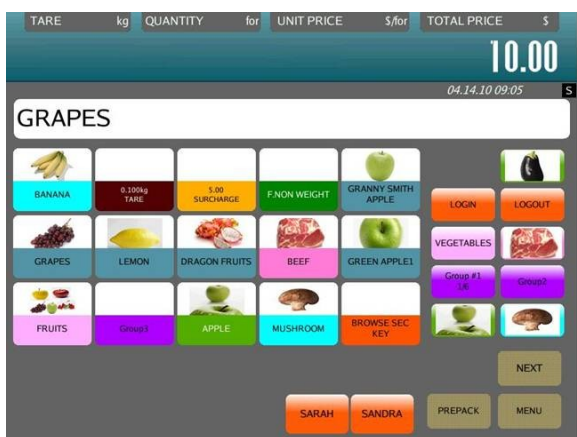

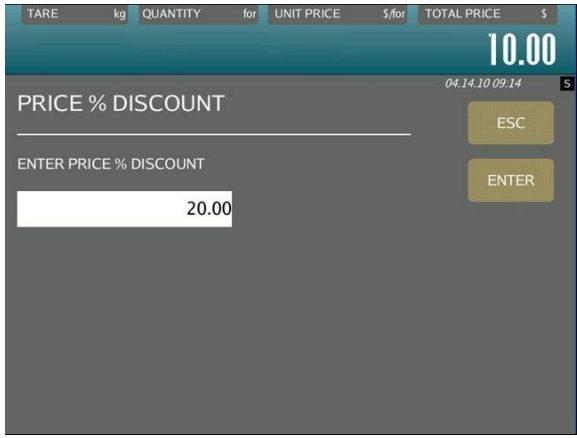

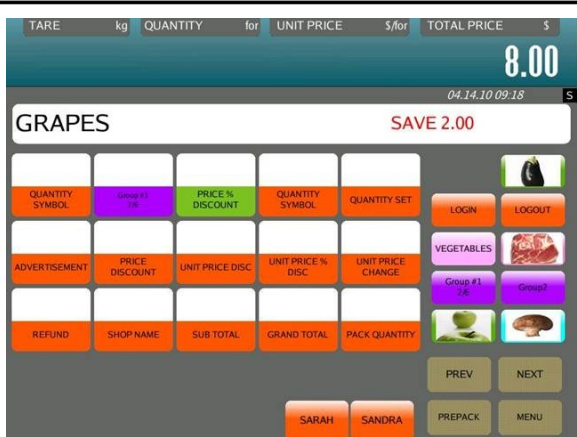

OPERATION	DISPLAY
<p>4. Press [PRINT] key at keypad to issue a label (Manual and Prepack non-weight item) or printed label when weight stable (Prepack weight item).</p>	 <p>The screenshot shows a digital scale interface with the following data:</p> <ul style="list-style-type: none"> TARE: 0.000 kg WEIGHT: 0.444 kg UNIT PRICE: 0.00 TOTAL PRICE: 0.00 Date/Time: 04/14/20 08:34 <p>The keypad below the display includes various function buttons such as LOGON, LOGOUT, VEGETABLES, and a dedicated PRINT key.</p>

PRICE % DISCOUNT Function Key

This function key is used to enter new price % discount for temporary

- Note:** a) Prior to this operation, [PRICE DISCOUNT] Function should be assigned to Preset Key in advance (Please refer to [Function Key Assignment](#)),
 b) This function is available for Label printing in Pre-pack Mode and MANUAL MODE,

Transaction example: No Price % Discount that programmed in PLU programming for GRAPES.

OPERATION	DISPLAY
<p>1. At Pre-pack Mode, call up PLU for GRAPES by entering PLU number. (e.g. 2)</p> <p>Then touch [PLU] key.</p>	
<p>2. Touch [PRICE % DISCOUNT] function key to entry price % discount screen</p>	
<p>3. Enter the value of Price % Discount e.g. : 20.00%</p> <p>Note1: Touch [ENTER] key to save the value and back to R-Mode.</p> <p>Note2: Touch [ESC] key to cancel operation.</p>	

OPERATION	DISPLAY
<p>4. Press [PRINT] key at keypad to issue a label (Manual and Prepack non-weight item) or printed label when weight stable (Prepack weight item).</p>	<p>The screenshot shows a digital display interface with a keypad. At the top, there are four large numerical displays: TARE (0.00), WEIGHT (0.00), UNIT PRICE (0.00), and TOTAL PRICE (0.00). Below these are smaller displays for 'kg' and '\$/kg'. The date and time '04.14.10 09:30' are shown in the top right. The keypad consists of several rows of buttons: <ul style="list-style-type: none"> Row 1: QUANTITY SYMBOL, Group #1 (08), PRICE % DISCOUNT, QUANTITY SYMBOL, QUANTITY SET, LOGIN, LOGOUT. Unit Price Discount Function Key

This function key is used to enter new Unit price discount for temporary and it will by pass the discount PLU that programmed in PLU Programming

Note: a) Prior to this operation, [UNIT PRICE DISCOUNT] Function should be assigned to Preset Key in advance (Please refer to [Function Key Assignment](#)),

b) This function is available for Label printing in Pre-pack Mode and MANUAL MODE,

Transaction example: Original Unit Price Discount for 1st limit is 2.00

OPERATION	DISPLAY
<p>1. At Normal Mode, call up PLU for DRAGON FRUITS by entering PLU number. (e.g. 4)</p> <p>Then touch [PLU] key.</p> <p>Note : Original Unit Price is 40.00/kg and put weight 0.126kg, the UP change to 38.00</p>	
<p>2. Touch [UNIT PRICE DISC] function key to entry Unit price discount screen</p>	
<p>3. Enter new Unit Price Discount e.g. : 1.00</p> <p>Note1: Touch [ENTER] key to save the value and back to R-Mode.</p> <p>Note2: Touch [ESC] key to cancel operation.</p>	

OPERATION	DISPLAY
<p>6. Press [PRINT] key at keypad to issue a label (Manual and Prepack non-weight item) or printed label when weight stable (Prepack weight item).</p>	<p>The screenshot shows a digital scale display with the following information:</p> <ul style="list-style-type: none"> TARE: 0.000 kg WEIGHT: 0.126 kg UNIT PRICE: 39.00 \$/kg TOTAL PRICE: 4.91 \$ Date/Time: 04.14.10 10:45 Item Name: DRAGON FRUITS Discount: SAVE 0.13 Grid of function buttons: <ul style="list-style-type: none"> QUANTITY SYMBOL, PRICE % DISCOUNT, QUANTITY SYMBOL, QUANTITY SET ADVERTISEMENT, PRICE DISCOUNT, UNIT PRICE DISC, UNIT PRICE % DISC, UNIT PRICE CHANGE REFUND, SHOP NAME, SUB TOTAL, GRAND TOTAL, PACK QUANTITY Navigation buttons: LOGIN, LOGOUT, VEGETABLES, Group #1, Group 2, PREV, NEXT, SARAH, SANDRA, PREPACK, MENU

Unit Price % Discount Function Key

This function key is used to enter new Unit price discount for temporary and it will by pass the discount PLU that programmed in PLU Programming.

Note: a) Prior to this operation, [UNIT PRICE DISCOUNT] Function should be assigned to Preset Key in advance (Please refer to [Function Key Assignment](#)),

b) This function is available for Label printing in Pre-pack Mode and MANUAL MODE,

Transaction example: Original Unit Price % Discount for 1st limit is 20.00%

OPERATION	DISPLAY
<p>1. At Normal Mode, call up PLU for GOLDEN DELICIOUS APPLE by entering PLU number. (e.g. 7)</p> <p>Then touch [PLU] key.</p> <p>Note : Original Unit Price is 17.00/kg and put weight 0.126kg, the UP change to 13.60</p>	
<p>2. Touch [UNIT PRICE DISC] function key to entry Unit price discount screen</p>	
<p>3. Enter new Unit Price % Discount e.g. : 50.00%</p> <p>Note1: Touch [ENTER] key to save the value and back to R-Mode.</p> <p>Note2: Touch [ESC] key to cancel operation.</p>	

OPERATION	DISPLAY
<p>6. Press [PRINT] key at keypad to issue a label (Manual and Prepack non-weight item) or printed label when weight stable (Prepack weight item).</p>	<p>The screenshot shows a digital scale display with the following information:</p> <ul style="list-style-type: none"> TARE: 0.000 kg WEIGHT: 0.126 kg UNIT PRICE: 8.50 \$/kg TOTAL PRICE: 1.07 \$ Date/Time: 04.14.10 11:13 Item Name: GOLDEN DELICIOUS APPLE Price: SAVE 1.07 Buttons: QUANTITY SYMBOL, PRICE % DISCOUNT, QUANTITY SET, LOGIN, LOGOUT, ADVERTISEMENT, PRICE DISCOUNT, UNIT PRICE DISC, UNIT PRICE % DISC, UNIT PRICE CHANGE, VEGETABLES, Group #1, Group #2, REFUND, SHOP NAME, SUB TOTAL, GRAND TOTAL, PACK QUANTITY, PREV, NEXT, SARAH, SANDRA, PREPACK, MENU.

Quantity Symbol Function Key

This function key is to select the Unit Symbol to be printed on Non-Weighing Item Label temporarily. If the PLU is called up again or a new PLU is called up, the Unit Symbol will return to the original one set in the PLU Programming Mode.

Note:

- a) Prior to this operation, **Quantity Symbol** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))
- b) This function is available for Non-Weighing of Label printing in Pre-pack Mode.

Transaction example: Original Quantity Symbol for Apple is PCS

OPERATION	DISPLAY
<p>1. At Normal Mode, call up PLU for GREEN APPLE by entering PLU number. (e.g. 10)</p> <p>Then touch [PLU] key.</p>	
<p>2. Touch [QUANTITY SYMBOL] Function key to enter to the Quantity Symbol screen.</p> <p>Note: Touch [ESC] key to cancel QUANTITY SYMBOL function.</p>	

OPERATION	DISPLAY
<p>3. Touch the desired key. (e.g. For).</p>	
<p>4. Press Print [*] Key to start issue a label.</p>	

Quantity Set Function Key

This function key is used to reset the Quantity value to be packed for Non-Weighing PLU temporarily printed on label. If the PLU is called up again or a new PLU is called up, the Quantity will return to the original one set in the PLU Programming Mode.

Note:

- a) Prior to this operation, **Quantity** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))
- b) This function is available for Non-Weighing of Label printing in Pre-pack Mode.

Transaction example: Original Quantity for Green Apple1 is 1

OPERATION	DISPLAY
<p>1. At Normal Mode, call up PLU for GREEN APPLE1 by entering PLU number. (e.g. 10)</p> <p>Then touch [PLU] key.</p>	
<p>2. Touch [QUANTITY SET] Function key to enter to the Quantity Symbol screen.</p> <p>Note: Touch [ESC] key to cancel SET QUANTITY function.</p>	

OPERATION	DISPLAY
<p>3. Enter the new quantity. (e.g. 5).</p>	
<p>4. Press Print [*] Key to start issue a label.</p> <p>Note : In Print out the quantity value will print 5</p>	

Unit Price Change Function Key

This function is used to change the Unit Price of PLU temporary. There are two ways to override Unit Price, using Function Key and entering the New Unit Price directly. If the PLU is called up again or a new PLU is called up, this function will be cancelled and the Unit Price will return to the original Unit Price in PLU Programming Mode.

Note: a) Prior to this operation, **Unit Price Change** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))

b) The method of direct entry is effective when SPEC141D001 “Unit Price Override” in User/Operation Spec is set to **Allow**.

c) This function is available for Label printing in Pre-pack Mode and Registration Mode.

Example: To call up PLU for LEMON (Initial Unit Price = \$33.33) and change it to \$20.00.

OPERATION	DISPLAY
<p>1. Call up PLU for LEMON by entering PLU number. (e.g. 3)</p> <p>Then press [PLU] key.</p>	<p>The screenshot shows a POS interface with a top status bar containing 'TARE', 'kg', 'WEIGHT', 'kg', 'UNIT PRICE', '\$/kg', and 'TOTAL PRICE', '\$'. Below this, the values are '0.000', '0.000', '33.33', and '0.00'. A date and time '04.14.10 12:26' is displayed. The main screen is titled 'LEMON' and features a grid of product buttons including BANANA, LEMON, DRAGON FRUITS, BEEF, GREEN APPLE1, and others. A 'BROWSE SEC KEY' button is highlighted.</p>
<p>2. Touch [PRICE CHANGE] Function key to enter to the Price Change screen e.g. : 20.00</p> <p>Note: Touch [ESC] key to cancel PRICE CHANGE function.</p>	<p>The screenshot shows the 'UNIT PRICE CHANGE' screen. The top status bar is identical to the previous screen. The main display area says 'UNIT PRICE CHANGE' and 'PLEASE ENTER UNIT PRICE'. A text input field contains the value '20.00'. There are 'ESC' and 'ENTER' buttons on the right side of the screen.</p>

OPERATION	DISPLAY
<p>3. Touch [ENTER] key.</p> <p>Note: Unit Price has been change from \$33.33 to \$20.00</p>	
<p>4. Place 0.126kg of Lemon on platter. And press [*] key to issue a label</p>	

Refund Function Key

This function key is used to clear the memory of the sales transaction customer has canceled after printing the total label or receipt. The canceled sales transaction data will be deleted from Report if Refund operation is executed.

Note:

- a) Prior to this operation, **Refund** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))
- b) This function is available for Label printing in Registration Mode only.

Example: A customer refunded 150g of GRANNY SMITH APPLE.

OPERATION	DISPLAY
<p>1. Call up PLU for GRANNY SMITH APPLE by entering PLU number. (e.g. 5)</p> <p>Then press [PLU] key.</p>	
<p>2. Touch [REFUND] Function key to enter to the Clerk selection screen.</p> <p>Enter item weight/Quantity value to be refund.</p> <p>Note1: Touch [ESC] key to cancel refund function. Note2: Enter Weight for Weight item, enter Quantity for Non-wt item</p>	

OPERATION	DISPLAY
<p>3. Touch [ENTER] key.</p>	
<p>4. Select the Clerk used.</p> <p>Note1: To issue a Receipt or Total Label for refund data must enter clerk.</p> <p>Note2: Touch [ESC] key to cancel Printing.</p>	
<p>5. Press Print [*] Key to issue a Receipt or Total Label.</p>	

Shop Name Function Key

This function is used to set new shop name printing in label only

Note:

- a) Prior to this operation, **Shop Name** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))
- b) Shop name should be programmed in advance. (Please refer to [SHOP NAME Programming](#))
- c) This function is available for Label printing in Pre-pack Mode and Registration Mode.
- d) Default shop name is set in User Spec setting spec “**141B010** Default Shop Name for label printing”

Transaction example: Default shop name in label is 01: My Mart and change to 02 “Mega Store”

OPERATION	DISPLAY
<p>1. Call up PLU for GRANNY SMITH APPLE by entering PLU number. (e.g. 5)</p> <p>Then press [PLU] key.</p>	
<p>2. Touch [SHOP NAME] Function key to select new shop name.</p> <p>Touch</p> <p>Note 1: If don't want to select new Shop Name for label print, touch [CANCEL]</p> <p>Note 2: Enter the number of shop name to browse more other shop name by touch [GO TO] key</p>	

OPERATION	DISPLAY
<p>3. Select a shop name by touch shop name desired. (e.g. 2)</p>	
<p>4. Place Granny Smith Apple to platter 0,126 Kg and press [*] key to print a label</p>	

Sub Total & Grand Total Function Key

[SUB TOTAL] function key is used to print Sub-Total label to indicate the total weight (Qty) of issued item labels and total price for same PLU. Sub-total label can only show the total data of the same PLU.

The Sub-total data will be clear in the following case,

- (1) The PLU is called up again or a new PLU is called up.
- (2) Press [SUB TOTAL] key to issue the Sub-total label.

[GRAND TOTAL] function key is used to print Grand-total label indicate the accumulation total weight (Qty) and total price calculated from several SUB-TOTAL for the same PLU. Grand –total label can only show the total data of the same PLU. If the PLU is called up again or a new PLU is called up, the Grand-total data will be cleared.

Note 1:

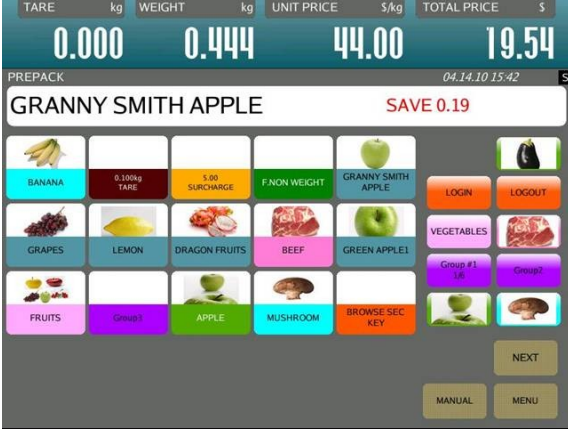

- a) Prior to this operation, **Sub Total** and **Grand Total** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))
- b) This function is effective in Pre-pack Mode only.
- c) This function is effective in Label.

Note 2:

- a) After Sub-Total is switched to Grand-Total Mode, the data for Sub-Total is cleared, and if new PLU is called up, all the old data for Sub-Total and Grand-Total will be cleared.

Example: To issue 20 labels for GRANNY SMITH LABEL (0.444kg), and print Sub-Total Label. Then, issue 10 more labels for GRANNY SMITH LABEL and print Grand-Total label. (Make sure Printer switch is set to LABEL).

OPERATION	DISPLAY
<p>1. At Pre-pack Mode, call up PLU of GRANNY SMITH LABEL (e.g. PLU # 5)</p>	

OPERATION	DISPLAY
<p>2. Place the product on the platter. (e.g. 0.444kg)</p> <p>Note: The label automatically issued after weight stable.</p>	
<p>3. Remove the product from platter and then place next pack of the product (e.g. 0.444kg) on platter to issue second label out.</p> <p>Note: Repeat the step to weighing the next pack, until the 20 packs are weighed.</p>	
<p>4. Press the assigned [SUB TOTAL] key to issue a Sub-Total label.</p>	

OPERATION	DISPLAY
<p>5. Remove the product from platter and then place next pack of the product (e.g. 1kg) on platter to issue second label out.</p> <p>Note: Repeat the step to weighing the next pack, until the 10 packs are weighed.</p>	
<p>6. Press the assigned [GRAND TOTAL] key to issue a Grand-Total label.</p> <p>Note: Press [CLEAR] key to clear the PLU data.</p>	

Pack Quantity Function Key

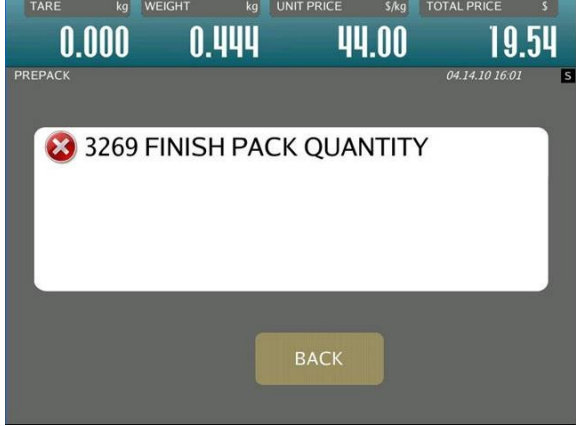

This function key is use to set the number of labels to be issued and print the setting number in Pre-pack Mode.

Note:

- a) Prior to this operation, **Pack Quantity** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))
- b) This function is available for Label printing in Prepack Mode only.

Example: To issue 10 labels for GRANNY SMITH LABEL (Make sure Printer switch is set to LABEL).

OPERATION	DISPLAY
<p>1. At Pre-pack Mode, call up PLU of BRUSSEL SPROUTS (e.g. PLU # 4)</p>	
<p>2. Press the assigned [PACK QUANTITY] key to enter Function Call Mode.</p> <p>Enter Pack Quantity by numeric key (e.g.10)</p> <p>Note: If you want to escape function call mode, press [CLEAR] key in tenkey.</p>	

OPERATION	DISPLAY
<p>3. Touch [ENTER] key.</p> <p>Then place the product on the platter. (e.g. 1kg)</p> <p>Note1: The Label automatically issued after weight stable.</p>	 
<p>4. When pack number reach 0 and try to print, it will appear error message</p>	

Price Markdown Function Key

This function key is used to get the desirable discounted total price temporarily by setting the fixed total price which is discounted from the original total price, when issuing item label, total label/receipt. If the PLU is called up again or a new PLU is called up, the function will be canceled. The formula is shown as follows.

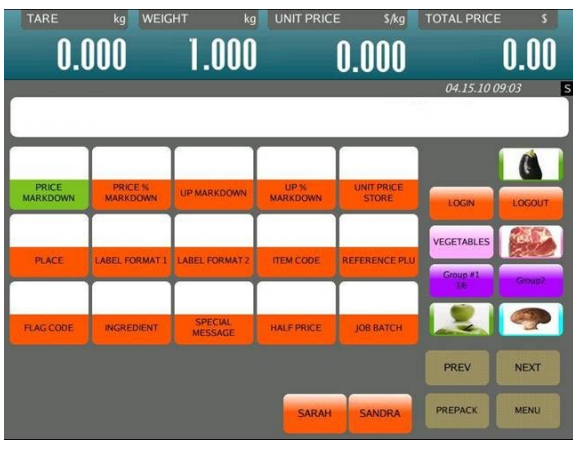

TOTAL PRICE AFTER DISCOUNT = NEWLY ENTERED DISCOUNT TOTAL PRICE.

Note:

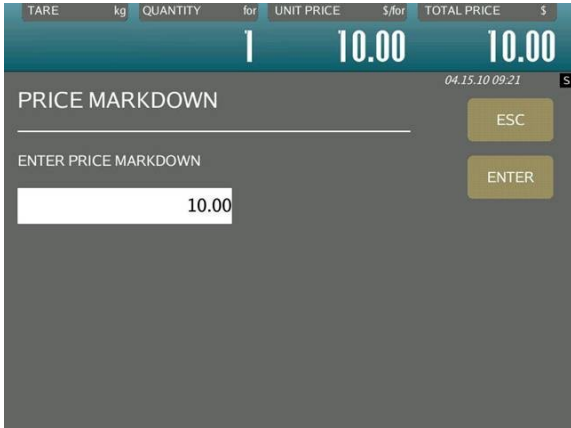

- a) Prior to this operation, **Price Markdown** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))
- b) This function is effective in Pre-pack Mode and Registration Mode.
- c) This function is effective in Label and Receipt operations.

1. Weighing Item

OPERATION	DISPLAY
<p>1. At Registration Mode, call up PLU of Lemon (e.g. PLU # 3)</p>	
<p>2. Press the assigned [PRICE MARKDOWN] key to enter Function Call Mode.</p> <p>Enter Markdown Price (e.g. \$30.00)</p> <p>Note: If you want to escape function call mode, press [CLEAR] key.</p>	

OPERATION	DISPLAY
<p>3. Touch [ENTER] key.</p> <p>Then place the product on the platter. (e.g. 1kg)</p>	
<p>4. Issue a label out.</p> <p>Note: Displayed Discounted value and then return back to main screen</p>	
<p>5. Then remove product from platter.</p>	

2. Non-Weighing Item

OPERATION	DISPLAY
<p>1. At Stand-by-Status, call up PLU of GRAPES (e.g. PLU # 2)</p>	
<p>2. Press the assigned [PRICE MARKDOWN] key to enter Function Call Mode.</p> <p>Enter Markdown Price (e.g. \$10.00)</p> <p>Note: If you want to escape function call mode, press [CLEAR] key.</p>	
<p>3. Touch [ENTER] key.</p> <p>Then enter sale quantity (e.g. 2)</p> <p>Note: Displayed Discounted value and then return back to main screen</p>	

OPERATION	DISPLAY
<p>4. Issue a label out.</p>	 <p>The screenshot shows a digital display interface with a dark background and various colored buttons. At the top, there are four large digital readouts: TARE (0.000 kg), WEIGHT (0.000 kg), UNIT PRICE (0.000 \$/kg), and TOTAL PRICE (0.00 \$). Below these is a date and time display: 04.15.10 09:03. The main area contains a grid of buttons: PRICE MARKDOWN (green), PRICE % MARKDOWN (orange), UP MARKDOWN (orange), UP % MARKDOWN (orange), UNIT PRICE STORE (orange), LOGIN (orange), LOGOUT (orange), PLACE (orange), LABEL FORMAT 1 (orange), LABEL FORMAT 2 (orange), ITEM CODE (orange), REFERENCE PLU (orange), VEGETABLES (purple), Group #1 (purple), Group #2 (purple), FLAG CODE (orange), INGREDIENT (orange), SPECIAL MESSAGE (orange), HALF PRICE (orange), JOB BATCH (orange), PREV (grey), NEXT (grey), SARAH (orange), SANDRA (orange), PREPACK (grey), and MENU (grey). There are also small icons for vegetables like eggplant, tomatoes, and mushrooms.</p>

Price % Markdown Function Key

This function key is used to get the desirable discounted total price temporarily by setting the fixed percentage of the original total price when issuing item label, total label or receipt. If the PLU is called up again or a new PLU is called up, this function will be canceled. The formula is shown as follows.

$$\text{TOTAL PRICE} = \text{ORIGINAL TOTAL PRICE} \times \text{DISCOUNTED \% VALUE.}$$

Note:

- a) Prior to this operation, **Price % Markdown** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))
- b) This function is effective in Pre-pack Mode and Registration Mode.
- c) This function is effective in Label and Receipt operations.

1. Weighing Item

OPERATION	DISPLAY
<p>1. At Pre-pack Mode, call up PLU of LEMON (e.g. PLU # 3)</p>	
<p>2. Press the assigned [PRICE % MARKDOWN] key to enter Function Call Mode.</p> <p>Enter Markdown Price (e.g. 90.00%)</p> <p>Note: If you want to escape function call mode, press [CLEAR] key.</p>	

OPERATION	DISPLAY
<p>3. Touch [ENTER] key. Then place the product on the platter. (e.g. 1kg)</p> <p>Note: 90.00% of price been markdown, and the balance 10% deducted from the Original Total Price with a message in RED “SAVE 3.33”.</p>	
<p>4. Press Print [*] Key to issue a Receipt or Total Label and remove product from platter.</p>	

2. Non-Weighing Item

OPERATION	DISPLAY
<p>1. At Stand-by-Status, call up PLU of GRAPES (e.g. PLU # 2)</p>	
<p>2. Press the assigned [PRICE % MARKDOWN] key to enter Function Call Mode.</p> <p>Enter Markdown Price (e.g. 33.33%)</p> <p>Note: If you want to escape function call mode, press [CLEAR] key.</p>	
<p>3. Touch [ENTER] key.</p> <p>Then enter sale quantity (e.g. 3)</p> <p>Note: 33.33.00% of price been markdown, and the balance 66.67% deducted from the Original Total Price with a message in RED "SAVE 20.00".</p>	

OPERATION	DISPLAY
<p>4. Press Print [*] Key to issue a Receipt or Total Label</p>	 <p>The screenshot shows a POS system interface with the following elements:</p> <ul style="list-style-type: none"> Top status bar: TARE kg, WEIGHT kg, UNIT PRICE \$/kg, TOTAL PRICE \$. Large numerical display: 0.000, 0.000, 0.00, 0.00. Navigation: Left arrow, Right arrow, Date/Time: 04.15.10 09:56, and a small 'S' icon. Function grid: <ul style="list-style-type: none"> Row 1: PRICE MARKDOWN, PRICE % MARKDOWN, UP MARKDOWN, UP % MARKDOWN, UNIT PRICE STORE, LOGIN, LOGOUT. Row 2: PLACE, LABEL FORMAT 1, LABEL FORMAT 2, ITEM CODE, REFERENCE PLU, VEGETABLES. Row 3: FLAG CODE, INGREDIENT, SPECIAL MESSAGE, HALF PRICE, JOB BATCH, Group #1, Group #2. Row 4: PREVIOUS, NEXT. Row 5: SARAH, SANDRA, PREPACK, MENU.

Unit Price Markdown Function Key

This function key is used to get the desirable discounted unit price temporarily by setting the fixed unit price that is discounted from the original unit price, when issuing item label, total label/receipt. If the PLU is called up again or a new PLU is called up, the function will be canceled. The formula is shown as follows.

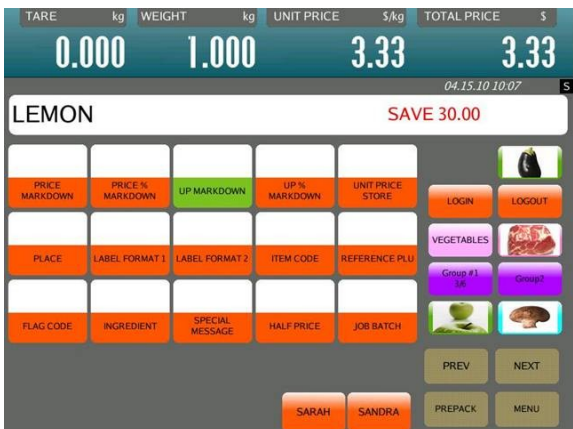

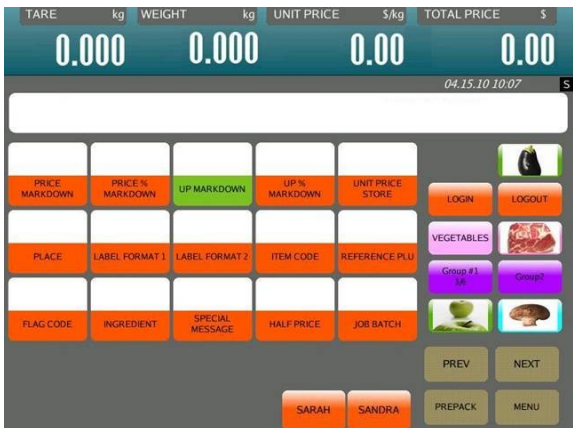

UNIT PRICE AFTER DISCOUNT = NEWLY ENTERED DISCOUNT UNIT PRICE

Note:

- a) Prior to this operation, **Unit Price Markdown** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))
- b) This function is effective in Pre-pack Mode and Registration Mode.
- c) This function is effective in Label and Receipt operations.

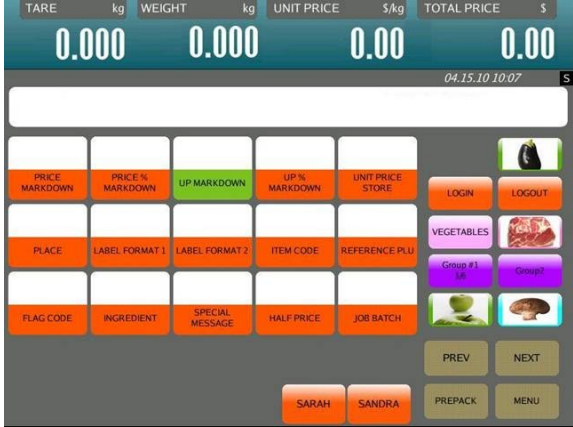

1. Weighing Item

OPERATION	DISPLAY
<p>1. At Pre-pack Mode, call up PLU of LEMON (e.g. PLU # 3)</p>	
<p>2. Press the assigned [UNIT PRICE MARKDOWN] key to enter Function Call Mode.</p> <p>Enter Markdown U.Price (e.g. \$3.33)</p> <p>Note: If you want to escape function call mode, press [CLEAR] key.</p>	

OPERATION	DISPLAY
<p>3. Touch [ENTER] key.</p> <p>Then place the product on the platter. (e.g. 1kg)</p> <p>Note: Original Unit Price will automatically changes to Unit Price After Discount (\$3.33).</p>	
<p>4. Press Print [*] Key to issue a Receipt or Total Label and remove product from platter.</p>	

2. Non-Weighing Item

OPERATION	DISPLAY
<p>1. At Stand-by-Status, call up PLU of GRAPES (e.g. PLU # 2)</p>	
<p>2. Press the assigned [UNIT PRICE MARKDOWN] key to enter Function Call Mode.</p> <p>Enter Markdown U.Price (e.g. \$6.00)</p> <p>Note: If you want to escape function call mode, press [CLEAR] key.</p>	
<p>3. Touch [ENTER] key.</p> <p>Then enter sale quantity (e.g. 3)</p> <p>Note: Original Unit Price will automatically changes to Unit Price After Discount (\$6.00).</p>	

OPERATION	DISPLAY
<p>4. Press Print [*] Key to issue a Receipt or Total Label</p>	 <p>The screenshot shows the POS system interface. At the top, there are four numerical fields: TARE (0.000), WEIGHT (0.000), UNIT PRICE (0.00), and TOTAL PRICE (0.00). The date and time '04.15.10 10:07' are displayed in the top right. Below these are several rows of menu items represented by buttons with icons and text labels. The labels include: PRICE MARKDOWN, PRICE % MARKDOWN, UP MARKDOWN, UP % MARKDOWN, UNIT PRICE STORE, LOGIN, LOGOUT, PLACE, LABEL FORMAT 1, LABEL FORMAT 2, ITEM CODE, REFERENCE PLU, VEGETABLES, Group #1, Group #2, FLAG CODE, INGREDIENT, SPECIAL MESSAGE, HALF PRICE, JOB BATCH, PREV, NEXT, SARAH, SANDRA, PREPACK, and MENU.</p>

Unit Price % Markdown Function Key

This function key is used to get the desirable discounted unit price temporarily by setting fixed percentage of origin unit price, when issuing item label, total label or receipt. If the PLU is called up again or a new PLU is called up, this function will be canceled.

The formula is shown as follows.

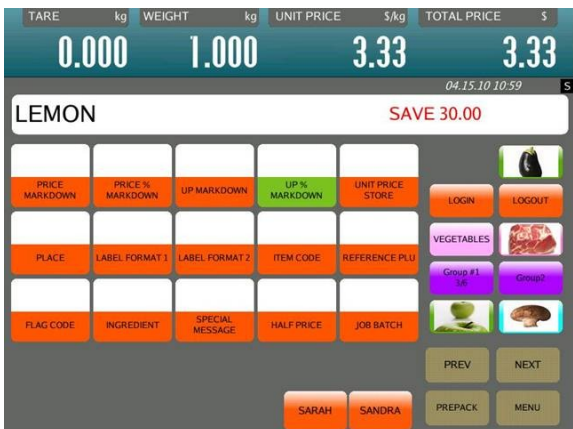

$$\text{UNIT PRICE AFTER DISCOUNT} = \text{ORIGINAL UNIT PRICE} \times \text{DISCOUNT \% VALUE}$$

Note:

- a) Prior to this operation, **Unit Price % Markdown** Function should be assigned to Preset Key in advance. (Please refer to [Function Key Assignment](#))
- b) This function is effective in Pre-pack Mode and Registration Mode.
- c) This function is effective in Label and Receipt operations.

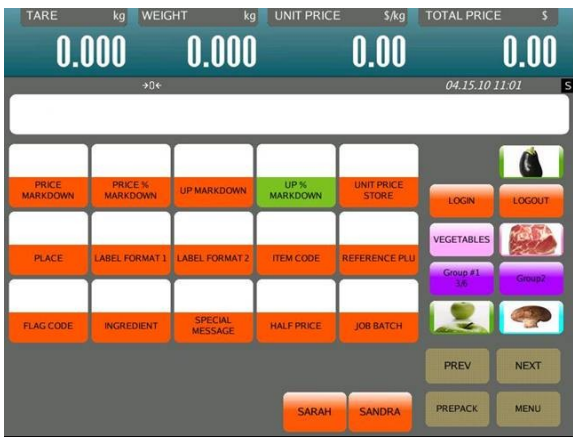

1. Weighing Item

OPERATION	DISPLAY
<p>1. At Pre-pack Mode, call up PLU of LEMON (e.g. PLU # 3)</p>	
<p>2. Press the assigned [UNIT PRICE % MARKDOWN] key to enter Function Call Mode.</p> <p>Enter Markdown U.Price (e.g. 10.00%)</p> <p>Note: If you want to escape function call mode, press [CLEAR] key.</p>	

OPERATION	DISPLAY
<p>3. Touch [ENTER] key.</p> <p>Then place the product on the platter. (e.g. 1kg)</p> <p>Note: Original Unit Price will automatically changes to Unit Price After Discount (\$3.33).</p>	
<p>4. Press Print [*] Key to issue a Receipt or Total Label and remove product from platter.</p>	

2. Non-Weighing Item

OPERATION	DISPLAY
<p>1. At Stand-by-Status, call up PLU of GRAPES (e.g. PLU # 2)</p>	
<p>2. Press the assigned [UNIT PRICE % MARKDOWN] key to enter Function Call Mode.</p> <p>Enter Markdown U.Price (e.g. 90.00%)</p> <p>Note: If you want to escape function call mode, press [CLEAR] key.</p>	
<p>3. Touch [ENTER] key.</p> <p>Then enter sale quantity (e.g. 3)</p> <p>Note: Original Unit Price will automatically changes to Unit Price After Discount (\$9.00).</p>	

OPERATION	DISPLAY
<p>4. Press Print [*] Key to issue a Receipt or Total Label</p>	 <p>The screenshot shows a digital display interface with the following elements:</p> <ul style="list-style-type: none"> Top status bar: TARE kg, WEIGHT kg, UNIT PRICE \$/kg, TOTAL PRICE \$. Large numerical readouts: 0.000, 0.000, 0.00, 0.00. Time and date: 04.15.10 11:01. Grid of function keys: <ul style="list-style-type: none"> PRICE MARKDOWN, PRICE % MARKDOWN, UP MARKDOWN, UP % MARKDOWN, UNIT PRICE STORE PLACE, LABEL FORMAT 1, LABEL FORMAT 2, ITEM CODE, REFERENCE PLU FLAG CODE, INGREDIENT, SPECIAL MESSAGE, HALF PRICE, JOB BATCH Navigation and menu keys: LOGIN, LOGOUT, VEGETABLES, Group #1, Group #2, PREV, NEXT, SARAH, SANDRA, PREPACK, MENU.

Unit Price Store Function Key

This function key is used to update PLU Unit price and store new PLU Unit Price to PLU programming

Example: Call PLU #3 LEMON with Unit Price \$33.33, then entry new Unit Price to 20.00 and touch [UNIT PRICE STORE] key, there is confirmation message whether to update or Not. If touch [YES] key it will save in PLU programming and when call again PLU#3 it will show new UNIT PRICE \$20.00

Note:

- a) This function is effective in Pre-pack Mode and Manual Mode.
- b) This function is effective in Weigh item and Non-Weigh item.

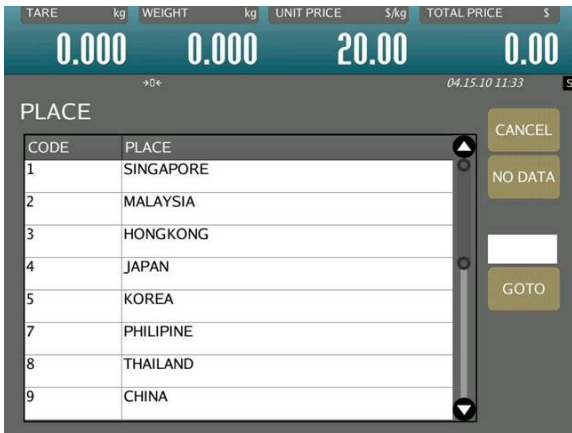

Place Function Key

This function key is used to select the desirable Place data to be printed on item label. If the PLU is called up again or a new PLU is called up, this function will be canceled. If the print area for Place is not programmed in the selected label format, Place data will be printed in the free room of 1st line of the Commodity Name print area.

Note:

- a) Prior to this operation, **PLACE** Function should be assigned to preset key in advance (Please refer to [Function Key Assignment](#)),
- b) This function is effective in PREPACK MODE and MANUAL MODE for label printing,
- c) The Place file has to be programmed in advance.

OPERATION	DISPLAY
<p>1. At Registration Mode, call up PLU for LEMON by entering PLU number (e.g. 2).</p> <p>Then touch [PLU] key.</p>	

OPERATION	DISPLAY
<p>2. Touch [PLACE] function key to enter Place list screen.</p> <p>Note1: Touch [NO DATA] key to clear selection.</p> <p>Note2: Touch [CANCEL] key to cancel operation.</p> <p>Note3: Touch [GOTO] key to search operation.</p>	 <p>The screenshot shows the 'PLACE' screen with a list of countries. The top bar displays TARE (kg) 0.000, WEIGHT (kg) 0.000, UNIT PRICE (\$/kg) 20.00, and TOTAL PRICE (\$) 0.00. The list includes: 1 SINGAPORE, 2 MALAYSIA, 3 HONGKONG, 4 JAPAN, 5 KOREA, 7 PHILIPINE, 8 THAILAND, 9 CHINA. Buttons for CANCEL, NO DATA, and GOTO are visible on the right.</p>
<p>3. Touch to desired place file to be used. And load the weight e.g. 1.000KG then press [*] key to print a label</p>	 <p>The screenshot shows the 'LEMON' screen with a grid of menu options. The top bar displays TARE (kg) 0.000, WEIGHT (kg) 1.000, UNIT PRICE (\$/kg) 20.00, and TOTAL PRICE (\$) 20.00. The menu includes: PRICE MARKDOWN, LABEL FORMAT 1, LABEL FORMAT 2, ITEM CODE, REFERENCE PLU, SPECIAL MESSAGE, and JOB BATCH. There are also buttons for LOGIN, LOGOUT, VEGETABLES, Group #1, Group #2, PREV, NEXT, SARAH, SANDRA, PREPACK, and MENU.</p>

Label Format 1 Function Key

This function key is used to select the right format to issue 1st Item Label. This function key cannot select the format for Total Label. If the PLU is called up again or a new PLU is called up, this function will be canceled and the 1st label format will return to the original one selected in the PLU File.

Note:

- a) Prior to this operation, **FREE FORMAT1** Function should be assigned to Preset key in advance (Please refer to [Function Key Assignment](#)),
- b) This function is effective in PREPACK MODE and MANUAL MODE for label printing,
- c) Only existing Free Format labels (F1 ~ F99) can be set in this function,
- d) Required to program in [Free Format Programming](#) in advanced.

OPERATION	DISPLAY												
<p>1. At Registration Mode, call up PLU for LEMON by entering PLU number (e.g. 2). Then touch [PLU] key.</p>													
<p>2. Touch [LABEL FORMAT1] function key to enter label format1 list screen (e.g. [LABEL FORMAT1]).</p>	<table border="1" style="margin-top: 10px;"> <thead> <tr> <th>CD</th> <th>FORMAT NAME</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>FOR1</td> </tr> <tr> <td>2</td> <td>F.NON WEIGHT</td> </tr> <tr> <td>3</td> <td>F.WEIGHT</td> </tr> <tr> <td>15</td> <td>FREE</td> </tr> <tr> <td>21</td> <td>FREE 23</td> </tr> </tbody> </table>	CD	FORMAT NAME	1	FOR1	2	F.NON WEIGHT	3	F.WEIGHT	15	FREE	21	FREE 23
CD	FORMAT NAME												
1	FOR1												
2	F.NON WEIGHT												
3	F.WEIGHT												
15	FREE												
21	FREE 23												

OPERATION	DISPLAY
<p>3. Touch desired label format1 file to be used.</p> <p>Load weight for weight item or enter quantity for non-weight item.</p>	
<p>4. Press [PRINT] key at keypad to issue a label.</p>	

Label Format 2 Function Key

This function key is used to select the right format to issue 2nd Item Label. This function key cannot select the format for Total Label. If the PLU is called up again or a new PLU is called up, this function will be canceled and the 2nd label format will return to the original one selected in the PLU File.

Note:

- a) Prior to this operation, **FREE FORMAT2** Function should be assigned to preset key in advance (Please refer to [Function Key Assignment](#)),
- b) This function is effective in **PREPACK MODE** and **MANUAL MODE** for label printing,
- c) Only existing Free Format labels (F1 ~ F99) can be set in this function.

OPERATION	DISPLAY
<p>1. At Registration Mode, call up PLU for BLACK CHICKEN by entering PLU number (e.g. 11).</p> <p>Then touch [PLU] key.</p>	
<p>2. Touch [LABEL FORMAT 2] function key to enter label format 2 list screen (e.g. FREE FORMAT #2).</p>	

OPERATION	DISPLAY
<p>3. Touch desired label format2 file to be used.</p> <p>Load weight for weight item or enter quantity for non-weight item.</p>	 <p>The screenshot shows a POS interface for 'LEMON'. At the top, there are four price fields: TARE (0.00), WEIGHT (1.00), UNIT PRICE (20.00), and TOTAL PRICE (20.00). Below these is a search bar containing 'LEMON'. The main area contains a grid of buttons: PRICE MARKDOWN, PRICE % MARKDOWN, UP MARKDOWN, UP % MARKDOWN, UNIT PRICE STORE, LOGIN, LOGOUT, PLACE, LABEL FORMAT 1, LABEL FORMAT 2 (highlighted in green), ITEM CODE, REFERENCE PLU, VEGETABLES, Group #1, Group #2, FLAG CODE, INGREDIENT, SPECIAL MESSAGE, HALF PRICE, JOB BATCH, PREV, NEXT, SARAH, SANDRA, PREPACK, and MENU.</p>
<p>4. Press [PRINT] key at keypad to issue a label.</p>	 <p>The screenshot shows the same POS interface for 'LEMON'. The price fields now show TARE (0.00), WEIGHT (1.00), UNIT PRICE (0.00), and TOTAL PRICE (0.00). The 'LABEL FORMAT 2' button remains highlighted in green. The rest of the interface is identical to the previous screenshot.</p>

Item Code Function Key

This function key is used to enter new item code for PLU and it for temporary only

For Example: In Item of GRAPES (PLU #2) programming file, the Item Code is set as 54321

- 1) At stand-by status, Call PLU #2 GRAPES,
- 2) Touch [ITEM CODE] key and enter new item code e.g. 12345.
- 3) Press [*] key to print a label, please see the barcode value, it already change to 12345

Reference PLU Function Key

This function key is used to called up a PLU is link to another PLU file in Registration Mode.

Note: The Reference PLU Number has to be programmed in [PLU Programming File](#) in advance.

For example: - In item of GRANNY SMITH APPLE (PLU No. 5) programming file, the Reference PLU Number is PLU No.10 GREEN APPLE1.

- 1) At Stand-by status, call up PLU of GRANNY SMITH APPLE (PLU No. 5)
- 2) Press the assigned [REFERENCE PLU] key to call up PLU# 10. and then continue desired operation (e.g. Load weight and print)

Note: If the Reference PLU Number is Not Exist, a message "PLU NOT EXIST" will appear when press the assigned [REFERENCE PLU] key.

Flag Code Function Key

This function key is used to enter new item code for PLU and it for temporary only

For Example: In Item of GRAPES (PLU #2) programming file, the Item Code is set as 21

- 1) At stand-by status, Call PLU #2 GRAPES,
- 2) Touch [FLAG CODE] key and enter new item code e.g. 55
- 3) Press [*] key to print a label, please see the barcode value, it already change to 55

Ingredient Function Key

This Function key is used to select another ingredient file that had programmed in advance

For Example:

1. At stand-by status, Call PLU #2 GRAPES,
2. Touch [INGREDIENT] key and Select the ingredient files
e.g. CD#1

- Note:**
1. [Print] Key is used to print ingredient only in label printing
 2. [ESC] key to cancel the selection and back to Registration Mode
 3. [SELECT] key to save the ingredient file that had selected
 4. [GO TO] key is used to search another selection of ingredient

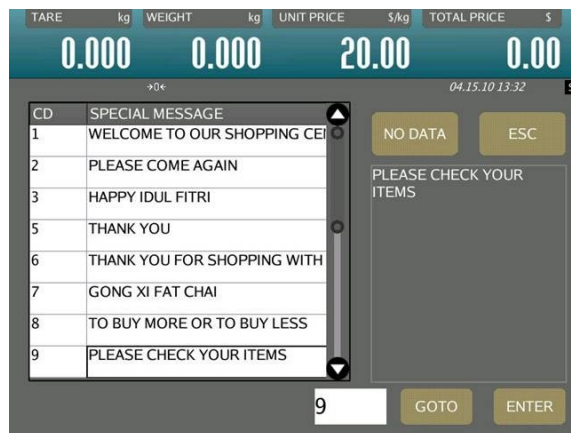

3. Press [SELECT] key to save the selection and it will back to Registration mode

Special Message Function Key

This Function key is used to select another Special Message file that had programmed in advance

For Example:

- 1) At stand-by status, Call PLU #3 LEMON,
- 2) Touch [SPECIAL MESSAGE] key and Select the Special message files e.g. CD#9

- Note:**
1. [NO DATA] Key is used to cancel the selection of Special Message
 2. [ESC] key to cancel the selection and back to Registration Mode
 3. [ENTER] key to save the Special Message file that had selected
 4. [GO TO] key is used to search another selection of Special Message

- 3) Press **[ENTER]** key to save the selection and it will back to Registration mode

Half Price Function Key

This function is used to change the Unit Price of PLU temporary to another unit price, with condition as below:

- a. With programmed 2nd Price
If at PLU programmed a value for 2nd Price, the unit price will display the 2nd price, when the key pressed.
- b. Without programmed 2nd Price
If at PLU not programmed value for 2nd price, unit price will display half of original unit price, when the key pressed.

Note:

- a) This function is effective in Pre-pack Mode and Manual Mode.
- b) This function is effective in Weigh item and Non-Weigh item.

Example1:

With programmed 2nd Price (To call up PLU for IRISH BACON (Initial Unit Price = \$18.00) and change it to 2nd price = \$5.00).

Note: The 2nd Price has to be programmed in [PLU Programming File](#) in advance.

OPERATION	DISPLAY
<p>1. Call up PLU for IRISH BACON by entering PLU number (e.g. 8).</p> <p>Then press [PLU] key.</p>	

OPERATION	DISPLAY
<p>2. Touch [HALF] Function key to change Unit Price to 2ND Price.</p>	

Example2:

Without Programmed 2nd Price (To call up PLU for MANGO(Initial Unit Price = \$19.00) and change it to half price \$8.50).

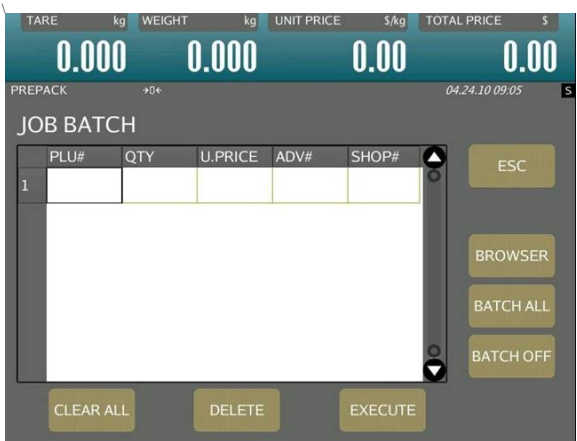

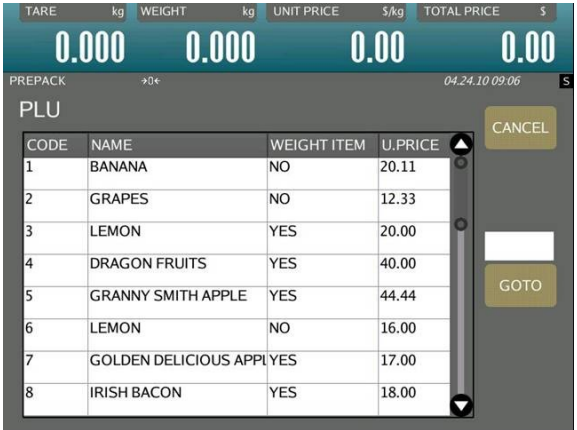

OPERATION	DISPLAY
<p>1. Call up PLU for BANANA by entering PLU number (e.g. 6).</p> <p>Then press [PLU] key.</p>	

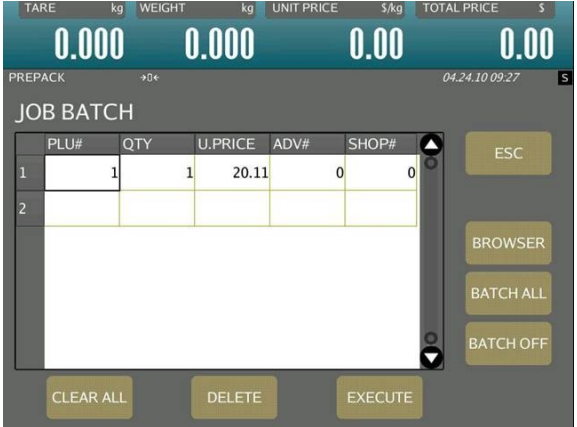

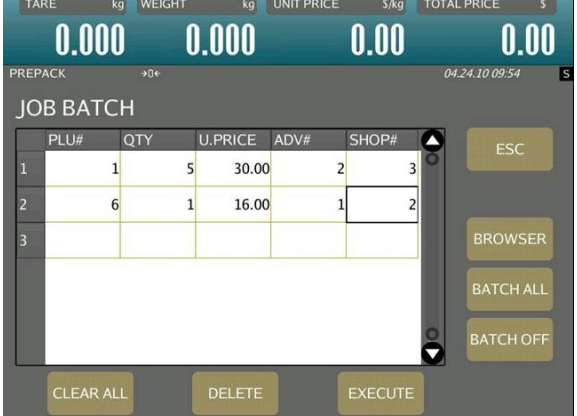

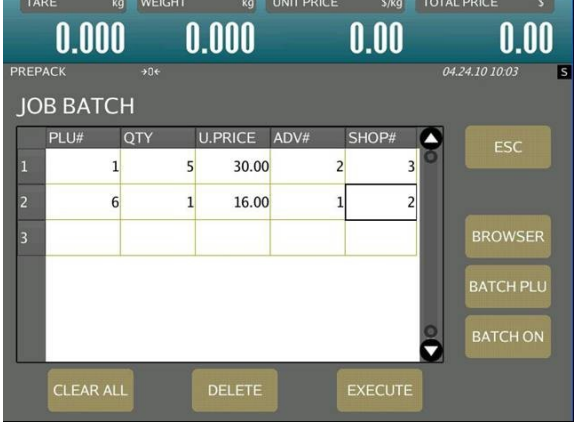

OPERATION	DISPLAY
<p>2. Touch [HALF] Function key to change Unit Price to the Half Price.</p>	<p>The top screenshot shows the display with the following data: TARE 0.000, WEIGHT 0.000, UNIT PRICE 9.50, TOTAL PRICE 0.00. A message box displays '1281 HALF PRICE ACTIVATED' and a 'BACK' button is visible below it.</p> <p>The bottom screenshot shows the main interface with 'MANGO' selected. The 'HALF PRICE' button is highlighted in green. Other buttons include PRICE MARKDOWN, PRICE % MARKDOWN, UP MARKDOWN, UP % MARKDOWN, UNIT PRICE STORE, LOGIN, LOGOUT, PLACE, LABEL FORMAT 1, LABEL FORMAT 2, ITEM CODE, REFERENCE PLU, VEGETABLES, Group #1, Group #2, FLAG CODE, INGREDIENT, SPECIAL MESSAGE, JOB BATCH, PREV, NEXT, SARAH, SANDRA, PREPACK, and MENU.</p>

Job Batch Function Key

This function key is used to print Batch PLU non weight item and should in Prepack mode

There are 2 way to execute the job batch, “Batch PLU” and “Batch All”. It also allow to change some field programming that programmed in Job batch function

OPERATION	DISPLAY
<p>1. In Registration Mode and Prepack mode, touch [JOB BATCH] key</p>	
<p>2. Touch [BROWSER] to select the PLU non weight item</p>	
<p>3. Select PLU 1 to by touching the code #1</p> <p>Note : [GOTO] is used to browse another PLU that</p>	

OPERATION	DISPLAY
<p>4. It allow to change all the field by entry the new value with ten key keyboard</p> <p>Note : For Adv# and Shop#, it can browse by touch adv# column then [BROWSER] key</p>	
<p>5. Add another PLU non Weight item by touch blank column and touch [BROWSER]</p>	
<p>6. Touch [BATCH ALL] key to change to [BATCH PLU] Touch [BATCH OFF] key to ON the Batch Job. The key will display [BATCH ON]</p> <p>Note : [CLEAR ALL] is used to clear all PLU list [DELETE] key is used to clear each PLU [ESC] key is used to quit from current page</p>	

OPERATION	DISPLAY
<p>7. Touch [EXECUTE] key to start the execution job batch and press [PRINT] key to start printing</p> <p>Note : If the selection BATCH PLU, after finish print 1st PLU it will stop printing and need to operator to press print key to continue print</p> <p>Batch ALL. After finish print 1st PLU it will automatically continue the 2nd PLU without press print key</p>	
<p>8. When finish to print all PLU it will display "JOB BATCH DONE"</p>	
<p>9. Press Clear Key in ten key keyboard to clear the PLU in Registration Mode</p>	

Open Cash Drawer Function Key

This function key is used to open the Cash Drawer with out Sales Transaction in Registration Mode and the opening count will updated to Clerk Report.

Steps:

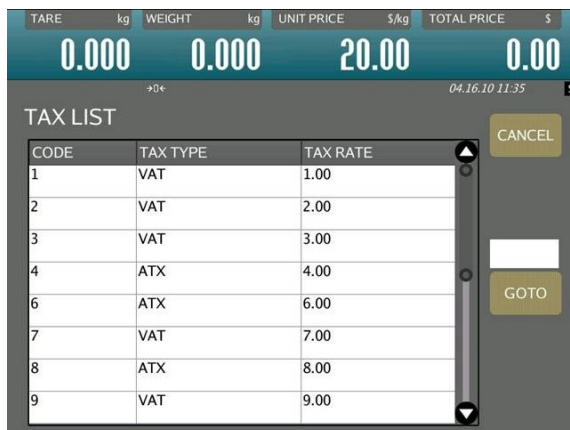

- 1) Touch the **[OPEN CASH DRAWER]** function key,
- 2) Then select Clerk and enter correct password for the clerk,
- 3) Then touch **[OK]** key, it will open cash drawer and also display report of date and time open on the screen.

Weight Check Function Key

This function key is used to enable or disable to weight checking

TAX Function Key

This function key is used to select all the tax type that had programmed in advanced For example: Call Up a PLU then Touch **[TAX]** key. It will show all Tax list

CODE	TAX TYPE	TAX RATE
1	VAT	1.00
2	VAT	2.00
3	VAT	3.00
4	ATX	4.00
6	ATX	6.00
7	VAT	7.00
8	ATX	8.00
9	VAT	9.00

Inventory Function Key

There are 5 types of Modes (**NORMAL SALES MODE, INVENTORY MODE, GARBAGE MODE, ORDERING MODE and RECEPTION MODE**) can be select by used this function key in Registration Mode.

When using Inventory Function, except Normal Mode, all the transactions data by CLERK Key will update to Inventory Report. When Select Modes, it will display on screen for currently running on which mode.

Note: Set SPEC 146A011 “Inventory/Garbage/Ordering/Reception” set to “Yes” in advance.

- a. Touch **[INVENTORY]** function key.
- b. Select a Mode and then do operation. **Example:** Call up PLU 1, then touch Clerk
- c. For Normal Mode it do accumulation, for other mode, it display Saved message (which saved into inventory report)

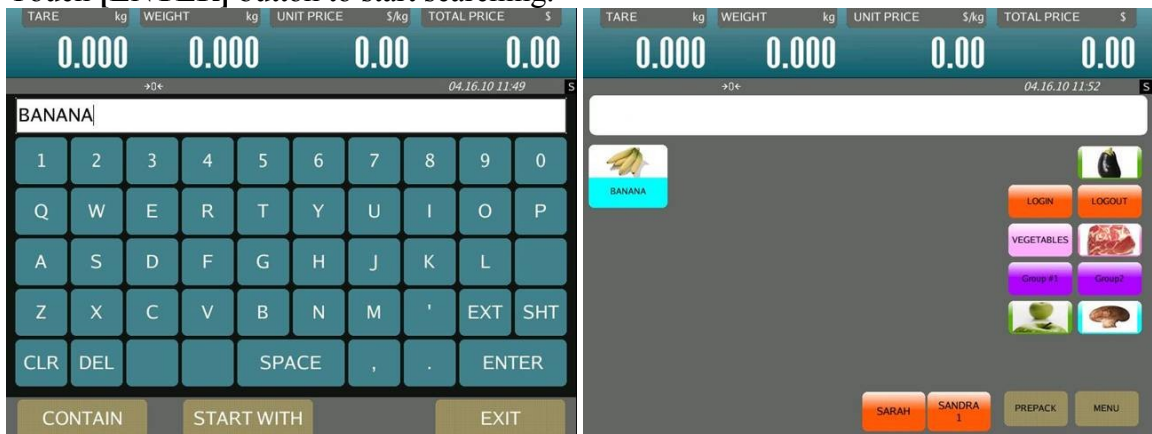

Date Print Function Key

This function key is used for to Printing or Not Print for date printing

Search Function Key

This function key is used to search item by name in the database. If searched item exist, it display on screen, if not display blank.

- 1) Touch **[Search]** Function Key,
- 2) Enter search data name using the [internal keyboard](#) screens.
- 3) Touch **[ENTER]** button to start searching.

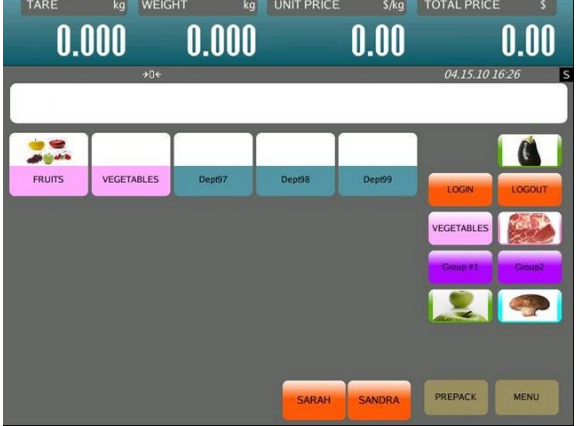

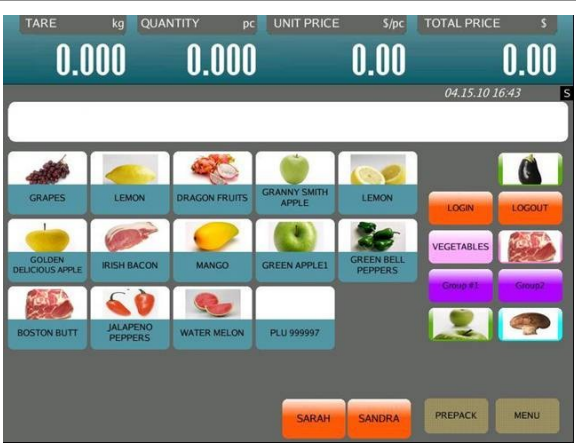

Note: **[Contain]** Key is to search item by entry any letter,
 E.g.: if entry letter A, it will show all Item Name that contain letter A
